Whenever any court remands a case to the Board for further proceedings, each of the parties shall, within 20 days of such remand, submit a report to the Board recommending procedures to be followed so as to comply with the court's order. The Board considers the reports and enters special orders governing the handling of the remanded case. To the extent the court's directive and time limitations permit, such orders conform to these rules.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 280 and 281

[FRL 3260-9]

Underground Storage Tanks; Technical Requirements, Financial Responsibility Requirements, and State Program Approval

AGENCY: Environmental Protection Agency (EPA).

ACTION: Supplement to proposed rule; request for comments.

SUMMARY: On April 17, 1987, the Environmental Protection Agency (EPA) proposed regulations (52 FR 12662, 12786, and 12853) for underground storage tank systems (USTs) containing petroleum or substances defined as hazardous under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended. Today the Agency is requesting comments on six issues not previously raised in the April 17 proposals: (1) The use of "static inventory control" to monitor used oil UST systems; (2) a list of substances that would be subject to the petroleum UST system standards, rather than the standards for hazardous substance UST systems, regardless of their relative concentrations; (3) alternative approaches to release monitoring of piping and tanks protected from external corrosion; (4) an approach to judging whether state requirements are "no less stringent" than the federal requirements; (5) additional decisionmaking authority for implementing agencies; and (6) the definition of flow-through process tank. Any comments in response to this notice will be considered by EPA in developing the final rule.

DATE: Comments must be received by January 22, 1988.

ADDRESSES: Send three copies of written comments to Docket Clerk, Office of Underground Storage Tanks (WH-562A), Docket No. UST 2-3 (used oil; the list of substances subject to petroleum UST system standards; and release detection) and UST 4-3 (state program issues), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460. Comments received by EPA and new information identified in today's notice may be inspected by appointment in Room LG-100, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC from 9:00 a.m. to 5:00 p.m., Monday through Friday, except legal holidays. Appointments can be made by calling (202) 475-9720.

FOR FURTHER INFORMATION CONTACT: RCRA/Superfund Hotline, (800) 424-9346; or in Washington, DC, (202) 382-3000.

SUPPLEMENTARY INFORMATION: The contents of today's preamble appear in the following outline:

I. Authority
II. Background
III. Used Oil Underground Storage Tanks
IV. List of Substances Subject to Petroleum UST Standards
V. Alternatives to Release Monitoring for Piping and Tanks Protected From External Corrosion
  A. Release Detection Variances for Protected Tanks
  B. Frequency of Release Detection for Protected Tanks
  C. Release Detection for Piping
VI. Identification of Federal Objectives for Use in Determining No Less Stringent State Programs
  A. Background
  B. Summary of Approaches to State Program Approval
  C. Federal Objectives
  D. Federal Objectives and No Less Stringent State Program Requirements
VII. Additional Decisionmaking Authority for Implementing Agencies
VIII. Alternative Definition of a Flow-Through Process Tank
IX. Notice of Availability

I. Authority

This supplemental notice is issued under the authority of sections 2002, 9001, 9002, 9003, 9004, 9005, 9006, 9007, and 9009 of the Solid Waste Disposal Act of 1970, as amended by the Resource Conservation and Recovery Act of 1976, as amended (42 U.S.C. 6912, 6991(a), 6991(b), 6991(c), 6991(d), 6991(e), 6991(f), 6991(g), 6991(h)).

II. Background

As a major section of the Hazardous and Solid Waste Amendments of 1984, Subtitle I provides for the development and implementation of a comprehensive regulatory program for underground storage tank (UST) systems. Under section 9003 of Subtitle I, EPA must promulgate regulations applicable to owners and operators of UST systems as necessary to protect human health and the environment. This section requires that EPA issue design, construction, installation, and compatibility performance standards for new tanks as well as requirements applicable to all tank owners and operators concerning leak detection, recordkeeping, reporting, closure, corrective action, and financial responsibility. Section 9004 requires EPA to authorize states to implement their own UST programs in lieu of the federal program if their requirements are "no less stringent" than EPA's and provide for adequate enforcement.

The April 17 proposed regulations were in three parts: UST technical requirements for petroleum and hazardous substances UST systems, financial responsibility for petroleum UST systems, and state program approval. Numerous issues were identified and discussed in the Preamble to the proposal. The public comment period ended on July 17 and the Agency is evaluating the numerous comments received in response to the proposal.

Since the proposal, the Agency has identified six additional areas about which it is now requesting public comment before finalizing the proposed rules. This notice identifies and addresses each of these additional areas and highlights several technical and policy questions about which EPA would like public comments and any relevant data that might guide EPA decisionmaking on the final rules. All data and responses to these questions, along with the comments already received on the proposal, will be carefully considered in developing the final rules. The final rules are expected to be promulgated next spring.

III. Used Oil Underground Storage Tanks

In the Preamble to the April 17, 1987 proposed regulations the Agency requested comments on its proposal to defer regulation of used oil tanks (52 FR 12889). Today the Agency seeks comment on allowable methods of release detection to be applied to such tanks if regulation is not deferred in the final rule.

Specifically, EPA is requesting comment on whether the final rules should include—for used oil USTs only—an alternative release detection method (referred to here as "static inventory control") in addition to those listed in § 280.41 of the proposed rule. Also, the Agency requests comment on allowing this alternative only for small used oil UST systems (e.g., less than 550 gallons or less than 1000 gallons). In a static inventory control test, the volume of oil in the tank is determined with a measuring stick. After an overnight or weekend period when no product is added to or taken from the tank, the volume of oil is measured again and the two readings are compared. The results of tests made over a period of time are averaged to determine if the tank has a leak.

Because of the way used oil is typically managed, the Agency believes that this release detection method may

be very practical and effective, particularly for use with small used oil USTs. These types of small USTs are often used for the periodic accumulation and storage of used oils at relatively low volumes of throughput. Such low-use storage practices appear to lend themselves to the static inventory method of detection.

In contrast, detection methods proposed for petroleum UST systems may not be practicable for small used oil USTs. For example, volumetric tank tightness testing techniques probably are not readily applicable for several reasons. Most of these test methods require measuring the temperature and coefficient of expansion of the substance stored. The coefficient of expansion is particularly difficult to establish for the heterogeneous used oils that are commonly stored in USTs before recycling. Thus, the only practical way to tightness test such tanks would be to clean them out and fill them with another substance (such as water).

The Agency is specifically requesting comments and relevant data on the following issues pertaining to used oil UST systems:

- The appropriateness of static inventory control for all used oil tanks, regardless of size;
- The appropriateness of allowing static inventory control only for small used oil tanks (e.g., less than 550 gallons or less than 1000 gallons);
- The frequency of static inventory control tests (e.g., daily, monthly, annually) and the minimum time frame for conducting tests (e.g., 24 hours, 36 hours).

The Agency is also requesting comments on whether there are other tanks containing substances other than used oil that may be sufficiently similar in physical properties (e.g., fuel oils 4, 5, and 6), and are managed in such a way that they should also be allowed to use a static inventory control method of release detection.

IV. List of Substances Subject to Petroleum UST Standards

The April 17 proposal would subject many owners and operators of UST systems containing hazardous substances to more stringent release detection requirements than owners and operators of UST systems containing petroleum. If the proposed rule were promulgated, owners and operators of hazardous substance UST systems would be required to use secondary containment with interstitial monitoring on those UST systems. A variety of other release detection options would be available to owners and operators of petroleum UST systems. EPA chose to propose the more stringent regulations for hazardous substance USTs because there is a lack of information demonstrating that alternative release detection methods could reliably detect releases of many hazardous substances.

Because hazardous substance UST systems would be regulated differently from petroleum USTs, EPA also proposed a method for determining when a mixture of petroleum and hazardous substances would be subject to the more stringent standards. EPA proposed that the regulation of mixtures of petroleum and hazardous substances be based on the relative concentrations of petroleum or hazardous substances in the mixture. For example, tanks containing mixtures in which petroleum comprised more than 50 percent of the weight or volume of the mixture would be regulated as petroleum USTs. Correspondingly, tanks containing hazardous substances whose weight or volume comprised more than 50 percent of the mixture would be regulated as hazardous substance tanks. EPA is concerned that the above approach may prove to be unworkable because of the difficulty of measuring concentrations and the uncertainty raised by constituents of petroleum that are also hazardous substances.

Therefore, the Agency is soliciting comment on whether, in the final rule, the Agency should identify a specific list of substances that would be subject to the petroleum UST system requirements regardless of the relative concentration of hazardous substances and petroleum within the substance listed. Under this approach, the definition of "petroleum tank systems" would be changed to include any tank system containing the substances listed. By contrast, "hazardous substance tank systems" would be defined as those USTs containing a substance or mixture of substances that is not found on this list and that also qualifies as a "regulated substance" under Subtitle I. Thus, petroleum substances not included on this list might be subject to hazardous substance tank requirements.

The Agency is seeking comment and data on the appropriateness of such an approach and the contents of the list. The list presently under consideration is set forth below. The Agency intends to develop a separate glossary that describes the chemical and physical properties, as well as the uses, of each of the substances identified in the list. This glossary is intended as a tool for owners and operators and implementing agencies to assist in the identification of petroleum substances and mixtures subject to the petroleum UST system regulations.

EPA's attempt to define the types of substances to be subject to the petroleum UST system standards is based on a review of information on the petroleum product refinery process. Refining is a complicated arrangement of processes and steps varying from simple distillation of crude petroleum to complex and expensive catalytic cracking. The primary purpose of refining is to separate crude oil into fractions or its individual constituents for direct use, for blending, or as feedstock for the synthesis of other chemicals. Some refinery operations are coupled with other petrochemical operations so that, in effect, numerous products such as plastics, alcohol, and fertilizers are derived from the original crude oil. The more detailed list limits the scope of the petroleum UST system regulations to those substances derived directly from the crude oil by the simple separation steps and excludes the numerous chemicals produced from these raw materials (some of which are addressed under the hazardous substances UST system requirements). EPA solicits comments on this approach.

Petroleum and petroleum products are complex mixtures of hydrocarbons. Some CERCLA hazardous substances are naturally present in crude oil. These substances can be separated from crude oil for direct use by consumers, or mixed with other fractions or substances. In the proposed list below, petroleum products containing hazardous substances that naturally occur in crude oil would be subject to the petroleum UST requirements. If these substances are in purified form, they would be subject to hazardous substance UST system requirements. For example, "gasoline" that contains benzene, a natural constituent of crude oil, would be considered a petroleum fraction and thus subject to regulations applicable to petroleum UST systems. When benzene, however, is stored in its pure form or mixed with other hazardous or non-petroleum substances, it would be considered a hazardous substance subject to the hazardous substance UST system regulations. Any UST containing a hazardous substance listed in CERCLA that has a petroleum product added to it, for example, as a solvent for the application or practical use of that hazardous substance, will be regulated as a hazardous substance UST. EPA requests comment on this approach to regulating mixtures of hazardous substances.

Petroleum products will undergo change in composition over time through

the introduction and substitution of various substances into the final product. For example, the octane enhancers in gasoline products have changed over the last several years and may continue to change in the future. By inclusion of the general product name on the list, the Agency intends to regulate as petroleum both current and future mixtures of the general product line, irrespective of changes in product composition. EPA solicits comments on this subject.

Some petroleum products can be derived from other materials such as coal, biomass, shale oil, plant extract, and organic waste. Because these products can be indistinguishable from crude-oil derived petroleum products, EPA would treat such a substance under the following list as if it were a petroleum fraction, and thus it would be subject to the petroleum UST rules.

The Agency solicits public comment on the applicability to all of the substances listed here of the proposed technical standards for petroleum UST systems, particularly the release detection methods described in Subpart D of the proposed rule.

Proposed List of Substances or Mixtures To Be Subject to the Petroleum UST Standards

Basic petroleum substances

Crude oils
Crude oil fractions
Petroleum feedstocks
Petroleum fractions

Motor gasolines

Leaded regular
Unleaded regular
Leaded premium
Unleaded premium
Gasohol

Aviation gasolines

Insulating and waterproofing materials

Transformer oils
Cable oils

Used Oils

V. Alternatives To Release Monitoring for Piping and Tanks Protected From External Corrosion

Since issuing the proposed UST Rule, EPA has performed additional analysis on the causes of UST system releases. A draft of the report *Causes of Release From UST Systems* and its supporting documents are now available in the Public Docket for review and comment. This draft report generally confirms the Agency's previous estimates used in preparing the proposed rulemaking concerning the total number of releases. The new data, however, show that releases from piping are much more common than tank releases. Also, the new data suggest that tank failure most often occurs due to corrosion of unprotected steel tanks over 10 years old and seldom occurs in tanks protected from external corrosion (though few of them have yet reached the end of their manufacturer-warrantied period—typically 20 to 30 years). For example, in one study of tank testing results, conducted primarily in Texas, approximately 30 percent of the UST systems were classified as not tight. Of that 30 percent, more of the systems had leaks from piping, vent lines or fittings than from tanks: 50 percent had leaks in the vent lines or tank fittings; 33 percent had product dispensing pipe leaks; and 17 percent had tank leaks. All of the tank leaks in this study were from unprotected steel tanks. These findings are typical of the new data collected.

Interviews with over 50 manufacturers, owners, installers, tank testers and regulators, on the other hand, have led EPA to conclude that tanks that are protected from external corrosion are unlikely to fail in their first 10 years. Of the nearly 200,000 fiberglass-reinforced plastic (FRP) tanks installed over the past 22 years, fewer than 1,000 of them have failed. Although some failures occurred when these tanks were first introduced, modification of installation practices and tank design has reduced the annual failure rate to less than 0.05 percent. The few that fail usually do so soon after installation as a result of improper installation.

Approximately 100,000 coated and cathodically protected tanks have been installed. Some are over 20 years old, although most have been installed in the last 5 years. Few failures have been recorded to date. None of these failures have resulted in a warranty claim. The failures were due to other causes, such as not following the manufacturer's installation or monitoring instructions. Cathodic protection technology has been successfully applied to many pipelines and other buried metal structures for over 30 years.

Approximately 30,000 composite tanks have been installed in the U.S. Tanks of this type have been in use for over 20 years without a single reported corrosion-related failure. The thick fiberglass coating on the tank exterior protects the steel shell from corrosion. This type of tank is widely used in Europe. The current manufacturing standards for these tanks are much more stringent than they were in the past. Although there is less historical performance data on composite tanks than on the other two tank types, EPA has confidence in their future performance.

Also in the April 17 proposal, EPA requested comments on the need for additional design and release monitoring requirements for pressurized piping and spill and overfill controls. These new data (including anecdotal evidence and numerous field observations) on causes of release have led EPA to consider whether there may be different ways of monitoring piping and protected tanks than those proposed on April 17. The new data suggests that new tanks are protected from the primary reason for failure (corrosion) and piping is the more common release source. Accordingly, the Agency requests comments on whether it should set more stringent detection requirements in the final rule for the piping (particularly pressurized delivery piping). In addition, EPA requests comments on whether it should allow alternative approaches or variances from the frequent-to-continuous monitoring that was proposed for the tank portion of a corrosion protected system.

A. Release Detection Variances for Protected Tanks

The first issue related to protected tanks for which EPA is requesting additional comment today is the use of variances to allow less frequent or alternative approaches to release detection of protected tanks in areas of lower risk (for example, at remote locations, in areas where the ground water is deep and not vulnerable to surface contamination, or in impermeable soil conditions that would prevent the movement of any release off the site). One alternative approach to release detection that might be allowed under such a variance could be periodic inspections and preventive maintenance of the interior of the protected tank. A variance allowing the use of such a method could be granted on a case-by-case basis by the implementing agency upon a demonstration that more frequent monitoring is unnecessary to protect human health and the environment. A variance could also be granted based on the site's location within an area that was previously classified as less vulnerable to contamination by the implementing agency.

In the April 17 proposal, EPA concluded that frequent-to-continuous release monitoring was necessary to minimize the adverse impacts of new tank system failures. This conclusion was based on the premise that rapid detection and prompt corrective action would control the extent of contamination and allow effective ground-water restoration. In lower risk areas, however, rapid release detection may not be necessary with protected tanks. A release from a protected tank will be a rare occurrence, and when it does occur it may not cause serious ground-water degradation in these lower risk areas even if it is not detected promptly.

EPA is requesting comment today on how such a variance should be structured. Specifically, what alternative release detection measures are appropriate and under what conditions should the alternatives be allowed?

The Agency requests comment on whether internal tank inspections and assessments are an appropriate alternative to release detection in lower risk areas and could be used to reliably detect early significant signs of degradation of a protected tanks' structure. Internal inspection and assessment appears to be preferred over release detection in much of Europe. Under this alternative approach for protected tanks, the Agency would require that the inspection be capable of detecting signs of internal corrosion, significant degradation of the interior or exterior surface, excessive deflection in the tank walls, and any other factors that could indicate an increased likelihood of failure. EPA requests comment on whether, if the failure mechanisms of protected tanks manifest themselves gradually, as is expected, periodic inspections (for example, at 5- or 10-year intervals) could identify these failures and allow an opportunity to take remedial steps that prevent further deterioration. The Agency also requests comment on whether infrequent release monitoring is appropriate in areas of lower risk. Several states and localities allow less frequent release monitoring than was suggested in the April 17 proposal. Testing could take place, for example, once a year, or once every five years in lower risk areas.

The second variance issue that EPA is requesting comment on today is under what conditions the above alternatives should be allowed. Should the EPA only allow this variance in Class III ground-water areas as defined in the Ground-Water Protection Strategy published by the Office of Ground-Water Protection? Could the variance be based on a site-specific determination of risk posed to human health and the environment? This determination could be based on consideration of ground-water use and vulnerability, proximity to surface waters and nearby inhabited structures, as well as other structures such as sewers. For example, the California UST program allows general variances that would enable the use of different methods of construction and monitoring state-wide, and site-specific variances whose issuance would be based on a consideration of environmental information at the particular site. Both types of variances must be found by the state to adequately protect the "soil and beneficial uses of waters within the state," according to the California state law. The Agency requests comment on this approach and how the appropriate release detection alternative could be chosen for a particular site or ground-water class area.

Specifically, EPA requests comment on the following: The need for release monitoring of protected tank's in lower risk areas; what failure mechanisms are expected or have been experienced with the different types of protected tanks, particularly if periodic internal inspections are conducted; industry field experiences with the detection of early signs of degradation of the tanks' structure by internal inspection, and the confidence associated with such assessment results; protocols that can be used for this internal inspection and assessment that will enable early identification of all types of failure mechanisms; the frequency at which the inspection should be performed; whether this approach can adequately protect human health and the environment; which failure modes detected during inspections can and cannot be reliably controlled or addressed by repairs; and information comparing the costs of this approach to the costs of the release detection methods under the April 17 proposal.

B. Frequency of Release Detection for Protected Tanks

The Agency is also requesting public comment on the appropriateness of allowing periodic rather than frequent-to-continuous release detection for protected tanks during the first 10 years of their use. A large number of non-leaking protected tanks currently in use are over ten years old, which has led EPA to believe that failures in tanks protected from external corrosion will be rare during the first ten years of use. Thus, EPA is considering allowing tightness testing of protected tanks every 3 or 5 years for the first ten years of their use. EPA requests comments on this approach.

Long-term failure rates for protected tanks, on the other hand, are still unknown. EPA is concerned that a higher rate of failure may occur later in the operational lives of protected tanks, for example, after 20 to 30 years of use. Such tanks today are typically only warrantied for 30 years by the manufacturer. Thus, EPA would require, at a minimum, frequent-to-continuous monitoring of protected tanks after the first ten years of their use. EPA requests comments on the need to also require the retirement of tanks whose warranties have expired or that have been in use for over thirty years.

C. Release Detection for Piping

With regard to the underground product delivery piping connected to the

tank, the Agency requests comments on the need to require more stringent release monitoring than was proposed on April 17. Recent data suggests piping is much more susceptible to failure than a protected tank because of its susceptibility to corrosion, improper installation, accidents, and environmental conditions (e.g., frost heaves or stresses due to heavy traffic loads). EPA requests comments on the following issues pertaining to delivery piping: Should EPA require the use of automatic detectors that restrict or shut off runaway releases for all pressurized piping? Should EPA also require periodic service or tightness tests to assure releases are minimized? What is the minimum time necessary for owners and operators to add these automatic detectors to existing pressurized piping? Should EPA require it to be installed within 1 or 2 years or when release detection for the tank is required? Should suction lines be periodically checked for tightness to assure leaks are discovered and addressed? At what frequency should suction and pressure line testing be performed?

With regard to release detection for pressurized piping, EPA has some new information that is available for public inspection in the Public Docket concerning methods that are currently being used within the petroleum industry. Many service stations are already equipped with mechanical pressure detectors that limit the flow of product when a leak is detected. Some major oil companies test pressurized lines annually, even when they are already equipped with this sort of continuous detector. EPA requests public comment on requiring the combination of mechanical pressure detectors and annual line testing.

In response to the April 17 proposed regulations, EPA received a report sponsored by the American Petroleum Institute entitled *Preliminary Report: A Leak Detection Performance Evaluation of Automatic Tank Systems and Product Line Detectors at Retail Facilities*. This new information is available for viewing in the public docket. It is the first attempt of which EPA is aware to independently evaluate vendor-claimed performance of some of the automatic line detectors. EPA requests public comment on this report. EPA also requests comments on several specific issues pertaining to these devices: Should EPA require automatic shutoff line leak detectors in the final rule? Should a performance standard be specified for this more sophisticated line detection technology? For example, should EPA require that these detectors perform with a probability of detection of 0.99, a probability of false alarm of 0.01, and a release rate of 0.1 gallons per hour?

As stated earlier, EPA now has data indicating that suction lines may pose significantly less of a threat to human health and the environment than pressurized lines. The Agency is aware of the availability of testing services that are presently used to test the integrity of suction lines. (Some information on this topic is now available for viewing in the public docket). Public comment and information is requested concerning these practices and the release detection performance and costs associated with such methods. Should the Agency allow the use of such methods alone for purposes of release detection on suction lines? Would conducting this type of test on a one- or three-year basis be adequate to protect human health and the environment at both new and existing tanks with suction lines? Between tests, will the owner or operator likely detect significant line leaks due to resulting operational problems with the pump?

VI. Identification of Federal Objectives for Use in Determining No Less Stringent State Programs

A. Background

Section 9004 of Subtitle I allows EPA to authorize states to operate their own program "in lieu of" the federal program if certain conditions are met. First, the state program must include requirements for each element in the federal program: Release detection, recordkeeping, reporting of releases, corrective action, closure of UST systems, new UST system performance, financial responsibility and notification. Second, the above requirements must be "no less stringent" than corresponding federal requirements. Finally, the state must provide for adequate enforcement of these requirements. Almost half of the states have recently developed and begun to implement their own comprehensive UST programs. EPA has encouraged these developments and believes that states must continue to have the flexibility to develop and carry out "homegrown" initiatives. EPA intends to establish an authorization process that will result in as little unnecessary disruption of these ongoing initiatives as possible. EPA believes that states should not have to go back and make revisions to their program to receive approval to operate "in lieu of" EPA requirements unless those revisions are necessary to protect human health and the environment.

This portion of today's notice seeks to expand and clarify the discussion of the "no less stringent" question and provide further details for public review and comment on how the Agency intends to implement its preferred approach to state program approval. In the April 17, 1987 proposed rule, EPA generally described three approaches that could be used to determine whether states are no less stringent. These three approaches are described in the following section. In addition, the Agency identified the general advantages and disadvantages of each approach but did not address the specific criteria it intended to use.

Today's notice presents the results of additional work on the no-less-stringent question. In the following sections, the Agency discusses a number of specific issues left unresolved in the proposed rule concerning "no less stringent," and solicits public review and comments on these issues. EPA will carefully consider all comments received in response to this notice, as well as the April 17 proposal, in developing the final rule for state program approval.

B. Summary of Approaches to State Program Approval

Section 9004(b)(1) of Subtitle I specifies that state programs must contain requirements that are no less stringent than the corresponding federal requirements in order to receive approval to operate in lieu of the federal program. In the Preamble to the April 17 proposal, EPA identified and solicited comments on the following three approaches to determining if state programs are no less stringent. The first approach was a holistic evaluation that would compare the overall stringency of the total state program to the total federal requirements. This approach would allow trade-offs between program elements; for example, balancing less stringent financial responsibility with more preventive tank system standards.

The second approach was an individual requirement-by-requirement comparison of specific state and federal requirements. This approach would require that all the federal requirements be matched by corresponding no less stringent state requirements for purposes of state program approval. This would tend to require state programs to have at least the same requirements as the federal program.

The third approach compared the overall technical program elements of the state program to the federal objectives for those elements. This approach would allow the consideration of trade-offs within technical elements.

The stringency of each state program element would be determined based on the likelihood of its performance in meeting the overall federal objectives for that element. As stated in the April 17 proposal, EPA prefers to use the third approach as the best combination of flexibility and implementability.

EPA does not believe that the specific federal requirements in the technical regulations provide the only definitive approach for protection of human health and the environment. In developing the federal requirements, EPA recognized that there could be other approaches that would meet EPA's overall performance objectives. The proposed technical standards are by necessity more detailed and specific than the objectives they are designed to meet because the federal regulations must be implemented by the regulated community as well as enforced by the implementing agency. Thus, the proposed requirements will protect human health and the environment, but they are not necessarily the only set of requirements that would do so. In many cases, the individual requirements set forth within the federal elements should not be interpreted to preclude states from developing other approaches that will still achieve the overall objectives of performance that the federal requirements are designed to achieve.

C. Federal Objectives

The April 17 proposal did not identify any of the federal objectives against which state program elements are to be compared under this preferred approach. Today's notice identifies these objectives and discusses them in detail in section VI.D.

These objectives represent the Agency's expectations of what will constitute an approvable state program. Federal objectives have been identified for the following program elements: (1) New UST systems (design, construction, installation and notification); (2) upgrading of existing UST systems; (3) general operating requirements; (4) release detection; (5) release reporting and investigation; (6) corrective action; (7) out-of-service or closed UST systems; and (8) financial responsibility. To satisfy the "no less stringent" requirement using this approach, the state must have requirements for all UST systems that meet the following objectives:

1. New UST System Design, Construction, Installation, and Notification

All new underground storage tanks, and the attached underground piping used to convey the regulated substance stored in the tank, must conform to the following:

- Be designed and constructed in a manner that will prevent releases for their operating life due to manufacturing defects, structural failure, or corrosion. (Note: Codes of practice developed by nationally-recognized organizations and national independent testing laboratories may be used to demonstrate that the state program requirements are no less stringent in this area.)
- Be installed in a manner that will prevent releases due to installation errors. (Note: Codes of practice developed by nationally-recognized organizations and manufacturers' instructions may be used to demonstrate that the state program requirements are no less stringent in this area.)
- All UST system owners and operators must notify the implementing state agency of the existence of any new UST system using a form designated by the state agency.

2. Upgrading Existing UST Systems

Existing UST systems must be upgraded to the new UST system standards within 10 years (by 1998). (The state may provide a demonstration in the state program approval application of how other state requirements will achieve this federal goal without an explicit 10-year deadline.)

3. General Operating Requirements

All new and existing UST systems must conform to the following:

- Be operated properly so that spills and overfills are prevented during product delivery;
- Be provided with equipment to prevent spills and overfills when new tanks are installed or existing tanks are upgraded. In lieu of such equipment, other state requirements on transporters must be provided to ensure that all spills and overfills are prevented during product delivery;
- Be operated and maintained to prevent releases due to corrosion for the operating life of the UST system if they have been equipped with corrosion protection;
- Be made or lined with materials that are compatible with the substance stored;
- At the time of upgrade or repair, be upgraded or repaired in a manner that will prevent releases due to structural failure or corrosion during their operating life;
- Have records of monitoring, testing, repairs, and closure maintained that are sufficient to demonstrate recent facility compliance status. These records must be made readily available when requested by the implementing agency.

4. Release Detection

All UST systems must be provided with release detection that conforms to the following:

- Is applied before all new UST systems begin to operate, and within five years after the effective date of the federal regulations at all other UST systems;
- Is sampled, tested, or checked for releases at all new UST systems at least once every 30 days, *except* that monthly inventory reconciliation (or its equivalent) can be used in combination with semi-annual testing of the tanks and their attached underground piping;
- Is sampled, tested, or checked for releases at all existing UST systems at least once every 30 days, *except* that monthly inventory reconciliation (or its equivalent) can be used in combination with tightness testing (every five years for tanks that are protected against corrosion, and every three years for tanks without protection) until [insert date 10 years from effective date]. After [insert date], release detection for existing UST systems must satisfy release detection requirements for new UST systems;
- Consists of a method, or combination of methods, capable of detecting a release of the regulated substance from any portion of the UST system before it migrates beyond the excavation area—as effectively as any of the methods allowed under the federal requirements—for as long as the UST system is in operation;
- Is designed, installed, operated and maintained so that releases will be detected;
- If the UST system is not provided with a continuous method of release detection, there must also be automatic detection and shutoff equipment on all of the UST's attached piping that conveys the regulated substance under greater than atmospheric pressure; and
- All new hazardous substance UST systems must use interstitial monitoring within secondary containment of the tanks and the attached underground piping that conveys the regulated substance stored in the tank, unless the owner and operator can demonstrate to the state (or the state otherwise determines) that another method will detect a release of the regulated substance in a manner no less stringent than other methods allowed under the state program.

VOL 52 ISS 246 DEC 23 1987 UMI

5. Release Reporting and Investigation

All UST system owners and operators must promptly investigate all suspected releases and report all underground releases that are confirmed, and any spills and overfills that are not contained and cleaned up.

6. Corrective Action

All releases from UST systems must conform with the following:

- Be promptly stopped when discovered;
- Be contained or otherwise have hazards mitigated through initial abatement activities;
- Be investigated to determine the extent of impacts on soil and ground water; and
- Be cleaned up through corrective action as necessary to protect human health and the environment.

7. Out-of-Service or Closed UST Systems

UST systems must conform with the following:

- Out-of-Service UST Systems. All new and upgraded UST systems temporarily taken out of service must continue normal operating requirements if regulated substances are stored in the tank;
- Closure of UST Systems. All tanks and piping must be closed in a manner that eliminates the potential for any future releases. The site must also be assessed to determine if there were any present or past releases, and if so, corrective action requirements must be complied with.

8. Financial Responsibility

The state requirements for financial responsibility for petroleum UST systems must assure that at least $1 million per occurrence is available for corrective action and third-party claims in a timely manner to protect human health and the environment.

States may allow the use of a wide variety of financial assurance mechanisms to meet this requirement. Each financial mechanism must meet the following criteria in order to be no less stringent than the federal requirements. The mechanism must: Be valid and enforceable; be issued by a provider that is qualified or licensed in the state; not permit cancellation without allowing the state to draw funds; ensure that funds will only and directly be used for corrective action and third party liability costs; and require that the provider notify the owner or operator of any circumstances that would impair or suspend coverage. States must require owners and operators to maintain records that demonstrate compliance with the state financial responsibility requirements, and these records must be made readily available when requested by the implementing agency.

D. Federal Objectives and No Less Stringent State Program Requirements

By identifying the federal objectives against which state program requirements will be compared, this notice provides significant new information concerning the Subtitle I state program approval process. Thus, EPA is today again soliciting public review and comments on the use of the element-by-element approach towards determining whether state program requirements are no less stringent than the federal requirements. In general, the Agency is interested in receiving comments on whether this approach will provide the level of flexibility that is needed for the Subtitle I approval process. Will state programs that have requirements meeting the federal objectives identified in the previous section of this notice be no less stringent in performance than the proposed federal requirements? Does this approach provide a clear and workable framework for readily and consistently approving acceptable state programs? Should the federal objectives be included in the final state program approval regulations? To what degree should state guidelines, procedures and statements of administrative policies be accepted by EPA as sufficient to assure that the federal objectives will be achieved by the state program? Should states be required to demonstrate that they can meet these objectives only through statutory authorities and regulations?

It is important to note that any changes made in the April 17, 1987 proposed technical regulations as the result of previously received public comments or data may result in some modifications to the federal objectives described today. For example, the Agency earlier requested and received comments on the feasibility of a class approach to regulation and whether secondary containment should be required at all USTs in sensitive ground-water areas. Therefore, if the Agency should decide on a class approach to the final technical rules, then the federal objectives would need to be modified.

The following sections describe the federal objectives in greater detail.

1. New UST System Design, Construction, Installation and Notification

EPA believes that new UST systems that are designed, constructed, and installed properly should prevent most future releases. An important federal objective is to have all new UST systems built and installed in accordance with current industry designs and practices. To achieve this objective, state requirements can incorporate these widely known codes and practices or adopt them by reference.

The federal objective for notification is that all UST system owners notify the implementing agency of the UST's existence, along with other statutorily required information. Section 9002(b)(2) of Subtitle I specifies the information that must be included in the notification for all USTs: The age, size, type, location and users of each tank. The Agency has already promulgated a form that may be used for existing and new tank system notifications. Many states, however, have designed their own forms to include additional data.

For existing USTs, this notification requirement has already been implemented nationally. Under Section 9002, all owners of existing and new UST systems were required to notify the designated state agency of the existence, age, use, etc. of their USTs. A few states chose not to designate a state agency and the notification forms for those states were accepted by the Regional EPA office. Because notifications of existing USTs have already taken place under existing federal authorities, states may be approved if they simply require owners and operators of *new* UST systems to notify the state agency. Only a few states do not already have the notification data for existing UST systems and that data may be collected from EPA.

2. Upgrading Existing UST Systems

An important objective in the federal program is to get the unprotected bare steel USTs in the nation either upgraded or replaced within 10 years. This required transition to protected tanks is expected to forestall and prevent numerous leaks that would otherwise occur in the future due to corrosion of bare steel UST systems.

Although this is an objective of the federal requirements that state programs must satisfy, EPA is aware of only one state (Florida) that has explicit requirements to upgrade existing UST systems within this 10-year period. The Agency intends to exercise some flexibility in determining whether the state program requirements are no less stringent in performance in achieving the federal objective. States that do not have an explicit 10-year deadline will be allowed to describe how other requirements are expected to achieve this objective without it. For example, EPA is aware of some existing state programs that, as a result of existing release detection requirements, will meet the objective, even without a deadline. In many of these states, initial reports are that numerous USTs have already been closed, upgraded or replaced. EPA intends to consider the potential impacts that such additional, more stringent, or faster-paced state requirements may have on reasonably achieving the same general objective of prompting most unprotected tanks to be closed, upgraded, or replaced by the time period established in the federal program.

3. General Operating Requirements

Prevention of releases through the proper operation and management of the UST system is an important objective of the federal requirements. Proper management approaches include the prevention of: Lapses in corrosion protection mechanisms; the introduction of any incompatible regulated substances into the tank system; tank overfilling and spills at the fill port; upgrades or repairs of USTs that do not follow acceptable practices; and inadequate recordkeeping that does not enable a demonstration of recent facility compliance. Improper operations will inevitably result in some releases into the environment; therefore, state-mandated operating requirements must be applicable to control the incidence of such releases.

The Agency is aware of some states that attempt to prevent spills and overfills by placing requirements on the transporters of the regulated substances. Because the transporter is the person who is most often responsible and present during the complete filling process, these programs try to control the behavior of a relatively few trained transporters, rather than a large number of tank owners and operators who are not always present when a tank is filled and who are not routinely trained in the proper way to fill a tank. Also, there is equipment (such as dry-disconnect couplings on delivery hoses) that can be used by transporters to prevent spills at tanks. Although EPA does not have authority to regulate transporters at the federal level, it is willing to consider approving state programs that demonstrate the use of such requirements in their applications for program approval as a no less stringent substitute for imposing requirements on the tank owners and operators. The Agency solicits comment on the appropriateness of allowing states to rely upon transporter requirements as a way of demonstrating achievement of this federal objective.

4. Release Detection

The detection of releases from new and existing USTs is an important objective in the federal requirements. The following discussion summarizes the five major aspects of this objective.

First, an approvable state program, at a minimum, would have to require that release detection be applied at all USTs as rapidly as scheduled in the proposed federal program (within 5 years). Although states would not have to follow the same approach towards phase-in as the federal program (all bare steel USTs within 3 years, the rest within 5 years), all USTs would have to be required to use some method of release detection within 5 years for the program to be determined no less stringent than this aspect of the federal program. For example, states could phase in release detection based on tank age, sensitive ground-water areas, or county by county as long as the schedule is completed within the 5-year period proposed for all USTs covered under the program. EPA is convinced that many releases will be detected the first time release detection is used on existing USTs. EPA requests comments on this approach to judging the stringency of state release detection requirements.

Second, EPA proposed new tank requirements that include immediate application of frequent-to-continuous monitoring or semi-annual tightness testing and inventory controls. This aspect of the federal release detection objective is aimed at avoiding the passing of lengthy periods of time before releases from new tank systems are discovered. If state programs are to be considered no less stringent, state requirements will have to detect new tank system releases within the same time frame set by the federal requirements.

Third, EPA's proposed release detection standards require that all methods, or combinations of methods, of detection be designed, installed, operated and maintained so that they are capable of detecting the releases from both the tanks and attached piping. EPA's proposed requirements specify general performance, and sometimes design, requirements for several different detection methods to assure they are used in ways that enhance detection of releases. Although approvable state programs do not have to mandate exactly the same requirements as the federal program, a state program must have requirements that assure a similar level of performance as the federally-allowed methods. For example, state ground-water monitoring wells located outside of the excavation area or at depths greater than 20 feet may be no less stringent if they are allowed to be used only in combination with other methods of detection or after an investigation by a qualified professional establishes an optimum location and depth that is suited to site conditions and assures rapid detection. EPA requests comments on the types of state requirements that should be accepted as no less stringent in assuring that this aspect of the federal release detection objective is met.

Fourth, EPA proposed that all new hazardous substance USTs be provided with interstitial monitoring, unless another release detection method can be demonstrated as reliable to the implementing agency. EPA believes states should also include this release detection requirement to be able to meet this aspect of the federal objective.

Fifth, the EPA proposal requires all existing USTs to be, at a minimum, tightness tested every 3 years if bare steel and every 5 years if protected from corrosion. For purposes of approving no less stringent state programs, this aspect of the federal release detection objective is that existing tank system owners and operators be required by the state to perform periodic tests of their USTs as frequently as would be required by the federal requirements until the system is upgraded or replaced and complies with the new tank standards. EPA requests comment on the appropriateness of approving state programs with detection requirements for existing tanks that differ in frequency from the federal requirements.

An additional question remains concerning the release detection objective. Earlier in this Notice, EPA discusses the possibility of including in the final technical rule a variance procedure for allowing owners and operators of petroleum USTs to use alternative release monitoring methods in lower risk areas. Such monitoring methods include internal tank inspections and preventive maintenance procedures or less frequent monitoring. If a variance is included in the federal technical requirements for release detection, this type of variance may also be allowed to be included in state requirements for release detection. To be no less stringent, the state may adopt a variance similar to the federal variance or may prospectively classify low risk locations. EPA requests comments on this approach and on whether a state variance can be

BEST COPY AVAILABLE

considered to be a "no less stringent" approach that meets the federal objective.

5. Release Reporting and Investigation

The proposal requires owners and operators of UST systems to promptly investigate suspected releases and report confirmed releases. For states to be determined no less stringent in this program element, they must require owners or operators to report or investigate when an UST system shows any indication that a release may be occurring or may have occurred. In addition, confirmation of underground releases must be reported by the owner and operator to ensure requirements for corrective action are met.

As an alternative to the reporting of all aboveground spills, the state may instead establish procedures that require immediate remedial action steps when a spill occurs. The Agency is aware that states have varying cutoff levels for the reporting of spills and overfills and, because reporting of spills is an administrative requirement, EPA believes that a state with higher reporting levels than required under the federal program may be approvable as long as containment and cleanup is required of unreported spills. The Agency requests comment on whether spilled product needs to be reported, even if the state requires prompt and complete investigation and cleanup, particularly of hazardous substance spills. For example, the Agency is aware of one state that requires all confirmed tank leaks to be reported, but spills and overfills of petroleum that are less than 100 gallons do not need to be reported because the immediate cleanup steps for such spills are already specifically prescribed in regulation. The Agency requests comment on whether this approach should be considered to be no less stringent than the federal requirements.

6. Corrective Action

Another objective of the federal requirements is that each site with a release be provided with corrective action as needed to protect human health and the environment. To determine whether the state program element will achieve this overall objective, the Agency intends to evaluate state corrective action requirements by looking at a few key aspects. First, will the state program require the release to be immediately stopped once it is discovered? Second, does the state program ensure that an identified release is contained and significant hazards rapidly mitigated (for example, is free product removed)? Third, will the state program cause adverse impacts to soil and ground water to be investigated, identified and cleaned up as necessary to protect human health and the environment? Finally, will the implementing agency have access to information necessary to establish and monitor the attainment of cleanup levels at the site?

As discussed in the Preamble to the April 17 proposal (52 FR 12751), the Agency's review of the experiences of several state and local cleanup programs indicates that no matter what approach is taken in their regulations, the actual work associated with cleanups in the field commonly translates into two stages: (1) Immediate abatement actions that are typically required at many sites (for example, free product removal), and (2) longer term corrective action associated with soils and ground-water. For purposes of state program approval, EPA does not believe that state requirements must be the same as proposed at the federal level. In fact, at present, most of the operating state and local programs appear to have much more general requirements than those proposed by EPA on April 17. Through numerous discussions with state officials, EPA has learned that these general mandates are supplemented by much more specific state policies, procedures and guidelines. Some states have also established state funding mechanisms that, in effect, place a significant part of the responsibility for cleanup activities with the state following a report by the owner or operator.

To meet this objective, EPA would allow states to demonstrate that they are no less stringent than corresponding federal corrective action requirements if they have requirements that at least mandate the four aspects of the federal objective described above. EPA solicits comments on the above approach, including whether the objective provides sufficient flexibility for States with varying, but protective, requirements; whether it is clear enough and implementable for program approval purposes; and whether it will ensure that only programs that are no less stringent will be approved. Comment is also solicited on whether states with even more general corrective action requirements (that do not explicitly mandate the four aspects of the federal objective discussed above) should be determined to be no less stringent if the state can demonstrate that the four aspects of the corrective action objective are implemented through written policies, guidelines and procedures.

7. Out-of-Service or Closed UST Systems

The federal objective for temporarily out-of-service UST systems is to ensure that the potential for releases from them is minimized through continuance of normal operating procedures. To meet this objective, temporarily closed UST systems containing product should continue release detection. Another approach would be simply to remove the product for the temporary closure period. For purposes of state program approval, if a state allows temporary closure, it must be able to hold the owner and operator responsible for the tank's management when the system is temporarily out-of-service and containing product. The Agency intends to be flexible concerning the specifics of what constitutes "normal operating procedures" for purposes of state program approval. To meet the federal objective, the state must at least continue to require release detection if product is stored in an out-of-service UST system.

The federal objective for the final closure of UST systems is to prevent all future releases and adverse environmental and public health impacts from closed systems. This is a very important objective because the Agency believes hundreds of thousands of UST systems will be closed over the next several years. The objective has two important aspects. First, all tanks and piping must be closed in a manner that eliminates the potential for any future releases from within the system. Second, the site must be assessed to determine if any past releases have occurred at that site that require corrective action. To meet this objective, the state will need to require the proper closure of UST systems by ensuring that all regulated substances are removed from the tank so that future releases are impossible. The state may choose to hold owners and operators responsible for using codes of practice developed by nationally-recognized organizations, or the state may specify the particular steps necessary for a proper closure. The state will also need to require that the assessment be reported and releases cleaned up. As part of the closure element, the state may require that the owner notify the state agency at closure. The Agency is aware that some agencies require notification before the closure takes place so that a state or local inspector may be present. Other states merely require notification after closure has occurred. For purposes of state program approval, prior reporting of closure is only required if the site

assessment reveals a past release and corrective action is necessary.

8. Financial Responsibility

An important objective of the federal program is that each UST system have adequate financial responsibility to undertake corrective action and meet third-party liability claims. The federal law generally mandates one million dollars as the minimum level of assurance needed for petroleum UST systems to demonstrate sufficient financial responsibility to meet cleanup and liability costs for a one time release. Aggregate levels are established by the proposed federal regulations for multi-tank owners. To meet these requirements, the federal program not only allows the use of a wide variety of mechanisms, but also allows the states to develop and allow their own financial mechanisms (for example, state trust funds). The federal program also allows combinations of mechanisms to be used. To help states determine whether their mechanisms are no less stringent than the federal requirements, we have established general criteria that are applicable to all financial mechanisms. These criteria follow from the federal objective that at least $1 million per occurrence is available for petroleum UST systems for corrective action and third-party liability claims in a timely manner to protect human health and the environment.

By establishing these criteria, we believe it is unnecessary to require the states to copy much of the direct requirements for each of the mechanisms affected by these criteria. For example, we would not specifically require the state to demonstrate that its regulations require a surety company to state in a bond that the bond cannot be cancelled during a 120-day period following notice of cancellation of the bond to the owner or operator. In order to fulfill the general criteria, the state must be able to draw on the funds assured by the bond before cancellation occurs. The state regulations must ensure that the time period before the effective cancellation of the bond provides ample opportunity for the state to assess the facility, determine if a release has occurred, and, if needed, draw funds from the instrument. In this way, the federal objective for financial responsibility is met.

VII. Additional Decisionmaking Authority for Implementing Agencies

As previously discussed, state programs must contain seven specific technical elements that are no less stringent than the corresponding federal requirements as well as notification requirements to be approved under section 9004. Instead of requiring a detailed line-by-line review and comparison of state requirements to federal requirements, EPA is presently considering the above "federal objective" approach to judging the stringency of state program elements.

Given the nature of the state program approval process, EPA believes that state program reviews will inevitably entail some line-by-line comparisons. Thus, even under the proposed flexible approach to approval, some state program reviews could still become inadvertently complicated and delayed by state program requirements that differ from those of the corresponding federal program.

To ensure that the approval process is flexibly implemented and is not unnecessarily delayed because of dissimilar state and federal administrative and procedural requirements, EPA today is requesting comment on providing additional flexibility to implementing agencies by changing several sections of the technical standards that were proposed on April 17, 1987. The purpose of these changes in the final rule would be to allow state implementing agencies to substitute their own procedural and administrative requirements for those set forth in the federal requirements.

The following is a list of the sections in the proposed technical standards and the added language. EPA requests comments on the need for these changes and whether similar types of changes to other sections of the proposed technical standards are appropriate:

Section	Additional language
Subpart B—New UST Systems:	
Section 280.20(a)(2)(i)	Adding "or according to guidelines established by the implementing agency" to the end of each paragraph.
Section 280.20(a)(2)(ii)	
Subpart C—General Operating Requirements:	
Section 280.30(b)(4)	Adding "or other equipment or procedures required by the implementing agency to be used at the site to assure spills and overfills are prevented" to the end of the paragraph.
Section 280.33(c)	Adding "or by personnel authorized by the implementing agency" to the end of the paragraph.
Section 280.34(b)	Adding "or in another reasonable time period established by the implementing agency" to the end of the paragraph.
Subpart D—Release Detection:	
Section 280.43(a)	Adding "or within another reasonable time period determined by the implementing agency" to the end of the paragraph.
Section 280.43(b)	
Section 280.43(c)	
Subpart E—Release Reporting and Investigation:	
Section 280.50(a)	Adding "or another reasonable period of time determined by the implementing agency" to the end of the paragraph.
Section 280.50(b)	Adding "or another reasonable amount specified by the implementing agency" after each phrase "25 gallons." Also adding "or within the time period established by the implementing agency" after "24 hours" every time it occurs.
Subpart F—Corrective Action for UST Systems Containing Petroleum:	
Section 280.61(a)(1)	Adding "or another reasonable period of time determined by the implementing agency" to the end of the paragraph.
Section 280.61(a)(5)	
Section 280.62(c)	
Section 280.65(a)(2)	Replacing the phrase "in excess of 25 gallons, or less than 25 gallons if" with the phrase "in excess of 25 gallons (or another amount determined by the implementing agency), or less than 25 gallons (or another amount determined by the implementing agency) if".
Subpart G—Corrective Action for UST Systems Containing Hazardous Substances:	
Section 280.74(b)	Adding "or another reasonable time period determined by the implementing agency" after "30 days".
Subpart H—Out-of-Service UST Systems and Closure:	
Section 280.80(d)	Adding "or another reasonable time period determined by the implementing agency" after "30 days".

The Agency also is considering changes to the proposed financial responsibility requirements for petroleum UST systems. The Agency solicits comments on the need for and appropriateness of adding the phrase "or another reasonable time period determined by the implementing agency" to the following subsections of the proposed financial responsibility rules:

Section 280.94(d)
Section 280.94(f)
Section 280.95(c)(3)
Section 280.95(c)(4)
Section 280.95(c)(5)
Section 280.96(c)(4)
Section 280.96(c)(5)
Section 280.96(c)(7)
Section 280.97(b)(1)2d
Section 280.97(b)(1)2e
Section 280.99(b)
Section 280.105(a)
Section 280.105(b)
Section 280.106(a)(2)
Section 280.106(a)(3)
Section 280.108(a)(1)(i)
Section 280.110(a)
Section 280.111(c)

VOL 52 ISS 246 DEC 23 1987 UMI

VOL 52 ISS 246 DEC 23 1987 UMI

VIII. Alternative Definition of a Flow-Through Process Tank

Another issue on which EPA is requesting additional comments today is the definition of flow-through process tanks. As described in the preamble to the proposed rule (52 FR 12892), Subtitle I of the 1984 RCRA Amendments expressly excludes "flow-through process" tanks. The Agency proposed to define this type of tank as one that "forms an integral part of an industrial or commercial process through which there is a steady or uninterrupted flow of materials during the operation of a process." The exclusion was not intended to apply to those tanks "used to store regulated substances prior to their introduction into the industrial or commercial process, or to store regulated substances as intermediates, by-products or finished products of the process."

EPA requests comments on the advisability of using alternative language to the proposed definition. In this alternative, "integral to a production process" would be substituted for "integral part of an industrial or commercial process." The Agency believes that this substitution would clarify the intent of the exclusion, making the regulation easier to implement.

IX. Notice of Availability

Reports, comments, and other information received and collected by EPA since the end of the comment period on the April 17 proposal are available for public inspection, by appointment, in the OUST Docket. The new information in these additional documents addresses subjects such as internal cathodic protection of oil storage tanks, exposure of fiberglass-reinforced plastic material to alcohol-gasoline mixtures, delineation of well water protection areas, and a summary of a meeting with representatives from state and local underground storage tank programs. EPA invites the public to view this new information and requests that any public comments on it be submitted to EPA on or before January 22, 1988. Please contact the Docket Clerk in the Office of Underground Storage Tanks (WH-562A), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460, (202) 475-9720, for an appointment.

List of Subjects in 40 CFR Parts 280 and 281

Administrative practice and procedure, Confidential business information, Hazardous materials, Reporting and recordkeeping requirements, Underground storage tanks, Water pollution control, Water supply.

Dated: December 15, 1987.

Lee M. Thomas,

Administrator.

Part V

Department of the Interior

Minerals Management Service

Outer Continental Shelf; Notice of Sale; Central Gulf of Mexico, Sulphur and Salt Lease Sale

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

Outer Continental Shelf (OCS)
Notice of Sale
Central Gulf of Mexico
Sulphur and Salt Lease Sale

PREAMBLE TO NOTICE OF SALE

By publication of the proposed Notice of Sale on September 10, 1987, the Department of the Interior provided the public and potential bidders the opportunity to review and comment on the terms and conditions of the proposed OCS sulphur and salt lease sale. All comments on the proposed Notice of Sale received by the Department were given careful consideration during the development of the final Notice of Sale. Some of these comments indicated an unfamiliarity with leasing or operating laws and regulations on the part of potential bidders while other comments requested that additional information be made available prior to the holding of the sale. The following discussion addresses these concerns.

(a) Operational Constraints

Concern was expressed that the adoption of the Information to Lessees (ITL) clause regarding operational constraints implied that oil and gas operations would be treated preferentially to sulphur operations. The operational constraints ITL clause was developed to address interference with established operations and concerns associated with subsidence caused by sulphur operations. It is not intended to confer preferential treatment on oil and gas operators, but simply to ensure that existing oil and gas operations are not adversely affected by sulphur operations. Sulphur lessees will be afforded similar protection from potential interference with their operations which could result from leasing in the future. Section 17(b) of the sulphur lease form reserves the right of the lessor to grant leases for any other minerals within an area leased for sulphur, "except that operations under such leases shall not unreasonably interfere with or endanger operations under this lease." Additionally, the Gulf of Mexico Regional Office of the Minerals Management Service (MMS) will make available to potential lessees information regarding existing oil and gas leases and operations on bidding units included in this sale to ensure that bidders are informed as fully as possible prior to the sale regarding potential constraints on sulphur operations. See paragraph 14(a) of the Notice.

The MMS is available to discuss with interested parties the issues of potential operational constraints and the applicability of operating regulations to sulphur operations. Contact Mr. Price McDonald, Chief, Offshore Rules and Operations Division, at (703) 648-7813 for information on this matter.

(b) Size of Bidding Units

Comments were received stating that the bidding units as configured in the proposed Notice of Sale (combinations of 1/4 blocks) do not coincide closely with the potential areal extent of sulphur deposits. Since this configuration could result in a potential lessee acquiring and holding "extraneous" acreage, commenters requested that bidding units be redefined to coincide more closely with the extent of sulphur deposits. Alternatively, commenters noted, provision should be made to allow acreage to be relinquished in 1/16-block increments.

The MMS currently lacks data on the exact outline of each prospect and has thus configured bidding units using the larger 1/4-block increments. However, existing regulations (30 CFR 256.76) allow unwanted acreage to be relinquished in 1/16-block increments after leases are awarded. Additional costs might be incurred by a potential lessee only for the first year's rental on portions of blocks which the lessee deems extraneous and wishes to relinquish.

(c) Archaeological Resources

Commenters requested that if MMS knows which bidding units may contain archaeological resources and where these resources are located within the unit, this information should be made available prior to the sale. They were concerned that compliance with the archaeological stipulation and procedures to protect archaeological sites may render a lease useless by precluding immediate development in the most desirable areas.

The MMS does not have sufficiently specific information regarding the presence, location, or characteristics of archaeological resources to indicate that deferral of any of the bidding units is warranted. Leasing of these units with the archaeological resources stipulation will provide for exploration and potential sulphur production while ensuring that adequate steps are taken to preserve archaeological resources. Of the 51 bidding units included in the sale, 12 have a low probability of archaeological resource occurrence and would not likely be subject to the survey requirement of the stipulation. These bidding units are 2, 9, 19, 37, 40, 42 through 46, 49, and 51. A portion of bidding unit number 48 (MPSE 295) also has a low probability of archaeological resource occurrence and would not require a survey. Portions of bidding units 7(EC 178 and 185N/2), 15(VR 226), and 39 (ST 160SW/4) have been cleared by previous archaeological surveys and would not require further surveys.

Three whole bidding units (1, 12, and 47) and portions of bidding units 3(EC 104), 11(VR 162), 14(VR 204NW/4), 16(SMI8), 20(EI 76), 21(EI 94; 110NW/4; 111N/2), 22(EI 116S/2; 129A), 25(EI 172), 26(EI 190; 191), and 29(EI 253N/2) have also had archaeological surveys. However, the results of surveys on these blocks indicate that potential lessees would be required to implement a mitigation plan prior to conducting exploration or development activities on certain portions of these blocks. A mitigation plan may involve the avoidance of a potential archaeological resource (indicated by

an anomaly or other information on an archaeological survey record) or the conduct of a more detailed survey to determine whether such a potential archaeological resource actually exists and whether a proposed operation could proceed without adversely affecting the resource.

The remaining whole and partial bidding units have not been surveyed. Archaeological surveys will be required of the lessee on these bidding units. These surveys will serve as the basis for determining whether mitigation plans will be required. Upon request by potential bidders, additional information regarding completed surveys and survey requirements will be made available by the Gulf of Mexico Regional Office prior to the lease sale. Such requests will be treated as proprietary to protect against disclosing information about the potential bidder's interest in specific areas. See paragraph 14(a) of the Notice.

(d) Sulphur and Salt Regulations

Commenters expressed concern about the current lack of separate regulations for sulphur operations. Sulphur leasehold activities in the OCS are currently managed by requiring compliance with the regulations in 30 CFR Part 250, OCS Order No. 10 for the Gulf of Mexico Region, and review of Exploration and Development and Production Plans on a case-by-case basis. This approach has been an effective means of providing for safety in operations and protection of the environment.

The MMS issued a notice of proposed rulemaking on March 18, 1986 (51 FR 9316), to consolidate, update, and restructure rules governing oil, gas, and sulphur operations in the OCS. All comments received regarding the proposed rulemaking, including concerns that sulphur operations should be covered by separate, specific regulations, have been considered in the development of final rulemaking. Final rules are anticipated to be published prior to the sulphur lease sale. Sulphur operations will continue to be managed by requiring compliance with OCS Order No. 10 and regulations in 30 CFR Part 250 until final rulemaking is, in fact, complete.

The MMS is available to discuss with interested parties the rulemaking process and to answer any questions regarding the applicability of existing regulations to sulphur operations. See paragraph (a) of this preamble.

(e) Royalty on Salt

In the proposed Notice, interested parties were invited to comment on an appropriate royalty rate for salt sold off lease. Comments ranged from precluding salt from being sold off lease--condition the leases so that salt could only be used in the sulphur production process on lease--to a nominal royalty rate. The Department has selected a royalty rate of 5 percent for salt taken off lease, consistent with the royalty rate charged for Federal salt leases issued in New Mexico in 1984 and in California in 1985. No royalty is charged for salt employed to produce sulphur on the lease. See paragraph 4 of this Notice.

THE NOTICE OF SALE FOLLOWS HEREWITH

4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE

Outer Continental Shelf
Notice of Sale
Central Gulf of Mexico
Sulphur and Salt Lease Sale

1. Authority. This Notice is published pursuant to the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1331-1356, (1982)), as amended by the OCS Lands Act Amendments of 1985 (100 Stat. 147), and the regulations issued thereunder (30 CFR Part 256).

2. Filing of Bids. Sealed bids will be received by the Regional Director (RD), Gulf of Mexico Region, Minerals Management Service (MMS), 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123-2394. Bids may be delivered in person to that address during normal business hours (8 a.m. to 4 p.m.) until the Bid Submission Deadline at 10 a.m., February 23, 1988. Hereinafter, all times cited in this Notice refer to Central Standard Time (c.s.t.) unless otherwise stated. Bids will not be accepted the day of Bid Opening, February 24, 1988. Bids received by the RD later than the time and date specified above will be returned unopened to the bidders. Bids may not be modified unless written modification is received by the RD prior to 10 a.m., February 23, 1988. Bids may not be withdrawn unless written withdrawal is received by the RD prior to 8:30 a.m., February 24, 1988. Bid Opening Time will be 9 a.m., February 24, 1988, at the Gulf of Mexico Regional Office, First Floor Conference Room (Room 101), 1201 Elmwood Park Boulevard, New Orleans, Louisiana. All bids must be submitted and will be considered in accordance with applicable regulations, including 30 CFR Part 256.

3. Method of Bidding. A separate bid in a sealed envelope labeled "Sealed Bid for Sulphur and Salt Lease Sale (bidding unit number, map number, map name, and block number(s)), not to be opened until 9 a.m., c.s.t., February 24, 1988," must be submitted for each prescribed bidding unit bid upon. It is recommended that all numbers of blocks and applicable portions (as described in paragraph 12) comprising the bidding unit appear on the sealed envelope. A bid form for this sale is available from the Gulf of Mexico Regional Office as provided in paragraph 14(a). In addition, the total amount bid must be in whole dollar amounts (no cents). Bidders must submit with each bid one-fifth of the cash bonus, in cash or by cashier's check, bank draft, or certified check, payable to the order of the U.S. Department of the Interior--Minerals Management Service. No bid for less than all of any bidding unit as described in paragraph 12 will be considered.

All documents must be executed in conformance with signatory authorizations on file. Partnerships also need to submit or have on file in the Gulf of Mexico Regional Office a list of signatories authorized to bind the partnership. Bidders submitting joint bids must state on the bid form the proportionate interest of each participating bidder in percent to a maximum of five decimal places after the decimal point, e.g., 50.12345 percent. Other documents may be required of bidders under 30 CFR 256.46. Bidders are warned against violation of 18 U.S.C. 1860, prohibiting unlawful combination or intimidation of bidders.

4. Bidding Systems. All bids submitted at this sale must provide for a cash bonus in the amount of $144,000 or more per bidding unit. All leases awarded will provide for a yearly rental payment of $3 per acre or fraction thereof. All leases will provide for a minimum royalty of $3 per acre or fraction thereof. A cash bonus/fixed royalty bidding system with a sulphur royalty rate of 12-1/2 percent at the mine will be employed on all bidding units offered in this sale. No royalty will be collected on salt used for operations or production purposes on the lease itself. A royalty rate of 5 percent at the mine applicable to salt produced for offsite usage will be employed on all bidding units offered in this sale.

5. Equal Opportunity. Each bidder must have submitted by the Bid Submission Deadline stated in paragraph 2, the certification required by 41 CFR 60-1.7(b) and Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375 of October 13, 1967, on the Compliance Report Certification Form, Form MMS-2033 (June 1985), and the Affirmative Action Representation Form, Form MMS-2032 (June 1985). See paragraph 14(d).

6. Bid Opening. Bid opening will begin at the Bid Opening Time stated in paragraph 2. The opening of the bids is for the sole purpose of publicly announcing bids received, and no bids will be accepted or rejected at that time. If the Department is prohibited for any reason from opening any bid before midnight on the day of Bid Opening, that bid will be returned unopened to the bidder as soon thereafter as possible.

7. Deposit of Payment. Any cash, cashier's checks, certified checks, or bank drafts submitted with a bid may be deposited by the Government in an interest bearing account in the U.S. Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bid on behalf of the United States.

8. Withdrawal of Bidding Units or Portions Thereof. The United States reserves the right to withdraw any bidding unit or portion thereof from this sale prior to issuance of a written acceptance of a bid for the bidding unit.

9. Acceptance, Rejection, or Return of Bids. The United States reserves the right to reject any and all bids. In any case, no bid will be accepted, and no lease for any bidding unit will be awarded to any bidder, unless:

(a) the bidder has complied with all requirements of this Notice and applicable regulations;

(b) the bid is the highest valid bid; and

(c) the amount of the bid has been determined to be adequate by the authorized officer.

No bonus bid will be considered for acceptance unless it provides for a cash bonus in the amount of $144,000 or more per bidding unit. Any bid submitted which does not conform to the requirements of this Notice, the OCS Lands Act, as amended, and applicable regulations may be returned to the person submitting that bid by the RD and not considered for acceptance. Bid adequacy guidelines are available from the Gulf of Mexico Regional Office. See paragraph 14(a).

10. Successful Bidders. Each person who has submitted a bid accepted by the authorized officer will be required to execute copies of the lease, pay the balance of the cash bonus bid together with the first year's annual rental as specified below, and satisfy the bonding requirements of 30 CFR 256, Subpart I. Successful bidders are required to submit the balance of the bonus and the first year's annual rental payment, for each lease issued, by electronic funds transfer in accordance with the requirements of 30 CFR 218.155.

11. Leasing Maps and Official Protraction Diagrams. Most of the bidding units offered for lease may be located on the Outer Continental Shelf Leasing Maps—Louisiana Nos. 1 through 12. This is a set of 27 maps which sells for $17 and which may be purchased from the Gulf of Mexico Regional Office (see paragraph 14(a)). Two of the bidding units contain blocks which are located on the Official Protraction Diagram NH 16-10, Mississippi Canyon (revised December 2, 1976). This map sells for $2 and also may be purchased from the Regional Office.

12. Description of the Areas Offered for Bids. The sale will include 51 bidding units as tabulated on the following page. Bidding units are based upon the MMS geologic outline of potential sulphur deposits and are formed by combining several quarter-blocks. The tabulation contains the bidding units offered in this sale as well as their block composition and acreage. The map abbreviations used therein and their associated map names are:

13. Lease Terms and Stipulations.

(a) Leases resulting from this sale will have a primary lease term of 10 years with the condition that the lease may be cancelled after 5 years, following notice pursuant to the OCS Lands Act, if drilling of an exploratory well has not been commenced or if the well has not been drilled in conformance with the approved exploration plan criteria or if there is not a suspension of operations in effect. Leases will be on Form MMS-2006 (December 1987). A copy of this lease form is reproduced at the end of this Notice. Additional copies may be obtained from the Gulf of Mexico Regional Office. See paragraph 14(a).

(b) The stipulations to be applied are as described in the following paragraphs:

Stipulation No. 1—Protection of Archaeological Resources.

(This stipulation applies to all bidding units leased in this sale.)

(1) "Archaeological resource" means any prehistoric or historic district, site, building, structure, or object (including shipwrecks); such term includes artifacts, records, and remains which are related to such a district, site, building, structure, or object (Section 301(5), National Historic Preservation Act, as amended, 16 U.S.C. 470w(5)). "Operations" means any drilling, mining, or construction or placement of any structure for exploration, development, or production of the lease.

(2) If the Regional Director (RD) believes an archaeological resource may exist in the lease area, the RD will notify the lessee in writing. The lessee shall then comply with subparagraphs (a) through (c).

(a) Prior to commencing any operations, the lessee shall prepare a report, as specified by the RD, to determine the potential existence of any archaeological resource that may be affected by operations. The report, prepared by an archaeologist and a geophysicist, shall be based on an assessment of data from remote-sensing surveys and of other pertinent archaeological and environmental information. The lessee shall submit this report to the RD for review.

(b) If the evidence suggests that an archaeological resource may be present, the lessee shall either:

(i) Locate the site of any operation so as not to adversely affect the area where the archaeological resource may be; or

(ii) Establish to the satisfaction of the RD that an archaeological resource does not exist or will not be adversely affected by operations. This shall be done by further archaeological investigation, conducted by an archaeologist and a geophysicist, using survey equipment and techniques deemed necessary by the RD. A report on the investigation shall be submitted to the RD for review.

(c) If the RD determines that an archaeological resource is likely to be present in the lease area and may be adversely affected by operations, the RD will notify the lessee immediately. The lessee shall take no action that may adversely affect the archaeological resource until the RD has told the lessee how to protect it.

(3) If the lessee discovers any archaeological resource while conducting operations on the lease area, the lessee shall report the discovery immediately to the RD. The lessee shall make every reasonable effort to preserve the archaeological resource until the RD has told the lessee how to protect it.

Stipulation No. 2—Military Areas.

(This stipulation applies only to Bidding Unit No. 49, i.e. Main Pass South and East Addition Block 289, which is located in the Eglin Water Test Area 1 (EWTA-1), an area used by the U.S. Air Force for rocket and missile testing. This bidding unit is located on the western boundary of EWTA-1.)

(a) Hold and Save Harmless

Whether compensation for such damage or injury might be due under a theory of strict or absolute liability or otherwise, the lessee assumes all risks of damage or injury to persons or property, which occur in, on, or above the Outer Continental Shelf (OCS), to any persons or to any property of any person or persons who are agents, employees, or invitees of the lessee, its agents, independent contractors, or subcontractors doing business with the lessee in connection with any activities being performed by the lessee in, on, or above the OCS, if such injury or damage to such person or property occurs by reason of the activities of any agency of the U.S. Government, its contractors or subcontractors, or any of their officers, agents or employees, being conducted as a part of, or in connection with,
the programs and activities of the command headquarters for Eglin Water Test Area 1 (EWTA-1), address provided below.

Notwithstanding any limitation of the lessee's liability in the lease, the lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of its officers, agents, or employees. The lessee further agrees to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the lessee, and to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the agents, employees, or invitees of the lessee, its agents, or any independent contractors or subcontractors doing business with the lessee in connection with the programs and activities of the aforementioned military installation, whether the same be caused in whole or in part by the negligence or fault of the United States, its contractors, or subcontractors, or any of its officers, agents, or employees and whether such claims might be sustained under a theory of strict or absolute liability or otherwise.

(b) Electromagnetic Emissions

The lessee agrees to control its own electromagnetic emissions and those of its agents, employees, invitees, independent contractors or subcontractors emanating from EWTA-1 in accordance with requirements specified by the commander of the command headquarters for EWTA-1, address provided below, to the degree necessary to prevent damage to, or unacceptable interference with, Department of Defense flight, testing or operational activities conducted within EWTA-1. Necessary monitoring control and coordination with the lessee, its agents, employees, invitees, independent contractors, or subcontractors will be affected by the commander of the aforementioned onshore military installation conducting operations in EWTA-1, provided, however, that control of such electromagnetic emissions shall in no instance prohibit all manner of electromagnetic communication during any period of time between a lessee, its agents, employees, invitees, independent contractors, or subcontractors and onshore facilities.

(c) Operational

The lessee, when operating or causing to be operated on its behalf, boat or aircraft traffic in EWTA-1, shall enter into an agreement with the commander of the command headquarters for EWTA-1, address provided below, upon utilizing the area prior to commencing such traffic. Such an agreement will provide for positive control of boats and aircraft operating in EWTA-1 at all times.

EWTA-1 Contact Officer: Commander
Armament Division
Attention: Howard Dimmig/CCN
Eglin AFB, Florida 32542
Telephone: (904) 882-5558

Stipulation No. 3—Hydrocarbon Discovery Stipulation.

(This stipulation applies to all bidding units leased in this sale.)

Sulphur and salt leases are granted separately from oil and gas leases. Therefore, any hydrocarbons discovered by the sulphur and salt lessee cannot be produced under this lease. If the lessee discovers hydrocarbons while conducting sulphur and salt operations on the lease area, the lessee shall report the discovery immediately to the Regional Director (RD). If the RD determines that the discovery is significant, and the Director determines that release of the information is necessary for the proper development of the field or area, then a public announcement of the significant hydrocarbon discovery will be made pursuant to 30 CFR 250.3.

14. Information to Lessees.

(a) Supplemental Documents. For copies of the various documents identified as available from the Gulf of Mexico Regional Office, prospective bidders should contact the Public Information Unit, Minerals Management Service, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123-2394, either in writing or by telephone (504) 736-2519. For additional information, contact the Regional Supervisor for Leasing and Environment at that address or by telephone at (504) 736-2755.

(b) Navigation Safety. Operations on some of the bidding units offered for lease may be restricted by designation of fairways, precautionary zones, anchorages, safety zones, or traffic separation schemes established by the U.S. Coast Guard pursuant to the Ports and Waterways Safety Act (33 U.S.C. 1221 et seq.), as amended. U.S. Corps of Engineers permits are required for construction of any artificial islands, installations, and other devices permanently or temporarily attached to the seabed located on the OCS in accordance with section 4(e) of the OCS Lands Act, as amended.

(c) Offshore Pipelines. Lessees are advised that the Department of the Interior and the Department of Transportation have entered into a Memorandum of Understanding, dated May 6, 1976, concerning the design, installation, operation, and maintenance of offshore pipelines. Bidders should consult both Departments for regulations applicable to offshore pipelines.

(d) Affirmative Action. Revision of the Department of Labor regulations on affirmative action requirements for Government contractors (including lessees) has been deferred, pending review of those regulations (see Federal Register of August 25, 1981, at 46 FR 42865 and 42968). Existing stocks of the affirmative action forms described in paragraph 5 of this Notice contain language that would be superseded by the revised regulations at 41 CFR 60-1.5(a)(1) and 60-1.7(a)(1). Submission of Form MMS-2032 (June 1985) and Form MMS-2033 (June 1985) will not invalidate an otherwise acceptable bid, and the revised regulations' requirements will be deemed to be part of the existing affirmative action forms.

(e) Ordnance Disposal Areas. The U.S. Air Force has released an indeterminable amount of unexploded ordnance throughout Eglin Water Test Area 1, which is shown on a map available from the MMS Gulf of Mexico Regional Office. The exact location of the unexploded ordnance is unknown, and lessees are advised that all bidding units included in this sale in or near this water test area should be considered potentially hazardous to drilling and platform and pipeline placement.

(f) Operational Constraints.

(1) Sulphur and salt exploration or development activities will be permitted in such a manner that they will not unduly interfere with prior rights or approvals for oil and gas exploration and/or development activities.

(2) Exploration or development and production plans submitted in accordance with 30 CFR 250.34 for proposed sulphur and salt activities will be required to include the showing of notice to existing oil and gas operators or pipeline permittees whose existing or approved activities may be affected by the proposed sulphur activities. Information regarding existing pipelines and other oil and gas appurtenances and structures is available from the Regional Office. See paragraph 14(a).

(3) The MMS may, if determined necessary as a means of safeguarding life and the environment and the carrying out of oil and gas operations, impose appropriate operational constraints or requirements including but not limited to the following:

(a) The establishment of "no activity zones" in the vicinity of certain existing or approved oil and gas activities; and

(b) The delaying of sulphur development activities until such time that the potential for negative impact upon oil and gas activities is at an acceptable level.

15. OCS Orders. Operations on all leases resulting from this sale will be conducted in accordance with the provisions of all Gulf of Mexico OCS Orders, as of their effective dates, and any other applicable OCS Order as it becomes effective.

Director, Minerals Management Service

Wm. D. Bettenberg

MINERALS MANAGEMENT SERVICE

Office | Serial number

Cash bonus | Rental rate per acre, or fraction thereof

SULPHUR AND SALT LEASE OF SUBMERGED LANDS UNDER THE OUTER CONTINENTAL SHELF LANDS ACT

This form does not constitute an information collection as defined by 44 U.S.C. 3502 and therefore does not require approval by the Office of Management and Budget.

Minimum royalty rate per acre, or fraction thereof | Royalty rate

This lease is effective as of (hereinafter called the "Effective Date") and shall continue for an initial period of years (hereinafter called the "Initial Period") by and between the United States of America (hereinafter called the "Lessor"), by the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, its authorized officer, and

(hereinafter called the "Lessee"). In consideration of any cash payment heretofore made by the Lessee to the Lessor and in consideration of the promises, terms, conditions, and covenants contained herein, including the Stipulation(s) numbered attached hereto, the Lessee and Lessor agree as follows:

Sec. 1. Statutes and Regulations. This lease is issued pursuant to the Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1331-1356, (1953)), as amended, and the regulations issued thereunder (30 CFR Part 256). The lease is issued subject to the Act; all regulations issued pursuant to the Act and in existence upon the Effective Date of this lease; all regulations issued pursuant to the statute in the future which provide for the prevention of waste and conservation of the natural resources of the Outer Continental Shelf and the protection of correlative rights therein; and all other applicable statutes and regulations.

Sec 2. Rights of Lessee. The Lessor hereby grants and leases to the Lessee the exclusive right and privilege to drill for, develop, and produce sulphur and salt resources in the submerged lands of the Outer Continental Shelf containing approximately acres (hereinafter referred to as the "leased area"), described as follows:

Form MMS-2006 (Dec. 87)

These rights include:

(a) the nonexclusive right to conduct within the leased area geological and geophysical explorations in accordance with applicable regulations;

(b) the nonexclusive right to drill water wells within the leased area, unless the water is part of geopressured-geothermal and associated resources, and to use the water produced therefrom for operations pursuant to the Act free of cost, on the condition that the drilling is conducted in accordance with procedures approved by the Director of the Minerals Management Service or the Director's delegate (hereinafter called the "Director"); and

(c) the right to construct or erect and to maintain within the leased area artificial islands, installations, and other devices permanently or temporarily attached to the seabed and other works and structures necessary to the full enjoyment of the lease, subject to compliance with applicable laws and regulations.

Sec. 3. Term. This lease shall continue from the Effective Date of the lease for the Initial Period and so long thereafter as sulphur and/or salt are produced from the leased area in paying quantities, or drilling or well reworking operations, as approved by the Lessor, are conducted thereon, or as otherwise provided by regulations.

Sec. 4. Rentals. The Lessee shall pay the Lessor, on or before the first day of each lease year which commences prior to a discovery in paying quantities of sulphur and/or salt on the leased area, a rental as shown on the face hereof.

Sec. 5. Minimum Royalty. The Lessee shall pay the Lessor, at the expiration of each lease year which commences after a discovery of sulphur and/or salt in paying quantities, a minimum royalty as shown on the face hereof or, if there is production, the difference between the actual royalty required to be paid with respect to such lease year and the prescribed minimum royalty if the actual royalty paid is less than the minimum royalty.

Sec 6. Royalty on Production.

(a) The Lessee shall pay a fixed royalty as shown on the face hereof in value of production saved, removed, or sold from the leased area. Any Lessee is liable for royalty payments on sulphur and/or salt lost or wasted from a lease site when such loss or waste is due to negligence on the part of the operator of the lease, or due to the failure to comply with any rule or regulation, order, or citation issued under the Act.

(b) The value of production for purposes of computing royalty on production from this lease shall never be less than 5 percent of the gross production or value of the sulphur at the mine. The value of production shall be the estimated reasonable value of the production as determined by the Lessor, due consideration being given to the highest price paid for a part or for a majority of sulphur and/or salt of like quality in the same general area, to the price received by the Lessee, to posted prices, and to other relevant matters. Except when the Lessor, in its discretion, determines not to consider special pricing relief from otherwise applicable Federal regulatory requirements, the value of production for the purposes of computing royalty shall not be deemed to be less than the gross proceeds accruing to the Lessee from the sale thereof. In the absence of good reason to the contrary, value computed on the basis of the highest price paid or offered at the time of production in a fair and open market for the major portion of like quality sulphur produced and sold from the field or area where the leased area is situated will be considered to be a reasonable value.

(c) Royalties shall be due and payable by the last day of the next month following the month in which the sulphur and/or salt is produced, unless the Lessor prescribes a later date.

Sec. 7. Payments. The Lessee shall make all payments (rentals, royalties, and any other payments required by this lease) to the Lessor by electronic transfer of funds, check, draft on a solvent bank, or money order unless otherwise provided by regulations or by direction of the Lessor. Rentals, royalties, and any other payments required by this lease shall be made payable to the Minerals Management Service and tendered to the Director. Determinations made by the Lessor as to the amount of payment due shall be presumed to be correct and paid as due.

Sec. 8. Bonds. The Lessee shall maintain at all times the bond(s) required by regulation prior to the issuance of the lease and shall furnish such additional security as may be required by the Lessor if, after operations have begun, the Lessor deems such additional security to be necessary.

Sec. 9. Plans. The Lessee shall conduct all operations on the leased area in accordance with approved exploration plans and approved development and production plans as are required by regulations. The Lessee may depart from an approved plan only as provided by applicable regulations.

Sec. 10. Performance. The Lessee shall comply with all regulations and Orders. After due notice in writing, the Lessee shall drill such wells and produce at such rates as the Lessor may require in order that the leased area or any part thereof may be properly and timely developed and produced in accordance with sound operating principles.

Sec. 11. Safety Requirements. The Lessee shall:

(a) maintain all places of employment within the leased area in compliance with occupational safety and health standards and, in addition, free from recognized hazards to employees of the Lessee or of any contractor or subcontractor operating within the lease area;

(b) maintain all operations within the leased area in compliance with regulations or orders intended to protect

persons, property, and the environment on the Outer Continental Shelf; and

(c) allow prompt access, at the site of any operation subject to safety regulations, to any authorized Federal inspector and shall provide any documents and records which are pertinent to occupational or public health, safety, or environmental protection as may be requested.

Sec. 12. Suspension and Cancellation.

(a) The Lessor may suspend or cancel this lease pursuant to Section 5 of the Act, and compensation shall be paid when provided by the Act.

(b) The lessor may, upon recommendation of the Secretary of Defense, during a state of war or national emergency declared by Congress or the President of the United States, suspend operations under the lease, as provided in section 12(c) of the Act, and just compensation shall be paid to the Lessee for such suspension.

Sec. 13. Indemnification. The Lessee shall indemnify the Lessor for, and hold it harmless from, any claim, including claims for loss or damage to property or injury to persons caused by or resulting from any operation on the leased area conducted by or on behalf of the Lessee. However, the Lessee shall not be held responsible to the Lessor under this section for any loss, damage, or injury caused by or resulting from:

(a) negligence of the Lessor other than the commission or omission of a discretionary function or duty on the part of a Federal Agency whether or not the discretion involved is abused; or

(b) the Lessee's compliance with an order or directive of the Lessor against which an administrative appeal by the Lessee is filed before the cause of action for the claim arises and is pursued diligently thereafter.

Sec. 14. Purchase of Production. In time of war or when the President of the United States shall so prescribe, the Lessor shall have the right of first refusal to purchase at the market price all or any portion of the sulphur and/or salt produced from the leased area, as provided in Section 12(b) of the Act.

Sec. 15. Equal Opportunity Clause. During the performance of this lease, the Lessee shall fully comply with paragraphs (1) through (7) of section 202 of Executive Order 11246, as amended (reprinted in 41 CFR 60-1.4(a)), and the implementing regulations which are for the purpose of preventing employment discrimination against persons on the basis of race, color, religion, sex, or national origin. Paragraphs (1) through (7) of section 202 of Executive Order 11246, as amended, are incorporated in this lease by reference.

Sec. 16. Certification of Nonsegregated Facilities. By entering into this lease, the Lessee certifies, as specified in 41 CFR 60-1.8, that it does not and will not maintain or provide for its employees any segregated facilities at any of its establishments and that it does not and will not permit its employees to perform their services at any location under its control where segregated facilities are maintained. As used in this certification, the term "segregated facilities" means, but is not limited to, any waiting rooms, work areas, restrooms and washrooms, restaurants and other eating areas, timeclocks, locker rooms and other storage or dressing areas, parking lots, drinking fountains, recreation or entertainment areas, transportation, and housing facilities provided for employees which are segregated by explicit directive or are in fact segregated on the basis of race, color, religion, or national origin, because of habit, local custom, or otherwise. The Lessee further agrees that it will obtain identical certifications from proposed contractors and subcontractors prior to award of contracts or subcontracts unless they are exempt under 41 CFR 60-1.5.

Sec. 17. Reservations to Lessor. All rights in the leased area not expressly granted to the Lessee by the Act, the regulations, or this lease are hereby reserved to the Lessor. Without limiting the generality of the foregoing, reserved rights include:

(a) the right to authorize geological and geophysical exploration in the lease area which does not unreasonably interfere with or endanger actual operations under the lease, and the right to grant such easements or rights-of-way upon, through, or in the leased area as may be necessary or appropriate to working of other lands or to the treatment and shipment of products thereof by or under authority of the Lessor;

(b) the right to grant leases for any minerals other than sulphur and/or salt within the leased area, except that operations under such leases shall not unreasonably interfere with or endanger operations under this lease;

(c) the right, as provided in section 12(d) of the Act, to restrict operations in the leased area or any part thereof which may be designated by the Secretary of Defense, with approval of the President, as being within an area needed for national defense and, so long as such designation remains in effect, no operations may be conducted on the surface of the leased area or the part thereof included within the designation except with the concurrence of the Secretary of Defense. If operations or production under this lease within any designated area are suspended pursuant to this paragraph, any payments of rentals and royalty prescribed by this lease likewise shall be suspended during such period of suspension of operations and production, the term of this lease shall be extended by adding thereto any such suspension period, and the Lessor shall be liable to the Lessee for such compensation as is required to be paid under the Constitution of the United States.

Sec. 18. Transfer of Lease. The Lessee shall file for approval with the appropriate field office of the Minerals Management Service any instrument of assignment or other transfer of this lease, or any interest therein, in accordance with applicable laws and regulations.

Sec. 19. Surrender of Lease. The Lessee may surrender this entire lease or any officially designated subdivision of the leased area by filing with the appropriate field office of the Minerals Management Service a written relinquishment, in triplicate, which shall be effective as of the date of filing. No surrender of this lease or of any portion of the leased area shall relieve the Lessee or its surety of the obligation to pay all accrued rentals, royalties, and other financial obligations or to abandon all works on the area to be surrendered in a manner satisfactory to the Director.

Sec. 20. Removal of Property on Termination of Lease. Within a period of 1 year after termination of this lease in whole or in part, the Lessee shall remove all devices, works, and structures from the premises no longer subject to the lease in accordance with applicable regulations and orders of the Director. However, the Lessee may, with the approval of the Director, continue to maintain devices, works, and structures on the leased area for drilling or producing on other Leases.

Sec. 21. Remedies in Case of Default.

(a) Whenever the Lessee fails to comply with any of the provisions of the Act, the regulations issued pursuant to the Act, or the terms of this lease, the lease shall be subject to cancellation in accordance with the provisions of section 5(c) and (d) of the Act and the Lessor may exercise any other remedies which the Lessor may have, including the penalty provisions of section 24 of the Act. Furthermore, pursuant to section 8(o) of the Act, the Lessor may cancel the lease if it is obtained by fraud or misrepresentation.

(b) Nonenforcement by the Lessor of a remedy for any particular violation of the provisions of the Act, the regulations issued pursuant to the Act, or the terms of this lease shall not prevent the cancellation of this lease or the exercise of any other remedies under paragraph (a) of this section for any other violation or for the same violation occurring at any other time.

Sec. 22. Unlawful Interest. No member of, or Delegate to, Congress, or Resident Commissioner, after election or appointment, or either before or after they have qualified, and during their continuance in office, and no officer, agent, or employee of the Department of the Interior, except as provided in 43 CFR Part 20, shall be admitted to any share or part in this lease or derive any benefit that may arise therefrom. The provisions of Section 3741 of the Revised Statutes, as amended, 41 U.S.C. 22, and the Act of June 25, 1948, 62 Stat. 702, as amended, 18 U.S.C. 431-433, relating to contracts made or entered into or accepted by or on behalf of the United States, form a part of this lease insofar as they may be applicable.

Sec. 23. Special Provisions.

(a) Any lease issued for an initial period of 10 years will be cancelled after 5 years, following notice pursuant to the Outer Continental Shelf Lands Act, where drilling of an exploratory well has not been commenced before the end of the 5th year, or if the well has not been drilled in conformance with the approved exploration plan criteria, or if there is not a suspension of operations in effect.

(b) The Lessee is granted the exclusive right to drill salt wells within the leased area and to use the salt produced therefrom for sulphur-mining operations pursuant to the Act free of royalty on the lease, on the condition that the drilling is conducted in accordance with procedures approved by the Director.

(c) The Lessee shall pay no royalty on salt produced and consumed or otherwise used on the lease for the production of sulphur. The Lessee shall pay a fixed royalty of 5% at the mine for any salt produced and used or otherwise disposed of off the leased area for purposes other than sulphur production.

Department of Health and Human Services

National Institutes of Health

Recombinant DNA Advisory Committee Meeting and Guidelines for Research; Notices

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Recombinant DNA Advisory Committee; Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the Recombinant DNA Advisory Committee at the National Institutes of Health, Building 31C, Conference Room 10, 9000 Rockville Pike, Bethesda, Maryland 20892, on February 1, 1988, from approximately 9 a.m. to adjournment at approximately 5 p.m. This meeting will be open to the public to discuss:

Amendment of Guidelines,

Proposed major action,

Other matters to be considered by the Committee.

Attendance by the public will be limited to space available. Members of the public wishing to speak at the meeting may be given such an opportunity at the discretion of the Chair.

Dr. William J. Gartland, Executive Secretary, Recombinant DNA Advisory Committee, National Institutes of Health, 12441 Parklawn Drive, Suite 58, Rockville, Maryland 20852, telephone (301) 770–0131, will provide materials to be discussed at the meeting, rosters of committee members, and substantive program information. A summary of the meeting will be available at a later date.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every Federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every Federal program would be included as many Federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the Catalog of Federal Domestic Assistance are affected.

Dated: December 14, 1987.

Betty J. Beveridge,

Committee Management Officer, National Institutes of Health.

BILLING CODE 4140–01–M

Recombinant DNA Research; Proposed Action Under Guidelines

AGENCY: National Institutes of Health, PHS, DHHS.

ACTION: Notice of proposed action under NIH Guidelines for Research Involving Recombinant DNA Molecules.

SUMMARY: This notice sets forth a proposed action to be taken under the National Institutes of Health (NIH) Guidelines for Research Involving Recombinant DNA Molecules. Interested parties are invited to submit comments concerning this proposal. This proposal will be considered by the Recombinant DNA Advisory Committee (RAC) at its meeting on February 1, 1988. After consideration of this proposal and comments by the RAC, the Director of the National Institutes of Health will issue a decision on this proposal in accord with the NIH Guidelines.

DATES: Comments received by January 19, 1988, will be reproduced and distributed to the RAC for consideration at its February 1, 1988, meeting.

ADDRESS: Written comments and recommendations should be submitted to the Director, Office of Recombinant DNA Activities, 12441 Parklawn Drive, Room 58, Rockville, MD 20852. All comments received in timely response to this notice will be considered and will be available for public inspection in the above office on weekdays between the hours of 8:30 a.m. and 5:00 p.m.

FOR FURTHER INFORMATION CONTACT: Background documentation and additional information can be obtained from the Office of Recombinant DNA Activities, 12441 Parklawn Drive, Room 58, Rockville, Maryland 20852, (301) 770–0131.

SUPPLEMENTARY INFORMATION: The NIH will consider the following action under the NIH Guidelines for Research Involving Recombinant DNA Molecules:

Large-Scale Production Involving Cephalosporium Acremonium Strain LU4–79–6

In a letter dated December 4, 1987, Dr. Mark A. Fogelsong of Eli Lilly and Company, Indianapolis, Indiana, requests approval to conduct large-scale experiments and production involving *Cephalosporium acremonium* strain LU4–79–6 under less than Biosafety Level 1—Large Scale (BL1–LS) conditions. Information on *C. acremonium* and construction of strain LU4–79–6 are provided in the submission.

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592) requires a statement concerning the official government programs contained in the *Catalog of Federal Domestic Assistance*. Normally NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every Federal research program in which DNA recombinant molecule techniques could be used, it has been determined to be not cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every Federal program would be included as many Federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about whether individual programs listed in the *Catalog of Federal Domestic Assistance* are affected.

Dated: December 17, 1987.

James C. Hill,

Acting Director, National Institute of Allergy and Infectious Diseases.

LIST OF PUBLIC LAWS

Last List December 22, 1987

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "P L U S" (Public Laws Update Service) on 523-6641. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.J. Res. 195/Pub. L. 100-195

Designating April 1988 as "Actors' Fund of America Appreciation Month." (Dec. 18, 1987; 101 Stat. 1312; 1 page) Price: $1.00

S. 608/Pub. L. 100-196

To amend the Reclamation Authorization Act of 1976 (90 Stat. 1324, 1327). (Dec. 18, 1987; 101 Stat. 1313; 1 page) Price: $1.00

H.J. Res. 431/Pub. L. 100-197

Making further continuing appropriations for the fiscal year ending September 30, 1988, and for other purposes. (Dec. 20, 1987; 101 Stat. 1314; 1 page) Price $1.00

BEST COPY AVAILABLE

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Title 3—

The President

Executive Order 12618 of December 22, 1987

Uniform Treatment of Federally Funded Inventions

By the authority vested in me as President by the Constitution and laws of the United States of America, and having concluded that the ability of the United States to achieve the statutorily prescribed policy (35 U.S.C. 200) of using the patent system to promote the utilization of inventions arising from federally supported research or development requires that Federal agencies follow uniform policies in administering patents and licenses conceived or first reduced to practice during the course of federally funded research, Executive Order No. 12591 of April 10, 1987, is amended by redesignating Sections 1(b)(5) and (6) as 1(b)(6) and (7), respectively, and by adding a new Section 1(b)(5) as follows:

"(5) administer all patents and licenses to inventions made with federal assistance, which are owned by the non-profit contractor or grantee, in accordance with Section 202(c)(7) of Title 35 of the United States Code as amended by Public Law 98–620, without regard to limitations on licensing found in that section prior to amendment or in Institutional Patent Agreements now in effect that were entered into before that law was enacted on November 8, 1984, unless, in the case of an invention that has not been marketed, the funding agency determines, based on information in its files, that the contractor or grantee has not taken adequate steps to market the inventions, in accordance with applicable law or an Institutional Patent Agreement;".

Executive Order 12619 of December 22, 1987

Half-day Closing of Government Departments and Agencies on Thursday, December 24, 1987

By the authority vested in me as President by the Constitution and laws of the United States of America, it is hereby ordered:

Section 1. All Executive departments and agencies of the Federal Government shall be closed and their employees excused from duty for the last half of the scheduled workday on Christmas Eve, December 24, 1987, except as provided in Section 2 below.

Sec. 2. The heads of Executive departments and agencies may determine that certain offices and installations of their organizations, or parts thereof, must remain open and that certain employees must remain on duty for the full scheduled workday on December 24, 1987, for reasons of national security or defense or for other essential public reasons.

Sec. 3. Thursday, December 24, 1987, shall be considered as falling within the scope of Executive Order No. 11582 and of 5 U.S.C. 5546 and 6103(b) and other similar statutes insofar as they relate to the pay and leave of employees of the United States.

Sec. 4. This Order shall apply to Federal departments and agencies only and is not intended to direct or otherwise implicate departments or agencies of State or local governments.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 52, No. 247
Thursday, December 24, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FEDERAL RESERVE SYSTEM

12 CFR Part 226

[Reg. Z; Docket No. R-0545]

Truth in Lending; Variable-Rate Disclosure Under Regulation Z

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is publishing a final rule amending Regulation Z (Truth in Lending) to require creditors to provide more information about the variable-rate feature of closed-end adjustable-rate mortgages than is currently required under Regulation Z. The amendments require creditors to distribute to consumers an educational booklet about adjustable-rate mortgages, and to provide a more detailed description of the variable-rate feature, along with an historical example. The information must be provided at the time an application form is given to the consumer or before the consumer pays a non-refundable fee, whichever is earlier. These revisions are intended to address concerns regarding the adequacy of information given to consumers applying for adjustable-rate mortgages and regarding the creditor burden of duplicative federal regulations.

EFFECTIVE DATE: December 28, 1987, but optional compliance until October 1, 1988.

FOR FURTHER INFORMATION:

SUPPLEMENTARY INFORMATION:

Background

For some time the Board has been working with the other federal financial regulatory agencies to develop a uniform set of disclosures for adjustable-rate mortgages (ARMs). This effort arose because of concern about the different disclosure requirements imposed by the various federal agencies. Currently, four federal agencies require that lenders subject to their regulations provide specific disclosures about ARMs to borrowers. Under Regulation Z, the Board requires that a variable-rate feature be described briefly to consumers. In contrast to Regulation Z, the regulations of two other federal financial agencies and the Department of Housing and Urban Development (HUD) call for more extensive, detailed information. The Federal Home Loan Bank Board (FHLBB) requires variable-rate disclosures for federally-chartered savings and loan associations and also for certain other lenders that wish to market their loans to federally-chartered savings and loans (12 CFR 545.33). The Office of the Comptroller of the Currency (OCC) mandates variable-rate disclosures for national banks and other lenders that seek to market their loans to national banks (12 CFR Part 29). Under the "Alternative Mortgage Transaction Parity Act of 1982" (12 U.S.C. 3802), state-chartered institutions and other mortgage lenders may take advantage of federal authorization of ARMs by following the rules of the FHLBB or the OCC. Finally, HUD prescribes disclosures for lenders wishing to participate in the Federal Housing Administration (FHA) insurance program (24 CFR Parts 203 and 234).

The federal financial agencies believe that this regulatory structure, which requires different disclosures by different lenders delivered at different times, is causing problems for both consumers and mortgage lenders. The ability of consumers to understand and make important decisions about ARMs before entering into these transactions may be hampered by their receipt of different information about ARM programs depending on what type of lender they have approached. This problem is exacerbated by the variety of ARM products now being offered as well as the complexity of some of these programs. At the same time, these regulatory requirements have proven burdensome to the mortgage industry, particularly when mortgage lenders must satisfy more than one regulation in order to take full advantage of the secondary market. Under certain circumstances, lenders who wish to originate mortgages for possible sale to either a federal savings and loan association or to a national bank may have to make disclosures under two agencies' rules.

Revisions to federal ARM disclosure requirements were initially requested by members of Congress in a letter to the Board in August 1984. The request called for uniform federal requirements for disclosures that include a "worst-case" statement of the highest interest rate and payment that might apply to an ARM. The Board asked the Federal Financial Institutions Examination Council (FFIEC) to assist in developing a recommendation for uniform requirements for the federal agencies with ARM disclosure regulations. After extensive deliberations by an FFIEC task force, the FFIEC made an initial recommendation to the Board in November 1984. As outlined by the FFIEC, the required disclosures would be specific to each consumer's transaction and include a "worst-case" payment example based on hypothetical index rate increases of two percentage points per year for three years. Based on these recommendations, the Board proposed amendments to Regulation Z on May 15, 1985 (50 FR 20221). Many of the Board's 500 public comments on the 1985 proposal objected to both the potential burden on creditors of requiring transaction-specific disclosures and to the assumptions about index rate movement.

For more than a year following the Board's proposal of the initial disclosure scheme, the FFIEC considered alternative plans for uniform ARM disclosures. In August 1986, the FFIEC approved a proposal requiring that creditors provide two types of disclosures to consumers seeking information about ARMs: (1) The *Consumer Handbook on Adjustable Rate Mortgages*, or a suitable substitute, and (2) disclosures that fully describe each of the creditor's ARM programs, with a 15-year historical example of how

VOL 52 ISS 247 DEC 24 1987 UMI

changes in the index or formula values used to compute interest rates would have affected interest rates and payments on a $10,000 loan. In addition, the maximum interest rate and payment that could result under the program for the $10,000 loan would be disclosed.

Based on the recommendations by the FFIEC and its own analysis, the Board on November 24, 1986, again proposed to amend Regulation Z (51 FR 42241). On February 5, 1987, the FHLBB proposed amendments to its ARM disclosure regulations which would require disclosures identical to what the Board proposed (52 FR 3665). The FHLBB regulation, as proposed, would cover all loans secured by borrower-occupied property (including open-end equity lines of credit.) Finally, on October 2, 1987, the OCC proposed to delete its ARM disclosure regulation and to defer to revised Regulation Z disclosure requirements (52 FR 36953).

A total of 135 comments were received during the 60-day period for public comments on the Board's proposal. Generally, commenters supported the concept of uniformity in federal ARM disclosure regulations. Most commenters also endorsed the proposal to require disclosures based on the features of the loan program but not specific to an individual consumer's actual loan amount. On the other hand, about one-fifth of the commenters expressed general opposition to the proposal. These commenters questioned the need for expanded disclosure requirements under Regulation Z and stated that the disclosures would be more costly to prepare and to distribute than the existing disclosures. Many commenters also maintained that the coverage of the proposal was too broad. For example, it was asserted that compliance with the proposed advance notice of interest rate adjustments would be difficult with certain short-term loans such as bridge loans. It was also argued that the 15-year index history would not be meaningful to consumers considering short-term loans, and that the disclosures would be difficult to prepare for loans that are custom-tailored to an individual consumer's needs. Many commenters suggested limiting coverage of the amendments to purchase-money and refinancing transactions which are variable-rate and secured by the consumer's principal dwelling. On the other hand, several commenters supported the coverage of the proposal. Some commenters argued that the proposed disclosures should also be required for open-end home equity lines. These commenters noted that home equity plans have become more prevalent since the Tax Reform Act of 1986 and impose great risks to consumers whose homes are burdened with such indebtedness. Other commenters requested that creditors be allowed to substitute the expanded disclosures for the existing Regulation Z ARM disclosures for all variable-rate transactions, whether or not secured by the consumer's principal dwelling.

Many commenters favored the requirement of an example showing how the payments and loan balance of a $10,000 loan would have been affected by historical changes in the index for a 15-year period. Other commenters questioned the usefulness of the historical information and argued that the recent interest rate fluctuations would not be repeated in the future. Commenters also maintained that the historical example would be burdensome to prepare. Some commenters recommended a shorter example or even one based on hypothetical index rate increases over a short period. Some commenters, particularly members of the thrift industry, reversed their previously stated opposition to an example based on hypothetical rate increases and recommended that form of example as a substitute for the historical example.

Many commenters supported the requirement that the maximum interest rate and payment be stated. These commenters argued that the statement would be a useful supplement to the historical example which might not reflect a potential worst-case for the loan in the future. HUD recommended that the maximum payment be stated as a schedule of payment increases showing the initial and maximum payments to correspond to its statutory disclosure requirements. Other commenters stated that the information might portray ARMs in a highly negative light. A few of these commenters requested that the dicslosure show the lowest rate and payment possible under the program.

Finally, several commenters addressed the proposed requirement for advance notice of interest rate and payment adjustments. The primary criticism was that the advance notice was required at least 30 days before the effective date of an interest rate adjustment and not before a payment at the new level is due, as is currently required by the OCC. The commenters stated that this proposed requirement would cause problems for lenders offering short-term ARMs that closely track changes in the index values. Some commenters recommended reducing the number of days before an adjustment that notice is required and clarifying that notice should be given before a payment at a new level is due.

After considering all of the comments, the Board has made changes in the final amendments designed to alleviate the burden of compliance without compromising the amount or detail of information recommended by the FFIEC to be disclosed to consumers. For example, in response to the comments, the Board has made a minor change to the coverage of the amendments, a modification of the requirement for a statement of the maximum interest rate and payment, and a change to the timing of the adjustment notice requirements, as explained below. Generally, the Board has not adopted the other changes suggested by commenters which would substantially alter the uniform disclosure provisions developed by the FFIEC.

Amendments to Regualtion Z

Based on recommendations from the FIEC, the Board is adopting amendments to Regulation Z to provide more information to consumers about adjustable-rate mortgages. These amendments will require a handbook to be distributed to consumers, as well as detailed disclosures about a creditor's ARM loan programs. The new ARM disclosure requirements have been added to the regulation at § 226.19(b) and § 226.18(f)(2) while new subsequent disclosure requirements for ARMs have been added at § 226.20(c).

The amendments apply to closed-end credit transactions secured by the consumer's principal dwelling. This coverage includes purchase-money mortgages, in which the consumer is obtaining a mortage loan for the purpose of purchasing a home, as well as transactions in which the consumer is using the home as security for a loan. In response to comments received about potential compliance problems for short-term loans, an exemption from the new disclosure requirements has been provided for transactions secured by the consumer's principal dwelling with a term of one year or less. These loans will continue to be covered by the existing disclosure requirements of § 226.18(f)(1) of Regulation Z.

Footnote 43 will allow creditors to substitute the new disclosures for any loan subject to the existing requirements of § 226.18(f)(1) of the regulation. This will allow creditors to treat all variable-rate transactions the same without having to provide different disclosures depending on whether the loan is secured by a consumer's principal dwelling. Creditors who substitute the disclosures under § 226.19(b) for the disclosures ordinarily required under § 226.18(f)(1) also must comply with the requirements under § 226.18(f)(2), although they need not comply with the requirements under § 226.20(c). The footnote does not permit substitution of disclosures required under § 226.18(f)(1) in transactions subject to § 226.19(b). (Home equity lines, in which an open-end line of credit is secured by the consumer's home, are not subject to the new requirements, which apply only to closed-end mortgages.) All other consumer credit transactions that contain a variable-rate feature would continue to be subject to the existing variable-rate disclosure requirements in Regulation Z.

As recommended by the FFIEC, the amendments will require that ARM disclosures, including both the ARM brochure and the other detailed ARM information, be provided to prospective borrowers when an application form is furnished or before the payment of a non-refundable fee, whichever is earlier. This rule will permit creditors to provide the detailed disclosures to consumers as an insert to the ARM brochure when it is given. Disclosure at this point in time is possible under the amendments because the new rule would require that disclosures reflect ARM loan program features, but not the terms of individual transactions. Footnote 45b provides a special timing rule (replacing the general timing rule) for cases where an ARM application reaches a creditor by telephone, or by way of an intermediary agent or broker. In both such cases, both the ARM brochure and the other detailed ARM information must be placed in the mail or delivered not later than three business days after the creditor receives the consumer's application. The proposed special timing rule for intermediary agents or brokers has been expanded to cover telephone applications in response to comments discussing potential compliance problems with the requirement of pre-application disclosures for transactions in which the application is made by telephone.

Under the new timing rule, the new variable-rate disclosure will be given to consumers earlier than the standard Truth in Lending information required by § 226.18. A sentence has been added to § 226.17(b) to cross-reference the early timing requirements for ARMs. In addition, a new paragraph (f)(2) has been added to § 226.18 to require that the later Truth in Lending disclosures be revised to include a statement that an adjustable-rate feature exists and that the variable-rate disclosures have been provided to the consumer.

A new paragraph (b)(1) requiring a descriptive ARM brochure has been added to § 226.19. The paragraph requires that creditors give each consumer a brochure when an application form is given to a consumer or before a consumer pays a non-refundable fee, whichever is earlier. The rule ensure that every consumer considering applying for an ARM will receive a brochure at an early stage in the application process. The *Consumer Handbook on Adjustable Rate Mortgages*, developed by the Board and the FHLBB, may be used by creditors to fulfill this requirement if they choose. The amendments would also permit creditors to provide a "suitable substitute" in place of the *Consumer Handbook*. Rather than the Board's evaluating whether an individual creditor's ARM brochure is a "suitable substitute," individual creditors should make a good faith determination of whether a brochure is, in fact, a suitable substitute. The Board envisions that substitutes must be, at a minimum, comparable to the *Consumer Handbook* in substance and comprehensiveness, recognizing that some lenders' brochures may contain more detailed descriptions of their particular ARM programs than contained in the *Consumer Handbook*.

The *Consumer Handbook* has been reprinted for resale by private publications companies, and by various trade organizations such as the American Bankers Association, the Mortgage Bankers Association, the National Council of Savings Institutions and the U.S. League of Savings Institutions.

Amendments also have been made in § 226.19(b)(2). They required that detailed, specific information about major aspects of a variable-rate loan program be clearly disclosed to consumers. To illustrate the requirements, sample form H–14 in Appendix H of the regulation has been revised, and model clauses have been included in a revision to Appendix H–4.

Under the amendments, creditors will be required to identify the index to which interest rate changes are tied, or provide a brief description of the formula used in calculating changes if no index is used. If the interest rate changes are purely discretionary or are made by an internally defined index, the creditor will still need to describe the method of rate changes or state that they are discretionary. A source of information about an index also must be disclosed. For example, if index values are listed in the *Wall Street Journal*, creditors could make such a statement in disclosing a source of information about their index. The amendments call for an explanation of how the interest rate and payment will be determined, for example, by a statement that the interest rate will be based on a specified index plus a margin and that the payment will be based on the interest rate, the loan balance, and the remaining loan term. Furthermore, creditors will be required to include a statement suggesting that consumers ask for the current margin value and interest rate. The disclosures also will alert consumers about a discount feature when the initial rate is discounted and will contain a statement suggesting that consumers ask for the amount of the applicable interest rate discount. In addition, the frequency of rate and payment adjustments will be disclosed, along with rate and payment caps.

If the presence of rate or payment caps would result in interest rate carryover or negative amortization, the disclosure statement would need to contain a statement about those features. Two other disclosures must be made: the fact that a loan program contains a demand feature, if applicable, and a statement describing the type of information that will be contained in an adjustment notice and when each notice will be provided. Finally, creditors will be required to include a notice to consumers that disclosure forms are available for the creditor's other ARM loan programs if the creditor has other closed-end ARM programs subject to the amendments.

One significant feature of the amendments is the requirement of an example, based on a $10,000 loan, illustrating how payments and the loan balance would have been affected by historical changes in the index to be used. Because the example will not be based on the actual amount to be borrowed, creditors will be able to pre-print the disclosures for each loan program and give them to consumers with an ARM handbook. The provision that the example be based on the historical performance of individual indices, rather than on assumed rate increases, reflects the revised recommendation of the FFIEC. Creditors also will be required to include a statement on the disclosure form explaining to consumers how to calculate their actual monthly payment amount for a loan amount other than $10,000. The example based on $10,000 also reflects the recommendation of the FFIEC, and is premised, in part, on the rationale that figures based on a $10,000

example provide information that consumers can use with minimal difficulty to calculate their actual monthly payments for a specific transaction. The amendments require that the example shown be based on the history of the specific index or formula to be used in the loan program. The index values used in the example will begin with the value for 1977 and be updated annually to add the values for additional years until a 15-year history is shown. For example, the disclosures for an ARM made in 1988 would include index values for each year from 1977 through 1987. In each subsequent year until 1991, a creditor's disclosures will include the index value for one more year. From that time forward, lenders will show a "rolling" history of index values, updated annually, for the preceding 15 years.

If the values for an index have not been available back to 1977, creditors need only go back as far as the values have been available in giving the history and may start the example at the year in which values are available. The history should reflect the method of choosing values for each program. For instance, if an average of index values is used, averages would be used in the history, but if a single index value is used, a single index value would be shown. The creditor should assume one date within a year (or one period, if an average is used) on which to base the history of index values for each loan program. The creditor may choose to use index values as of any date or period as long as the index value as of this date or period is used for each year in the index history. Only one index value per year need be shown, even if the program provides for adjustments to the interest rate or payment more than once in a year. In such cases, the creditor may assume that the index rate remained constant for the full year for the purpose of calculating the interest rate, payment, and loan balance. Updating will be necessary only once each year to reflect the most recent year's index value. New disclosures would be required when an ARM program changes. (To assist creditors in constructing histories of certain common indices, the Board has included tables of index values in section 3 below.)

The payment and outstanding loan balance figures in the example must reflect all significant loan program terms. For example, features such as rate and payment caps, a discounted interest rate, negative amortization, and interest carryover need to be taken into account by creditors in calculating the payment and outstanding balance figures. Because disclosures will be given early, creditors will need to assume a value for the margin in order to do the calculations for the example. Creditors may select a margin that they have used during the preceding six months and disclose on the form that the margin is one that they have used recently. The margin selected may be used until a creditor updates the disclosure form to reflect the most recent 15 years of index values. Similarly, to the extent that the ARM program has a discounted initial rate, creditors also will be permitted to assume an amount by which the initial rate will be discounted—which is representative of the amount of discounts by the creditor during the preceding six months—and disclose on the form that the initial rate has been discounted to the extent of other discounts offered by the creditor recently. The provision for a representative discount was added to respond to the concerns expressed by creditors about the need for individual program disclosure forms to reflect the amount of every discount offered by the creditor—amounts which could fluctuate daily depending upon market conditions.

The amendments also require disclosure of the maximum interest rate and payment. These disclosures would be calculated based on a $10,000 loan that is originated at the most recent interest rate shown in the historical example, and would assume that the interest rate then increases as rapidly as possible under the program. Thus, in a loan with interest rate limitations, or "caps," of 2 percentage points per year, and 5 percentage points for the life of the loan, the maximum interest rate would be 5 percentage points higher than the most recent rate shown in the historical example. Furthermore, the loan would not reach the maximum interest rate increase until the fourth year of the loan because of the 2 percentage points annual limitation. Consequently, the maximum payment disclosed would reflect the amortization of the loan during that period. Finally, to enable FHA lenders to follow the new requirements, this provision has been modified also to require a statement of the initial interest rate and payment for that loan. The Board believes that this requirement will also benefit consumers by providing a point of reference for evaluating the stated maximum levels for an ARM.

The final amendments do not contain the proposed requirement that ARMs without limitations on the maximum increases in the interest and payment contain a "conspicuous" statement to that effect. That provision is no longer necessary in light of section 1204 of the Competitive Equality Banking Act of 1987, Pub. L. No. 100–86, section 1204, and the recent amendment to Regulation Z, which require that all dwelling-secured ARM loans contain the maximum interest rate that may apply during the loan term.

As mentioned earlier, the ARM disclosures given before application will describe the type of information that will be provided in notices of adjustments and the timing for such notices. A paragraph also has been added as § 226.20(c) to require a subsequent disclosure form. The new section will apply, except as provided in footnote 43, to all ARMs that have been disclosed in accordance with the new § 226.19(b) requirements. Regulation Z does not currently require a subsequent disclosure of rate and payment changes, although the existing OCC, FHLBB, and HUD regulations already require it. The new paragraph requires notice of the adjusted payment amount, interest rate, index rate, and loan balance. The creditor also will be required to disclose the extent to which any increase in the interest rate has not been fully implemented at the adjustment date (for example, if the new index plus margin would exceed an interest rate adjustment cap), and the payment that would be required to fully amortize a loan (if different from the payment already disclosed). In transactions providing that payment adjustments may accompany interest rate adjustments, creditors would be required to send borrowers notice at least 25, but not more than 120, days before the due date of a payment at the new level. The final amendment differs from the proposal which called for a notice at least 30 days before the effective date of each scheduled interest rate adjustment. The minimum advance notice was revised to 25 days to track the existing notice requirements of the OCC and to provide creditors more flexibility in giving adjustment notices for the variety of loans that will be subject to the new subsequent disclosure requirements. At the same time, the Board believes that the timing of the disclosures still will provide consumers with adequate advance notice of adjusted payment amounts. The timing requirement was clarified to refer to calendar days and a requirement that the disclosures must be delivered or placed in the mail within the specified period was added for consistency with the requirements for delivery of other disclosures, such as when an application is made by telephone or through an intermediary agent or broker. Finally, the timing provision was tied to the due date of the payment at a new level rather than to the effective date of the interest rate adjustment. Notice is required to be given whenever interest rate adjustments and corresponding payment adjustments can be made periodically under the loan agreement but are not made because, for example, the index values have not changed or an interest rate cap has prevented any such adjustments. However, creditors are required to send borrowers notice only once each year if interest rate adjustments are made without a corresponding payment adjustment. Thus, for example, in transactions where the interest rate may be adjusted more frequently than the payment, the creditor would be required to send at least one notice each year during which there have been interest rate adjustments but no corresponding payment adjustments.

Finally, footnote 43 to Regulation Z has been retained and renumbered footnote 45a. Retention of the footnote will permit creditors who are required to comply with variable-rate disclosure regulations of other federal agencies to substitute those disclosures for the disclosures required under these amendments. Because the FHLBB likely will adopt disclosure requirements identical in substance to the final amendments to Regulation Z, certain creditors will be permitted to give the uniform ARM disclosures under FHLBB rules without being required to make identical disclosures under Regulation Z. (As proposed, the FHLBB regulations would also require certain other disclosures applicable to the ARM relating to due-on-sale clauses, rate changes and prepayment penalties, escrow payments, call provisions, and conditions of default. Because the FHLBB proposal would permit FHLBB-regulated institutions to purchase from other unaffiliated lenders ARMs for which only the uniform disclosures have been made, the secondary market should not be affected by the FHLBB's retention of these additional disclosures.) The footnote will also benefit lenders originating ARMs insured by the Federal Housing Administration, which has not yet adopted the uniform requirements. Furthermore, FHA lenders may continue to take advantage of the footnote at the time HUD amends its ARM disclosure requirements to adopt the uniform requirements.

Creditors also will be permitted to utilize the subsequent disclosure requirements of other federal agencies in place of the subsequent disclosure requirements of § 226.20(c). The FHLBB likely will adopt subsequent disclosure requirements identical to those required under § 226.20(c). A new footnote 45c has been added to permit this substitution. Changes have also been made to Appendix H by redesignating model clause H–4 as H–4(A); adding model clauses H–4(B), H–4(C) and H–4(D), and substituting sample form H–14 with a new form. (The official staff commentary interpreting these regulatory changes is being published for comment in this issue of the Federal Register.)

Tables of Certain Index Values

To assist creditors in constructing histories of various indices used in their ARM programs, the Board has prepared tables of values for common indices for the years 1977–1987. Table 1 provides the values for United States Treasury securities adjusted to constant maturities of 1, 3, and 5 years. Weekly average values are provided as of the first week ending in January and in July. Table 2 provides the January and July monthly average values for three other indices—the Cost of Funds Ratio to 11th Federal Home Loan Bank District Institutions, the National Average Contract Interest Rate for Major Lenders on the Purchase of Previously Occupied Homes, and the National Monthly Median Cost of Funds Ratio to FSLIC-Insured Institutions. It also includes the semiannual and quarterly average values for the National Average Cost of Funds Ratio to FSLIC-Insured Institutions. Years in which index values were not available are marked "n.a." (Creditors need not use these tables in constructing their index histories. Furthermore, the dates used in these tables were selected merely to provide index values at two or more points within each year. Creditors may choose to use the applicable index values in these tables even if index values as of another date are used in their ARM program.)

TABLE 1.—CONSTANT MATURITY YIELD ON UNITED STATES TREASURY SECURITIES

Year	Average for first week ending in January (percent)			Average for first week ending in July (percent)		
	1 Year	3 Year	5 Year	1 Year	3 Year	5 Year
1977	5.02	5.83	6.24	5.72	6.32	6.68

Economic Impact Statement

The Board's Division of Research and Statistics has prepared an economic impact statement on the proposed revisions to Regulation Z. A copy of the analysis may be obtained from Publications Services, Board of Governors of the Federal Reserve System, Washington, DC. 20551, at (202) 452–3245.

List of Subjects in 12 CFR Part 226

Advertising, Banks, banking, Consumer protection, Credit, Federal Reserve System, Finance, Penalties, Rate limitations, Truth in lending.

For reasons set out in this notice, and pursuant to the Board's authority under section 105 of the Truth in Lending Act (15 U.S.C. 1604 as amended), the Board amends Part 226 as follows:

PART 226—TRUTH IN LENDING

1. The authority citation for Part 226 continues to read as follows:

Authority: Sec. 105, Truth in Lending Act, as amended by sec. 605, Pub. L. 96–221, 94 Stat. 170 (15 U.S.C. 1604 *et seq.*); sec. 1204(c), Competitive Equality Banking Act, Pub. L. 100–86, 101 Stat. 552.

2. Section 226.17 is amended by revising paragraph (b) to read as follows:

§ 226.17 General disclosure requirements.

* * * * *

(b) *Time of disclosures.* The creditor shall make disclosures before consummation of the transaction. In certain residential mortgage transactions, special timing requirements are set forth in § 226.19(a). In certain variable-rate transactions, special timing requirements for variable-rate disclosures are set forth in § 226.19(b) and § 226.20(c). In certain transactions involving mail or telephone orders or a series of sales, the timing of disclosures may be delayed in accordance with paragraphs (g) and (h) of this section.

* * * * *

3. Section 226.18 is amended by revising footnote 43 and paragraph (f) to read as follows:

§ 226.18 Content of disclosures.

* * * * *

(f) *Variable rate.* (1) If the annual percentage rate may increase after consummation in a transaction not secured by the consumer's principal dwelling or in a transaction secured by the consumer's principal dwelling with a term of one year or less, the following disclosures: [43]

(i) The circumstances under which the rate may increase.

(ii) Any limitations on the increase.

(iii) The effect of an increase.

(iv) An example of the payment terms that would result from an increase.

[43] Information provided in accordance with §§ 226.18(f)(2) and 226.19(b) may be substituted for the disclosures required by paragraph (f)(1) of this section.

(2) If the annual percentage rate may increase after consummation in a transaction secured by the consumer's principal dwelling with a term greater than one year, the following disclosures.

(i) The fact that the transaction contains a variable-rate feature.

(ii) A statement that variable-rate disclosures have been provided earlier.

* * * * *

§ 226.22 [Amended]

4. Section 226.22 is amended by redesignating footnote 45a as 45d.

5. Section 226.19 is revised to read as follows:

§ 226.19 Certain residential mortgage and variable-rate transactions.

(a) *Residential mortgage transactions subject to RESPA.*—(1) *Time of disclosures.* In a residential mortgage transaction subject to the Real Estate Settlement Procedures Act (12 U.S.C. 2601 *et seq.*) the creditor shall make good faith estimates of the disclosures required by § 226.18 before consummation, or shall deliver or place them in the mail not later than three business days after the creditor receives the consumer's written application, whichever is earlier.

(2) *Redisclosure required.* If the annual percentage rate in the consummated transaction varies from the annual percentage rate disclosed under § 226.18(e) by more than ⅛ of 1 percentage point in a regular transaction or more than ¼ of 1 percentage point in an irregular transaction, as defined in § 226.22, the creditor shall disclose the changed terms no later than consummation or settlement.

(b) *Certain variable-rate transactions.* [45a] If the annual percentage rate may increase after consummation in a transaction secured by the consumer's principal dwelling with a term greater than one year, the following disclosures must be provided at the time an application form is provided or before the consumer pays a non-refundable fee, whichever is earlier: [45b]

(1) The booklet titled *Consumer Handbook on Adjustable Rate Mortgages* published by the Board and the Federal Home Loan Bank Board, or a suitable substitute.

(2) A loan program disclosure for each variable-rate program in which the consumer expresses an interest. The following disclosures, as applicable, shall be provided:

(i) The fact that the interest rate, payment, or term of the loan can change.

(ii) The index or formula used in making adjustments, and a source of information about the index or formula.

(iii) An explanation of how the interest rate and payment will be determined, including an explanation of how the index is adjusted, such as by the addition of a margin.

(iv) A statement that the consumer should ask about the current margin value and current interest rate.

(v) The fact that the interest rate will be discounted, and a statement that the consumer should ask about the amount of the interest rate discount.

(vi) The frequency of interest rate and payment changes.

(vii) Any rules relating to changes in the index, interest rate, payment amount, and outstanding loan balance including, for example, an explanation of interest rate or payment limitations, negative amortization, and interest rate carryover.

(viii) An historical example, based on a $10,000 loan amount, illustrating how payments and the loan balance would have been affected by interest rate changes implemented according to the terms of the loan program. The example shall be based upon index values beginning in 1977 and be updated annually until a 15-year history is shown. Thereafter, the example shall reflect the most recent 15 years of index values. The example shall reflect all significant loan program terms, such as negative amortization, interest rate carryover, interest rate discounts, and interest rate payment limitations, that would have been affected by the index movement during the period.

(ix) An explanation of how the consumer may calculate the payments for the loan amount to be borrowed based on the most recent payment shown in the historical example.

(x) The maximum interest rate and payment for a $10,000 loan originated at the most recent interest rate shown in the historical example assuming the maximum periodic increases in rates and payments under the program; and the initial interest rate and payment for that loan.

(xi) The fact that the loan program contains a demand feature.

(xii) The type of information that will be provided in notices of adjustments and the timing of such notices.

(xiii) A statement that disclosure forms are available for the creditor's other variable-rate loan programs.

6. Section 226.20 is amended by adding paragraph (c) to read as follows:

§ 226.20 Subsequent disclosure requirements.

* * * * *

(c) *Variable-rate adjustments.* [45c] An adjustment to the interest rate with or without a corresponding adjustment to the payment in a variable-rate transaction subject to § 226.19(b) is an event requiring new disclosures to the consumer. At least once each year during which an interest rate adjustment is implemented without an accompanying payment change, and at least 25, but no more than 120, calendar days before a payment at a new level is due, the following disclosures, as applicable, must be delivered or placed in the mail:

(1) The current and prior interest rates.

(2) The index values upon which the current and prior interest rates are based.

(3) The extent to which the creditor has foregone any increase in the interest rate.

(4) The contractual effects of the adjustment, including the payment due after the adjustment is made, and a statement of the loan balance.

(5) The payment, if different from that referred to in paragraph (c)(4) of this section, that would be required to fully amortize the loan at the new interest rate over the remainder of the loan term.

[45a] Information provided in accordance with variable-rate regulations of other federal agencies may be substituted for the disclosures required by paragraph (b) of this section.

[45b] Disclosures may be delivered or placed in the mail not later than three business days following receipt of a consumer's application when the application reaches the creditor by telephone, or through an intermediary agent or broker.

[45c] Information provided in accordance with variable-rate subsequent disclosure regulations of other federal agencies may be substituted for the disclosure required by paragraph (c) of this section.

Appendix H—[Amended]

7. Appendix H is amended by redesignating H–4 as H–4(A) and revising the heading in the table of Contents, by adding H–4(B), H–4(C), and H–4(D), and by revising H–14 and the heading in the table of contents to read as follows:

Appendix H—Closed-end Model Forms and Clauses

* * * * *

H–4(A) Variable-Rate Model Clauses (§ 226.18(f)(1))
H–4(B) Variable-Rate Model Clauses (§ 226.18(f)(2))
H–4(C) Variable-Rate Model Clauses (§ 226.19(b))
H–4(D) Variable-Rate Model Clauses (§226.20(c))

* * * * *

H–14 Variable-Rate Mortgage Sample (§ 226.19(b))

* * * * *

H–4(A) Variable-Rate Model Clauses

* * * * *

H–4(B) Variable-Rate Model Clauses

Your loan contains a variable-rate feature. Disclosures about the variable-rate feature have been provided to you earlier.

H–4(C) Variable-Rate Model Clauses

This disclosure describes the features of the Adjustable Rate Mortgage (ARM) program you are considering. Information on other ARM programs is available upon request.

How Your Interest Rate and Payment are Determined

• Your interest rate will be based on [an index plus a margin] [a formula].

• Your payment will be based on the interest rate, loan balance, and loan term.

—[The interest rate will be based on (identification of index) plus our margin. Ask for our current interest rate and margin.]

—[The interest rate will be based on (identification of formula). Ask us for our current interest rate.]

—Information about the index [formula for rate adjustments] is published [can be found] _____.

—[The initial interest rate is not based on the (index) (formula) used to make later adjustments. Ask us for the amount of current interest rate discounts.]

How Your Interest Rate Can Change

• Your interest rate can change (frequency).

• [Your interest rate cannot increase or decrease more than _____ percentage points at each adjustement.]

• Your interest rate cannot increase [or decrease] more than _____ percentage points over the term of the loan.

How Your Payment Can Change

• Your payment can change (frequency) based on changes in the interest rate.

• [Your payment cannot increase more than (amount or percentage) at each adjustment.]

• You will be notified in writing _____ days before the due date of a payment at a new level. This notice will contain information about your interest rates, payment amount, and loan balance.

• [You will be notified once each year during which interest rate adjustments, but no payment adjustments, have been made to your loan. This notice will contain information about your interest rates, payment amount, and loan balance.]

• For example, on a $10,000 [term] loan with an initial interest rate of _____ (the rate shown in the interst rate column below for the year 19_____), the maximum amount that the interest rate can rise under this program is _____ percentage points, to _____ %, and the monthly payment can rise from a first-year payment of $_____ to a maximum of $_____ in the _____ year.

Example

The example below shows how your payments would have changed under this ARM program based on actual changes in the index from 1977 to 1991. This does not necessarily indicate how your index will change in the future.

The example is based on the following assumptions:

Amount of loan..... $10,000
Term..... _____
Change date ..... _____
Payment adjustment.... (frequency)
Interest adjustment..... (frequency)
[Margin] * ..... _____
Caps ____ [periodic interest rate cap]
_____ lifetime interest rate cap
_____ [payment cap]
[Interest rate carryover]—
[Negative amortization]
[Interest rate discount] **
Index ..... (identification of index or formula)

* This is a margin we have used recently; your margin may be different.

** This is the amount of a discount we have provided recently; your loan may be discounted by a different amount.

Year	Index (%)	Margin (percentage points)	Interest rate (%)	Monthly payment ($)	Remaining balance ($)
1977					
1978					
1979					
1980					
1981					
[redacted]					
1983					
1984					
1985					
[redacted]					
1987					
1988					
1989					
1990					
1991					

To see what your payments would have been during that period, divide your mortgage amount by $10,000; then multiply the monthly payments by that amount (For example, in 1991 the monthly payment for a mortgage amount of $60,000 taken out in 1977 would be: $60,000 ÷ $10,000 = 6; 6x_____ = $_____ per month.)

H–4(D) Variable-Rate Model Clauses

Your new interest rate will be _____%, which is based on an index value of _____%.

Your previous interest rate was _____%, which was based on an index value of _____%.

[The new interest rate does not reflect a change of _____ percentage points in the index value which was not added because of _____.]

[The new payment will be $_____.]

[Your new loan balance is $_____.]

[Your (new) (existing) payment will not be sufficient to cover the interest due and the difference will be added to the loan amount. The payment amount needed to pay your loan in full by the end of the term at the new interest rate is $_____.]

[The following interest rate adjustments have been implemented this year without changing your payment: _____. These interest rates were based on the following index values: _____.]

* * * * *

H–14 Variable-Rate Mortage Sample

This disclosure describes the features of the Adjustable Rate Mortgage (ARM) program you are considering. Information on other ARM programs is available upon request.

How Your Interest Rate and Payment are Determined

• Your interest rate will be based on an index rate plus a margin.

• Your payment will be based on the interest rate, loan balance, and loan term.

• The interest rate will be based on the weekly average yield on United States Treasury securities adjusted to a constant maturity of 1 year (your index), plus our margin. Ask us for our current interest rate and margin.

• Information about the index rate is published weekly in the *Wall Street Journal.*

• Your interest rate will equal the index rate plus our margin unless your interest rate "caps" limit the amount of change in the interest rate.

How Your Interest Rate Can Change

• Your interest rate can change yearly.

• Your interest rate cannot increase or decrease more than 2 percentage points per year.

• Your interest rate cannot increase or decrease more than 5 percentage points over the term of the loan.

How Your Montly Payment Can Change

• Your monthly payment can change yearly based on changes in the interest rate.

• For example, on a $10,000, 30-year loan with an initial interest rate of 9.71% (the rate shown in the interest rate column below for the year 1987), the maximum amount that the interest rate can rise under this program is 5 percentage points, to 14.71%, and the monthly payment can rise from a first-year payment of $85.82 to a maximum of $123.31 in the fourth year.

• You will be notified in writing 25 days before the annual payment adjustment may be made. This notice will contain information about your interest rates, payment amount, and loan balance.

Example

The example below shows how your payments would have changed under this ARM program based on actual changes in the index from 1977 to 1987. This does not necessarily indicate how your index will change in the future. The example is based on the following assumptions:

Amount..... $10,000
Term..... 30 years.
Payment adjustment. 1 year.
Interest adjustment. 1 year.
Margin ..... 3 percentage points.
Caps ..... 2 percentage points annual interest rate.
Index ..... 5 percentage points lifetime interest rate. Weekly average yield on U.S. Treasury securities adjusted to a constant maturity of one year.

Year (as of 1st week ending in July)	Index (percent)	Margin (percentage points)	Interest rate (percent)	Monthly payment (dollars)	Remaining balance (dollars)
1977	5.72	3	8.72	78.46	9,927.64
1978	8.34	3	10.72**	92.89	9,874.67
1979	9.44	3	12.44	105.67	9,832.70
1980	8.51	3	11.51	98.79	9,776.04
1981	14.94	3	13.51**	113.51	9,731.98
1982	14.41	3	13.72***	115.07	9,683.39
1983	9.76	3	12.76	108.25	9,618.21
1984	12.17	3	13.72***	114.96	9,554.39
1985	7.66	3	11.72**	101.08	9,456.03
1986	6.36	3	9.72**	88.13	9,311.25
1987	6.71	3	9.71	88.07	9,151.55

*This is a margin we have used recently; your margin may be different.
**This interest rate reflects a 2 percentage points annual interest rate cap.
***This interest rate reflects a 5 percentage points lifetime interest rate cap.

To see what your payments would have been during that period, divide your mortgage amount by $10,000; then multiply the monthly payment by that amount. (For example, in 1987 the monthly payment for a mortgage amount of $60,000 taken out in 1977 would be: $60,000 ÷ $10,000 = 6; 6 × $88.07 = $528.42.)

FARM CREDIT ADMINISTRATION

12 CFR Parts 614 and 624

Farm Credit System Regulatory Accounting Practices—Temporary Regulations; Loan Policies and Operations—Loss sharing Agreements; Effective Date

AGENCY: Farm Credit Administration.

ACTION: Notice of effective date.

SUMMARY: The Farm Credit Administration (FCA) published final amended regulations under Parts 614 and 624 on November 16, 1987 (52 FR 43733). These regulations implement the provisions of the Farm Credit Act Amendments of 1986 relating to the use of regulatory accounting practices by Farm Credit System institutions and transfer the section relating to reversal of previously accrued financial assistance to the FCA regulations governing loss-sharing agreements. In accordance with 12 U.S.C. 2252, the effective date of the final rule is 30 days from the date of publication in the **Federal Register** during which either or both Houses of Congress are in session. Based on the records of the sessions of Congress, the effective date of the regulations is December 21, 1987.

EFFECTIVE DATE: December 21, 1987.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Peoples, Office of the General Counsel, Farm Credit Administration, 1501 Farm Credit Drive, McLean, Virginia 22102–5090 (703) 883–4020.

(Secs. 5.17(9) and (10), Pub. L. 92–181, as amended by Pub. L. 99–205, 12 U.S.C. 2252(a)(9)(1))

Dated: December 21, 1987.

David A. Hill,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–NM–153–AD; Amdt. 39–5815]

Airworthiness Directives; McDonnell Douglas Model DC–10–10, –10F, –15, –30, –30F, –40, and KC–10A (Military) Series Airplanes, Fuselage Numbers 1 Through 400

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final Rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC–10–10, –10F, –15, –30 –30F, –40, and KC–10A (Military) series airplanes, which requires inspections of the inboard and outboard wing flap vane primary (aft) attach bolts and nuts, and replacement, if necessary. This amendment is prompted by an incident where three pieces of a left hand outboard flap vane departed the aircraft due to corroded primary (aft) attach bolts and nuts. This condition, if not corrected, could result in the separation of an inboard or outboard flap vane from the wing.

EFFECTIVE DATE: January 20, 1988.

ADDRESSES: The applicable service information may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1–L00 (54–60). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or at 4344 Donald Douglas Drive, Long Beach, California.

FOR FURTHER INFORMATION CONTACT: Mr. Maurice Cook, Aerospace Engineer, Airframe Branch, ANM–121L, FAA, Northwest Mountain Region, Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California 90808; telephone (213) 514–6319.

SUPPLEMENTARY INFORMATION: The FAA has recently received a report of an incident where an operator of a McDonnell Douglas DC–10 series airplane lost sections of an outboard flap vane during flight. Investigation revealed that the nut for the primary

BEST COPY AVAILABLE

(aft) bolt attaching the vane to the support at track 2 was severely corroded and split; the primary bolt was not found. The attach bolt and nut were fabricated from high strength steel. Analysis attributed the nut failure to corrosion. Evaluation of the corroded nut showed that the bolt may have been missing for some time. The affected airplane had accumulated 42,876 flight hours time in service at the time of the incident.

Corrosion in the attach bolt and nut assemblies, if not detected and corrected, could lead to loss of the inboard or outboard flap vane from the wing.

The FAA has reviewed and approved McDonnell Douglas Alert Service Bulletin A57-107, dated June 22, 1987, which describes procedures for inspection and replacement, if necessary, of the inboard and outboard wing flap vane primary (aft) attach bolts and nuts.

Since this condition is likely to exist or develop on other airplanes of the same type design, this AD requires inspection and replacement, if necessary, of the inboard and outboard wing flap vane primary (aft) attach bolts and nuts, in accordance with the service bulletin previously mentioned.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this document involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required).

Aviation safety, Aircraft.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

§ 39.1 [Amended]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

2. By adding the following new airworthiness directive:

McDonnell Douglas: Applies to McDonnell Douglas Model DC-10-10, -10F, -15, -30, -30F, -40, and KC-10A (Military) series airplanes, fuselage numbers 1 through 400, certificated in any category. Compliance required as indicated unless previously accomplished.

To prevent inboard and outboard flap vane separation due to loose, broken or corroded primary (aft) attach bolts or nuts, accomplish the following:

A. Within 15 days after the effective date of this AD, unless accomplished since June 6, 1987, inspect the flap vane primary (aft) attach bolts and nuts in accordance with the Phase I, Accomplishment Instructions, of McDonnell Douglas DC-10 Alert Service Bulletin No. A57-107, dated June 22, 1987, or later FAA-approved revisions.

B. If cracked, broken, or corroded bolts or nuts are found during the inspections required by paragraph A., above, before further flight, replace with airworthy bolts and nuts, in accordance with Phase I, Accomplishment Instructions of McDonnell Douglas DC-10 Alert Service Bulletin No. A57-107, dated June 22, 1987, or later FAA-approved revisions.

C. An alternate means of compliance, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service information from the manufacturer may obtain copies upon request to McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Director of Publications, C1-L00 (54-60). This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Los Angeles Aircraft Certification Office, 4344 Donald Douglas Drive, Long Beach, California.

This amendment becomes effective January 20, 1988.

Issued in Seattle, Washington, on December 16, 1987.

Wayne J. Barlow,

Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 520

Oral Dosage Form New Animal Drugs Not Subject to Certification; Gentamicin Sulfate Soluble Powder

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Schering Corp. providing for the safe and effective use of a new concentration of gentamicin sulfate soluble powder for use in swine drinking water for control and treatment of colibacillosis in weanling swine and swine dysentery in swine.

EFFECTIVE DATE: December 24, 1987.

FOR FURTHER INFORMATION CONTACT: John R. Markus, Center for Veterinary Medicine (HFV-142), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3442.

SUPPLEMENTARY INFORMATION: Schering Corp., Galloping Hill Rd., Kenilworth, NJ 07033, filed supplemental NADA 133-836 providing for use of a new concentration of gentamicin sulfate soluble powder (GENTOCIN®/GARACIN® soluble powder, 333.3 milligrams of gentamicin per gram) for control and treatment of colibacillosis in weanling swine caused by strains of *E. coli* sensitive to gentamicin, and control and treatment of swine dysentery associated with *Treponema hyodysenteriae*. There are two concentrations of gentamicin currently approved, 16.7 and 66.7 milligrams.

The supplemental NADA is approved for the proposed higher concentration of 333.3 milligrams of gentamicin, and the regulations in 21 CFR 520.1044c(a) are revised to reflect this approval. This approval provides for a new concentration of a currently approved drug. There is no change in the conditions of use for the product, and no new safety and effectiveness data were required. Therefore, a freedom of information summary as provided for by 21 CFR 514.11(e)(2) is not required.

The agency has determined under 21 CFR 25.24(d)(1)(iii) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 520

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 520 is amended as follows:

PART 520—ORAL DOSAGE FORM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 520 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

2. Section 520.1044c is amended by revising paragraph (a) to read as follows:

§ 520.1044c Gentamicin sulfate soluble powder.

(a) *Specifications.* Each gram of gentamicin sulfate soluble powder contains gentamicin sulfate equivalent to 16.7, 66.7, or 333.3 milligrams of gentamicin.

* * * * *

Dated: December 21, 1987

Richard A. Carnevale,

Acting Associate Director, Office of New Animal Drug Evaluation, Center for Veterinary Medicine.

[FR Doc. 87-29520 Filed 12-23-87; 8:45 am]

BILLING CODE 4160-01-M

DEPARTMENT OF DEFENSE

Department of the Air Force

32 CFR Part 811

Release, Dissemination, and Sale of Visual Information Materials

AGENCY: Department of the Air Force, Department of Defense.

ACTION: Final rule.

SUMMARY: The Department of the Air Force revises the regulation establishing policy on the release, dissemination, and sale of Air Force visual information (VI) materials. It explains how reproductions may be sold, distributed, or released. This revision incorporates DOD Instruction 7230.7 which updates the schedule of fees. It also updates terminology, functional addresses and information on requesting visual material.

EFFECTIVE DATE: January 25, 1988.

ADDRESS: HQ USAF/SCV, Washington, DC 20330.

FOR FURTHER INFORMATION CONTACT: Major Cultice, HQ USAF/SCV, Washington, DC 20330, telephone (202) 695-9610.

SUPPLEMENTARY INFORMATION: On October 8, 1987, the Department of the Air Force published a proposed rule in the **Federal Register** establishing policy on the release, dissemination, and sale of Air Force visual information (VI) materials (52 FR 37631). No comments were received.

The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354), and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub. L. 96-511).

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

List of subjects in 32 CFR Part 811

Classified information, Motion pictures, Television.

Therefore, 32 CFR 811 is revised to read as follows:

PART 811—RELEASE, DISSEMINATION, AND SALE OF VISUAL INFORMATION MATERIALS

Sec.

811.0 Purpose.
811.1 Exclusions.
811.2 Agencies authorized to release VI materials.
811.3 Policy on the dissemination and sale of VI products.
811.4 Restrictions on the use of government VI records.
811.5 Procedures for requesting VI materials.
811.6 How to collect fees.
811.7 Schedule of fees.
811.8 Requests for motion media.
811.9 Requests for still VI media.

Authority: 10 U.S.C. 8013.

Note.—Part 806 of this chapter states the basic policies and instructions governing the disclosure of records and tells members of the public what they must do to inspect or obtain copies of the material referenced herein.

§ 811.0 Purpose.

This part establishes policy on the release, dissemination, and sale of Air Force visual information (VI) materials. It explains how reproductions may be sold, distributed, or released. It implements 32 CFR Part 288 (Department of Defense (DOD) Instruction 7230.7), DOD Directive 4000.19, DOD Directive 7290.3-M, and DOD Directive 5040.2. It should be used with Part 806 (AFR 12-30, Air Force Freedom of Information Act Program); Part 812 (AFR 12-32, Schedule of Fees for Copying, Certifying, and Searching Records and Other Documentary Material); AFR 177-108, Paying and Collecting Transactions at Base Level; Part 837 (AFR 190-1, Public Affairs Policies and Procedures); and AFR 205-1, Information Security Program. It applies to all Air Force personnel including United States Air Force Reserve and Air National Guard units and members. The term major command (MAJCOM), when used in this part, includes separate operating agencies and direct reporting units.

§ 811.1 Exclusions.

This volume does not apply to:

(a) The sale of aerial reconnaissance or cartographic type photography. Request this photography from the Defense Mapping Agency/ODS, ATTN: DDCP, Washington, DC 20315-0020.

(b) The sale of completed productions. Requests for purchase of completed Air Force productions should be sent to the National Archives and Records Administration, National Audiovisual Center, Information Office, 8700 Edgeworth Drive, Capitol Heights MD 20722-3701.

(c) VI materials made for the Air Force Office of Special Investigations (AFOSI) for use in an investigation or a counterintelligence report. Part 806 and AFR 124-4, Requesting AFOSI Investigations and Safeguarding, Handling and Releasing Information from AFOSI Reports, show who may use these VI materials.

(d) VI materials made for aircraft and missile mishap investigators for investigations of Air Force aircraft and missile mishaps per AFR 127-4. Part 806 and AFR 124-4 show who may use these materials.

§ 811.2 Agencies authorized to release VI materials.

(a) The Secretary of the Air Force, Office of Public Affairs (SAF/PA), per Part 837, may release VI materials to:

(1) News media, commercial publications, or electronic mail.

(2) Film companies.

(3) Industries.

(4) Nonprofit organizations.

(5) Agencies outside the federal government.

(6) The general public (not associated with the news media).

(b) The Secretary of the Air Force, Office of Legislative Liaison (SAF/LL), arranges for the release of VI material through SAF/PA upon request from members of Congress and provides such material for official use.

(c) The International Affairs Division (HQ USAF/CVAII) (or, in some cases, MAJCOM Foreign Disclosure Office) authorization is required to release classified and unclassified materials for use by foreign governments and international organizations or their representatives.

§ 811.3 Policy on the dissemination and sale of VI products.

(a) *Sale of VI material.* Although copies of Air Force VI products may be sold, Air Force policy is to not compete with commercial industry. When VI materials are sold to persons or organizations outside the federal government, charges and fees must be assessed according to Part 812.

(b) *Dissemination of VI material to state and local governments.* Copies of VI materials that meet the requirements of this part may be loaned or sold to state and local governments, or any tax exempt organization, under Title III of the 1968 Intergovernmental Cooperation Act. The requester must certify that such materials are not available from commercial sources. The only Air Force organization authorized to loan copies of VI materials is the United States Air Force Central Visual Information Library (AFCVIL), managed by 1352d Audiovisual Squadron, Norton AFB CA.

(c) *Disseminating and selling activities.* Dissemination and sale of Air Force VI documentation is accomplished by the DOD Motion Media Records Center, operated by the 1352d Audiovisual Squadron (AAVS) (MAC), Norton AFB CA and the DOD Still Media Records Center, operated by the US Navy at the Anacostia Naval Station, Washington, DC.

(d) *Sale of original VI material.* Original VI material is not for sale. Reproductions of the original may be sold. HQ USAF/SCV may authorize the loan of copies or duplicates of original material for federal government use. SAF/PA may lend copies or duplicates of original material to agencies outside the federal government and to the public.

(1) DOD VI records centers use only government-owned VI material in servicing approved requests for dissemination and sale. The use of nongovernment VI material must be with the written permission of the owner.

(2) Production of material for sale must not stop or slow official Air Force work or be used to justify facility expansion or additional manpower.

(e) *Requests and services exempt from fees.* In accordance with Part 813, requests received from the sources below are exempt from paying fees if funds are available for producing the material, production does not impair the mission of the furnishing agency, all clearances and releases specified by this part have been obtained, and the work can be done during normal duty hours. When requests cannot be accomplished within the above criteria, the request will be processed only when fees are paid by the requester.

(1) DOD and other government agencies requesting VI materials for official activities (DOD Directive 4000.19 and DOD Directive 5040.2).

(2) Members of Congress requesting VI materials for use in official activities.

(3) VI records center materials or services furnished according to law or Executive order.

(4) Federal, state, territorial, county, or municipal governments, or their agencies, for functions related to or furthering an Air Force or other DOD objective.

(5) Nonprofit organizations for functions related to public health, education, or welfare.

(6) Members of the Armed Forces in a casualty status, their next of kin, or authorized representative, when the requested VI material relates to the member and does not compromise classified information or the work of an accident investigation board.

(7) The general public, to further the Armed Forces recruiting program or public understanding of the Armed Forces, when such VI materials or services are determined by SAF/PAM to be in the best interest of the Air Force.

(8) Incidental or occasional requests for VI records center materials or services (including requests from residents of foreign countries) when it is determined that fees would be inappropriate. (For the distribution of VI materials to foreign nations, see Part 837 of this chapter).

§ 811.4 Restrictions on the use of government VI records.

Activities sending materials to the DOD VI records centers must ensure that any limitation on their use is noted on the materials. The following restrictions on VI material disseminated or sold from the records centers must also be observed:

(a) Materials must not be used to promote or endorse a commercial service or product (see Part 837).

(b) Rights to official Air Force VI material may not be claimed by any other agency or person.

(c) The waiver of propriety and privacy rights cannot be granted with the sale or release of VI materials unless these rights and the rights of transfer are owned by the Air Force.

(d) VI materials received from Air Force contractors may be released, disseminated, or sold if not identified as proprietary material in the applicable contract.

(e) When provisions of formal agreements between the Air Force and other government agencies on release of VI materials differ from this part, the provisions of the formal agreement apply.

§ 811.5 Procedures for requesting VI materials.

(a) Informal inquiries may be made to the appropriate DOD records center on VI materials available in broad subject areas. Such inquiries are not formal requests. Research of, or access to, materials are provided only by submission of a formal request. Inquiries regarding motion picture or television materials should be sent to the DOD Central Motion Media Records Center (1352d AVS/AVOS, Norton AFB CA 92409–5996). Inquiries regarding still photo materials should be sent to the DOD Still Media Records Center, ATTN: Code LGP–R, Bldg 168, Anacostia Naval Station, Washington, DC 20374–1681.

(b) Submit formal requests according to § 811.8 and § 811.9. When advised that the request has been approved, the requester may communicate directly with the records center about the selection of materials.

§ 811.6 How to collect fees.

(a) The Air Force or DOD activity making the sale collects the funds in advance.

(b) The fees due the United States must be paid by cash, United States Treasury check, certified check, cashiers check, bank draft, or postal money order (AFM 177–108). Personal checks may not be used.

§ 811.7 Schedule of fees.

Fees are established by the Department of Defense and are listed as follows:

(a) Still Photography. Still pictorial or documentary photographic prints. Unlisted standard sizes of prints may be furnished, if available, at prevailing contract or activity rates.

PRICE PER PRINT

BILLING CODE 3910-01-C

32 CFR Part 811a

Visual Information Documentation (VIDOC) Program

AGENCY: Department of the Air Force, DOD.

ACTION: Final rule.

SUMMARY: The Department of the Air Force revised the regulation establishing policy for the management of the Air Force visual information documentation (VIDOC) program. It implements Department of Defense (DOD) Directive 5040.2, and describes how the program is accomplished. The revision updates functional address symbols and implements new terminology.

EFFECTIVE DATE: January 25, 1988.

ADDRESS: HQ USAF/SCV, Washington, DC 20330.

FOR FURTHER INFORMATION CONTACT: Major Cultice, HQ USAF/SCV, Washington, DC 20330, telephone (202) 695-9810.

SUPPLEMENTARY INFORMATION: The Department of the Air Force published a proposed rule in the **Federal Register** on October 8, 1987, establishing policy for the management of the Air Force visual information documentation program (52 FR 37636). No comments were received.

The Department of the Air Force has determined that this regulation is not a major rule as defined by Executive Order 12291, is not subject to the relevant provisions of the Regulatory Flexibility Act of 1980 (Pub. L. 96-354), and does not contain reporting or recordkeeping requirements under the criteria of the Paperwork Reduction Act of 1980 (Pub.L. 96-511).

List of Subject in 32 CFR Part 811a

Archives and records, Motion pictures.

Therefore, 32 CFR Part 811a is revised to read as follows:

32 CFR PART 811a—VISUAL INFORMATION DOCUMENTATION (VIDOC) PROGRAM

Sec.

811a.1 Purpose.
811a.2 Material sources for the VIDOC program.
811a.3 Disposition of VI documentation materials.

Authority: 10 U.S.C. 8013.

§ 811a.1 Purpose.

This part establishes policy for the management of the Air Force visual information documentation (VIDOC) program. It implements Department of Defense (DOD) Directive 5040.2 and describes how the program is accomplished. It applies to all Air Force personnel including United States Air Force Reserve and Air National Guard units and members. The term major command (MAJCOM), when used in this part includes separate operating agencies and direct reporting units. The Air Force VIDOC program:

(a) Records, through visual information (VI) means (still photographs, motion pictures, video, audio tape, and so forth), imagery of significant Air Force events that document the employment, growth, progress, and exercise of Air Force resources during peacetime and in combat.

(b) Collects and preserves visual imagery of significant Air Force events with known or potential historical or archival value.

(c) Ensures imagery which depicts the prime mission, support activities, and significant events of key Air Force organizations is available. VIDOC imagery or products are used for many purposes, at all levels, in the Air Force. Examples are:

(1) *Immediate use.* Documentation used to help analyze and evaluate concepts and results of deployments, contingencies, tests, exercises, and so forth, during peacetime and in combat to support Air Force, DOD, and national objectives. VIDOC provides source material for slides, motion picture clips, video tapes, multimedia products, and so forth; used for training, management, information, and briefing purposes. In wartime, products are used to support theater commanders psychological operations objectives, operational briefings, status reports, public affairs requirements, collateral intelligence, and the historical record.

(2) *Future use.* VIDOC materials with long-term or permanent value are retained in DOD central record centers, the National Air and Space Museum, and the National Archives. These make up the pictorial records of development, growth, and progress of air power and provide a continued resource for VI productions and other media presentations.

§ 811a.2 Material sources for the VIDOC program.

(a) The primary sources of VI documentation materials are:

(1) Aerospace Audiovisual Service (AAVS) documentation crews, both ground and aerial, whose primary mission is to acquire Air Force imagery in peacetime and in combat.

(2) Base VI support centers (VISC).

(3) Optical instrumentation and engineering imagery of Air Force research, development, test, and evaluation (RDT&E) projects, including that material originated by defense and aerospace contractors.

(4) Armament delivery recording (ADR) imagery.

(b) Although the imagery may not originate from a documentation requirement, when properly processed, indexed, and stored, it serves as a valuable source of VI documentation.

§ 811a.3 Disposition of VI documentation materials.

(a) VI materials generated or acquired by Air Force members, employees, or contractors in conducting official duties are the property of the United States Air Force. Personal use of VI material for sale or any other reason not directly related to an official Air Force activity is prohibited. Any deviation from this policy must be approved by HQ USAF/SCV. This policy also applies when Air Force members or employees, by choice or agreement, occasionally use personally owned equipment or supplies in conducting official duties.

(b) Photographs, motion picture films, transparencies, video tapes, audio recordings, and other VI products are subject to safeguards and release requirements when released outside the Department of Defense (see Part 806 and Part 837 of this chapter).

Patsy J. Conner,

Air Force Federal Register Liaison Officer.

BILLING CODE 3910-01-M

VETERANS ADMINISTRATION

38 CFR Part 8a

Veterans Mortgage Life Insurance

AGENCY: Veterans Administration.

ACTION: Final regulatory amendments.

SUMMARY: The Veterans Administration (VA) is amending its Veterans Mortgage Life Insurance (VMLI) regulations to provide that where an eligible veteran ceases to own the housing unit purchased in part with a grant, or a subsequently acquired housing unit which was subject to a mortgage loan that resulted in his or her life being insured under Veterans Mortgage Life Insurance, he or she will again be eligible for full Veterans Mortgage Life Insurance coverage up to the statutory maximum. Eligibility for maximum coverage will not be reinstated where a housing unit is being remortgaged or refinanced.

EFFECTIVE DATE: December 24, 1987.

FOR FURTHER INFORMATION CONTACT: Paul F. Koons, Assistant Director for Insurance, Veterans Administration Regional Office and Insurance Center, P.O. Box 8079, Philadelphia, PA 19101 (215) 951–5360.

SUPPLEMENTARY INFORMATION: On pages 28356 nd 28357 of the Federal Register of July 14, 1987, proposed regulatory amendments were published providing that eligibility for maximum VMLI coverage may be reinstated under certain circumstances. Interested parties were given 30 days within which to submit written comments, suggestions, or objections regarding the proposed regulatory amendments. No written objections were received and the proposed regulations are hereby adopted without change and are set forth below.

The Administrator hereby certifies that these final regulatory amendments will not have a significant impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601–612. Pursuant to 5 U.S.C. 605(b) these final regulatory amendments are, therefore, exempt from the initial and final regulatory flexibility analyses requirements of sections 603 and 604. The reason for this certification is that these final regulatory amendments will affect only certain VMLI policyholders. They will, therefore, have no significant direct impact on small entities in terms of compliance costs, paperwork requirements or effects on competition.

The VA has also determined that these final regulatory amendments are nonmajor in accordance with Executive Order 12291, Federal Regulation. These final regulatory amendments will not have a large effect on the economy, will not cause an increase of costs or prices, and will not otherwise have any significant adverse economic effects.

The Catalog of Federal Domestic Assistance Program Number is 64.103.

List of Subjects in 38 CFR Part 8a

Mortgage life insurance, Veterans.
Approved: November 24, 1987.

Thomas K. Turnage,
Administrator.

PART 8a—VETERANS MORTGAGE LIFE INSURANCE

38 CFR Part 8a—Veterans Mortgage Life Insurance is amended as follows:

1. Section 8a.2 is revised to read as follows:

§ 8a.2 Maximum amount of insurance

(a) Each eligible veteran is authorized up to a maximum of $40,000 in Veterans Mortgage Life Insurance (VMLI) to insure his or her life during periods he or she is obligated under a mortgage loan, except that, as to an individual housing unit, whenever there is a reduction in the actual amount of insurance in force as provided for in § 8a.4(b) of this title, the amount of Veterans Mortgage Life Insurance thereafter available to insure the life of the same veteran on the same housing unit is permanently reduced by a like amount.

(b) The maximum amount of insurance in force on any one life at one time shall not exceed the lesser of the following amounts:

(1) $40,000.

(2) For insurance issued prior to December 24, 1987, the reduced maximum amount of insurance then available to an eligible veteran.

(3) The amount of the unpaid principal of the mortgage loan outstanding on the date of approval of the grant on a housing unit then owned and occupied by the eligible veteran, or on a housing unit being or to be constructed or remodeled for the eligible veteran, and such initial amount of insurance may be adjusted upward, subject to the maximum insurance available to the eligible veteran, or downward, depending upon the amount of the mortgage loans outstanding on the date of full disbursement of the grant, or on the date of final settlement of the purchase, construction, or remodeling agreement, whichever date is the later date.

(4) Where an eligible veteran ceases to own the housing unit purchased or adapted in part with a grant, or subsequently acquired housing unit which was subject to a mortgage loan that resulted in his or her life being insured under Veterans Mortgage Life Insurance, and becomes obligated under a mortgate loan on another housing unit occupied or to be occupied by the eligible veteran, the amount of the unpaid principal outstanding on the mortgage loan on the newly acquired housing unit on the date insurance hereunder is placed in effect.

(5) Where an eligible veteran incurs or refinances a mortgage loan, subject to the provisions of paragraph (a) of this section, the amount of the incurred or refinanced mortgage loan.

(6) Where the title to a housing unit is or will be vested in an eligible veteran and his or her spouse, the amount of insurance shall not exceed the principal amount of the outstanding mortgage loans. If title to an undivided interest in a housing unit is or will be vested in a person other than the spouse of an eligible veteran, the amount of Veterans Mortgage Life Insurance or his or her life shall be computed to be such part of the total of the unpaid principal of the loan outstanding on the housing unit as is proportionate to the undivided interest of the veteran in the entire property.

(7) All claims, arising out of the deaths of insured veterans occurring prior to October 1, 1976, shall be subject to the $30,000 lifetime maximum amount of insurance then in effect.

(8) All claims, arising out of the deaths of insured veterans occurring prior to (date of final publication), shall be subject to the provisions of paragraph (a) of this section then in effect which limited the amount of Veterans Mortgage Life Insurance coverage to a lifetime maximum per eligible veteran.

(c) Any eligible veteran who prior to October 1, 1976, was covered by $30,000 Veterans Mortgage Life Insurance and who on that date became eligible to have his or her coverage increased may elect to retain the lesser amount of coverage he or she had in effect prior to that date.

(Authority: 38 U.S.C. 210, 806)

2. In § 8a.4, paragraph (b) and the first sentence of paragraph (d) are revised and an authority citation is added at the end of the section to read as follows:

§ 8a.4 Coverage.

* * * * *

(b) The amount of Veterans Mortgage Life Insurance in force on his or her life at any one time shall be reduced simultaneously (1) with the reduction in the principal of the mortgage loan, whether or not the mortgage loan is amortized, and (2) in addition, if the mortgage loan is amortized, according to the schedule for the reduction of the principal of the mortgage loan whether or not the schedule payments are timely made.

* * * * *

(d) Subject to the $40,000 maximum amount of insurance, and to the reduced maximum amount of insurance available to the eligible veteran, he or she is entitled to be insured under Veterans Mortgage Life Insurance or to apply for such insurance as often as he or she becomes obligated under a mortgage loan or a refinanced mortgage loan on a housing unit or a successor housing unit owned and occupied by the eligible veteran.* * *

(Authority: 38 U.S.C. 210, 806)

BILLING CODE 8320–01–M

POSTAL SERVICE

39 CFR Part 111

Domestic Mail Manual; Forwarding of Fourth-Class Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: This rulemaking modifies the process by which the Postal Service forwards fourth-class mail. Under the modified procedure, the Postal Service will attempt to forward all fourth-class mail unless the sender specifically endorses the package to the contrary. Under the former procedures, forwarding to a different post office depended upon a prior agreement by the addressee to pay forwarding postage.

EFFECTIVE DATES: This rule is effective December 24, 1987, except that grace periods are allowed for the phase-out of several endorsements as explained below.

FOR FURTHER INFORMATION CONTACT: John Sadler, (202) 268–3523.

SUPPLEMENTARY INFORMATION: On July 27, 1987, the Postal Service published a proposed rule to modify the process of forwarding fourth-class mail, 52 FR 28021. The Postal Service received eight written comments to the proposed rule.

All eight comments favored the proposed rule change because it was preferable to the current process which they believe is not well understood by individuals. Specifically, the commenters indicated that they believe that most individuals do not adequately understand what is included in fourth-class mail and, as a result, do not understand the Postal Service's request to indicate whether they will guarantee payment of fourth-class forwarding postage when they fill out a change of address card. The commenters concluded that the proposed rule, which would provide that all fourth-class mail is forwarded to the addressee who will be allowed at the point of delivery to either accept or refuse delivery and payment of postage, will result in more pieces being accepted with fewer returns because recipients will be refusing only those packages which they truly do not want.

Several commenters also indicated that they felt that the endorsements "Address Correction Requested" and "Forwarding and Return Postage Guaranteed, Address Correction Requested" were redundant. Most of these commenters urged elimination of the "Address Correction Requested" endorsement since it does not provide our delivery personnel with sufficiently explicit instructions as to the service desired by the mailer. We agree with this argument and, at the end of a one-year grace period (December 24, 1988), we will eliminate "Address Correction Requested" as an officially recognized endorsement.

Several commenters also argued that the "Do Not Forward" endorsement was not sufficiently specific as to mailer intent and the resultant Postal Service action. We agree and are changing the "Do Not Forward" endorsement to "Do Not Forward, Do Not Return". Mailers may, however, continue to use the endorsement "Do Not Forward" during a one-year grace period, until December 24, 1988.

Although two commenters argued for elimination of the disposal of the mail option there were other commenters who agreed with the option and clearly desired it. Based on these comments and our own views, the Postal Service will retain this option which allows a mailer to elect to have the Postal Service dispose of an undeliverable piece instead of returning it to the sender. We have also added a new endorsement based on several comments which requested an "off piece" address correction and the disposal of the mail piece. The endorsement will be "Do Not Forward, Do Not Return, Address Correction Requested."

Ordinarily the Postal Service delays the effective date of a final rule until thirty days after the date of publication. In this case, we believe an exception is warranted, and accordingly we are making the rule effective upon publication in the Federal Register. Our reasons for doing so are the following. Those affected by the rule will be permitted, if they wish, to continue following the former procedure during a one year grace period. Secondly, because the new rule requires the Postal Service to print and distribute several new forms, the sooner we can begin that rather lengthy process the sooner the service can be offered to mailers who uniformly want and need it.

Based on our proposed rule and the comments received thereto, the Postal Service hereby amends the Domestic Mail Manual, which is incorporated by reference in the Code of Federal Regulations (see 39 CFR 111.1.), as follows:

PART 111—[AMENDED]

1. The authority citation for Part 111 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 101, 401, 403, 404, 3001–3011, 3201–3219, 3403, 3621, 5001.

PART 159—UNDELIVERABLE MAIL

2. In 159, revise Exhibit 159.151f to read as follows:

Exhibit 159.151f—Treatment of Undeliverable Fourth-Class Mail Including Parcel Post (Forwarded up to 12 months)

Mailer endorsement	USPS action
No Endorsement	Forward locally at no charge, forward out of town postage due. If undeliverable or addressee refuses to pay postage, return mail pieces with new address or reason for nondelivery; charge both forwarding (where attempted) and return postage.
Do Not Forward, Do Not Return [1]	No forwarding or return service is provided, mail pieces is disposed of by the Postal Service.
Forwarding and Return Postage Guaranteed	Same as no endorsement.
Forwarding and Return Postage, Guaranteed, Address Correction Requested [2].	Forward locally at no charge; forward out of town postage due. If forwarded, provide a separate address correction notice; charge address correction fee. If mail piece is undeliverable, or addressee refuses to pay postage, return mail piece with new address or reason for nondelivery; charge both forwarding (where attempted) and return postage at the appropriate single-piece fourth-class rate.
Do Not Forward, Do Not Return, Address Correction Requested.	No forwarding or return service is provided; provide a separate address correction notice; charge address correction fee; mail piece is disposed of by Postal Service.

Mailer endorsement	USPS action
Do Not Forward, Address Correction Requested, Return Postage Guaranteed [3].	No forwarding service is provided; return mail piece with new address or reason for nondelivery; charge return postage at the appropriate single piece fourth-class rate.

[1] Mailers may continue to use the endorsements "Do Not Forward" which has been changed to "Do not Forward, Do not Return" and the "Address Correction Requested" endorsement which will be eliminated after a period of one year. This grace period expires on December 24, 1988.
[2] The authorized abbreviation for this endorsement is FWD & RET Postage Guaranteed—ACR.
[3] The authorized abbreviation for this endorsement is Do Not Forward-ACR-RPG or DNF-ACR-Return Postage Guaranteed.

NOTE.—These regulations apply to mail associated with a customer change of address. Do not provide temporary change of address information at any time.

3. In 159.2, revise .212 and .24d to read as follows:

159.2 Forwarding.

* * * * *

.212 Unless endorsed *Do Not Forward, Do Not Return,* fourth-class mail is forwarded locally for 1 year free of charge. The addressee is charged forwarding postage for pieces forwarded non-locally. However, the addressee is not required to accept each article; it is the addressee's option to refuse any piece of fourth-class mail. Such refusal does not revoke the right to have other fourth-class mail forwarded. If the addressee intends to refuse to pay forwarding postage on all fourth-class mail and desires that the Postal Service not forward such mail, the addressee must request the postmaster to send Form 3546, *Notice to Change Forwarding Order,* to the postmaster at the old address, requesting that the forwarding of fourth-class mail be discontinued.

* * * * *

.24 Postage for Forwarding.

* * * * *

d. Fourth-class mail is subject to the collection of additional postage for nonlocal forwarding at the appropriate single-piece rate. Unless endorsed *Do Not Forward, Do Not Return,* all fourth-class will be delivered as directed when the old and new addresses are served by the same single-ZIP Coded or multi-ZIP Coded post office. Additional postage is not charged.

PART 790—ANCILLARY SERVICES (FOURTH-CLASS MAIL)

4. In 790, revise 791, 792 and 793 to read as follows:

790 Ancillary Services.

791 Forwarding and Return.

Unless endorsed *Do Not Forward, Do Not Return,* fourth-class mail will be forwarded locally for 1 year at no charge. (For forwarding purposes, local is defined as the same single-ZIP Coded or multi-ZIP Coded post office.) Unless specifically endorsed *Do Not Forward, Do Not Return* or unless the customer has filed a Form 3546, *Notice to Change Forwarding Order,* non-local forwarding for 1 year will be provided at an additional charge. Undeliverable fourth-class mail bearing no endorsement or the endorsement *Forwarding and Return Postage Guaranteed, Address Correction Requested* or *Forwarding and Return Postage Guaranteed* is forwarded, when the new address is known. Forwarding postage will be collected from the addressee if the mail piece is accepted. The recipient may refuse to pay the forwarding postage on any piece of fourth-class mail (and have the piece returned) and still continue to have other fourth-class mail forwarded. Form 3546 will be used only if the addressee intends to refuse to pay for forwarding on all fourth-class mail and requests the postmaster of the new address to notify the postmaster of the old address that forwarding service on fourth-class mail is not desired. The appropriate single-piece rates and conditions are applicable to forwarding and return of fourth-class items mailed at single piece, presort, and bulk rates. If the piece cannot be forwarded because the new address is not known, it will be given return service (see 792), unless endorsed *Do Not Forward, Do Not Return.* During months 13 through 18 mail pieces will be returned with the correct new (forwarding) address or the reason for nondelivery attached unless endorsed *Do Not Forward, Do Not Return.*

792 Return.

792.1 Endorsed and Unendorsed Pieces. Unless endorsed *Do Not Forward, Do Not Return,* all undeliverable fourth-class mail (after forwarding has been attempted) will be returned postage due to the sender (or the person designated by the sender) with the reason for nondelivery attached. No address correction fee is charged.

792.2 Pieces Bearing a Meter Stamp. When fourth-class mail bearing a postage meter stamp of a private mailer is received unaddressed and without return address, and delivery cannot be made, the piece must be returned to the post office of mailing. The reason for nondelivery will be attached without charging the address correction fee. The office of mailing will deliver the piece to the meter licensee on payment of the return postage.

793 Address Correction.

The addressee's new (forwarding) address, or the reason for nondelivery if the new address is not known, may be obtained by the sender either independently of or in combination with the return and forwarding services provided by 791 and 792. To obtain this service, the mailing piece must bear the endorsement: *Forwarding and Return Postage Guaranteed, Address Correction Requested;* or *Do Not Forward, Do Not Return, Address Correction Requested;* or *Do Not Forward, Address Correction Requested, Return Postage Guaranteed* according to the service desired. See Exhibit 159.151f for details. Temporary changes of address are not provided. The following conditions govern these services:

a. When a piece bears the endorsement *Do Not Forward, Do Not Return, Address Correction Requested;* Form 3579, *Undeliverable 2d, 3d, 4th Class Matter,* or a markup label is used to notify the sender. The address-correction fee is charged (See 712.2). Form 3579 or a markup label utilizing the customer's old address will be prepared for mailing to the sender in an envelope in the same manner that address correction notices are prepared for mailing to second-class publishers. *Exception:* When address labels are affixed to plastic wrappers, or a window-address format is used on a mail piece, making compliance with the foregoing instructions difficult, Form 3547, *Notice to Mailer of Correction in Address,* will be substituted to provide the requested information.

b. If a piece bearing the endorsement *Forwarding and Return Postage Guaranteed, Address Correction Requested* must be returned to the sender by the post office of original address because the piece cannot be forwarded, Form 3579 or a markup label is affixed to the piece, and it is returned to the sender at the applicable single-piece fourth-class postage for the piece. No address correction fee is charged.

c. If a piece bearing the endorsement *Forwarding and Return Postage Guaranteed, Address Correction Requested* is forwarded to the addressee, then Form 3547 is used by the post office of original address to furnish the sender with the new address. The address correction fee is charged (see 712.2).

d. Forwarding address information will not be provided for mail bearing an exceptional address format (see 122.422).

A transmittal letter making these changes in the pages of the Domestic Mail Manual will be published and will be transmitted to subscribers automatically. Notice of issuance of the transmittal letter will be published in the Federal Register as provided by 39 CFR, 111.3.

Fred Eggleston,
Assistant General Counsel, Legislative Division.

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-7

[FPMR Temp. Reg. A-25, Supp. 3]

Travel and Transportation Expense Payment System Using Contractor-Issued Charge Cards, Government Travel System (GTS) Accounts, and Travelers Checks

AGENCY: Federal Supply Service, GSA.
ACTION: Temporary regulation.

SUMMARY: This supplement amends FPMR Temp. Reg. A-25 to extend the expiration date and to cancel supplement 2 thereto.

DATES:
Effective date: October 24, 1987.
Expiration date: September 30, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. Charles T. Angelo, Director, Travel and Transportation Management Division (FBT), Washington, DC 20406 (FTS/(703) 557-1261).

SUPPLEMENTARY INFORMATION: GSA has determined that this rule is not a major rule for the purposes of Executive Order 12551 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more, a major increase in costs to consumers or others, or significant adverse effects. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and consequences of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101-7

Freight, Government property, Moving of household goods, Office relocations, Transportation.

1. The authority citation for Part 101-7 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c).

2. In 41 CFR Chapter 101, the following temporary regulation is added to the appendix at the end of Subchapter A to read as follows:

December 7, 1987.

Federal Property Management Regulations Temporary Regulation A-25, Supplement 3

To: Heads of Federal Agencies
Subject: Travel and transportation expense payment system using contractor-issued charge cards, Government travel system (GTS) accounts, and travelers checks.

1. *Purpose.* This supplement extends the expiration date of FPMR Temporary Regulation A-25.

2. *Effective date.* This regulation is effective October 24, 1987.

3. *Expiration date.* This supplement expires on September 30, 1988, unless sooner canceled or revised.

4. *Explanation of change.* The expiration date in paragraph 3 of FPMR Temporary Regulation A-25, Supplement 2, is revised to September 30, 1988.

T.C. Golden,
Administrator of General Services.

BILLING CODE 6820-24-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6771]

Suspension of Community Eligibility

AGENCY: Federal Emergency Management Agency, FEMA.
ACTION: Final rule.

SUMMARY: This rule lists communities, where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP), that are suspended on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If FEMA receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension data given in this rule, the suspension will be withdrawn by publication in the Federal Register.

EFFECTIVE DATES: The third date ("Susp.") listed in the fourth column.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646-2717, Federal Center Plaza, 500 C Street, Southwest, Room 416, Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended (42 U.S.C. 4022), prohibits flood insurance coverage as authorized under the National Flood Insurance Program (42 U.S.C. 4001-4128) unless an appropriate public body shall have adopted adequate floodplain management measures with effective enforcement measures. The communities listed in this notice no longer meet that statutory requirement for compliance with program regulations (44 CFR Part 59 *et seq.*). Accordingly, the communities will be suspended on the effective date in the fourth column. As of that date, flood insurance will no longer be available in the community. However, some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue their eligibility for the sale of insurance. A notice withdrawing the suspension of the communities will be published in the Federal Register. In the interim, if you wish to determine if a particular community was suspended on the suspension date, contact the appropriate FEMA Regional Office or the NFIP servicing contractor.

In addition, the Federal Emergency Management Agency has identified the

special flood hazard areas in these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the fifth column of the table. No direct Federal financial assistance (except assistance pursuant to the Disaster Relief Act of 1974 not in connection with a flood) may legally be provided for construction or acquisition of buildings in the identified special flood hazard area of communities not participating in the NFIP and identified for more than a year, on the Federal Emergency Management Agency's initial flood insurance map of the community as having flood-prone areas. (Section 202(a) of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column.

The Administrator finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary because communities listed in this final rule have been adequately notified. Each community receives a 6-month, 90-day, and 30-day notification addressed to the Chief Executive Officer that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. For the same reasons, this final rule may take effect within less than 30 days.

Pursuant to the provision of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, FEMA, hereby certifies that this rule if promulgated will not have a significant economic impact on a substantial number of small entities. As stated in Section 2 of the Flood Disaster Protection Act of 1973, the establishment of local floodplain management together with the availability of flood insurance decreases the economic impact of future flood losses to both the particular community and the nation as a whole. This rule in and of itself does not have a significant economic impact. Any economic impact results from the community's decision not to (adopt) (enforce) adequate floodplain management, thus placing itself in noncompliance of the Federal standards required for community participation. In each entry, a complete chronology of effective dates appears for each listed community.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Family Support Administration

45 CFR Parts 206 and 233

Alien Legalization; Application, Determination of Eligibility and Furnishing Assistance-Public Assistance Programs, Coverage and Conditions of Eligibility in Financial Assistance Programs Alien Legalization

AGENCY: Family Support Administration, HHS.

ACTION: Interim final rules.

SUMMARY: These interim final rules implement provisions of the Immigration Reform and Control Act of 1986, Pub. L. 99–603, as they relate to the eligibility determination requirements of aliens applying for assistance payments under the Aid to Families with Dependent Children (AFDC) program, under title IV–A of the Social Security Act (the Act); and the adult assistance programs for the aged, blind, and disabled under titles I, X, XIV, and XVI (AABD) in

Guam, Puerto Rico, and the Virgin Islands.

DATES: The interim final rules are effective December 24, 1987. Interested persons and agencies are invited to submit written comments concerning these regulations no later than February 22, 1988. We will consider all comments submitted and revise these rules if necessary.

ADDRESSES: Comments should be submitted in writing to the Administrator, Family Support Administration, Department of Health and Human Services, 5600 North Building, 300 Independence Ave., SW., Washington, DC 20201, or delivered to the Office of Family Assistance, Family Support Administration, Room B–428, Trans Point Building, 2100 Second Street, SW., Washington, DC, 20201 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Diann Dawson, Director, Division of Policy, Office of Family Assistance, Family Support Administration, Room B–424, 2100 Second Street SW., Washington, DC 20201, telephone (202) 245–3290.

SUPPLEMENTARY INFORMATION:

Legalization

Pursuant to section 245A(h) of the Immigration and Nationality Act (INA), as added by section 201 of the Immigration Reform and Control Act of 1986 (IRCA), Pub. L. 99–603, aliens who have continuously resided in the United States illegally since before January 1, 1982, can apply to the Immigration and Naturalization Service (INS) for an adjustment of their immigration status to that of lawful temporary resident. After a period of eighteen months in a temporary resident status, an alien can apply for adjustment to permanent resident status.

If the alien does not apply for such adjustment by the end of the thirty-first month after the alien is granted temporary resident status, or if adjustment is denied, the alien's status as a lawful temporary resident terminates, and the alien returns to an unlawful status.

Section 245A(h) explicitly disqualifies any alien who was granted lawful temporary resident status from eligibility for assistance payments under the AFDC program for a period of 5 years from the effective date of the receipt of such status. This disqualification period is maintained even though the temporary status may be changed to that of permanent status within the 5 year period. Accordingly, 45 CFR 233.50 is revised to indicate that this new group of aliens is temporarily disqualified from AFDC eligibility.

However, temporary resident alien applicants for assistance in the adult categories under title I, X, XIV and XVI (AABD) in Guam, Puerto Rico, and the Virgin Islands are not subject to the disqualification provisions of the statute. Cuban and Haitian entrants, as defined in paragraph (1) or (2)(A) of section 501(e) of Pub. L. 96–422, as in effect on April 1, 1983, whose status has been adjusted to that of lawful temporary resident are also not subject to the disqualification provision and, if otherwise eligible, are entitled to assistance.

IRCA section 302 adds new section 210 to the INA to provide for granting lawful temporary resident status and eventually permanent resident status to certain aliens who performed seasonal agricultural work in the United States during a specfied period of time. Special agricultural alien workers granted the temporary resident status are also temporarily disqualified for the 5 year period from assistance under the AFDC program; however, they are entitled to assistance, if otherwise eligible, under the adult programs in Guam, Puerto Rico, and the Virgin Islands.

In addition, IRCA section 121 amends section 1137 of the Social Security Act to provide that beginning October 1, 1988, as a condition of an individual's eligibility for assistance under the AFDC, territorial assistance, and Medicaid programs, a State must require an individual to declare in writing whether he is a citizen or national of the United States, and if not, whether he is in a satisfactory immigration status. An individual must produce documents to establish satisfactory immigration status and the State must verify the individual's status through an automated or other system made available by INS, unless the Secretary of HHS grants a waiver. Regulations implementing this section of IRCA will be published separately. The Department is also developing regulations to implement IRCA section 204, which appropriates funds for fiscal years 1988 through 1991 to reimburse the States for the costs of programs of public assistance, programs of public health assistance, and educational services provided to certain aliens whose status is adjusted under IRCA.

Disqualified aliens, pursuant to section 245A(h) of the Immigration and Nationality Act, who are either a parent or a sibling of an otherwise eligible child, will be excluded from assistance units in the same way that ineligible aliens have been excluded prior to the enactment of Public Law 99–603. However, IRCA section 201(b) provides that the income of a disqualified parent is considered available to his or her dependent child by using the stepparent deeming formula at section 402(a)(31) of the Social Security Act, 45 CFR 233.20(a)(3)(xiv). Accordingly, § 233.20 is revised to reflect this provision for deeming from the disqualified alien to his or her eligible child. Also, IRCA section 201(b) provides that where a disqualified alien is the brother or sister of a dependent child, the needs of the alien shall not be considered in determining the need of the dependent child. Therefore, 45 CFR 206.10 is revised to reflect that the needs and income of disqualified alien siblings are not considered in determining need of an otherwise eligible dependent child.

Regulatory Procedures

Justification for Dispensing with Notice of Proposed Rulemaking

The Administrative Procedure Act creates an exception to general notice and comment rulemaking procedures where the agency for good cause finds that those procedures are unnecessary. Since these regulations merely incorporate into current regulations the IRCA amendments to the Social Security Act without imposing additional obligations or requirements on States or the public, we believe notice and comment rulemaking is unnecessary. We are therefore implementing these regulations through interim final publication. In addition, this legislation was signed into law on November 6, 1986. INS has already implemented the application procedures for legalization in May 1987. Therefore interim final publication of these rules will assist States in handling applications for assistance from aliens whose status has been adjusted under IRCA.

Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be performed for any "major" rule. A "major" rule is defined as any rule that would result in annual effect on the national economy of $100 million or more; result in a major increase in costs or prices; or have significant adverse impacts on competition, employment, or productivity. The Department concludes that implementing the eligibility determination requirements of aliens for benefits of IRCA does not constitute a major rule within the meaning of E.O. 12291 because it does not have an effect on the economy of $100 million or more or otherwise meet the threshold criteria. The effect of the proposed rules is to promulgate the statutory provisions and other conforming procedures to effectively implement the requirements of the law. Any impacts on the economy are due to the IRCA statutory requirements and not as a result of these proposed rules. Accordingly, a regulatory impact analysis is not required.

Paperwork Reduction Act

These regulations do not have new recordkeeping or reporting requirements pursuant to the Paperwork Reduction Act of 1980.

Regulatory Flexibility Act

The Regulatory Flexibility Act requires that a regulatory flexibility analysis be performed for each rule with a significant economic impact on a substantial number of small entities. Small entities are defined by the Act to include small businesses, small non-profit organizations, and small government entities. The principal impact of these regulations are on States, which are not "small entities" within the meaning of the Act. We certify that this regulation will not, if promulgated, have a significant impact on a substantial number of small entities because it affects only the transfer of funds between the Federal Government and the States. Therefore, a regulatory flexibility analysis is not required.

Part 206 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

PART 206—APPLICATION, DETERMINATION OF ELIGIBILITY AND FURNISHING ASSISTANCE—PUBLIC ASSISTANCE PROGRAMS

1. The authority citation for Part 206 is revised to read as set forth below and the authority citations following all sections in Part 206 are removed:

Authority: Sections 402 and 1102 of the Social Security Act (42 U.S.C. 602 and 1302) and Pub. L. 97–248, 96 Stat. 324, and Pub. L. 99–603.

2. Section 206.10(a)(1)(vii)(B) is revised to read as follows:

§ 206.10 Application, determination of eligibility and furnishing of assistance.

(a) * * *
(1) * * *
(vii) * * *

(B) Any blood-related or adoptive brother or sister; *Exception:* needs and income of disqualified alien siblings, pursuant to § 233.50(c), are not considered in determining the eligibility and payment of an otherwise eligible dependent child.

* * * * * *

Part 233 of Chapter II, Title 45, Code of Federal Regulations is amended as set forth below:

PART 233—COVERAGE AND CONDITIONS OF ELIGIBILITY IN FINANCIAL ASSISTANCE PROGRAMS

1. The authority citation for Part 233 is revised to read as set forth below and the authority citations following all the sections in Part 233 are removed:

Authority: Sections 1, 402, 406, 407, 1002, 1102, 1402, and 1602 of the Social Security Act (42 U.S.C. 301, 602, 606, 607, 1202, 1302, 1352 and 1382 note), and Sections 6 of Pub. L. 94–114, 89 Stat. 579 and Part XXIII of Pub. L. 97–35, 95 Stat. 843, Pub. L. 97–248, 96 Stat. 324, and Pub. L. 99–603.

2. Section 233.20 is amended by redesignating paragraph (a)(3)(vi) as (a)(3)(vi)(A) and adding paragraph (q)(3)(vi)(B) to read as follows:

§ 233.20 Need and amount of assistance.

(a) * * *
(3) * * *
(vi) * * *

(B) Income of an alien parent, who is disqualified pursuant to § 233.50(c) is considered available to the otherwise eligible child by applying the stepparent deeming formual at 45 CFR 233.20(a)(3)(xiv).

* * * * * *

3. Section 233.50 is amended by adding a new paragraph (c) to read as follows:

§ 233.50 Citizenship and alienage.

* * * * * *

(c) An alien granted lawful temporary resident status pursuant to section 201 or 302, of the Immigration Reform and Control Act of 1986 (Pub. L. 99–603) who must be either:

(1) A Cuban and Haitian entrant as defined in paragraph (1) or (2)(A) of section 501(e) of Pub. L. 96–422, as in effect on April 1, 1983, or

(2) An adult assistance applicant for OAA, AB, APTD, or AABD, or

(3) An applicant for AFDC who is not a Cuban and Haitian entrant applicant under (1) above who was adjusted to lawful temporary resident status more than five years prior to application.

All other aliens granted lawful temporary or permanent resident status, pursuant to sections 201 or 302 of the Immigration Reform and Control Act of 1986, are disqualified for five years from the date lawful temporary resident status is granted.

BILLING CODE 4156–04–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 87–169; RM–5489, RM–5591, RM–6042]

Radio Broadcasting Services; Punta Gorda, Punta Rassa, and Franklin Park, FL

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 225C2 for Channel 224A at Punta Gorda, Florida, and modifies the Class A license for Station WQLM(FM) to specify the new channel at the request of the licensee, Ogden Broadcasting Company of Florida, Inc.; and allots Channel 249A to Punta Rassa, Florida, in response to a petition by Sea Breeze Broadcasting for a first FM channel at that community. The counterproposal filed by Christine

Harvel to allot Channel 222A to Franklin Park, Florida, has been dismissed at her request. With this action, this proceeding is terminated.

DATES: Effective February 1, 1988. The window period for filing applications on Channel 249A at Punta Rassa, Florida will open on February 2, 1988, and close on March 3, 1988.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87–169, adopted December 2, 1987 and released December 17, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

47 CFR Part 73

[MM Docket No. 87–29; RM–5594]

Radio Broadcasting Services; Eddyville, IA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document, at the request of "O"-Town Communications, allocates Channel 268C2 to Eddyville, Iowa, as the community's first local FM service. Channel 268C2 can be allocated in compliance with the Commission's minimum distance separation requirements with a site restriction of 2.8 kilometers (1.8 miles) northwest to avoid a short-spacing to the proposed allocation of Channel 269C2 to Fort Madison, Iowa. With this action, this proceeding is terminated.

DATES: Effective February 1, 1988. The window period for filing applications will open on February 2, 1988, and close on March 3, 1988.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 87–29, adopted December 2, 1988, and released December 17, 1988. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, NW, Suite 140, Washington, DC 20037.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. 81–11; Notice 24]

Lamps, Reflective Devices and Associated Equipment; Corrections

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Corrections.

SUMMARY: This notice corrects an error in the heading and an error in the text in the amendment published on September 14, 1987 to Federal Motor Vehicle Safety Standard No. 108 responsive to the petition by BMW of North America. The word "devises" was used instead of "devices". Language previously removed from paragraph S4.1.1.36(a)(2) was erroneously reinstated. It is therefore necessary to correct these errors.

FOR FURTHER INFORMATION CONTACT: Jere Medlin, Office of Rulemaking, NHTSA, Washington, DC 20590 (202–366–5276).

SUPPLEMENTARY INFORMATION: On September 14, 1987, the agency amended paragraph S4.1.1.36(a)(2) of 49 CFR 571.108 Motor Vehicle Safety Standard No. 108, *Lamps, Reflective Devices, and Associated Equipment* (52 FR 34654) to permit aiming pad configurations specified for sealed beam headlamps with circular lenses to be used on replaceable bulb headlamps. This action was taken pursuant to a proposal published on February 25, 1987 (52 FR 5563). For clarity's sake the entire text of S4.1.1.36(a)(2) was published, and not just the changes or additions to it. In both the proposal and final rule the paragraph began with the words "(2) The exterior face of the lens of each replaceable bulb headlamp * * *". However, S4.1.1.36(a)(2) had been amended in July 1986 to begin "(2) The lens of each replaceable bulb headlamp * * *" (51 FR 24152), and the words "exterior face of the" added on September 14 are incorrect and must be deleted.

In addition, the term "reflective devises" appeared in the title to the standard; the correct word is "devices".

Because the amendments are corrections they may be made effective immediately.

The engineer primarily responsible for this correction is Jere Medlin.

In consideration of the foregoing, 49 CFR Part 571 is amended as follows:

PART 571—[CORRECTED]

1. The authority citation for Part 571 continues to read as follows:

Authority: 15 U.S.C. 1392, 1401, 1403, 1407; delegation of authority at 49 CFR 1.50.

§ 571.108 [Corrected]

2. In the title of § 571.108, the word "devises" is changed to read "devices".

3. In the first sentence of paragraph (a)(2) of paragraph S4.1.1.36, the words "exterior face of the" are removed.

Issued on December 18, 1987.

Barry Felrice,

Associate Administrator for Rulemaking.

[FR Doc. 87–29525 Filed 12–23–87; 8:45 am]

BILLING CODE 4910–59–M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 672

[Docket No. 61225–7052]

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure; request for comments.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the shares of the total allowable catch (TAC) for sablefish that will be allocated to trawl gear in the Central and Western Regulatory Areas of the Gulf of Alaska for the 1988 fishing year are needed as bycatch amounts to support directed trawl fisheries for other groundfish species during the 1988 fishing year. The Secretary of Commerce is prohibiting directed fishing for sablefish in the Central and Western Regulatory Areas by persons using trawl gear during the 1988 fishing year. This action is necessary to prevent wastage of sablefish in the trawl fishery that would otherwise occur if the total share of the TAC assigned to trawl gear were reached prematurely, which would cause sablefish to be declared a prohibited species in the trawl fishery. This action is intended as a groundfish management measure that will conserve the sablefish resource.

DATES: Effective January 1, 1988. Comments are invited until January 15, 1988.

ADDRESSES: Comments should be addressed to Robert W. McVey, Director, Alaska Region (Regional Director), National Marine Fisheries Service, P.O. Box 021668, Juneau, Alaska 99802.

FOR FURTHER INFORMATION CONTACT: Ronald J. Berg (Fishery Management Biologists, NMFS), 907–586–7230.

SUPPLEMENTARY INFORMATION: The Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) governs the groundfish fishery in the exclusive economic zone in the Gulf of Alaska under the Magnuson Fishery Conservation and Management Act (Magnuson Act). Regulations implementing the FMP are at 50 CFR Part 672. Section 672.2 of the regulations defines the Western, Central, and Eastern Regulatory Areas in the Gulf of Alaska. The optimum yield for all groundfish species managed by the FMP is a range from 116,000 to 800,000 metric tons (mt). The Council adopted at its December 8–11, 1987 meeting, TACs for each species and apportionments thereof among domestic annual processing (DAP), joint venture processing (JVP), total allowable level of foreign fishing (TALFF), and reserves. TAC is synonymous with "target quota", a term proposed to be changed to "total allowable catch" under Amendment 16 to the FMP. This amendment is currently being reviewed by the Secretary of Commerce (Secretary) under Section 304 of the Magnuson Act. "Total allowable catch" is used in this notice to avoid confusion in the fishing industry, members of which are accustomed to this term. The Council has submitted the TACs and apportionments with the recommendation that the Secretary implement them. The Council adopted a TAC for sablefish equal to 28,000 mt, of which 12,540 mt and 4,060 mt will be distributed to the Central and Western Regualtory Areas, respectively. Under § 672.24(b)(2), twenty percent of the TAC in these two areas is allocated to vessels using trawl gear. Therefore, based on TAC's for the Central and Western Area that are proposed for 1988, these areas would be assigned 2,510 mt and 810 mt, respectively, of sablefish for trawl gear.

Some trawl vessels conduct directed fisheries for sablefish. Trawl vessels also conduct directed fisheries for pollock, Pacific cod, and flounders, and catch sablefish as a bycatch. Under § 672.24(b)(3)(i), if the Regional Director determines that the share of sablefish assigned to trawl gear in a regulatory area may be taken before the end of the year, the Secretary may prohibit directed fishing by vessels using trawl gear for the remainder of the year, thus saving some sablefish bycatch amounts to support other directed fisheries. Since sablefish bycatches would be retainable, wastage is reduced.

Under § 672.24(b)(3)(ii), if the share of the sablefish TAC assigned to trawl gear in either the Central or Western Regulatory Area is reached, further catches of sablefish must be treated as a prohibited species by trawl gear for the remainder of the year in the applicable management area. In this event, further catches are discarded at sea, which can result in substantial waste of an economically valuable groundfish resource.

In 1987, trawl vessels reached their allocated 1,760 mt share of sablefish in the Central Regulatory Area on May 5. From that date, operators of trawl vessels were required to discard sablefish until the end of the year. In the Western Regulatory Area where the sablefish trawl quota was 600 mt,

VOL 52 ISS 247 DEC 24 1987 UMI

operators of trawl vessels were required to treat sablefish as a bycatch-only species after March 21, when the Regional Director prohibited further directed fishing for sablefish with trawl gear. Smaller amounts of effort in the Western Regulatory Area by trawl vessels and the smaller amounts of sablefish available in this area favored reduced sablefish catches such that sablefish were not declared a prohibited species in the Western Regulatory Area in 1987.

The Regional Director finds that directed fishing on sablefish by trawl vessels in the Gulf of Alaska is likely early in the 1988 fishing year. At the same time, he finds that sablefish bycatches by vessels fishing for other groundfish species using trawl gear will be quite high in both the Central and Western Regulatory Areas. If trawl vessels reach their sablefish assignments early, sablefish would be declared a prohibited species early in the year, and significant wastage would occur.

The Regional Director's findings are based in part on two facts. First, the price paid to fishermen for sablefish in 1987 was about $1.00 per pound, on average, and a price of this magnitude is expected in 1988, which will continue to attract significant trawl effort early in the year. Second, the Council adopted at its December 8–11, 1987 meeting, DAP quotas for pollock, Pacific cod, and flounder in the Central and Western Regulatory Areas, which are significantly higher than those in effect at the end of the 1987 fishing year. Since sablefish were declared a prohibited species in the Central Regulatory Area on May 5, 1987, and a bycatch-only species in the Western Regulatory Area on March 21, 1987, at levels of domestic fishing effort smaller than those expected in 1988, reaching all of the sablefish trawl assignment seems certain in the Central Regulatory Area and is highly likely in the Western Regulatory Area. If sablefish assignments are reached as early in the year as they were in 1987, further sablefish catches in the trawl fisheries would be required to be discarded, resulting in significant economic waste.

The Regional Director has determined that the amounts of sablefish expected to be assigned to trawl gear in the Central and Western Regulatory Areas, 2,510 mt and 810 mt, respectively, will be required to support directed trawl fishing for other groundfish species in 1988. Therefore, under § 672.24(b)(3)(i), the Secretary, in order to provide adequate bycatch amounts of sablefish to ensure continued groundfish fishing by trawl vessels on other species, is prohibiting directed fishing for sablefish as defined at § 672.2 by operators of trawl vessels during the 1988 fishing year.

The agency finds for good cause that it is impracticable and contrary to the public interest to provide prior notice and opportunity for comment or to delay the effectiveness of this action. This prohibition on directed fishing for sablefish with trawl gear must take effect by January 1, 1988 in order to minimize discards of sablefish as a prohibited species. Public comments on the necessity for this action are invited for a period of 15 days after the effective date of this notice. Public comments on this notice of closure may be submitted to the Regional Director at the address above until January 15, 1988. If written comments are received which oppose or protest this action, the Secretary will reconsider the necessity for this action, and as soon as practicable after that reconsideration, will either publish in the **Federal Register** a notice of continued effectiveness of the adjustment, responding to comments received; or modify or rescind the adjustment.

Classification

This action is taken under § 672.24 and is in compliance with Executive Order 12291.

Proposed Rules

Federal Register
Vol. 52, No. 247
Thursday, December 24, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF ENERGY

10 CFR Parts 1035 and 1036

Non-procurement Debarment and Suspension

AGENCY: Department of Energy.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Energy (DOE) proposes establishment of a new regulation in 10 Code of Federal Regulations (CFR) Part 1036 for nonprocurement debarment and suspension which supercedes the coverage in 10 CFR Part 1035 as it relates to non-procurement debarment and suspension.[1] This rule is proposed in order to comply with Executive Order 12549 and is based on the Office of Management and Budget (OMB) final guidelines on non-procurement suspension and debarment issued on May 26, 1987.

DATE: To be assured of consideration, comments on the proposed rule must be received on or before February 22, 1988. Comments should refer to specific sections in the proposed rule.

ADDRESS: All written comments should be addressed to Department of Energy, Procurement and Assistance Management Directorate, Business Clearance Division (MA–441), 1000 Independence Avenue SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Thomas Brown, Department of Energy; Procurement and Assistance Management Directorate (MA–441), 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–9075

Carol A. Cowgill, Department of Energy, Office of the Assistant General Counsel for Procurement and Finance (GC–34), 1000 Independence Avenue SW., Washington, DC 20585, (202) 586–6502.

[1] For other documeins concerning non-procurement debarment and suspension see the Federal Register of Tuesday, October 20, 1987 (52 FR 39015–39062 and 39198–39204.

VII. Public Comments.
List of Subjects in 10 CFR Part 1036

I. Background

Executive Order 12549, "Debarment and Suspension," was signed by President Reagan on February 18, 1986 and was published February 21, 1986 (51 FR 6370–71).

On February 21, 1986, OMB published proposed guidelines covering the subjects indicated in section 6 of E.O. 12549, including: Coverage, Governmentwide criteria, and minimum due process procedures (51 FR 6372–79). This guidance was issued in regulation format as a model rule for use by the executive departments and agencies in preparing the agency regulations called for by section 3 of the Order.

The final guidelines were issued on May 26, 1987 and published May 29, 1987 (52 FR 20360–69).

II. Proposed Rule

Section 3 of E.O. 12549 directs Federal agencies to issue regulations governing implementation of the Order; the regulations must be consistent wtih these guidelines. DOE proposes to essentially adopt the OMB guidelines.

DOE's proposed rules implement section 3 of E.O. 12549 by:

(1) Prescribing the programs and activities that are covered by the Order;

(2) Prescribing the criteria and procedures that DOE shall use in implementing the Order;

(3) Providing for the listing of debarred and suspended participants, participants who voluntarily exclude themselves from participation in covered transactions, and participants declared ineligible; and

(4) Setting forth the consequences of the actions under paragraph (3) of this section.

There are two areas within the OMB guidelines, "Coverage" (§ 1036.110(a)(1)) and "Responsibilities of DOE" (§ 1036.505(e)) which allow for agency discretion. Public comments are especially invited on these two sections which are discussed below.

The scope of the final OMB guidelines published on May 29, 1987 covered direct and indirect costs but left to agency discretion whether to limit coverage (that is, the responsibility to check the consolidated list or certification) to items charged as direct costs. This notice limits coverage in § 1036.110(a)(1)) only to direct cost activities because extending coverage to indirect costs is administratively complicated and may impose additional paperwork burden on the public.

The guidelines published on May 29, 1987 allowed agency discretion to determine when agencies would require certification by prospective nonprocurement participants. The proposed rule in § 1036.505(e) permits certification by all prospective nonprocurement participants receiving awards of $25,000 or less which alleviates the need for participants to check the DOE and GSA lists. The $25,000 threshold is consistent with the small purchase threshold in the proposed Government-wide common rule for grants to state and local governments and with the Federal Acquisition Regulation (FAR). The proposed certification appears at § 1036.505(f).

DOE has supplemented the final OMB guidelines with existing DOE rules and procedures in §§ 1036.112, 1036.310, 1036.320, 1036.410, and Subpart F.

The existing DOE rules used to supplement the OMB guidelines were originally promulgated in 10 CFR Part 1035. A table showing which portions of 10 CFR Part 1035 were incorporated into the proposed 10 CFR Part 1036 is shown below. While most of the 10 CFR Part 1035 language is repeated verbatim some editorial changes have been made to make it consistent with Part 1036.

Existing 10 CFR Part 1035 Reference (sections)	Corresponding 10 CFR 1036 Reference (sections)
1035.2	1036.112
1035.5(c)	1036.310(a)

1035.10	1036.320

BEST COPY AVAILABLE

Existing 10 CFR Part 1035 Reference (sections)	Corresponding 10 CFR 1036 Reference (sections)
1035.5(c)	1036.410(a)
1035.6	1036.410(b)
1035.6 (a) thru (i)	1036.410(b) (1) thru (9)
1035.8	1036.600
1035.7	1036.605
1035.15	1036.610
1035.13	1036.615

The non-procurement debarment and suspension coverage in 10 CFR Part 1035 will be deleted at the time the proposed rule in 10 CFR Part 1036 becomes final.

Section 1036.325(a) indicates that if a suspension precedes a debarment, the suspension period may be considered in determing the debarment period. The suspension period may include the DOE-wide suspension during a proposed debarment (see § 1036.315) as well as a Governemnt-wide suspension.

III. Review Under the Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be prepared for "major" rules which are defined in the Order as any rule that has an annual effect on the national economy of $100 million or more, or certain other specified effects.

DOE has determined that this regulation will not have an annual economic impact of $100 million or more or the other effects listed in the Order. For this reason, we have determined that this proposed rule is not a major rule within the meaning of the Order.

IV. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 605(b)) requires that, for each rule with a "significant economic impact on a substantial number of small entities," an analysis be prepared describing the rule's impact on small entities and identifying any significant alternatives to the rule that would minimize the economic impact on small entities.

DOE has determined that this regulation will not have a significant economic impact on a substantial number of small entities. Consequently, no Regulatory Flexibilty Analysis has been or will be prepared.

V. Review Under the Paperwork Reduction Act

There are no information collection or recordkeeping burdens imposed by this rule.

VI. Review Under the National Environmental Policy Act

DOE has concluded that promulgation of this rule would not represent a major Federal action having significant impact on the human environment under the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 et seq. (1976)), the Council on Environmental Quality Regulations (40 CFR Parts 1500 through 1508), and the DOE guideline (10 CFR Part 1021) and, therefore, does not require an environmental impact statement or an environmental assessment pursuant to NEPA.

VII. Public Comments

Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments with respect to the proposed changes set forth in this notice. Comments should be submitted in writing to the address indicated in the "ADDRESS" section of this notice. All comments received will be available for public inspection in the DOE Public Reading Room, Room 1E-190, Forrestal Building, 1000 Independence Ave., SW., Washington, DC 20585, between the hours of 9 a.m. and 4 p.m., Monday through Friday, except Federal holidays. All written comments received by February 22, 1988, will be fully considered prior to publication of a final rule resulting from this proposal.

The Department has concluded that this proposed rule does not involve a substantial issue of fact or law and that the proposed rule will not have a substantial impact on the nation's economy or a large number of individuals or businesses. Therefore, pursuant to Public Law 95–91, the DOE Organization Act, the Department does not plan to hold a public hearing on this proposed rule.

List of Subjects in 10 CFR Parts 1035 and 1036

Administrative practice and procedure, Debarment and suspension, Grants/energy, Cooperative agreements/energy, Loans/energy.

Barton J. Roth,

Director, Procurement and Assistance Management Directorate.

For the reasons set out in the preamble, Title 10 of the CFR is proposed to be amended as set forth below

1. Part 1036 is added to read as follows:

PART 1036—DEBARMENT AND SUSPENSION (NON-PROCUREMENT)

Subpart A—General

Sec.
1036.100 Purpose.
1036.110 Scope.
1036.112 Applicability.
1036.115 Policy.
1036.120 Definitions.

Subpart B—Effect of Action
1036.200 Debarment or suspension.
1036.205 Voluntary exclusion.
1036.210 Ineligible persons.
1036.215 Exception provision.
1036.220 Continuation of current awards.
1036.225 Failure to adhere to restrictions.

Subpart C—Debarment
1035.300 General.
1036.305 Causes for debarment.
1036.310 Procedures for debarment.
1036.315 Effect of proposed debarment.

Authority: Secs. 644 and 646, Pub. L. 95–91, Stat. 599 (42 U.S.C. 7254, and 7256); and Executive Order 12549 51 FR 6370, 3 CFR 1986 Comp., p. 189; OMB Guidelines for Non-procurement Debarment and Suspension, 52 FR 20360.

Subpart A—General

§ 1036.100 Purpose.

Executive Order 12549 provides that, to the extent permitted by law, Executive departments and agencies shall participate in a system for debarment and suspension from programs and activities involving Federal financial and nonfinancial assistance and benefits. Debarment or suspension of a participant in a program by one agency shall have Government-wide effect.

§ 1036.110 Scope.

(a) *Covered transactions.* These rules apply to Department of Energy (DOE) domestic assistance described below:

(1) *General.* Covered transactions (whether by a Federal agency, recipient, subrecipient, or intermediary) include, except as noted in paragraph (a)(3) of this section: grants, cooperative agreements, scholarships, fellowships, loans, loan guarantees, subsidies, insurance, payments for specified use,

and subcontracts and transactions at any tier that charged as direct costs, regardless of type (including subtier awards under awards which are statutory entitlement or mandatory awards); and specially covered activities identified in paragraph (a)(2) of this section.

(2) *Specially covered activities of the Departments of Agriculture, and Housing and Urban Development, and the Veterans Administration.* [Reserved]

(3) *Exceptions.* The following transactions are covered transactions: statutory entitlement or mandatory awards (but not subtier awards thereunder which are not themselves mandatory); benefits to an individual as a personal entitlement without regard to the individual's present responsibility (but benefits received in an individual's business capacity are not excepted); incidental benefits derived from ordinary governmental operations; and, other transactions where the application of Executive Order 12549 and these rules would be prohibited by law.

(b) *Relationship to other actions.* This section § 1036.110, describes the types of activities and transactions to which a debarment or suspension under the rules will apply. Subpart B, Effect of Action, § 1036.200, and Subpart F, § 1036.615 set forth the consequences of a debarment or suspension. Those consequences would apply only with respect to participants in the covered transactions and activities described in § 1036.110. Section 1036.330, Scope of debarment, and § 1036.420, Scope of suspension, govern the extent to which a specific participant or organizational elements of a participant would be automatically included within a debarment or suspension action, and the conditions under which additional affiliates or persons associated with a participant may also be brought within the scope of the action.

(c) *Relationship to DOE acquisition activities.* Debarment and suspension of Federal procurement contractors and subcontractors are covered by the FAR, 48 CFR Subpart 9.4. Debarment and suspension of DOE procurement contractors is covered by the rules in 10 CFR Part 1035.

§ 1035.112 Applicability.

The provisions of this part apply to all covered transaction debarment and suspension actions initiated by DOE on or after the effective date of this part.

§ 1036.115 Policy.

(a) In order to protect the public interest, it is the policy of DOE to conduct business only with responsible persons. Debarment and suspension are discretionary actions that, taken in accordance with Executive Order 12549 and these rules, are appropriate means to effectuate this policy.

(b) Debarment and suspension are serious actions which shall be used only in the public interest and for the Federal Government's protection and not for purposes of punishment. DOE may impose debarment or suspension for the causes and in accordance with the procedures set forth in this part.

§ 1036.120 Definitions.

For purposes of this part—

"Adequate evidence" means information sufficient to support the reasonable belief that a participant's act or omission has occurred.

"Affiliate." Persons are affiliates of one another if, directly or indirectly, one owns, controls, or has the power to control the other, or a third person owns, controls, or has the power to control both.

"Agency" means any executive department, military department or defense agency or other agency of the executive branch, excluding the independent regulatory agencies.

"Awardee" means any organization of individual that:

(a) Submits proposals for, or is awarded, or reasonably may be expected to submit proposals for, or be awarded a DOE agreement; or

(b) Conducts business with DOE as an agent or representative of an awardee.

"Control" means the power to exercise, directly or indirectly a controlling influence over the management, policies, or activities of a person, whether through the ownership of voting securities, through one or more intermediary persons, or otherwise. For purposes of actions under these guidelines, a person who owns or has the power to vote more than 25 percent of the outstanding voting securities of another person, or more than 25 percent of total equity if the other person has no voting securities, is presumed to control. Such presumption may be rebutted by evidence to the contrary. Other indicia of control include, but are not limited to: Interlocking management or ownership; identity of interests among family members; shared facilities and equipment; common use of employees; and, establishment following the debarment, suspension, or other exclusion of a participant, of an organization or entity which is to operate in the same business or activity and to have substantially the same management, ownership, or principal employees as the debarred, suspended or excluded participant.

"Conviction" means a judgment or conviction of a criminal offense by any court of competent jurisdiction, whether entered upon a verdict or a plea, including a plea of nolo contendere.

"Debarment" means an action taken by the DOE debarring official in accordance with these rules to exclude a person from participating in covered transactions. A person so excluded is "debarred."

"Debarring official" means an agency head or a designee authorized by the agency head to impose debarment. The DOE debarring official is the Director, Procurement and Assistance Management Directorate.

"Director" means the Director, Procurement and Assistance Management Directorate, DOE.

"DOE" means the Department of Energy, including the Federal Energy Regulatory Commission.

"DOE List" means the DOE Consolidated List of Debarred, Suspended, Ineligible and Voluntarily Excluded Awardees maintained by DOE in accordance with § 1036.610 of this part.

"GSA List" means the GSA Consolidated List which is a list compiled, maintained and distributed by the General Services Administration (GSA) containing the names and other information about participants who have been debarred, suspended, or voluntarily excluded under Executive Order 12549 and these regulations and those who have been determined to be ineligible.

"Indictment" means an indictment for a criminal offense. An information or other filing by competent authority charging a criminal offense shall be given the same effect as an indictment.

"Ineligible" means excluded from participation in covered transactions, programs, or agreements pursuant to statutory, Executive order, or regulatory authority other than Executive Order 12549 and these rules; for example, excluded pursuant to the Davis-Bacon Act and its related statutes and implementing regulations, the Equal Employment Opportunity Acts and Executive orders, the Buy American Act of the Environmental Protection Acts and Executive orders.

"Legal proceedings" means any criminal proceeding or any civil judicial proceeding to which the Federal Government or a State or local government or quasi-governmental authority is a party. The term includes appeals from such proceedings.

"Notice" means a written communication served in person or sent by certified mail, return receipt

requested, or its equivalent, to the last known address of a party, its identified counsel, its agent for service or process, or any partner, officer, director, owner, or joint venturer of the party. Notice, if undeliverable, shall be considered to have been received by the addressee five days after being properly sent to the last address known by DOE.

"Participant" means any person who submits proposals for, receives an award or subaward or performs services in connection with, or reasonably may be expected to be awarded or to perform services in connection with, a covered transaction. This term also includes any person who conducts business with a Federal agency as an agent or representative of another participant.

"Person" means any individual, corporation, partnership, association, unit of government or legal entity however organized, including any subsidiary of any of the foregoing.

"Preponderance of the evidence" means proof by information that, compared with that opposing it, leads to the conclusion that the fact at issue is more probably true than not.

"Proposal" means a solicited or unsolicited bid, application, request, invitation to consider or similar communication by or on behalf of a person seeking a benefit, directly or indirectly, under a covered transaction.

"Respondent" means a person against whom a debarment or suspension action has been initiated.

"Subsidiary" means any corporation, partnership, association or legal entity however organized, owned or controlled by another person.

"Suspending official" means an agency head or a designee authorized by the agency head to impose suspension. The DOE suspending official is the Director, Procurement and Assistant Management Directorate.

"Suspension" means an action taken by the DOE suspending official in accordance with this part to immediately exclude a person from participating in covered transactions for a temporary period, pending completion of an investigation and such legal or debarment proceedings as may ensue. A person so excluded is "suspended."

"Voluntary exclusion" means a status of nonparticipation or limited participation in covered transactions assumed by a person pursuant to the terms of a settlement.

Subpart B—Effect of Action

§ 1036.200 Debarment or suspension.

(a) Except to the extent prohibited by law, a person's debarment or suspension shall be effective throughout the executive branch of the Federal Government. Except as provided in § 1036.215, persons who are debarred or suspended under these rules are excluded from participation in all covered transactions of all agencies for the period of their debarment or suspension. DOE and DOE participants shall not make awards to or agree to participation by such debarred or suspended persons during such period. (See also § 1036.615)

(b) In addition, persons who are debarred or suspended are excluded from participation in or under any covered transaction in any of the following capacities; as an owner or partner holding a controlling interest, director, or officer of the participant; as a principal investigator, project director, or other position involved in management of the covered transaction; as a provider of federally-required audit services; in any other position to the extent that the incumbent is responsible for the administration of Federal funds; or in any other position charged as a direct cost under the covered transaction.

§ 1036.205 Voluntary exclusion.

Participants who accept voluntary exclusions under § 1036.320 are excluded in accordance with the terms of their settlement; their listing, pursuant to Subpart E of this part, is for informational purposes. Awarding agencies and participants must contact DOE to ascertain the extent of the exclusion.

§ 1036.210 Ineligible persons.

Persons who are ineligible are excluded from participation in covered transactions, programs, or agreements in accordance with the applicable statutory, executive order, or regulatory authority.

§ 1036.215 Exception provision.

DOE may grant an exception permitting a debarred, suspended, or excluded person to participate in a particular transaction upon a written determination by the Director setting forth the compelling reason(s) for deviating from the Presidential policy established by Executive Order 12549. Exceptions to this policy shall be granted only infrequently. Exceptions shall be reported in accordance with § 1036.505.

§ 1036.220 Continuation of current awards.

(a) Notwithstanding the debarment, suspension, voluntary exclusion or ineligible status of any person, DOE and DOE participants may continue agreements in existence at the time the person was debarred, suspended, declared ineligible or voluntarily excluded. A decision as to the type of termination action, if any, to be taken should be made only after thorough review to ensure the propriety of the proposed action.

(b) DOE and DOE participants shall not make continuation or renewal awards or extend the duration of current agreements with any person who is debarred, suspended, declared ineligible or under a voluntary exclusion, except as provided in § 1036.215.

§ 1036.225 Failure to adhere to restrictions.

Doing business with a debarred, suspended or otherwise excluded person, in connection with a covered transaction, where it is known or reasonably should have been known that the person is debarred, suspended or otherwise excluded from participation in such transaction, except as permitted under these rules, may result in disallowance of costs, annulment or termination of award, issuance of a stop work order, debarment or suspension, or other remedies as appropriate.

Subpart C—Debarment

§ 1036.300 General.

The debarring official may debar a participant for any of the causes in § 1036.305, using procedures established in accordance with §§ 1036.310, 1036.600, and 1036.605. The existence of a cause for debarment, however, does not necessarily require that the participant be debarred; the seriousness of the participant's acts or omissions and any mitigating factors shall be considered in making any debarment decision.

§ 1036.305 Causes for debarment.

Debarment may be imposed in accordance with the provisions of §§ 1036.300, 1036.310, 1036.600, and 1036.605 for:

(a) Conviction of or civil judgment for any offense indicating a lack of business integrity or honesty which affects the present responsibility of a participant, including but not limited to:

(1) Fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public or private agreement;

(2) Bribery, embezzlement, false claims, false statements, falsification or destruction of records, forgery, obstruction of justice, receiving stolen property, or theft; or

(3) Unlawful price fixing between competitors, allocation of customers between competitors, bid rigging, or any other violation of Federal or State antitrust laws that relates to the submission of bids or proposals.

(b) Violation of the terms of a public agreement so serious as to affect the present responsibility of a participant, including but not limited to:

(1) A willful or material failure to perform under one or more public agreements;

(2) A history of substantial noncompliance with the terms of one or more public agreements; or

(3) A willful or material violation of a statutory or regulatory provision or requirement applicable to a public agreement.

(c) Any of the following causes:

(1) Debarment or equivalent exclusionary action by any public agency or instrumentality for causes substantially the same as provided for by § 1036.305;

(2) Doing business with a debarred; suspended or otherwise excluded person, in connection with a covered transaction, where it is known or reasonably should have been known that the person is debarred, suspended or otherwise excluded from participation in such transactions;

(3) Conduct indicating a lack of business integrity or honesty which affects the present responsibility of a participant;

(4) Loss or denial or the right to do business or practice a profession under circumstances indicating a lack of business integrity or honesty or otherwise affecting the present responsibility or a participant;

(5) Failure to pay a debt (including disallowed costs and overpayments) owed to DOE or instrumentality, provided the debt is uncontested by the debtor or, if contested, provided that the debtor's legal and administrative remedies have been exhausted; or

(6) Violation of a material provision of a voluntary exclusion or of any settlement of a debarment or suspension action.

(d) Any other cause of so serious or compelling a nature that it affects the present responsibility of a participant.

§ 1036.310 Procedures for debarment.

(a) *Investigation and referral.* DOE offices responsible for the award and administration of agreements are responsible for reporting to both the Procurement and Assistance Management Directorate and the Inspector General, DOE, information about possible fraud, waste, abuse, or other wrongdoing which may constitute or contribute to a cause(s) for debarment or suspension under this part. Participants and persons performing under agreements awarded by DOE shall be required to report such information to the contracting officer and to the Inspector General, DOE.

(b) *Proposed debarment notices.* When the Director, after consultation with legal counsel, determines that causes exist to propose debarment of a participant or affiliate, the Director shall send the respondent a notice containing, as appropriate, the following information:

(1) That a debarment is being proposed.

(2) The reasons for the proposed debarment in terms sufficient to put the respondent on notice of the conduct or transaction(s) upon which the proposed debarment is based, except that the notice shall omit any information which, if disclosed, would prejudice an ongoing civil or criminal investigation or a pending or contemplated legal proceeding, or would compromise national security.

(3) The cause(s) relied upon under § 1036.305 of this part for the proposed debarment.

(4) That within 30 days after receipt of the notice, the respondent may submit, or make a written request for an opportunity to submit, to the Director or designee, information and argument in opposition to the proposed debarment, including any additional specific information that may raise a genuine dispute over the material facts. The submission in opposition may be made in person, in writing, or through a representative.

(5) DOE's procedures governing debarment decisionmaking (see § 1036.600).

(6) The effects of the proposed debarment (§ 1036.315) and the effects of a final debarment (§ 1036.615). If a notice of proposed debarment is issued to a participant or affiliate who is not suspended, the notice shall state that, for purposes of affected DOE agreements and subagreements, the proposed debarment shall have the effect of a suspension for DOE only.

(7) The respondent's name and address have been placed on the DOE List and the GSA List.

(c) *Submission in opposition.* Within 30 days after receipt of the notice of proposed debarment, the respondent may submit, in person, in writing, or through a representative, information and argument in opposition to the proposed debarment. A request for a meeting should be sent to the Director. (See § 1036.600(c)).

(d) *Additional proceedings as to disputed material facts.* (1) In actions not based upon a conviction or judgment, if the Director determines that there exists a genuine dispute over facts material to the proposed debarment, respondent(s) shall be afforded an opportunity to appear, *pro se* or with counsel, submit documentary evidence, present witnesses, and confront any person DOE presents. (See § 1036.600(d)).

(2) [Reserved]

(e) *Debarring official's decision*—(1) *No additional proceedings necessary.* In actions based upon a conviction or judgment, or in which there is no genuine dispute over material facts, the Director shall make a decision on the basis of all the information in the administrative record, including any submissions made by the respondent. The decision shall be made within 45 days after receipt of any information and argument submitted by the respondent, unless the debarring official extends this period for good cause.

(2) *Additional proceedings necessary.* In actions in which additional proceedings are necessary to determine disputed material facts, the Director shall base the decision on the facts as found, together with any information and argument submitted by the respondent and any other information in the administrative record.

(f) *Standard of evidence.* In any contested action, the cause for debarment must be established by a preponderance of the evidence. In any contested action in which the proposed debarment is based upon a conviction or civil judgment, the standard shall be deemed to have been met.

(g) *Notice of debarring official's decision.* (1) If the Director decides to impose debarment, the respondent shall be given prompt notices.

(i) Referring to the notice of proposed debarment, the meeting, and the fact-finding conference;

(ii) The Director's findings of fact and conclusions of law;

(iii) Specifying the reasons for debarment;

(iv) Stating the period of debarment, including effective dates; and

(v) Advising that the debarment is effective for covered transactions throughout the executive branch of the Federal Government unless an agency head or a designee authorized by an agency head makes the determination referred to in § 1036.215. The decision may limit the debarment or suspension action to affected covered transactions involving particular commodities, products, services, or forms of energy, or

to projects or work performed in specified geographic regions;

(vi) The names and addresses of the respondents that will be placed on the DOE List;

(vii) A copy of the debarment notice was sent to GSA and that the respondent's name and address will be addressed to the GSA List; and

(viii) If less than an entire organization is debarred, the identity or description of the organizational element(s) or individual(s) included within the scope of the debarment.

(2) If the Director decides not to impose debarment, the respondent shall be given prompt notice of that decision. A decision not to impose debarment shall be without prejudice to a subsequent imposition of debarment by any other agency.

§ 1036.315 Effect of proposed debarment.

Upon issuance of a notice of proposed debarment and until the final debarment decision is rendered, DOE shall not make any new, continuation, or renewal awards to the respondent. DOE may waive this exclusion pending a debarment decision upon a written determination by the debarring official identifying the reasons for doing so. In the absence of such a waiver, the provisions of § 1036.215 allowing exceptions for particular transactions may be applied.

§ 1036.320 Voluntary exclusion.

At any time prior to the issuance of a final decision under § 1036.310(e), the Director may, in the public interest, agree, in writing, to terminate a suspension or withdraw a proposed debarment on the conditions that the respondent voluntarily refrain from attempting to obtain, and from entering into, one or more types of DOE or other Federal covered transactions. Failure to observe such conditions shall be an independent cause for debarment or suspension. The name and address of the respondent who is a party to a voluntary exclusion shall be placed on the DOE List and GSA List. The Director shall not enter into a voluntary exclusion if the proposed debarment is based on conviction of or civil judgment for any of the causes in § 1036.305(a), or if the suspension was based on an indictment for any of the causes in § 1036.205(a).

§ 1036.325 Period of debarment.

(a) Debarment shall be for a period commensurate with the seriousness of the cause(s). Generally, a debarment should not exceed three years. Where circumstances warrant, a longer or indefinite period of debarment may be imposed. If a suspension precedes a debarment, the suspension period may be considered in determining the debarment period.

(b) The Director may extend an existing debarment for an additional period, if that official determines that an extension is necessary to protect the public interest. However, a debarment may not be extended solely on the basis of the facts and circumstances upon which the initial debarment action was based. If debarment for an additional period is determined to be necessary, the procedures of § 1036.310 shall be followed to extend the debarment.

(c) The Director may reduce the period or scope of debarment, upon the respondent's request, supported by documentation, for reasons such as:

(1) Newly discovered material evidence;

(2) Reversal of the conviction or judgment upon which the debarment was based;

(3) Bona fide change in ownership or management;

(4) Elimination of other causes for which the debarment was imposed; or

(5) Other reasons the Director deems appropriate.

§ 1036.330 Scope of debarment.

(a) *Scope in general.* (1) Debarment of a person or affiliate under these rules constitutes debarment of all its subsidiaries, divisions, and other organizational elements unless the debarment decision is limited by its terms to one or more specifically identified individuals or organizational elements or to specific types of transactions.

(2) The debarment action may include any other affiliate of the participant that is—

(i) Specifically named and

(ii) Given notice of the proposed debarment and an opportunity to respond.

(See § 1306.310).

(b) *Imputing conduct.* For purposes of determining the scope of debarment, conduct may be imputed as follows:

(1) *Conduct imputed to participant.* The fraudulent, criminal, or other seriously improper conduct of any officer, director, shareholder, partner, employee, or other individual associated with a participant may be imputed to the participant when the conduct occurred in connection with the individual's performance of duties for or on behalf of the participant, or with the participant's knowledge, approval, or acquiescence. The participant's acceptance of the benefits derived from the conduct shall be presumptive evidence of such knowledge, approval, or acquiescence.

(2) *Conduct imputed to individuals associated with participant.* The fraudulent, criminal or other seriously improper conduct of a participant may be imputed to any officer, director, shareholder, partner, employee, or other individual associated with the participant who participated in, knew of, or had reason to know of the participant's conduct.

(3) *Conduct of one participant imputed to other participants in a joint venture.* The fraudulent, criminal or other seriously improper conduct of one participant in a joint venture or similar arrangement may be imputed to other participants if the conduct occurred for or on behalf of the joint venture or similar arrangement or with the knowledge, approval, or acquiescence of these participants. Acceptance of the benefits derived from the conduct shall be presumptive evidence of such knowledge, approval or acquiesence.

Subpart D—Suspension

§ 1036.400 General.

(a) The suspending official may suspend a participant for any of the causes in § 1036.405 using procedures established in accordance with §§ 1036.410, 1036.600 and 1036.605.

(b) Suspension is a serious action to be imposed on the basis of adequate evidence of one or more of the causes set out in § 1036.405 when it has been determined that immediate action is necessary to protect the public interest.

§ 1036.405 Causes for suspension.

(a) Suspension may be imposed in accordance with the provisions of §§ 1036.400, 1036.410, 1036.600, and 1036.605 upon adequate evidence:

(1) To suspect the commission of an offense listed in § 1036.305(a); or

(2) That a cause for debarment under § 1036.305 may exist.

(b) Indictment shall constitute adequate evidence for purposes of suspension actions.

§ 1036.410 Procedures for suspension.

(a) *Investigation and referral.* DOE offices responsible for the award and administration of covered transactions are responsible for reporting to both the Procurement and Assistance Management Directorate and the Inspector General, DOE, information about possible fraud, waste, abuse, or other wrongdoing which may constitute or contribute to a cause(s) for debarment or suspension under this part. Participants and persons performing under covered transactions awarded by DOE shall be required to report such information to the contracting officer and to the Inspector General, DOE.

(b) *Suspension notice.* When the Director, after consultation with legal counsel, determines that causes exist to suspend or propose debarment of an awardee or affiliate, the Director shall send the awardee or affiliate a notice containing, as appropriate, the following information:

(1) That a decision to suspend has been made.

(2) The reasons for the suspension in terms sufficient to put the respondent on notice of the conduct, transaction(s), or other adequate evidence upon which the suspension is based, except that the notice shall omit any information which, if disclosed, would prejudice an ongoing civil or criminal investigation or a pending or contemplated legal proceeding, or would compromise national security.

(3) The cause(s) relied upon under § 1036.405 of this part for the suspension.

(4) That within 30 days after receipt of the notice, the respondent may submit, or make a written request for an opportunity to submit, to the Director or designee, information and argument in opposition to the suspension, including any additional specific information that may raise a genuine dispute over the material facts. The submission in opposition may be made in person, in writing, or through a representative.

(5) DOE's procedures governing suspension decision-making (see § 1036.600).

(6) The effects of the suspension (see §§ 1036.315, and 1036.615).

(7) That the suspension is effective as of the date of the notice.

(8) The respondent's name and address have been placed on the DOE List.

(9) That a copy of the suspension notice was sent to GSA, and that the respondent's name will be added to the GAS List.

(c) *Submission in opposition.* Within 30 days after receipt of the notice of suspension, the respondent may submit, in person, in writing, or through a representative, information and argument in opposition to the suspension. A request for a meeting should be sent to the Director. (See § 1036.600(c).)

(d) *Additional proceedings as to disputed material facts.* (1) If it is found that there exists a genuine dispute over facts material to the suspension, respondent(s) shall be afforded an opportunity to appear *pro se* or with counsel, submit documentary evidence, present witnesses, and confront any person the DOE presents (See § 1036.600(d)), unless—

(i) The action is based on an indictment, conviction or judgment, or

(ii) A determination is made, on the basis of Department of Justice advice, that the substantial interests of the Federal Government in pending or contemplated legal proceedings based on the same facts as the suspension would be prejudiced. (See § 1036.605.)

(2) [Reserved]

(e) *Suspending official's decision.* The Director may modify or terminate the suspension (for example, see § 1036.325(c) for the reasons for reducing the period or scope of debarment) or may leave it in force. Howver, a decision to modify or terminate the suspension shall be without prejudice to the subsequent imposition of suspension by any other agency or debarment by any agency. The decision shall be rendered in accordance with the following provisions:

(1) *No additional proceedings necessary.* In actions (i) based on an indictment, conviction, or judgement, (ii) in which there is no genuine dispute over material facts, or (iii) in which additional proceedings to determine disputed material facts have been denied, the Director shall make a decision on the basis of all the information in the administrative record, including any submission made by the respondent. The decision shall be made within 45 days after receipt of any information and argument submitted by the respondent, unless the suspending official extends this period for good cause.

(2) *Additional proceedings necessary.* In actions in which additional proceedings are necessary to determine disputed material facts, the Director shall base the decision on the facts as found, together with any information and argument submitted by the respondent and any other information in the administrative record.

(f) *Notice of suspending official's decision.* Prompt written notice of the Director's decision shall be sent to the respondent and any affiliates involved.

§ 1036.415 Period of suspension.

(a) Suspension shall be for a temporary period pending the completion of investigation and any ensuing legal or debarment proceedings, unless terminated sooner by the Director or as provided in paragraph (b) of this section.

(b) If legal or debarment proceedings are not initiated within 12 months after the date of the suspension notice, the suspension shall be terminated unless an Assistant Attorney General requests its extension, in which case it may be extended for an additional six months. In no event may a suspension extend beyond 18 months, unless such proceedings have been initiated within that period.

(c) The Director shall notify the Department of Justice of an impending termination of a suspension, at least 30 days before the 12-month period expires, to give that Department an opportunity to request an extension.

§ 1036.420 Scope of suspension.

The scope of a suspension shall be the same as the scope of debarment (see § 1036.330, except that the procedures of § 1036.410 shall be used in imposing a suspension.

Subpart E—GSA Consolidated List; DOE Responsibilities

§ 1036.500 GSA List.

(a) OMB has designated GSA to compile, maintain, and distribute a list of all participants who have been debarred, suspended, or voluntarily excluded under Executive Order 12549 and these rules, and those who have been determined to be ineligible.

(b) At a minimum, this list indicates:

(1) The names and addresses of all debarred, suspended, voluntarily excluded, and ineligible participants in alphabetical order, with cross-references when more than one name is involved in a single action;

(2) The type of action;

(3) The cause for the action;

(4) The scope of the action;

(5) Any termination date for each listing; and

(6) The agency and name and telephone number of the agency point of contact for the action.

§ 1036.505 Responsibilities of DOE.

(a) The DOE liaison who shall be responsible for providing GSA with current information concerning debarments, suspensions, voluntary exclusions and ineligibilities taken by that agency is the Director, Office of Clearance and Support, Procurement and Assistance Management Directorate. Until February 18, 1989, the liaison shall also provide GSA and OMB with information concerning all transactions in which the agency has granted exceptions under § 1036.215 permitting participation by debarred, suspended, or excluded persons.

(b) Unless an alternative schedule is agreed to by GSA, DOE shall advise GSA of the information set forth in § 1036.500(b) and of the exceptions granted under § 1036.215 within five working days after taking such actions.

VOL 52 ISS 247 DEC 24 1987 UMI

(c) DOE procedures to provide for the effective dissemination and use of the DOE list and the GSA list in order to ensure that listed persons do not participate in any covered transaction in a manner inconsistent with that person's listed status, except as otherwise provided in this rule, are provided in § 1036.615.

(d) DOE shall direct inquiries concerning listed persons to the agency that took the action.

(e) DOE permits prospective participants receiving covered transactions at or below the threshold of $25,000 to certify whether the participant, or any person acting in a capacity listed in § 1036.200(b) with respect to the participant or the particular covered transaction, is currently or within the preceding three years has been:

(1) Debarred, suspended or declared ineligible;

(2) Formally proposed for debarment, with a final determination still pending;

(3) Voluntarily excluded from participation; or

(4) Indicted, convicted, or has a civil judgement rendered against them for any of the offenses listed in § 1036.305(a).

Adverse information on the certification need not necessarily result in denial of participation.

(f) In lieu of checking the DOE and the GSA lists, Participants may require prospective participants to submit the following certification for covered transactions at or below the threshold of $25,000:

Certification Regarding Debarment and Suspension

The Participant certifies to the best of its knowledge and belief, that:

(a) The Participant, or any person acting in a capacity specified in (b) below, currently or within the preceding three years

(1) Is or has ( ) is not and has not ( ) been debarred, suspended or declared ineligible

(2) Has ( ) has not ( ) been formally proposed for debarment with a final determination still pending

(3) Has ( ) has not ( ) been voluntarily excluded from participation

(4) Has ( ) has not ( ) been indicted, convicted, or had a civil judgement rendered against them for:

(i) Fraud or a criminal offense in connection with obtaining, attempting to obtain, or performing a public or private agreement; or

(ii) Bribery, embezzlement, false claims, false statements, falsification or destruction of records, forgery, obstruction of justice, receiving stolen property, or theft; or

(iii) Unlawful price fixing between competitors, allocation of customers between competitors, bid rigging, or any other violation of Federal or State antitrust laws that relates to the submission of bids or proposals.

(b) "Persons", for the purpose of this certification, means individuals in or under any covered transaction in any of the following capacities; as an owner or partner holding a controlling interest, director, or officer of the participant; as a principal investigator, project director, or other position involved in management of the covered transaction; as a provider of federally-required audit services; in any other position to the extent that the incumbent is responsible for the administration of Federal funds; or in any other position charged as a direct cost under the covered transaction.

Subpart F—Additional DOE Procedures for Debarment and Suspension

§ 1036.600 Decisionmaking.

(a) *Definitions.* (1) "Fact-finding panel" means a three-member panel appointed by the Director to conduct a fact-finding conference under paragraph (d) of this section. This panel shall consist of an office director within the Procurement and Assistance Management Directorate, a senior attorney nominated by the General Counsel or designee, and a senior official of a program or other office of the Department.

(2) For purposes of this section, "timely" means mailed or delivered to the Director not later than 30 days after the date of the notice under § 1036.310(b)(1) or § 1036.410(b)(1) or on or before such later date as may be specified in the notice. If the postmark date is affixed by a postage meter and DOE receives the document more than five days after the post-mark date, the date of receipt shall be used to determine timeliness.

(b) *Written response.* A timely written response to a notice of suspension or proposed debarment may contain any or all of the following:

(1) A request for a meeting with the Director or designee (§ 1036.600(c));

(2) A request for a fact-finding conference (§ 1036.600(d)); and

(3) Information and argument in opposition to the suspension or proposed debarment including identification of disputed material facts. If the respondent fails to submit a timely written response to a notice of suspension or proposed debarment, the Director shall notify the respondent in accordance with § 1036.310(b)(6) or § 1036.410(b)(5) that the awardee remains suspended, or that the awardee is debarred, as applicable.

(c) *Meeting.* Upon receipt of a timely request therefor, the Director shall schedule a meeting with the Director or designee and the respondent, no later than 30 days from the date the request is received. The Director or designee may postpone the date of the meeting if the respondent requests a postponement in writing.

(1) At the meeting, the respondent, appearing personally or through an attorney or other authorized representative, may informally present and explain evidence that causes for suspension or debarment do not exist, evidence of any mitigating factors, and arguments concerning the imposition, scope, duration, or effects of a suspension, proposed debarment, or debarment. The respondent may offer or explain a previous offer to agree to a voluntary exclusion (§ 1036.205) at the meeting.

(2) Any written information or arguments submitted at or in connection with the meeting shall be included in the administrative record. The Director shall not be required to make a transcript of the meeting.

(3) Within two weeks following the date of the meeting, the Director shall send a notice to the respondent containing the following information:

(i) Names, organizational affiliations, titles, addresses, and telephone numbers of all individuals who attended;

(ii) A brief description of each document submitted by the respondent;

(iii) A summary of the issues discussed; and

(iv) A statement describing the action the Director has taken or proposes to take.

(d) *Fact-finding conference.* The purposes of a fact-finding conference under this section are to provide the respondent an opportunity to dispute material facts and to make arguments realted to a suspension or proposed debarment, and to provide the Director with proposed findings of fact based, as applicable, on adequate evidence or on a preponderance of the evidence.

(1) *Appointment of fact-finding panel and notice to respondent.* If the Director determines that a written response or a presentation at the meeting puts material facts in dispute, the Director shall appoint a fact-finding panel. (See § 1036.310(d)) Upon appointment, the panel shall notify the respondent that the case has been referred to the panel and shall schedule a fact-finding conference.

(2) *Appearances.* The Director may be represented at the fact-finding conference by the General Counsel or designee. The respondent may appear personally or through an attorney or other authorized representative.

(3) *Scope of the fact-finding conference.* The factual issues considered at the conference shall be limited to those identified in the Director's referral and any amendments thereto filed by the Director.

(4) *Procedures.* The fact-finding conference shall be conducted in accordance with applicable procedural rules adopted by the General Counsel or designee. The procedural rules shall be as informal as practicable, consistent with the principles of fundamental fairness, prompt decisionmaking, and with the evidentiary standards for suspension and debarment. (See § 1035.8(d)(4) and 1035 Appendix A—Rules for Fact-Finding Conferences.)

(5) *Preliminary administrative record.* At least 10 days before the fact-finding conference date, the Director shall file with the fact-finding panel, and mail or deliver to the respondent, a copy of the administrative record as of the date of the transmittal. The copy sent to the responent shall not include any documents which, as provided in § 1035.7, may not be disclosed; the copy filed with the fact-finding panel shall identify which documents must be sealed and viewed by the fact-finding panel only incamera, as provided in § 1036.605.

(6) *Evidence and argument.* The respondent and the Director shall have the opportunity to submit documentary evidence, to examine and cross-examine witnesses, and to present argument. Only evidence which is relevant to the issues referred for the fact-finding conference and which is reliable and probative shall be admissible.

(7) *Transcript.* The fact-finding panel shall make a transcribed record of the fact-finding conference which shall be transmitted to the Director within 20 days after the hearing record is closed. The transcript shall be available at cost to the respondent. The requirement for a transcript may be waived by mutual agreement of the Director and all respondents.

(8) *Fact-finding conference report.* Within 30 days after the conference record is closed, the fact-finding panel shall transmit to the respondent (by notice) and to the Director a written report setting forth proposed findings of fact. The findings shall resolve any disputes over material facts based on a preponderance of the evidence if the case involves a proposal to debar, or on adequate evidence if the case involves a suspension. The respondent shall have 30 days from receipt of the fact-finding panel's report to submit written exceptions to the Director.

(9) *Final decision.* If the final decision sustains a proposed debarment, the debarment may begin no earlier than ten days after the date of the notice of final decision a copy of which shall be transmitted to the fact-finding panel.

§ 1036.605 Coordination with Department of Justice

Whenever a meeting or fact-finding conference is requested, under § 1036.600 (b)(1) or (b)(2), the Director's legal representative shall obtain the advice of appropriate Department of Justice officials concerning the impact disclosure of evidence at the meeting or fact-finding conference could have on any pending civil or criminal investigation or legal proceeding. If such official requests in writing that evidence needed to establish the existence of a cause for suspension or proposed debarment not be disclosed to the respondent, the Director shall:

(a) Decline to rely on such evidence and withdraw (without prejudice) the suspension or proposed debarment until such time as disclosure of the evidence is authorized; or

(b) Rely on such evidence without disclosing it to the respondent. At the fact-finding conference, the Director shall make such evidence available for in camera inspection to the fact-finding panel. Evidence submitted for in camera inspection shall be part of the administrative record, but may not be disclosed to the respondent or any member of the public until release is authorized in writing by an appropriate Department of Justice official or until related legal proceedings are concluded, whichever occurs first.

§ 1036.610 DOE consolidated list of debarred, suspended, ineligible, and voluntarily excluded awardees.

The Director shall compile and maintain a list of persons and affiliates who are currently suspended, proposed for debarment, debarred, ineligible or voluntarily excluded under this part and 10 CFR Part 1035. The DOE List shall contain the following information at a minimum:

(a) The person's name and address;

(b) The causes(s) relied upon under this part;

(c) The effect of each action;

(d) The effective date of the action and, in the case of debarment, the expiration date; and

(e) The name and telephone number of the DOE official who can be contacted for additional information about the action.

§ 1036.615 Effects of being listed on the DOE and GSA lists.

The Director may grant an exception to the prohibitions of paragraphs (a) through (e) of this section by issuing a written determination setting forth the compelling reasons justifying the waiver in accordance with § 1036.215.

(a) DOE shall not solicit, or consider, and shall return any proposal submitted by a contractor, awardee, or person on the DOE List or a person on the GSA List, to the extent that the solicitation activity or proposal falls within the scope of the suspension, proposed debarment, debarment, ineligibility of voluntary exclusion, as indicated on the DOE List or GSA List.

(b) DOE and DOE participants shall not make any new, continuation, or renewal award, or extend any agreement or covered transaction with an awardee or person on the DOE List or on the GSA List, to the extent that the activity falls within the scope of the suspension, proposed debarment, debarment, ineligibility or voluntary exclusion, as indicated on the DOE List or GSA List.

(c) DOE and DOE participants, regardless of tier, shall not approve or consent to any new, continuation, renewal award or extension of a subagreement with a contractor, awardee, or person on the DOE List and shall not approve or consent to any new, continuation, renewal award or extension of a subagreement with a person on the GSA List, to the extent that the award falls within the scope of the suspension, proposed debarment, debarment, ineligibility or voluntary exclusion.

(d) DOE and participants shall disapprove or not consent to the selection (by an awardee) of an individual to serve as a principal investigator, as a project manager, in a position of responsibility for the administration of Federal funds, or in another key personnel position, if the individual is on the DOE List or GSA List.

(e) DOE and DOE participants shall not conduct business with an agent or representative whose name appears on the DOE List or GSA List.

(f) DOE shall review existing agreements and may initiate a review of any subagreements with a contractor, awardee or person on the DOE List or on the GSA List for the purpose of determining whether termination or

other remedial action, available under the terms of the agreement, subagreement, or applicable law, is necessary to protect the Government's interest.

(g) DOE and DOE participants shall review the DOE and GSA Lists before conducting a preaward survey or soliciting proposals, making new, continuation, or renewal awards or otherwise extending the duration of existing agreements, or approving or consenting to the award, extension, or renewal of subagreements at any tier.

PART 1035 [REMOVED]

2. Part 1035 is removed.

[FR Doc. 87-29494 Filed 12-23-87; 8:45 am]
BILLING CODE 6450-01

FEDERAL RESERVE SYSTEM

12 CFR Part 226

[Regulation Z; Docket No. R-0625]

Truth in Lending; Home Equity Disclosures Under Regulation Z

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed rule.

SUMMARY: The Board is publishing for comment a proposal to amend Regulation Z. The proposed amendment would require creditors to provide disclosures for home equity lines of credit secured by the consumer's principal dwelling at the time an application form is given to the consumer or before the consumer pays a non-refundable fee, whichever is earlier. The proposal also would require the disclosures for home equity plans to be segregated from any other information given to the consumer. Under the proposed amendment, creditors would have to provide additional information about home equity lines secured by a consumer's principal dwelling, including information about a plan's payment terms, whether a creditor can terminate or change the terms of a plan, and, for variable-rate plans, disclosures about the index, frequency of rate adjustments, and a history of changes in the index. Creditors also would be required to provide consumers with a brochure describing home equity plans.

DATES: Comments must be received on or before February 8, 1988.

ADDRESSES: Comments should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC, 20551, or delivered to the 20th Street courtyard entrance on 20th Street, between C Street and Constitution Avenue NW., Washington, DC, between 8:45 a.m. and 5:15 p.m. weekdays. Comments should include a reference to Docket No. R-0625. Comments may be inspected in Room B-1122 between 8:45 a.m. and 5:15 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: Sharon Bowman or Leonard Chanin, Staff Attorneys, Division of Consumer and Community Affairs, at (202) 452-3667 or 452-2412; for the hearing impaired *only*, contact Earnestine Hill or Dorothea Thompson, Telecommunications Device for the Deaf, at (202) 452-3544, Board of Governors of the Federal Reserve System, Washington, DC, 20551.

SUPPLEMENTARY INFORMATION:

(1) Background

A home equity line is an open-end credit line secured by the homeowner's equity—the difference between the market value of the home and any debts secured by that home. During the past few years the number of lenders offering home equity lines of credit and the number of consumers borrowing through this form of credit have increased considerably. The increased promotion and use of home equity plans has led the Board to examine the disclosures required by the Truth in Lending Act and Regulation Z to determine if the current requirements ensure that consumers receive adequate information about these plans at a relevant stage of the credit-granting process. Financial institutions, trade associations, consumer groups, the Board's Consumer Advisory Council (CAC), and the Congress also have focused on existing disclosure requirements. Financial institutions and trade associations have asked Board staff how information should be disclosed for these plans. Consumer groups and the CAC have expressed concern about the complexities and risks associated with these plans, and the adequacy of the disclosures consumers are receiving. In addition, bills have been introduced in the Congress that would require increased disclosures and would regulate substantive aspects of home equity lines.

Based on the Board's analysis of the current disclosure requirements under Regulation Z—and discussions with financial institutions, trade associations, consumer groups and the CAC—the Board has concluded that the current disclosure requirements do not ensure that consumers receive adequate information about home equity lines in a meaningful and timely fashion.

(2) Current Disclosure Requirements

Currently, Regulation Z requires the same disclosures for home equity lines of credit as for other open-end credit plans. As with other open-end plans, creditors may provide consumers with disclosures at any time prior to the first transaction under the plan, and the disclosures need not be provided in a specified format. In addition the disclosures required by the regulation are rather limited—a creditor is required to disclose only how the finance charge is determined, including the periodic and annual percentage rates; other (nonfinance) charges, such as late payment fees, that may be imposed; the existence of a security interest; and the consumer's billing rights. The Board believes that the current disclosure requirements for home equity lines are insufficient in their timing, format, and content to ensure that consumers understand the terms and conditions of a particular loan program before committing to a plan.

(i) *Timing of disclosures.* In general, the Truth in Lending Act permits disclosures for both open-end and closed-end credit transactions to be given at a relatively late stage of the credit process—at any time before the consumer actually becomes obligated for a particular credit plan.

There are two exceptions to this rule, however. Section 128(b)(2) of the Truth in Lending Act provides that in closed-end residential mortgage transactions subject to the Real Estate Settlement Procedures Act, disclosures must be given within three business days after the creditor receives the consumer's written application. Another exception to this general rule is contained in the regulations just adopted by the Board with respect to adjustable-rate mortgages (ARMs). Those regulations require information about the variable-rate feature of certain closed-end adjustable-rate mortgages to be given to consumers either when an application form is provided or before a consumer pays a nonrefundable fee, whichever is earlier. (See this issue of the **Federal Register**.)

The Board believes that consumers should receive disclosures about home equity lines at an earlier time in the credit process to facilitate consumer understanding and shopping for this type of credit. The same concerns that prompted early disclosures for closed-end ARMs—credit shopping and risk to the consumer—also support requiring early disclosures for home equity lines. The risk to the consumer in the event of default, the potential loss of the home, is

the same for both closed-end and open-end transactions secured by the home. Furthermore, because most home equity lines are variable-rate and often have large up-front fees, the Board believes consumers should receive disclosures in a timely fashion to better understand the risks and complexities of a particular plan, as well to better shop among plans. Specifically, the Board believes consumers should be provided with disclosures when an application form is provided or before the consumer pays a non-refundable fee, whichever is earlier.

(ii) *Format of disclosures.* Regulation Z currently does not require creditors to provide home equity disclosures in any particular format. As with other open-end plans, the disclosures can be interspersed with contract and other information, and need not be highlighted.

The Board believes that the disclosures for home equity lines should be separated from other information. The same concern that prompted segregation of disclosures generally for closed-end transactions—that is, to ensure that the disclosures are highlighted—exists with respect to home equity lines. The purpose of the Trust in Lending disclosure is to provide consumers with clear and readily understandable information about the costs of a credit transaction. Because home equity plans involve terms and conditions that are more complicated and numerous than those in other types of open-end plans, the Board believes that the disclosures required to be provided to consumers by the regulation should be segregated from other information to enable consumers to easily identify and understand the most important terms and conditions. Such a requirement is particularly important when the consumer's home secures the transaction.

In addition to this requirement, the Board believes some information warrants special attention. The Board is proposing that three disclosures—the risk of the loss of the consumer's home in the event of default, the right of a creditor to terminate an account, and the right of a creditor to change the terms of an account—as well as the current security interest disclosure, precede all other disclosures on the form provided to the consumer. Provisions such as the creditor's ability to change a plan's terms and conditions at will or to terminate an account are common in open-end credit, including home equity lines. Consumers, however, may not be familiar with these aspects of the plans if they are more accustomed to closed-end credit where the home is being used as security. Moreover, the exercise of any one of these provisions could have an adverse effect on consumers, thus making it particularly important that consumers be alerted to them.

(iii) *Content of disclosures.* The Board does not believe that changing the timing and format of the disclosure requirements will be sufficient to ensure that consumers understand home equity plans. Regulation Z currently requires creditors to provide only the four items of information mentioned earlier. Therefore, certain important information about home equity lines is not required to be disclosed. The regulation, for example, does not require disclosure of whether a creditor may unilaterally change the terms and conditions of the plan, and the circumstances under which the creditor may terminate the plan and require payment of any outstanding balance. Information about the payment terms of the plan may be difficult to understand, and may not be presented in a manner that facilitates consumer awareness of such features.

The absence of such disclosures is significant since home equity lines contain unique features that may expose consumers to greater risk than the typical open-end credit plan. For example, many of the programs have characteristics of both open-end and closed-end credit. The programs often involve two phases—a phase during which the consumer may obtain advances, as with traditional open-end products, and a phase during which the consumer may not borrow additional money and simply repays what already has been borrowed. Each phase may involve its own payment terms, and, in addition, creditors may give the consumer the option to choose among several payment terms during aphase. Moreover, unlike most traditional open-end plans, many home equity programs permit payment of only interest during the draw period. While some programs provide for payment of the outstanding balance over an extended period of time, others do not; in the latter case, the consumer may be required to pay the entire outstanding balance at the end of the draw period, a fact that may not be clearly disclosed when the consumer contracts for the plan. If the plan calls for full payment of the outstanding balance at the end of the draw period, there may be no guarantee that the creditor will refinance the outstanding principal balance when it becomes due. Although other types of open-end credit, like credit cards, also can involve repayment terms that permit borrowers to make small monthly payments, the risk to consumers is greater with a home equity line given the size of the average credit line, the potential size of the balances, and the risk that consumers may lose their homes if they are unable to pay the full balance when it is due.

In the case of variable-rate home equity lines, the Board is also concerned about adequate disclosure of the variable-rate feature. For open-end variable-rate home equity lines, only a limited amount of information about the variable-rate feature is currently required. (The creditor must disclose the circumstances under which the rate may increase, any limits on the increase, and the effect of an increase.) Requiring additional disclosures for variable-rate home equity lines secured by the consumer's principal dwelling would be consistent with the additional variable-rate disclosures just adopted by the Board for closed-end ARMs. The same concern exists in both open-end and closed-end transactions, that is, the possibility of losing the home in the event of default and the fact that the variable-rate feature could increase the risk of default in some instances. The Board believes most of the variable-rate disclosures contained in its final ARMs rule should be provided for home equity lines secured by the consumer's principal dwelling. Such disclosures, adjusted to reflect the fact that open-end transactions differ from closed-end transactions, would ensure that consumers receive substantially the same information for all variable-rate credit secured by the consumer's principal dwelling.

(3) Current Advertising Requirements

Currently an advertisement that states an annual fee or other cost information must state additional information, such as the annual percentage rate (APR), any minimum, fixed, transaction or activity charge, and any membership or participation fee. Reference in an advertisement to certain other terms, such as a payment term, however, does not require the disclosure of the other cost information, such as the APR.

The Board believes that providing specific terms, such as the payment amount, in an advertisement without providing additional cost information gives an incomplete and potentially misleading picture of the major terms and conditions of the plan and the consumer's potential obligations under the plan. The proposed amendments to § 226.6 to require additional disclosures for home equity lines would address this concern without the need for changes to the advertising section. Under the open-end advertising rules in § 226.16, any reference to an item required to be

disclosed under § 226.6 requires the disclosure of the cost information discussed above. Thus if any of the proposed disclosures in § 226.6(e) is stated in an advertisement, the cost information listed in § 226.16(b) would have to be provided.

(4) Consumer Brochure

In addition to the need for disclosures about specific home equity programs, because home equity lines are a relatively new and nontraditional form of credit the Board believes that consumers also may need more general information about these products. Under the new closed-end regulations, creditors will provide consumers with a brochure that describes ARMs (*The Consumer Handbook on Adjustable Rate Mortgages*, published by the Board and the Federal Home Loan Bank Board, or a suitable substitute), along with the other disclosures. The Board is proposing that creditors be required to provide prospective borrowers with a similar brochure describing home equity lines of credit. The brochure would generally describe how home equity plans operate, define terms consumers might not be familiar with, and advise consumers how to compare home equity plans. The Board is currently working on a brochure that would meet this requirement. Under the proposal, creditors would provide this brochure, or a suitable substitute, along with the other disclosures.

(5) Proposed Amendments to Regulation Z

(i) *Coverage.* The Board is proposing to amend Regulation Z to require additional disclosures for home equity lines. The disclosures would be required only for open-end credit programs secured by the consumer's principal dwelling. The new requirements would not apply to home equity lines secured by other consumer dwellings, such as vacation homes.

(ii) *Timing.* the initial home equity disclosure statement—containing both the existing and proposed disclosures—and the brochure would be given to the consumer when an application form is provided or before the consumer pays a nonrefundable fee, whichever is earlier. For mail and telephone applications (and those submitted through an agent or broker) disclosures would be provided within three business days of receipt of the application by the creditor. The creditor would not be required to provide the consumer with additional initial Truth in Lending disclosures under section 226.6 at the time an account is opened. If a creditor makes a change in a home equity program after giving the initial disclosures, however, the creditor must provide consumers written notice of the changes under the existing rules in § 226.9(c), dealing with changes in the terms of a credit plan. Section 226.9(c) would require creditors to give the notice to all consumers who may be affected by the changes, for example, at the time the consumer submits a completed application. Creditors would not be required to give notices to consumers that had merely received the initial disclosures along with an application. The Board seeks comment on whether the current rules in § 226.9(c) dealing with changes in the terms of open-end credit plans are adequate to ensure that notice of changes is provided to consumers without imposing undue burdens on creditors, or whether the rules should be modified in some manner.

(iii) *Format.* Under the proposal, creditors would be required to segregate the disclosures from any other information provided to the consumer. Creditors would not be permitted to include the disclosures in loan contracts, or to provide additional information with the segregated disclosures. To further highlight three of the new disclosures—the risk of loss of the consumer's home in the event of default, the right of a creditor to terminate an account, and the right of a creditor to change the terms of an account—as well as the current security interest disclosure, the regulation would require that these disclosures precede all other disclosures on the form provided to the consumer. Creditors could continue to provide additional information about plans, as long as the information is not interspersed with the required disclosures.

(iv) *New home equity disclosures.* Under the proposal creditors would have to disclose the fact that consumers risk losing their homes in the event of default. Creditors also would be required to describe certain of their contractual rights. The circumstances under which the creditor (or consumer) may terminate the plan would be provided. For example, if a creditor retains the right to terminate the plan if a rate ceiling is reached, that fact would be noted. In addition, the disclosure would state any fees that may be imposed in the event of termination, and whether the creditor may require payment in full of any outstanding balance. If a creditor retains the right to unilaterally change the terms and conditions of the plan, that right also would be disclosed.

Creditors would disclose the period during which a consumer could obtain advances and the period during which the consumer would be allowed only to make payments. Creditors also would have to disclose how the minimum monthly payment requirements for each period are determined. Examples of the monthly payment amount for each period based on an assumed $10,000 balance outstanding, at a recent interest rate charged under the plan, would be provided. For purposes of the examples, an interest rate would be considered recent if it had been in effect within 90 days of delivery of the disclosures. Creditors also would provide a statement if the minimum monthly or periodic payment may not or will not reduce the outstanding principal balance. The proposal would require disclosure of any minimum outstanding balance or minimum draw requirements under the plan. Disclosure also would have to be made that information about the creditor's other open-end home equity programs is available.

(v) *Additional disclosures for variable-rate plans.* The Board proposes to require creditors to provide additional information for variable-rate home equity lines. These disclosures would closely parallel the disclosures just adopted by the Board (and published in this issue of the **Federal Register**), for closed-end variable-rate transactions secured by a consumer's principal dwelling. Under the proposal creditors would provide the index or the formula used to make rate adjustments, and a source of information about the index. Creditors also would have to describe how the interest rate is determined, including, for example, whether a margin is added to the index to arrive at the interest rate. A statement also would be provided to consumers suggesting they ask about the current index, margin, and interest rate. Creditors would disclose the frequency of rate and payment adjustments, and any rules relating to changes in the index, interest rate, payment amount, and outstanding loan balance. Such information would include an explanation of limitations on the maximum payment or rate that would be charged, interest rate carryover, and negative amortization. Creditors also would specifiy the informaiton that would be provided on periodic statements concerning the rate changes.

In addition to these disclosures, creditors would have to provide a historical table that shows the values of the specific index or formula to be used in the loan program, beginning with the value for 1977. The index values would be updated annually until a fifteen-year history is shown. Creditors would then show a "rolling history" of index values for the preceding fifteen years. The margin and interest rate for each of the years also would be provided. Unlike the closed-end ARMs rule just adopted by the Board, the monthly payment and remaining balance for the historical table would not have to be provided. The Board believes this information would be of limited value for open-end transactions since the outstanding balance can, and often does, fluctuate as the consumer makes draws and payments under the plan. Comment is requested, however, or whether the monthly payment amount and remaining balance should be required for open-end as it is for closed-end transactions. Creditors also would be required to disclose the initial interest rate shown in the historical table and the maximum interest rate and the corresponding payments for a $10,000 loan under the plan.

The Board requests comment on one issue that relates to an existing provision in the regulation and staff commentary dealing with disclosures of the annual percentage rate in open-end variable-rate credit plans. The commentary to § 226.6(a)(2) states that a creditor in disclosing the APR in effect in a variable-rate plan may use in insert showing the current rate, may give the rate as of a specified date and update the disclosure from time to time for example, each calendar month, or may disclose an estimated rate under § 226.5(c). In light of the proposed requirement that home equity disclosures be provided earlier, the Board requests comment on whether these options for disclosing the APR provide creditors with sufficient flexibility.

Creditors also would have to provide additional variable-rate information on or with the first periodic statement sent to consumers after the rate has been adjusted. Consumers would be informed of the prior and current index values and the interest rates derived from these values. If the creditor has foregone any interest rate increase, this would be noted. Creditors also would disclose the contractual effects of any rate adjustment, including the payment due and loan balance.

A sample home equity disclosure statement that shows how the proposed and existing requirements might be met is provided in the Appendix of this notice.

(vi) *Consumer brochure.* The Board also proposed to require creditors to furnish consumers with a home equity brochure along with the required disclosures. Creditors would provide the brochure that the Board will publish or a suitable substitute. Any brochure that is substituted for the Board's pamphlet would have to define terms common to home equity lines, describe features that are basis to most home equity lines, give examples of how rate changes could affect monthly payments, and provide a basic checklist of items that consumers should be alerted to when they shop for home equity products.

(6) Related Provisions

(i) *Right of rescission—material disclosures.* The Board is also proposing to amend footnote 36, accompanying § 226.15(a)(3) of the regulation. Section 226.15(a)(3) states that the consumer may exercise the right of rescission until midnight of the third business day following opening the plan, delivery of the notice of the right to rescind, or delivery of all "material disclosures," whichever occurs last. Footnote 36 of the regulation currently defines material disclosures to include the method of determining the finance charge and the balance upon which a finance charge will be imposed, the annual percentage rate, and the amount of method of determining the amount of any membership or participation fee that may be imposed as part of the plan. The Board believes all of the proposed disclosures in footnote 36. The proposcd lines should be treated as material discolsures in footnote 36. The proposed disclosures contain information that is essential to consumers understanding the cost, terms, and conditions of home equity transactions, and thus consumers must have the information in order to properly exercise their right of rescission.

(ii) *Advertising requirements.* The Board is not proposing changes to the advertising rules contained in § 226.16 of the regulation. The additional disclosures for home equity plans, if included in an advertisement, will require additional advertising disclosures, however. Under the open-end advertising rules in § 226.16, any reference to an item required to be disclosed under § 226.6 calls for the disclosure of cost information such as the APR, any membership or participation fee, and any minimum, fixed, transaction, or activity charge. Thus if any of the proposed disclosures in § 226.6(e) is stated in an advertisement, other cost information such as the APR also would have to be provided. (The commentary currently limits the terms that require additional disclosures to those items in § 226.6(a) and (b); comment 226.16(b)–1 would be revised to include a reference to § 226.6(e), if the Board adopts this proposal as a final rule.)

(7) Comment Period

The comment period ends on February 8, 1988. Because prompt resolution of these matters is essential and in the public interest, the expanded rulemaking procedure set forth in the Board's policy statement of January 19, 1979 (44 FR 3957) will not be followed. The Board believes an abbreviated comment period is necessary to ensure that a final rule is issued at least six months before October 1, 1988, the statutory deadline for the effective date of regulatory amendments.

(8) Economic impact statement

The Board's Division of Research and Statistics has prepared an economic impact statement on the proposed revisions to Regulation Z. A copy of the analysis may be obtained from Publications Services, Board of Governors of the Federal Reserve System, Washington, DC, 20551, at (202) 542–3245.

List of Subjects in 12 CFR Part 226

Advertising, Banks, banking, Consumer protection Credit, Federal Reserve System, Finance, Penalties, Truth in lending.

(9) Text of Proposed Revisions

Certain conventions have been used to highlight the proposed revisions. New language is shown inside bold-face arrows, while language that would be removed is set off with brackets. For the reasons set out in this notice, and pursuant to the Board's authority under section 105 of the Truth in Lending Act (15 U.S.C. 1604 et seq.), the Board proposes to amend Part 226 as follows:

PART 226—TRUTH IN LENDING

1. The authority citation for Part 226 continues to read as follows:

Authority: Sec. 105, Truth in Lending Act, as amended by sec. 605, Pub. L. 96–221, 945 Stat. 170 (15 USC 1604 et seq.); sec. 1204(c), Competitive Equality Banking Act., Pub. L. 100–86, 101 Stat. 552.

2. Section 226.5 is amended by adding paragraph (a)(3), redesignating (b)(2) as (b)(3) and adding a new paragraph (b)(2) to read as follows:

Subpart B—Open-end Credit

§ 226.5 General disclosure requirements

(a) *Form of disclosures.* * * *

►(3) In a plan secured by the consumer's principal dwelling, the disclosures required by § 226.6 shall be grouped together, shall be segregated

from everything else, and shall not contain any information not directly related [10a] to the disclosures required under § 226.6. The disclosures required by § 226.6(c) and (e)(1)–(3) shall precede all other disclosures. [10b]◄

(b) *Time of disclosures.* * * *

►(2) *Initial disclosures for plans secured by the consumer's principal dwelling.* In a plan secured by the consumer's principal dwelling, the creditor shall furnish the initial disclosure statement and brochure required by section 226.6 at the time an application form is provided or before the consumer pays a nonrefundable fee, whichever is earlier. [10c] The creditor may furnish the disclosures required by § 226.6(d) in accordance with § 226.5(b)(1).◄

* * * * *

3. Section 226.6 is amended by adding paragraph (e) and (f) to read as follows:

§ 226.6 Initial disclosure statement.

* * * * *

►(e) *Additional disclosures for plans secured by the consumer's principal dwelling.* In a plan secured by the consumer's principal dwelling, the following additional disclosures:

(1) A statement that loss of the consumer's home may occur in the event of default.

(2) A statement of the circumstances under which the consumer or the creditor may terminate the plan, any fees that may be imposed upon termination, and whether the creditor may require payment of the outstanding balance in full at such time.

(3) If the creditor has the right to change the terms and conditions during the plan, a statement of that fact.

(4) The payment terms for the plan (separately stated, if applicable, for the period when advances may be obtained and the period when repayment is made without new advances).

(i) The length of the plan.

(ii) An explanation of how the minimum monthly or periodic payment will be determined, including a statement of any other payment, such as one-time payment of the outstanding balance.

(iii) An example, based on a $10,000 amount outstanding and a recent interest rate, showing the minimum monthly or periodic payment, and any one-time payment of the oustanding balance.

(5) If the minimum monthly or periodic payment may not or will not reduce the outstanding principal balance, a statement of that fact.

(6) Any minimum outstanding balance or minimum draw requirements, stated as dollar amounts.

(7) A statement that disclosure forms are available for the creditor's other open-end programs secured by the consumer's principal dwelling.

(8) If the plan has a variable rate, the following additional disclosures:

(i) The index or formula used in making adjustments, and a source of information about the index.

(ii) An explanation of how the interest rate will be determined, including an explanation of how the index is adjusted, such as by the addition of a margin.

(iii) A statement that the consumer should ask about the current index value, margin, and interest rate.

(iv) The frequency of interest rate and payment changes.

(v) Any rules relating to changes in the index, interest rate, payment amount, and outstanding loan balance including, for example, an explanation of interest rate or payment limitations, negative amortization, and interest rate carryover.

(vi) An historical table showing how interest rates would have been affected by changes in index values over a 15-year period. The historical table would start in 1977 and be updated annually until 15 years of index, margin, and interest rate values are shown.

(vii) A statement of the most recent interest rate shown in the historical table and maximum interest rate and corresponding payments based on a $10,000 advance.

(viii) A statement that interest rate information will be provided on or with the first periodic statement after each rate change.

(f) *Brochure for plans secured by the consumer's principal dwelling.* In a plan secured by the consumer's principal dwelling, the home equity brochure published by the Board, or a suitable substitute.◄

4. Section 226.7 is amended by adding paragraph (l) to read as follows:

§ 226.7 Periodic statement.

* * * * *

►(l) *Additional disclosures for variable rate plans secured by the consumer's principal dwelling.* On or with the first periodic statement after an interest rate adjustment of a variable-rate plan secured by the consumer's principal dwelling, notification of the rate change. The notice shall contain the following information.

(1) The current and prior interest rates.

(2) The index values upon which the current and prior interest rates are based.

(3) The extent to which the creditor has foregone any increase in the interest rate.

(4) The contractual effects of the adjustment, including the payment due after the adjustment is made.◄

* * * * *

5. Footnote 36 to paragraph (a)(3) of § 226.15 is revised to read as follows:

§ 226.15 Right of rescission.

(a) * * *

(3) * * * [36]

* * * * *

Appendix

Editorial Note: This appendix will not appear in the Code of Federal Regulations.

Sample Disclosure

Important Terms of Our Home Equity Line of Credit

Security Interest: You must give us a security interest in your home. You could lose your home if you do not meet the obligations in your agreement with us.

Termination and Payment Upon Termination: We can cancel your account and require you to pay the entire outstanding balance immediately: (1) if the interest rate that would apply to your account should exceed 18%; (2) if changes in the law either prohibit or increase our risk or burden of offering the plan; (3) if you fail to comply with the requirements in your agreement with us.

You may close your account at any time by notifying us in writing. If you close your account, we can require you to pay the entire outstanding balance immediately.

Changes in Terms: We can change the terms and conditions that apply to your account during the life of the plan.

Payment Requirements: You can obtain advances for fifteen years. During this period, your minimum monthly payment will equal the amount of interest accrued and unpaid on your account at the end of the billing period or $10, whichever is greater. For example, if you had an outstanding balance of $10,000, the minimum monthly payment at an interest rate of 10.25% would be $85.42. Outstanding balances of less than $200 must be paid in full.

The minimum monthly payment (when it equals accrued interest) will not reduce the outstanding principal balance on your account.

At the end of fifteen years, you must pay the entire outstanding balance immediately. For example, if after fifteen years you had an outstanding balance of $10,000, you would have to make one payment of $10,000.

Variable Rate Feature: The interest rate is variable and can change quarterly. The rate will not exceed 18%.

The interest rate equals an "index" plus a "margin." The index is the average prime rate charged by banks as published in the Federal Reserve Bulletin for the first month of the preceding quarter. The margin was 2 percentage points on 10/1/87. Ask us for the current index value, margin, and interest rate.

How the Finance Charge is Determined: Finance charges begin to accrue on the date a transaction is posted to your account. To determine the finance charge for a billing period, we multiply the "average daily balance" on your account by the "periodic rate." The "average daily balance" equals the total of the balances outstanding at the end of each day during the billing period divided by the number of days in the billing period. (The balance outstanding at the end of each day is determined by taking the beginning balance in your account each day, adding new advances, and subtracting any payments and credits and unpaid finance charges.) The "periodic rate" equals the interest rate (the index plus the margin) divided by the number of billing periods in a year (12).

Currently, the periodic rate is .8542% and the corresponding Annual Percentage Rate is 10.25%.

Other Finance Charges: You must pay a loan processing fee Finance Charge of $200 when you open your account.

Other Charges

Application fee	$150
Annual fee	45
Late payment fee (or 5% of the late payment, whichever, is greater)	5
Closing costs (estimated)	750
Title search/Insur	200
Appraisal fee	150
Attorney/Doc. prep	250
Recording fees	150

Minimum Draw Requirements: The minimum amount of an advance is $500.

Effects of the Variable-Rate Feature: Increases in the interest rate will increase the amount of your minimum monthly payment. For example, if the interest rate increased from 10.25% to the 18% maximum permitted under the plan, the minimum monthly payment on a $10,000 balance would increase from $85.42 to $150.

You will be notified of changes in the interest rate on the monthly periodic statement you receive following the change.

Rate History: This table shows how the interest rate would have been affected by actual changes in the index that occurred between 1977 and 1987. It does not necessarily indicate how the index will change in the future.

Year	Index (percent)	Margin (percent)	Interest rate (percent)
1977	5.75	2	8.75
1978	9.00	2	11.00
1979	11.54	2	13.54
1980	11.48	2	13.48
1981	20.39	2	18.00*
1982	16.26	2	18.00*
1983	10.50	2	12.50
1984	13.00	2	15.00
1985	9.50	2	11.50
1986	8.16	2	10.16
1987	8.25	2	10.25

* This interest rate reflects the 18% lifetime interest rate cap.

►[10a] The disclosures may include an acknowledgement of receipt, the date of the transaction, and the consumer's name address, and account number.◄

►[10b] The disclosures required by § 226.6(d) and (f) may be sparated from the other disclosures. Creditors also may use an insert or attachment for disclosing information that is subject to change, such as the index, interest rate, and payment example.◄

►[10c] In the case of telephone or mail applications or when an application reaches the creditor through an intermediary agent or broker, disclosures may be delivered not later than three business days after the creditor receives the consumer's application.◄

[36] The term "material disclosures" means the information that must be provided to satisfy the requirements in § 226.6 with regard to the method of determining the finance charge and the balance upon which a finance charge will be imposed, the annual percentage rate, [and] the amount or method of determining the amount of any membership or participation fee that may be imposed as part of the plan[.]►, and those items set forth in § 226.6(e).◄

Information on our other home equity programs is available on request.

Board of Governors of the Federal Reserve System, December 21, 1987.

William W. Wiles,

Secretary of the Board.

12 CFR Part 226

[Reg. Z; Docket No. R–0545A]

Proposed Update to Official Staff Commentary

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed official staff interpretation.

SUMMARY: The Board is publishing for additional comment proposed changes to the official staff commentary to Regulation Z (Truth in Lending). The proposed commentary would offer guidance to creditors in complying with the provisions of an amendment to Regulation Z that is being published in final form in this issue of the **Federal Register**. The regulatory amendment requires creditors to provide more information to consumers about certain closed-end variable-rate loans than is currently required. The proposed commentary revisions include new material as well as numerous technical changes in existing material.

DATES: Comments must be received on or before January 29, 1988.

ADDRESSES: Comments should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC, 20551, or delivered to the 20th Street courtyard entrance, on 20th Street between C Street and Constitution Avenue, NW., Washington, DC, between 8:45 a.m. and 5:15 p.m. weekdays. Comments should include a reference to Docket No. R–0545A. Comments may be inspected in Room B–1122 between 8:45 a.m. and 5:15 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: Sharon T. Bowman or Thomas J. Noto, Staff Attorneys, or Michael S. Bylsma, Senior Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, DC, 20551, (202) 452–3667. For the hearing impaired *only*, Telecommunication Device for the Deaf (TDD), contact Earnestine Hill or Dorothea Thompson at (202) 452–3544.

SUPPLEMENTARY INFORMATION:

(1) Background

This proposed official staff interpretation is being published in conjunction with a final amendment to Regulation Z that is designed to provide more information to consumers about closed-end variable-rate transactions secured by a consumer's principal dwelling with a term greater than one

year. The proposed commentary would apply and interpret the regulatory amendment. Proposed revisions to the commentary were originally published for public comment on November 24, 1986 (51 FR 42248), however to obtain as much input as possible on provisions that will interpret the regulatory amendment, the Board is publishing for additional comment the proposed changes to the commentary. Following public comment, it is anticipated that commentary revisions will be adopted in final form with compliance optional until October 1, 1988.

The comment period for this proposal has been limited to 30 rather than the usual 60 days. The shorter comment period will ensure that final commentary provisions are in place as quickly as possible to assist creditors in complying with the new amendments to Regulation Z. The proposed revisions include material that was originally proposed for comment in November of 1986, with a few additions. Additional material is included, for example, regarding the definition of a variable-rate "program" and the treatment of discount features for disclosure purposes. The major revisions proposed for the commentary begin with comment 18(f)(2). Portions of existing commentary that would undergo only minor changes have been reprinted to assist commenters in understanding the proposed revisions.

(2) Explanation of Revisions

The following is a brief description of the proposed revisions to the commentary:

Subpart C—Closed-end Credit

Section 226.17—General disclosure requirements.

17(a) Form of Disclosures

Paragraph 17(a)(1). Comment 17(a)(1)–2 would be amended to clarify that the general segregation requirement in § 226.17(a) does not apply to the disclosures required under new §§ 226.19(b) and 226.20(c). The information contained in the fifth bulleted paragraph under comment 17(a)(1)–5, which discusses disclosure of a variable-rate feature on other documents, would be deleted since similar information would be required under new paragraph (f)(2) of § 226.18. In addition, the ninth bulleted paragraph under comment 17(a)(1)–5, discussing negative amortization, would be revised to change the reference from § 226.18(f)(3) to new § 226.18(f)(1)(iii).

17(b) Time of Disclosures

Comment 17(b)–1 would be expanded by adding a reference to the timing requirements in new § 226.19(b) for variable-rate transactions secured by the consumer's principal dwelling with a term greater than one year. Comment 17(b)–2 would be amended by adding a reference to the timing rules for additional disclosures required upon the conversion of open-end transactions to certain closed-end variable-rate transactions. 17(c) Basis of Disclosures and Use of Estimates

Paragraph 17(c)(1). The first bulleted paragraph in comment 17(c)(1)–2, discussing preferential employee rates, would be revised to change the reference from § 226.18(f) to § 226.19(b). This change would clarify that certain preferred-rate employee loans are variable-rate transactions subject to the disclosure requirements of new § 226.19(b). Material generally relating to the basis of disclosures for variable-rate transactions currently in the commentary to § 226.18(f) would be moved to the commentary to § 226.17(a)(1) and the material currently in the commentary to § 226.17(a)(1) would be reordered to accommodate this change. Comments 17(c)–8 –9 and –10, discussing graduated payment mortgages, Morris plans and number of transactions would be redesignated, respectively, as comments 17(c)–12, –14 and –15. Material currently contained in comments 18(f) –2 and –3, discussing the basis of disclosures and use of estimates for variable-rate transactions, would be added as comments 17(c)(1) –8 and –9. Comment 17(c)(1)–10 would incorporate material on discounted variable-rate transactions currently contained in comment 18(f)–8. Most of the material currently in comment 18(f)–6 relating to the basis of disclosure for certain variable-rate transactions would be incorporated in comment 17(c)(1)–11. Two parts of existing comment 18(f)–6 that do not relate to the basis of disclosure, namely the reference in the second bullet to the conditions for imposition of a shared-appreciation feature and the reference to the hypothetical example in the third bullet, would be deleted in the new comment 17(c)(1)–11. The material currently in comment 18(f)–7, discussing growth-equity mortgages, would be incorporated in new comment 17(c)(1)–13, although detailed discussion of the option of disclosing by analogy to variable-rate disclosures would be deleted in favor of a more general reference in the new comment 17(c)(1)–13.

17(f) Early Disclosures

As a result of the revisions to § 226.19 of the regulation, the reference in comment 17(f)–3 to § 226.19(b) would be revised to reference § 226.19(a)(2).

Section 226.18—Content of disclosures.

18(f) Variable Rate

Comment 18(f)–1 would be expanded to explain whether paragraph (f)(1) or (f)(2) of § 226.18 applies to a particular variable-rate transaction. Comment 18(f)–1 would also indicate that variable-rate loans that are for a term longer than one year and are secured by the consumer's principal dwelling are subject to the special early disclosure requirements of new § 226.19(b).

With minor changes, material relating to the basis of disclosures for variable-rate transactions would be moved to the commentary to § 226.17(c)(1). Consequently, comments 18(f) –2 and –3 and comments 18(f) –5 through –8 would be deleted. Present comment 18(f)–4 would be redesignated as comment 18(f)–2. The material currently in comments 18(f) –2 and –3 would be incorporated in comments 17(c)(1) –8 and –9, and the material currently in comments 18(f)–6, –7 and –8 would be incorporated, respectively, in comments 17(c)(1)–11, –13 and –12. The material currently in comment 18(f)–5 would be incorporated in the commentary to new § 226.19(b), which contains the new disclosure requirements. The material currently in comment 18(f)–6 would be incorporated in new comment 19(b)–4 to clarify that the designated transactions are subject to the general disclosure requirements of new § 226.19(b). The material currently in comment 18(f)–6 relating to the basis for disclosures would not be transferred to new comment 19(b)–4, since such information would be incorporated in comment 17(c)(1)–12.

The current headings referring to paragraphs 18(f)(1) through (4) would be changed to reference paragraphs 18(f)(1)(i) through (iv) to reflect the fact that current § 226.18(f) of the regulation has become § 226.18(f)(1).

Comment 18(f)(2)–1 would be added to clarify that where a variable-rate transaction is secured by the consumer's principal dwelling and has a term greater than one year, later Truth in Lending disclosures must state that the variable-rate feature exists and refer to the variable-rate disclosures provided earlier to the consumer under new § 226.19(b).

Section 226.19—Certain residential mortgage transactions.

The title of this section of the commentary would be revised to read "Certain Residential Mortgage and Variable-Rate Transactions" to reflect the fact that § 226.19 of the regulation now incorporates disclosure provisions for variable-rate loans secured by the consumer's principal dwelling that have a term greater than one year.

19(a) Time of Disclosure

The current heading referring to 19(a) would be redesignated as 19(a)(1). Existing comments 19(a)–1 through 19(a)–5 would therefore become comments 19(a)(1) –1 through –5.

19(b) Rediscloure Required

The current heading referring to 19(b) would be redesignated as 19(a)(2). Existing comments 19(b)–1 through 19(b)–4 would therefore become comments 19(a)(2) –1 through –4.

Comment 19(b)–1 would be added to clarify that the new requirements of § 226.19(b) apply to all variable-rate transactions secured by the consumer's principal dwelling with a term greater than one year.

Comment 19(b)–2 would be added to explain the special timing rules under § 226.19(b) for cases where applications are received through an agent or broker or by telephone, as well as where open-end accounts convert, pursuant to a written agreement, to transactions subject to § 226.19(b).

Comment 19(b)–3 would incorporate material previously contained in comment 18(f)–5 to clarify that creditors may substitute information provided in accordance with the variable-rate regulations of other federal agencies for the disclosures required by § 226.19(b). The reference to footnote 43 and § 226.18(f) in old comment 18(f)–5 would be revised to reference footnote 45a and § 226.19(b), respectively, in the new comment 19(b)–3.

Comment 19(b)–4 would incorporate, with some changes, material previously contained in comment 18(f)–6 clarify that the designated transactions are subject to the general disclosure requirements of §226.19(b). The last sentence in the first bullet under old comment 18(f)–6 referring to the disclosures that must be given for renegotiable rate mortgages would be deleted in the new comment 19(b)–4, as would the third and fourth sentences in the second bullet dealing with disclosures for shared-equity mortgages. The language in the third bullet under old comment 18(f)–6 would be revised in the new comment 19(b)–4 to take into account transactions where the initial underlying rate is fixed, and the reference to the hypothetical example in the last sentence would be deleted.

Paragraph 19(b)(1) Comment 19(b)(1)–1 would be added to clarify what constitutes a suitable substitute for the *Consumer Handbook on Adjustable Rate Mortgates.*

Paragraph 19(b)(2). Comment 19(b)(2)–1 would be added to explain that a creditor must provide disclosures for each of its variable-rate programs in which the consumer expresses an interest.

Comment 19(b)(2)–2 would be added to clarify what constitutes a separate loan program that would require separate program disclosures. Comment 19(b)(2)–3 would be added to clarify that the disclosures required under §226.19(b)(2) need only be made as applicable, and comment 19(b)(2)–4 would be added to explain the circumstances under which a creditor must revise its loan program disclosures.

Comments to new § 229.19(b)(2)(i) through (xiv) would be added to clarify the requirements imposed by these paragraphs and to illustrate how a creditor may comply with the new provisions.

Section 226.20—Subsequent disclosure requirements.

20(a) Refinancings

Comment 20(a)–3 would be amended to clarify that the addition of a variable-rate feature to an obligation or an increase in the rate based on a previously undisclosed variable-rate feature are events requiring disclosures under new § 226.19(b)(2) if the variable-rate transaction is secured by the consumer's principal dwelling and has a term greater than one year. The comment explains that, in such cases, disclosures must be given at the time of the addition or increase.

20(b) Assumptions

Comment 20(b)–6 would be amended to provide that assumptions of variable-rate transactions secured by the consumer's principal dwelling with a term greater than one year may be disclosed in accordance with § 226.18(f)(2)(i) or § 226.18(f)(1).

20(c) Variable-Rate Adjustments

Comment 20(c)–1 would be added to explain what subsequent disclosures are required in cases where a rate adjustment is made in a variable-rate transaction subject to new § 26.19(b). Comment 20(c)–2 would clarify that shared-equity loans and preferred-rate employees loans with an underlying fixed rate would be exempt from the new subsequent disclosure requirements of § 226.20(c).

Appendix H—Closed-End Model Forms and Clauses

Commentary would be provided to interpret the new model clauses H–4(B) through H–4(D) in Appendix H of the regulation. These additions would be numbered as comments app. H–5 through –7. In addition commentary describing new Sample H–14 would be added as comment app. H–18. Consequently, existing comments app. H–5 through –14 would be renumbered as comments app. H–8 through –17 and existing comments app. H–16 through –20 would be renumbered as comments app. H–19 through –23.

List of Subjects in 12 CFR Part 226

Advertising, Banks, Banking, Consumer protection, Credit, Federal Reserve System, Finance, Penalties, Rate limitations, Truth in lending.

Certain conventions have been used to highlight the proposed revisions. New language is shown inside arrows, while language that would be deleted is set off with brackets. Pursuant to authority granted in section 105 of the Truth in Lending Act (15 U.S.C. 1604 as amended), the Board proposes to amend the official staff commentary to Regulation Z (12 CFR Part 226 Supp. I) as follows:

PART 226—[AMENDED]

(1) The authority citation for Part 226 continues to read:

Authority: Sec. 105, Truth in Lending Act, as amended by sec. 605, Pub. L. 96–221, 94 Stat. 170 (15 U.S.C. 1604 *et seq.*); sec. 1204(c), Competitive Equality Banking Act, Pub. L. 100–86, 101 Stat. 552.

(2) *Text of proposed revisions.* The proposed revisions to the commentary (12 CFR Part 226 Supp. I) include revising comment 17(a)(1)–2; removing the information contained in the fifth bullet under comment 17(a)(1)–5 and changing the reference in the ninth bullet under this comment from § 226.18(f)(3) to § 226.18(f)(1)(iii); revising comment 17(b)–1; changing the reference in the first bullet under comment 17(c)(1)–2 from § 226.18(f) to § 226.19(b); redesignating existing comment 17(c)(1)–8 as comment 17(c)(1)–12; redesignating existing comments 17(c)(1)–9 and 17(c)(1)–10 as comments 17(c)(1)–14 and 17(c)(1)–15, respectively; adding new comments 17(c)(1)–8 through 17(c)(1)–11 and 17(c)(1)–13; changing the reference in comment 17(f)–3 from § 226.19(b) to § 226.19(a)(2); revising comment 18(f)–1; deleting comment 18(f)–2; redesignating existing comment 18(f)–4 as comment 18(f)–2; deleting comments 18(f)–3

through 18(f)–8; redesignating comments 18(f)(1)–1, 18(f)(2)–1, 18(f)(3)–1, 18(f)(4)–1 and 18(f)(4)–2 as comments 18(f)(1)(i)–1, 18(f)(1)(ii)–1, 18(f)(1)(iii)–1, 18(f)(1)(iv)–1, and 18(f)(1)(iv)–2, respectively; adding new comment 18(f)(2)–1; revising the title to the commentary to § 226.19; redesignating paragraphs 19(a) and 19(b) as paragraphs 19(a)(1) and 19(a)(2), respectively; redesignating comments 19(a)–1 through 19(a)–5 as comments 19(a)(1)–1 through 19(a)(1)–5 and comments 19(b)–1 through 19(b)–4 as 19(a)(2)–1 through 19(a)(2)–4; adding new comments 19(b)–1 through 19(b)(2)(xiv)–1; revising comment 20(a).3; revising comment 20(b)–6 and adding comments 20(c)–1 and 20(c)–2; amending the commentary to Appendix H by redesignating comments app. H–5 through app. H–20 as app. H–8 through H–23, adding new comments app. H–5 through app. H–7, and revising newly redesignated comment app. H–18, to read as follows:

Supplement I—Official Staff Interpretation

* * * * *

§ 226.17—General disclosure requirements.

17(a) Form of Disclosures

Paragraph 17(a)(1)

2. *Segregation of disclosures.* The disclosures may be grouped together and segregated from other information in a variety of ways. For example, the disclosures may appear on a separate sheet of paper or may be set off from other information on the contract or other documents:

- By outlining them in box.
- By bold print dividing lines.
- By a different color background.
- By a different type style.

►(The general segregation requirement described in this subparagraph does not apply to the disclosures required under § 226.19(b) and 226.20(c) although the disclosures must be clear and conspicuous.)◄

* * * * *

5. *Directly related.* * * *

[• When a variable-rate feature is disclosed on other documents * * *.]

* * * * *

• A brief reference to negative amortization in variable-rate transactions. For example, in the variable-rate disclosure, the creditor may include a short statement such as "Unpaid interest will be added to principal." (See the commentary to [§ 226.18(f)(3)]►226.18(f)(1)(iii)◄.)

* * * * *

17(b) Time of Disclosures

1. **Consummation.** As a general rule, disclosures must be made before "consummation" of the transaction. The disclosures need not be given by any particular time before consummation, except in certain mortgage transactions ►and variable-rate transactions secured by the consumer's principal dwelling with a term greater than one year◄ under § 226.19. (See the commentary to §226.2(a))13) regarding the definition of consummation.)

2. **Converting open-end to closed-end credit.** If an open-end credit account is converted to a closed-end transaction under a written agreement with the consumer, the creditor must provide a set of closed-end credit disclosures before consummation of the closed-end transaction. ►(See the commentary to § 226.19(b)(2) for the timing rules for additional disclosures required upon the conversion to a variable-rate transaction secured by a consumer's principal dwelling with a term greater than one year.)◄ If consummation of the closed-end transaction occurs at the same time as the consumer enters into the open-end agreement, the closed-end credit disclosures may be given at the time of conversion. * * *

17(c) Basis of Disclosures and Use of Estimates

Paragraph 17(c)(1)

* * * * *

2. **Modification of obligation.** * * *

• If the creditor-employer offers a preferential employee rate, the disclosures should reflect the terms of the legal obligation. (See the commentary to section [226.18(f)] ►226.19(b)◄ for an example of a preferred-rate employee transaction that is a variable-rate transaction.)

* * * * *

►8. **Basis of disclosures in variable-rate transactions.** The disclosures for a variable-rate transaction and must be based on the terms in effect at the time of consummation. However, in a variable-rate transaction with either a seller buydown that is reflected in the credit contract or a consumer buydown, disclosures should not be based solely on the initial terms. In those transactions, the disclosed annual percentage rate should be a composite rate based on the lower rate for the buydown period and the rate that is the basis of the variable-rate feature for the remainder of the term. (See the commentary to §226/17(c) for a discussion of buydown transactions and the commentary to § 226.19(a)(2) for a discussion of the rediscloure of certain residential mortgage transactions with a variable-rate feature).

9. **Use of estimates in variable-rate transactions.** The variable-rate feature does not, by itself, make the disclosures estimates.

10. **Discounted variable-rate transactions.** In some variable-rate transactions, creditors may set an initial interest rate that is not determined by the index or formula used to make later interest rate adjustments. Typically, this initial rate charged to consumers is lower than the rate would be if it were calculated using the index or formula. However, in some cases the initial rate may be higher. In a discounted transaction, for example, a creditor may calculate interest rates according to a formula using the six-month Treasury bill rate plus a 2 percent margin. If the Treasury bill rate at consummation is 10 percent, the creditor may forgo the 2 percent spread and charge only 10 percent for a limited time, instead of setting an initial rate of 12 percent.

- When creditors use an initial interest rate that is not calculated using the index or formula for later rate adjustments, the disclosures should reflect a composite annual percentage rate based on the initial rate for as long as it is charged and, for the remainder of the term, the rate that would have been applied using the index or formula at the time of consummation. The rate at consummation need not be used if a contract provides for a delay in the implementation of changes in an index value. For example, if the contract specifies that rate changes are based on the index value in effect 45 days before the change date, creditors may use the index value in effect not more than 45 days before consummation in calculating a composite annual percentage rate.
- The effect of the multiple rates must also be reflected in the calculation and disclosure of the finance charge, total, of payments, and payment schedule.
- If a loan contains a rate or payment cap that would prevent the initial rate or payment, at the time of the first adjustment, from changing to the rate determined by the index or formula at consummation, the effect of that rate or payment cap should be reflected in the disclosures.
- Because these transactions involve irregular payment amounts, an annual percentage rate tolerance of ¼ of 1 percent applies, in accordance with § 226.22(a)(3) of the regulation.
- Examples of discounted variable-rate transactions include—

—A 30-year loan for $100,000 with no prepaid finance charges and rates determined by the Treasury bill rate plus 2 percent. Rate and payment adjustments are made annually. Although the Treasury bill rate at the time of consummation is 10 percent, the creditor sets the interest rate for one year at 9 percent, instead of 12 percent according to the formula. The disclosures should reflect a composite annual percentage rate of 11.63 percent based on 9 percent for one year and 12 percent for 29 years. Reflecting those two rate levels, the payment scheduled should show 12 payments of $804.62 and 348 payments of $1,025.31. The finance charge should be $226,463.32 and the total of payments $366,463.32.

—Same loan as above, except with a 2 percent rate cap on periodic adjustments. The disclosures should reflect a composite annual percentage rate of 11.53 percent based on 9 percent for the first year, 11 percent for the second year, and 12 percent for the remaining 28 years. Reflecting those three rate levels, the payment schedule should show 12 payments of $804.62, 12 payments of $950.09, and 336 payments of $1,024.34. The finance charge should be $265,234.76, and the total of payments $365,234.76.

—Same loan as above, except with a 7½ percent cap on payment adjustments. The disclosures should reflect a composite annual percentage rate of 11.64 percent, based on 9 percent for one year and 12 percent for 29 years. Because of the payment cap, five levels of payment should be reflected. The payment schedule should show 12 payments of $804.62, 12 payments of $864.97, 12 payments of $929.86, 12 payments of $999.60, and 312 payments of $1,070.03. The finance charge should be $277,037.96, and the total of payments $377,037.96.

This paragraph does not apply to variable-rate loans in which the initial interest rate is set according to the index or formula used for later adjustments but is not set at the value of the index or formula at consummation. For example, if a creditor commits to an initial rate based on the formula on a date prior to consummation, but the index has moved during the period between that time and consummation, a creditor should base its disclosures on the initial rate.

11. *Other variable-rate transactions.* Examples of variable-rate transactions include:

- Renegotiable rate mortgage instruments that involve a series of short-term loans secured by a long-term obligation, where the lender is obligated to renew the short-term loans at the consumer's option. At the time of renewal, the lender has the option of increasing the interest rate. Disclosures must be given for the longer term of the obligation, with all disclosures calculated on the basis of the rate in effect at the time of consummation of the transaction.
- "Shared-equity" or "shared-appreciation" mortgages that have a fixed rate of interest and an appreciation share based on the consumer's equity in the mortgaged property. The appreciation share is payable in a lump sum at a specified time. Disclosures must be based on the fixed interest rate. (As discussed in § 226.2, other types of shared-equity arrangements are not considered "credit" and are not subject to Regulation Z.)
- Preferred-rate employee loans where the terms of the legal obligation provide that the rate will increase only if the employee leaves the employ of the creditor and the note reflects the preferred rate. The disclosures are to be based on that rate.

Graduated-payment mortgages and step-rate transactions without a variable-rate feature are not considered variable-rate transactions.◄

[8.] ►12◄. *Graduated-payment adjustable-rate mortgages.* * * *

►13. *Growth-equity mortgages.* Also referred to as payment-escalated mortgages, these mortgage plans involve scheduled payment increases to prematurely amortize the loan. The initial payment amount is determined as for a long-term loan with a fixed interest rate. Payment increases are scheduled periodically, based on changes in an index. The larger payments result in accelerated amortization of the loan. In disclosing these mortgage plans, creditors may either:

- Estimate the amount of payment increases, based on the best information reasonably available; or
- Disclose by analogy to the variable-rate disclosures in § 226.18(f)(1).

(This discussion does not apply to growth-equity mortgages in which the amount of payment increases can be accurately determined at the time of disclosure. For these mortgages, as for graduated-payment mortgages, disclosures should reflect the scheduled increases in payments.)◄

17(f) Early Disclosures

* * * * *

3. *Content of new disclosures.* If rediscloure is required, the creditor has the option of either providing a complete set of new disclosures, or providing disclosures of only the terms that vary from those originally disclosed. (See the commentary to section [226.29(b)[►226.19(a)(2)◄.)

* * * * *

Section 226.18—Content of disclosures.

* * * * *

18(f) Variable Rate

1. *Coverage.* **The requirements of § 226.18(f) apply to all transactions in which the terms of the legal obligation allow the creditor to increase the rate originally disclosed to the consumer. It includes not only increases in the interest rate but also increases in other components, such as the rate of required credit life insurance. The provisions, however, do not apply to increases resulting from delinquency (including late payment), default, assumption, acceleration or transfer of the collateral. ►Section 226.18(f)(1) applies to variable-rate transactions that are not secured by the consumer's principal dwelling and to those that are secured by the principal dwelling but have a term of one year or less. Section 226.18(f)(2) applies to variable-rate transactions that are secured by the consumer's principal dwelling and have a term greater than one year. Moreover, transactions subject to § 226.18(f)(2) are subject to the special early disclosure requirements of § 226.19(b). Creditors are permitted under footnote 43 to substitute in any variable-rate transaction the disclosures required under § 226.19(b) for those disclosures ordinarily required under § 226.18(f)(1). Creditors who provide variable-rate disclosures under § 226.19(b) must comply with all of the requirements of that section including the timing of disclosures, and must also provide the disclosures required under § 226.18(f)(2). Creditors utilizing footnote 43 may, but need not, also provide disclosures pursuant to § 226.20(c). (Substitution of disclosures under § 226.18(f)(1) in transactions subject to § 226.19(b) is not permitted under the footnote.)◄

* * * * *

►*Paragraph 18(f)(2)*

1. *Disclosure required.* In a variable-rate transaction that is for a term greater than one year and is secured by the consumer's principal dwelling, the creditor must give special early disclosure under § 226.19(b) in addition to the later disclosures required under § 226.18(f)(2). The disclosures under § 226.18(f)(2) must state that the variable-rate feature exists and that variable-rate disclosures have been provided earlier.◄

Section 226.19—Certain Residential Mortgage ►and Variable-Rate◄ Transactions

[19(a) Time of Disclosure]

►19(a)(1) Time of Disclosure◄

* * * * *

[19(b) Rediscloure Required]

►19(a)(2) Rediscloure Required◄

* * * * *

►*Certain Variable-Rate Transactions*

1. *Coverage.* Section 226.19(b) applies to all closed-end variable-rate transactions that are secured by the consumer's principal dwelling and have a term greater than one year. The requirements of this section apply not only to transactions financing the initial acquisition of the consumer's principal dwelling, but also to any other closed-end variable-rate transactions secured by the principal dwelling. Closed-end variable-rate transactions that are not secured by the principal dwelling, or are secured by the principal dwelling but have a term of one year or less are subject to the disclosure requirements of § 226.18(f)(1) rather than those of § 226.19(b).

2. *Timing.* A creditor must give the disclosures required under this section at the time an application form is provided or before the consumer pays a non-refundable fee, whichever is earlier. In cases where a creditor received a written application through an intermediary agent or broker, however, footnote 45b provides a substitute timing rule requiring the creditor to deliver the disclosures or place them in the mail not later than three business days after the creditor receives the consumer's written application. This three-day rule also applies where the creditor takes an application over the telephone. If, however, the consumer merely requests an application over the telephone, the creditor must include the early disclosures required under this section with the application that is sent to the consumer. In cases where the creditor solicits applications through the mail, the creditor must also send the disclosures required under this section if an application form is included with the solicitation. In cases where an open-end credit account is converted to a closed-end transaction subject to this section under a written agreement with the consumer, disclosures under this section should be given at the time of conversion. (See the commentary to § 226.20(a) for information on

VOL 52 ISS 247 DEC 24 1987 UMI

the timing requirements for § 226.19(b)(2) disclosures when a variable-rate feature is later added to a transaction.)

Other variable-rate regulations. Transactions in which the creditor is required to comply with and has complied with the disclosure requirements of the variable-rate regulations of other federal agencies are exempt from the requirements of § 226.19(b), by virtue of footnote 45a. Those variable-rate regulations include the regulations issued by the Federal Home Loan Bank Board and those issued by the Department of Housing and Urban Development. The exception in footnote 45a is also available to creditors that are required by state law to comply with the federal variable-rate regulations noted above and to creditors that are authorized by title VIII of the Depository Institutions Act of 1982 (12 U.S.C. 3801 *et seq.*) to make loans in accordance with those regulations. Creditors using this exception should comply with the timing requirements of those regulations, if they differ, rather than the timing requirements of Regulation Z in making the variable-rate disclosures.

4. *Examples of variable-rate transactions.* The following transactions, if they are for a term greater than one year and are secured by the consumer's principal dwelling, constitute variable-rat transactions subject to the disclosure requirements of § 226.19(b). (If these variable-rate transactions either are not secured by the consumer's principal dwelling, or have a term of one year or less, § 226.18(f)(1) applies rather than § 226.19(b).)

- Renegotiable rate mortgage instruments that involve a series of short-term loans secured by a long-term obligation, where the lender is obligated to renew the short-term loans at the consumer's option. At the time of renewal, the lender has the option of increasing the interest rate.
- "Shared-equity" or "shared-appreciation" mortgages that have a fixed rate of interest and an appreciation share based on the consumer's equity in the mortgage property. The appreciation share is payable in a lump sum at a specified time. The requirements of § 226.19(b)(2) (iv), (v), (viii), (ix), (x) and (xii) do not apply to shared-equity mortgages, however. (As discussed in § 226.2, other types of shared-equity arrangements are not considered "credit" and are not subject to Regulation Z.)
- Preferred-rate employee loans where the terms of legal obligation provide that the initial underlying rate is fixed, but will increase if the employee leaves the employ of the creditor, and the note reflects the preferred rate. The disclosures under § 226.19(b)(2) (v), (viii), (ix), (x), (xii), and (xiii) do not apply to such loans.

Graduated-payment mortgages and step-rate transactions without a variable-rate feature are not considered variable-rate transactions.

Paragraph 19(b)(1)

1. *Substitutes.* Creditors who wish to use publications other than the *Consumer Handbook on Adjustable Rate Mortgages* must make a good faith determination that their brochures are suitable substitutes to the *Consumer Handbook*. A substitute is suitable if it is, at a minimum, comparable to the *Consumer Handbook* in substance and comprehensiveness. Creditors are permitted to provide more detailed information than is contained in the *Consumer Handbook*.

Paragraph 19(b)(2)

1. *Disclosure for each variable-rate program.* In variable-rate transactions subject to § 226.19(b) requirements, a creditor must provide disclosures that fully describe each of the creditor's variable-rate loan programs in which the consumer expresses an interest at the time an application form is provided or before the consumer pays a non-refundable fee, whichever is earlier. Moreover, if a consumer requests disclosures for other closed-end variable-rate programs subject to § 226.19(b), a creditor must provide disclosures for as many other of its programs as the consumer requests. The creditor, of course, is permitted to give the consumer information about all of its programs subject to § 226.19(b) initially. In addition, these disclosures may be inserted in the *Consumer Handbook* (or a suitable substitute) as long as they are identified as the creditor's loan program disclosures.

2. *Variable-rate loan program defined.* If the identification, the presence or absence, or the exact value of a loan feature must be disclosed under this section, variable-rate loans that differ as to such features constitute separate loan programs. For example, separate loan program disclosures would be required based on differences in any of the following loan features:

- The index or other formula used to calculate interest rate adjustments
- The rules relating to changes in the index, interest rate, payments, and loan balance
- The presence or absence of, and the amount of, rate or payment caps
- The presence of a balloon or a demand feature
- The possibility of negative amortization
- The possibility of interest rate carryover
- The frequency of interest rate and payment adjustments
- The presence of a discount feature

In addition, if a loan feature must be taken into account in preparing the disclosure required by § 226.19(b)(2)(ix), variable-rate loans that differ as to that feature constitute separate programs and require separate loan program disclosures under § 226.19(b)(2). If, however, a representative value may be given for a loan for a loan feature or the feature need not be disclosed under § 226.19(b)(2), variable-rate loans that differ as to such features do not constitute separate loan programs. For example, separate program disclosures would not be required based on differences in the following loan features:

- The amount of a discount
- The amount of a margin

3. *As applicable.* The disclosures required by this section need only be made as applicable. Any disclosure not relevant to a particular transaction may be eliminated. For example, if the transaction does not contain a demand feature, the disclosure required under § 226.19(b)(2)(xii) need not be given.

4. *Revisions.* A creditor must revise the disclosures required under this section once a year when the new index value becomes available. A change in the loan program, however, would require new disclosures.

Paragraph 19(b)(2)(i)

1. *Change in interest rate, payment, or term.* A creditor must disclose the fact that the terms of the legal obligation permit the creditor, after consummation of the transaction, to increase (or decrease) the interest rate, payment, or term of the loan initially disclosed to the consumer. For example, the disclosures for a variable-rate program in which the interest rate and payment (but not loan term) can change might read, "Your interest rate and payment can change yearly."

Paragraph 19(b)(2)(ii)

1. *Identification of index or formula.* If a creditor ties interest rate changes to a particular index, this fact must be disclosed, along with a source of information about the index. For example, if a creditor uses the weekly average yield on U.S. Treasury Securities adjusted to a constant maturity as its index, the disclosure might read, "Your index is the weekly average yield on U.S. Treasury Securities adjusted to a constant maturity of one year published weekly in the Wall Street Journal." If no particular index is used, the creditor must briefly describe the formula used to calculate interest rate changes.

2. *Changes at creditor's discretion.* If interest rate changes are at the creditor's discretion, this fact must be disclosed. If an index is internally defined, such as by a creditor's prime rate, the creditor should either briefly describe that index or state that interest rate changes are at the creditor's discretion.

Paragraph 19(b)(2)(iii)

1. *Determination of interest rate and payment.* This provision requires an explanation of how the creditor will determine the consumer's interest rate and payment. In cases where a creditor bases its interest rate on a specific index and adjusts the index through the addition of a margin, for example, the disclosure might read, "Your interest rate is based on the index plus a margin, and your payment will be based on the interest rate, loan balance, and remaining loan term."

Paragraph 19(b)(2)(iv)

1. *Current margin value and interest rate.* Because the disclosures can be prepared in advance, the interest rate and margin may be several months old when the disclosures are delivered. A statement, therefore, is required alerting consumers to the fact that they should inquire about the current margin value applied to the index and the current interest rate. For example, the disclosure might state, "You should ask us for our current interest rate and margin."

Paragraph 19(b)(2)(v)

1. *Discounted interest rate.* In some variable-rate transactions, creditors may set an initial interest rate that is not determined by the index or formula used to make later interst rate adjustments. Typically, this initial rate charged to consumers is lower than the rate would be if it were calculated using the index or formula. However, in some cases the initial rate may be higher. If the initial interest rate contains a discount feature, creditors must alert the consumer to this fact. For example, if a creditor discounted a consumer's initial rate, the disclosure might state, "Your initial interst rate is not based on the index used to make later adjustments." (See the commentary to § 226.17(c)(1) for a further discussion of discounted variable-rate transactions.) In addition, the disclosure must suggest that consumers inquire about the amount that the program is currently discounted. For example, the disclosure might state, "Ask us for the amount our Adjustable Rate Mortgages are currently discounted." (See the commentary to § 226.19(b)(2)(viii) for a discussion of how to reflect the discount in the historical example.)

Paragraph 19(b)(2)(vi)

1. *Frequency.* The frequency of interest rate and payment adjustments must be disclosed. If interest rate changes will be imposed more frequently or at different intervals than payment changes, a creditor must reveal the frequency and timing of both types of changes. For example, in a variable-rate transaction where interest rate changes are made monthly, but payment changes occur on an annual basis, this fact must be disclosed.

Paragraph 19(b)(2)(vii)

1. *Rate and payment caps.* The creditor must disclose limits on changes (increases or decreases) in the interest rate or payment, although the absence of such limits need not be stated. If an initial discount is not taken into account in applying overall or periodic rate limitations, that fact must be disclosed. If separate overall or periodic limitations apply to interest rate increases resulting from other events, such as the exercise of a fixed-rate conversion option or leaving the creditor's employ, those limitations must also be stated. Limitations do not include legal limits in the nature of usury or rate ceilings under state or federal statutes or regulations. (See § 226.30 for the rule requiring that a maximum interest rate be included in certain variable-rate transactions.)

2. *Negative amortization and interest rate carryover.* A creditor must disclose, where applicable, the possibility of negative amortization. For example, the disclosure might state, "If any of your payments is not sufficient to cover the interest due, the difference will be added to your loan amount." In addition, the creditor must disclose the existence of any interest rate carryover exists when a change in the index rate that is not imposed at the time of an adjustment because, for example, it exceeds an adjustment limitation, is carried over and incorporated into the calculation of future rate adjustments. For example, if the index rates 3 percentage points during the year, the loan contains a 2 percentage point cap on annual changes (increases or decreases) in the interest rate, and the creditor may impose the additional percentage point the following year, the creditor must disclose the fact that changes in the index will be carried over to subsequent interest rate adjustment rates. The disclosure might state, "Changes in the index not passed on as changes in the interest rate will be carried over to subsequent interest rate adjustment dates."

3. *Conversion option.* If a loan program permits consumers to convert their variable-rate loans to fixed-rate loans, the creditor must disclose that the interest rate may increase if the consumer converts the loan to a fixed-rate loan. The creditor must also disclose the rules relating to the conversion feature, such as the period during which the loan may be converted; any fee that may be charged at conversion; and how the fixed rate will be determined. The creditor should identify any index used and state the margin to be added to determine the fixed rate. (In disclosing the period during which the loan may be converted, the margin, and any fees to be charged at conversion, the creditor may use information applicable to the conversion feature during the six months preceding preparation of the disclosures. That information may be used until the program disclosures are otherwise updated.) Although the rules relating to the conversion option must be disclosed, the effect of exercising the option should not be reflected elsewhere in the disclosures, such as in the historical example or in the calculation of the initial and maximum interest rate and payments.

4. *Preferred-rate employee loans.* Section 226.19(b) applies to preferred-rate employee loans, where the rate will increase if the employee leaves the creditor's employ, whether or not the underlying rate is fixed or variable. In these transactions, the creditor must disclose that the rate may increase if the employee leaves the creditor's employ. The creditor must also disclose the rules relating to termination of the employee's preferred-rate, such as any fees that may be charged when the rate is changed and how the new rate will be determined.

Paragraph 19(b)(2)(viii)

1. *Index movement.* This section requires a creditor to provide an historical example, based on a $10,000 loan amount originating in 1977, showing how interest rate changes implemented according to the terms of the loan program would have affected payments and the loan balance at the end of each year during a 15-year period. (In all cases, the creditor need only calculate the payments and loan balance for the term of the loan. For example, in a five-year loan, a creditor would show the payments and loan balance for the five-year term, from 1977 to 1981 with a zero loan balance reflected for 1981. For the remaining ten years, 1982–1991, the creditor need only show the remaining index values.) Pursuant to this section, the creditor must provide a history of index values for the preceding 15 years. Initially, the disclosures would give the index values from 1977 to the present. Each year thereafter, the revised program disclosures should include an additional year of index values until 15 years of values are shown. If the values for an index have not been available for 15 years, a creditor need only go back as far as the values are available in giving a history and payment example. In all cases, only one index value per year need be shown. Thus, in transactions where interest rate adjustments are implemented more frequently than once per year, a creditor may assume that the interest rate and payment resulting from the index value chosen will stay in effect for the entire year for purposes of calculating the loan balance as of the end of the year and for reflecting other loan program terms. If a creditor uses an average of index values or any other index formula, the history given should reflect those values. The creditor should select one date or, when an average of single values is used as an index, one period and should base the example on index values measured as of that same date or period for each year shown in the history. In cases where interest rate changes are at the creditor's discretion (see the commentary to § 226.19(b)(2)(ii)), the creditor must provide a history of the rates imposed for the preceding period, beginning with the initial history of rates starting in 1977. In giving this history, the creditor need only go back as far as as the creditor's rates can reasonably be determined.

2. *Selection of margin.* For purposes of the disclosure required under § 226.19(b)(2)(viii), a creditor may select a margin that has been used during the six months preceding preparation of the disclosures, and should disclose that the margin is one that the creditor has used recently. The margin selected may be used until a creditor updates the disclosure form to reflect the most recent index values.

3. *Amount of discount.* For purposes of the disclosure required under § 226.19(b)(2)(viii), a creditor may select a discount (amount and term) that has been used during the six months preceding preparation of the disclosures, and should disclose that the discount is one that the creditor has used recently. The discount should be reflected in the historical example for as long as the discount is in effect. A creditor may assume that a discount has been in effect for a full year for purposes of reflecting the discount in the historical example.

Paragraph 19(b)(2)(ix)

1. *Calculation of payments.* A creditor is required to include a statement on the disclosure form that explains how a consumer may calculate his or her actual monthly payments for a loan amount other than $10,000. The example should be based

BEST COPY AVAILABLE

VOL 52 ISS 247 DEC 24 1987 UMI

upon the most recent payment shown in the historical example. The creditor, however, is not required to calculate the consumer's payments. (See the model clauses in Appendix H–4(C).)

Paragraph 19(b)(2)(x)

1. *Initial and maximum interest rate and payment.* The disclosure form must state the initial and maximum interest rates and payments for a $10,000 loan originated at the most recent interest rate (index value plus margin) shown in the historical example. In calculating the maximum payments under this paragraph, a creditor should assume that the interest rate increases as rapidly as possible under the loan program, and the maximum payment disclosed should reflect the amortization of the loan during this period. Thus, in a loan with 2 percentage point annual (and 5 percentage point overall) interest rate limitations or "caps," the maximum interest rate would be 5 percentage points higher than the most recent rate shown in the historical example. Moreover, the loan would not reach the maximum interest rate until the fourth year because of the 2 percentage point annual rate limitations, and the maximum payment disclosed would reflect the amortization of the loan during this period. If the loan program includes a discounted initial interest rate, the most recent rate shown in the historical example should be discounted by the amount of the discount reflected elsewhere in the disclosure for purposes of calculating the initial and maximum interest rates and payments. If a discount is reflected, the disclosure of the initial and maximum rates and payments should state the amount by which the most recent rate has been discounted. (See comment 19(b)(2)(viii)–3 regarding disclosure of the amount of a discount.)

Paragraph 19(b)(2)(xi)

1. *Demand feature.* If a variable-rate loan subject to § 226.19(b) requirements contains a demand feature, this fact must be disclosed. (pursuant to § 226.18(i), creditors would also disclose the demand feature in the standard disclosures given later.)

Paragraph 19(b)(2)(xii)

1. *Adjustment notices.* A creditor must disclose to the consumer the type of information that will be contained in subsequent notices of adjustments and when such notices will be provided. (See § 226.20(c) regarding notices of adjustments.) For example, in transactions providing that payment adjustments may accompany each interest rate adjustment, the disclosure might state, "You will be notified at least 25, but no more than 120, days before the due date of a payment at a new level. This notice will contain information about the index and interest rates, payment amount, and loan balance." In transactions where there may be interest rate adjustments without accompanying payment adjustments in a year, the disclosure might read, "You will be notified once each year during which interest rate adjustments, but no payment adjustments, have been made to your loan. This notice will contain information about the index and interest rates, payment amount, and loan balance."

Paragraph 19(b)(2)(xiii)

1. *Multiple loan programs.* A creditor that offers multiple variable-rate loan programs is required to have disclosures for each variable-rate loan program subject to § 226.19(b)(2). The creditor must inform the consumer that other closed-end variable-rate programs exist, and that disclosure forms are available for these additional loan programs. For example, the disclosure form might state, "Information on other Adjustable Rate Mortgage programs is available upon request."◄

Section 226.20—Subsequent disclosure requirements.

20(a) Refinancings

* * * * *

3. *Variable rate.* If a variable-rate feature was properly disclosed under the regulation, a rate change in accord with those disclosures is not a refinancing. For example, a renegotiable rate mortgage that was disclosed as a variable-rate transaction is not subject to new disclosure requirements when the variable-rate feature is invoked. However, even if it is not accomplished by the cancellation of the old obligation and substitution of a new one, a new transaction subject to new disclosures results if the creditor either:

- Increases the rate based on a variable-rate feature that was not previously disclosed, or
- Adds a variable-rate feature to the obligation.

►If either of these two events occurs in a variable-rate transaction secured by a principal dwelling with a term longer than one year, the disclosures required under § 226.19(b)(2) also must be given at that time.◄

* * * * *

20(b) Assumptions

* * * * *

6. *Disclosures.* For transactions that are assumptions within this provision, the creditor must make disclosures based on the "remaining obligation." For example:

* * *

If a transaction involves add-on or discount finance charges, the creditor may make abbreviated disclosures, as outlined in § 226.20(b)(1) through (5). ►Creditors providing disclosures pursuant to this section for assumptions of variable-rate transactions secured by the consumer's principal dwelling with a term longer than one year need not provide new disclosures under § 226.18(f)(2)(ii) or § 226.19(b) or periodic notices under § 226.20(c). Alternatively, a creditor may disclose the variable-rate feature of such a transaction solely in accordance with § 226.18(f)(1).◄

►20(c) Variable-Rate Adjustments

1. *Timing and content of adjustment notices.* This section requires a creditor to provide certain disclosures in cases where an adjustment to the interest rate is made in a variable-rate transaction subject to § 226.19(b). There are two timing rules, depending on whether payment changes may accompany interest rate changes. In transactions where the interest rate may be adjusted more frequently than the payment, a creditor is required to send at least one notice each year during which interest rate adjustments have occurred without accompanying payment adjustments. In transactions providing for payment adjustments to accompany interest rate adjustments, a creditor must deliver or place in the mail notices to borrowers at least 25, but not more than 120, calendar days before a payment at a new level is due. In all cases, the disclosure must include, as applicable, the new payment amount, the current and prior interest and index rates and the loan balance, and must notify the consumer of the extent to which any increase in the interest rate has been foregone. The disclosure must also state the payment that would be required to fully amortize the loan if this amount is different from the payment already disclosed. (In cases where an open-end account is converted to a transaction subject to § 226.19(b), the requirements of this section do not apply until adjustments are made following conversion.)

2. *Exceptions.* Section 226.20(c) does not apply to shared-equity loans and preferred-rate employee loans with an underlying fixed rate.◄

* * * * *

Appendix H—Closed-End Model Forms and Clauses

* * * * *

4. *Model H–4►(A)◄.** * *

5. *►Model H–4(B).* This model clause illustrates the variable rate disclosure required under § 226.18(f)(2), which would alert consumers to the fact that the transaction contains a variable-rate feature and that earlier disclosures were provided under § 226.19(b) in cases where the variable-rate transaction is secured by the consumer's principal dwelling with a term greater than one year.◄

6. *►Model H–4(C).* This model clause illustrates the early disclosures required generally under § 226.19(b) when the variable-rate transaction is secured by the consumer's principal dwelling and is for a term greater than on year. It includes information on how the consumer's interest rate is determined and how it can change over the term of the loan, and explains changes that may occur in the borrower's monthly payment. The model clause also contains an example of how to disclose historical changes in the index or formula values used to compute interest rates for the preceding 15 years. In addition, the model clause illustrates the disclosure of the initial and maximum interest rates and payments for a loan originated at the most recent rate shown in the historical example.◄

7. *►Model H–4(D).* This model clause illustrates the adjustment notice required under § 226.20(c), and provides examples of payment change notices and annual notices of interest rate changes.◄

[5.] ►8.◄*Model H–5.** * *
[6.] ►9.◄*Model H–6.** * *
[7.] ►10.◄*Model H–7.** * *
[8.] ►11.◄*Models H–8 and H–9.** * *
[9.] ►12.◄*Sample forms.** * *
[10.] ►13.◄*Sample H–10.** * *

[12.] ►15.◄*Sample H–12.** * *
[13.] ►16.◄*Sample H–13 through H–15.** * *
[14.] ►17.◄*Sample H–13.** * *

18.►*Sample H–14K.* This sample disclosure form illustrates the disclosures under § 226.19(b) for a variable-rate transaction secured by the consumer's principal dwelling with a term greater than one year. The sample form shows a creditor how to adapt the model clauses in Appendix H–4(C) to the creditor's own particular variable-rate program. The sample disclosure form describes the features of a specific variable-rate mortgage program and alerts the consumer to the fact that information on the creditor's other closed-end variable-rate programs is available upon request. It includes information on how the interest rate is determined and how it can change over time, and explains how the monthly payment can change based on a $10,000 loan amount, payable in 360 monthly installments, based on historical changes in the values of the weekly average yield on U.S. Treasury Securities adjusted to a constant maturity of one year. Index values are measured as of the first week ending in July for the years 1977 through 1987. This reflects the requirement that the index history be based on values for the same date or period each year beginning with index values for 1977. The index history in 1988 would contain fewer than 15 years of index values. In making these disclosures in 1992, however, a creditor would need to show a full 15-year index history. In 1993, the index history would cover the years 1978 through 1992. The sample disclosure also illustrates the requirement under § 226.19(b)(2)(x) that the initial and the maximum interest rates and payments be shown for a $10,000 loan originated at the most recent rate shown in the historical example. In the sample, the loan is assumed to have an initial interest rate of 9.71% (which was the interest rate in 1987 for the example shown) and to have 2 percentage point annual (and 5 percentage point overall) interest rate limitations or caps. Thus, the maximum amount that the interest rate could rise under this program is 5 percentage points higher than the 9.71% initial rate to 14.71%, and the monthly payment could rise from $85.62 to a maximum of $123.31. The loan would not reach the maximum interest rate until its fourth year because of the 2 percentage point annual rate limitations, and the maximum payment disclosed would reflect the amortization of the loan during that period. The sample form also illustrates how to provide consumers with a method of calculating their actual monthly payment for a loan amount other than $10,000.◄

BILLING CODE 6210–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 87–ASW–34]

Proposed Revision of Transition Area; Johnson City, TX

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposal would revise the transition area located at Johnson City, TX. The closure of the Shepherd Farm Airport, with the subsequent cancellation of the associated Standard Instrument Approach Procedure (SIAP) to the Shepherd Farm Airport, and the decommissioning of the Johnson City nondirectional radio beacon (NDB), with the subsequent cancellation of the associated NDB SIAP to the Johnson City Airport, have necessitated this revision. The intended effect of this proposed revision would release that controlled airspace no longer required for aircraft executing the SIAP to the Shepherd Farm Airport and the NDB SIAP to the Johnson City Airport. This revision would provide adequate controlled airspace for the VOR–B SIAP now serving the Johnson City Airport. Coincident with this action, the instrument flight rules (IFR) status of the Shepherd Farm Airport would be canceled.

DATE: Comments must be received on or before January 20, 1988.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace and Procedures Branch, Air Traffic Division, Southwest Region, Docket No. 87–ASW–34, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530.

The official docket may be examined in the Office of the Regional Counsel, Southwest Region, Federal Aviation Administration, 4400 Blue Mound Road, Fort Worth, TX.

FOR FURTHER INFORMATION CONTACT: Bruce C. Beard, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530; telephone: (817) 624–5561.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 87–ASW–34."

The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be charged in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, 4400 Blue Mound Road, Fort Worth, TX, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Manager, Airspace and Procedures Branch, Department of Transportation, Federal Aviation Administration, Fort Worth, TX 76193–0530. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA isconsidering an amendment to § 71.181 of the Federal Aviation Regulations (14 CFR Part 71) by revising the transition area located at Johnson City, TX. The closure of the Shepherd Farm Airport, decommissioning of the Johnson City NDB, and the cancellation of the associated SIAP's necessitated the need for this revision. The intended

effect of this revision would release that controlled airspace no longer required for aircraft executing the respective SIAP's to the Shepherd Farm Airport and the Johnson City Airport. This revision would reduce the existing 700-foot transition area to a 7-mile radius of the Johnson City Airport and would provide adequate controlled airspace for the VOR–B SIAP now serving the Johnson City Airport. Coincident with this action, the IFR status of the Shepherd Farm Airport would be canceled. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Johnson City, TX [Revised]

That airspace extending upward from 700 feet above the surface within a 7-mile radius of the Johnson City Airport (latitude 30°15'05" N., longitude 98°37'21" W.).

Issued in Fort Worth, TX, on December 2, 1987.

Larry L. Craig,

Manager, Air Traffic Division, Southwest Region.

[FR Doc. 87–29491 Filed 12–23–87; 8:45 am]

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

16 CFR Part 500

Fair Packaging and Label Act

AGENCY: Federal Trade Commission.

ACTION: Request for comments.

SUMMARY: The Federal Trade Commission ("FTC"), in accordance with the Regulatory Flexibility Act and publication of a Plan for the Periodic Review of Commission Rules, 46 F.R. 35118 (July 7, 1981), is soliciting comments and data on whether the Rules and Regulations Under the Fair Packaging and Labeling Act, 16 CFR Part 500 ("the Rules") have had a significant economic impact on small entities, and if they have, whether the Rules should be amended to minimize this impact.

DATE: All comments and data should be received by the Commission no later than January 25, 1988.

ADDRESS: Comments and data should be sent to: Secretary, Federal Trade Commission, Washington, D.C. 20580. Submissions should be identified as "FPLA Rules—RFA Comment".

FOR FURTHER INFORMATION CONTACT: James G. Mills, (202) 326–3035, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act, Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 601 et seq. (the "RFA"), requires that the FTC conduct a periodic review of rules that have or will have a significant economic impact upon a substantial number of small entities.

The Fair Packaging and Labeling Act, 15 U.S.C. 1453–1455 (the "FPLA"), was enacted in order to eliminate consumer confusion in the marketplace; to standardize the means used by sellers to disclose package content information to buyers; and to eliminate consumer deception and confusion concerning product size representations. Section 2 of the Act states Congress's policy on informing consumers: "Packages and their labels should enable consumers to obtain accurate information as to the quantity of the contents and should facilitate value comparisons." 15 U.S.C. 1451.

The Federal Trade Commission has enforcement responsibility over package disclosures placed upon "consumer commodities" as defined in the FPLA. The Food and Drug Administration and the U.S. Department of Agriculture have analogous responsibilities and regulations covering foods, drugs, devices and cosmetics, and meat and poultry products, respectively.

In 1988, the Commission issued rules implementing the Fair Packaging and Labeling Act. These rules are codified at 16 CFR Part 500. The FPLA regulations, which closely parallel the Act's requirements, establish requirements for the manner and form of the labeling of consumer commodities (as defined in the FPLA) with: (1) The identity of the commodity; (2) the name and place of business of the manufacturer, packer or distributor; (3) the net quantity of contents; and (4) the net quantity of servings, uses or applications represented to be present. 16 CFR 500.3–500.26. The rules also require sellers that make "cents off," "introductory offer," or "economy size" claims to keep records for one year showing compliance with the Act's substantiation requirements for such claims. (16 CFR 502.100–500.103.)

The purpose of this review is limited to determining whether the Rules should be continued without change, or should be amended or rescinded, consistent with the stated objectives of the applicable statute, to minimize any significant economic impact of the Rules upon a substantial number of small entities.

In order to conduct the periodic review of these Rules pursuant to the RFA, the Commission poses the following questions for comment. The Commission requests that factual data (*e.g.*, economic and accounting information, statistical analysis, surveys, studies, etc.) upon which submitted comments are based be included with the comments.

(1) Have the Rules had a significant economic impact (costs and/or benefits) on a substantial number of small entities? Please describe the details of any significant negative and/or positive economic impact.

(2) Is there a continued need for the Rules and all of their requirements?

(3)(a) What burdens, if any, does compliance with the Rules place on small entities?

(b) To what extent are these burdens that small entities would experience under standard and prudent business practice?

(4) What changes, if any, should be made to the Rules that would minimize the economic effect on small entities?

(5) To what extent do the Rules overlap, duplicate or conflict with other federal, state and local government rules?

(6) Have technology, economic conditions or other factors changed in the area affected by the Rules since their promulgation in 1988 and, if so, what effect do these changes have on the Rules or those covered by them?

List of Subjects in 16 CFR Part 500

Packaging, Labeling, Trade practices.

Authority: The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (1980).

By direction of the Commission.

Emily H. Rock,

Secretary.

[FR Doc. 87–29500 Filed 12–23–87; 8:45 am]

BILLING CODE 6750-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD8–87–14]

Drawbridge Operation Regulations; Gulf Intracoastal Waterway, Louisiana

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of the St. Mary Parish Council and the Louisiana Department of Transportation and Development, the Coast Guard is considering a change to the regulation governing the operation of the swing span bridge on State Route 319 over the Gulf Intracoastal Waterway, mile 134.0 near Cypremort, St. Mary Parish, Louisiana, by permitting the draw to remain closed to navigation from 6:55 to 7:10 a.m. and 3:50 to 4:05 p.m. Monday through Friday, except holidays, from 15 August to 5 June. Presently the draw opens on signal. This proposal is being made to allow school buses to pass without delays because of bridge openings. This action should accommodate the needs of vehicular traffic and still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before February 8, 1988.

ADDRESS: Comments should be mailed to Commander (ob), Eighth Coast Guard District, 500 Camp Street, New Orleans, Louisiana 70130–3396. The comments and other materials referenced in this notice will be available for inspection and copying in Room 1115 at this address. Normal office hours are between 8:00 a.m. and 3:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: John Wachter, Bridge Administration Branch, at the address given above, telephone (504) 589–2965.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data or arguments. Persons submitting comments should include their names and addresses, identify the bridge, and give reasons for concurrence with or any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Eighth Coast Guard District, will evaluate all communications received and determine a course of final action on this proposal. This proposed regulation may be changed in the light of comments received.

Drafting Information

The drafters of this notice are John Wachter, project officer, and Lieutenant Commander James Vallone, project attorney.

Discussion of Proposed Regulation

Vertical clearance of the bridge in the closed position is 4 feet above mean high water. Navigation through the bridge consists of all types of recreational traffic including outboard and inboard powered vessels, large and small, and sailing vessels of various sizes. Commercial traffic on the waterway includes considerable barge traffic transporting petroleum products, chemicals, cement, shells, manufactured industrial goods, and miscellaneous food products. A review of the bridge logs indicates that the bridge opens about once every two days on average during both the proposed 15-minute moring closure period and the proposed 15-minute afternoon closure period.

Economic Assessment and Certification

This proposed regulation is considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under the Department of Transportation regulatory policies and procedures (44 FR 11034: February 26, 1979).

The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary. The basis for this conclusion is that the duration of the proposed closures is so minimal and would be in effect only during the school year, that vessels can easily schedule passages to avoid the proposed 15-minute closures. Since the economic impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulation

In consideration of the foregoing, the Coast Guard proposes to amend part 117 of Title 33, Code of Federal Regulations, as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; and 49 CFR 1.46 and 33 CFR 1.05–1(g).

2. Section 117.451 is amended by redesignating existing paragraph (d) as paragraph (e) and by adding a new paragraph (d) to read as follows:

§ 117.451 Gulf Intracoastal Waterway.

* * * * *

(d) The draw of the SR319 (Louisa) bridge across the Gulf Intracoastal Waterway, mile 134.0 near Cypremort, shall open on signal; except that, the draw need not be opened from 6:55 to 7:10 a.m. and from 3:50 to 4:05 p.m. Monday through Friday except holidays from 15 August to 5 June.

* * * * *

Peter J. Rots,

Rear Admiral, U.S. Coast Guard Commander, Eighth Coast Guard District.

Dated: December 3, 1987.

[FR Doc. 87–29516 Filed 12–23–87; 8:45 am]

BILLING CODE 4910-14-M

33 CFR Parts 140, 143, and 146

[CGD 84–098b]

Emergency Evacuation Plan for Manned OCS Facilities

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to issue regulations which would require a comprehensive, site specific contingency plan for the emergency evacuation of all personnel from manned fixed facilities and Mobile Offshore Drilling Units on the Outer Continental Shelf (OCS facilities). In

addition, although it is not the Coast Guard's intention to require the use of standby vessels, this proposal would establish specific standards for standby vessels if they are identified as an integral part of the evacuation plan. This proposal is a continuance of Coast Guard initiatives to require contingency planning for evacuation of personnel under emergency conditions, such as hurricanes, blowouts, and major fires. This proposal is also in response to recent legislation concerning evacuation procedures. The ultimate effect of this proposal would be to provide facility and emergency assistance personnel with the direction and equipment necessary for a timely and safe evacuation of the OCS facility in an emergency.

DATES: Comments must be received on or before January 25, 1988.

ADDRESSES: Comments may be mailed to Commandant (G-CMC/21) (CGD 84-098b), U.S. Coast Guard, 2100 Second St. SW., Washington, DC 20593-0001. Comments will be available for inspection or copying at the Office of the Marine Safety Council (G-CMC), Room 2110, at the above address, between the hours of 8 a.m. and 3 p.m., Monday through Friday, except holidays. The telephone number is (202) 267-1477.

FOR FURTHER INFORMATION CONTACT: LCDR Anthony Dupree, Offshore Activities Branch, (202) 267-2307.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written comments, data, or arguments. Each comment should include the name and address of the person submitting the comment, reference the docket number (84-098b) and the specific section of the proposal to which each comment applies, and give the reason for the comment. Persons desiring acknowledgment that their comments have been received should enclose a stamped, addressed postcard or envelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting this proposal are LCDR Alan J. Cross and LCDR Anthony Dupree, Jr., Project Managers, and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Background and Objectives

In March 1985, the Coast Guard published an advance notice of proposed rulemaking (ANPRM) regarding revision of the regulations on Outer Continental Shelf Activities (CGD 84-098) (50 FR 9290). That ANPRM identified the Coast Guard's intent to extensively revise existing regulations to address new developments in the offshore industry, new legislation, interagency agreements, and recommendations received following casualties on the Outer Continental Shelf (OCS). Safe evacuation of personnel from manned fixed platforms and mobile offshore drilling units (both known as "OCS facilities" in Coast Guard OCS regulatory terminology) under emergency conditions was discussed in that ANPRM. That discussion included a request for public comment regarding an overall emergency evacuation plan. Comments were also requested regarding the use and effectiveness of standby vessels as part of an overall evacuation plan and the criteria to be applied to standby vessels if used. This proposal is intended to address that portion of the parent project (CGD 84-098) addressing emergency evacuation plans and standby vessels and has been identified as a separate docket (CGD 84-098b) to facilitate its early development and implementation.

Investigations of certain casualties involving mobile offshore drilling units (MODUs) and experience gained from recent evacuations of other OCS facilities have identified a need for increased awareness on the part of the facility personnel with respect to the procedures to be followed in the event of a personnel evacuation and the circumstances under which such an evacuation is necessary. Additionally, experience has shown that where equipment has been identified as part of an evacuation scheme, specifically standby vessels, that equipment should be adequately equipped to perform its intended function. These needs have been addressed in detail in the Coast Guard's investigation of the events surrounding the casualties involving the MODU OCEAN RANGER and the National Transportation Safety Board's investigations into the events surrounding the sinkings of the MODUs OCEAN EXPRESS, OCEAN RANGER, and PENROD 61.

More recently, the U.S. Congress, in section 5201 of the Omnibus Budget Reconciliation Act of 1986 (Pub. L. 99-509; October 21, 1986), expressed its concern for the safety of offshore workers during emergency conditions by requiring the U.S. Coast Guard—

(a) To "issue final regulations, to become effective before September 1, 1987, relating to the evacuation of personnel as provided for in the advance notice of proposed rulemaking regarding the revision of the regulations on Outer Continental Shelf activities (50 FR 9290 (1985)), published March 7, 1985;" and

(b) In preparing the evacuation regulations, to "consider requiring standby vessels for the evacuation of personnel from manned installations on the Outer Continental Shelf".

A "standby vessel", in the context of this legislation, is a vessel maintained on the OCS in the vicinity of manned platforms and MODUs and designed and equipped in a manner to render effective evacuation assistance in the event of an emergency onboard an OCS facility.

In response to this legislation and the recommendations contained in the investigation reports on the various casualties, the Coast Guard is proposing the following amendments in this notice:

(a) To require the operator to prepare a comprehensive Emergency Evacuation Plan or Plans for the complete evacuation of all personnel on OCS facilities subject to the operator's control and to submit a copy of the Plan or Plans to the Coast Guard for examination. "Operator" is defined in 33 CFR 140.10 (by referencing the Minerals Management Service's definition in 30 CFR 250.2(gg)) as the lessee, designated agent of the lessee, or holder of rights under an approved operating agreement.

(b) To establish inspection, equipment, and manning requirements for all standby vessels specifically identified as part of an Emergency Evacuation Plan.

Other matters relating to evacuation, such as lifesaving appliances and onboard means of escape, will be addressed under the parent project, "Revision of the Regulations on Outer Continental Shelf Activities" (CGD 84-098).

Discussion of Comments to the ANPRM

The Coast Guard received 72 separate letters in response to the questions raised in the ANPRM on evacuation. One of the letters was reproduced 596 times by a maritime organization and the copies were signed and submitted by various individuals. Of these 72 letters, 42 (as well as the 596 form letters) supported the mandatory use of standby vessels covering all OCS facilities, 27 were opposed to making the use of standby vessels mandatory, and three were uncommitted.

In general, the vast majority of the respondents, as well as Congress, recognize that standby vessels, properly equipped and manned, can be of significant benefit in the evacuation of personnel. The real area of concern is not whether standby vessels could be beneficial but whether they should be required to be located off each manned OCS facility or group of facilities. The National Transportation Safety Board (NTSB), in investigating the sinking of the MODUs OCEAN EXPRESS, OCEAN RANGER, and PENROD 61, recommended that the Coast Guard require standby vessels for MODUs (NTSB recommendations M-79-44, M-83-20, and M-86-104). Most of the comments received on the ANPRM suggested that the use of standby vessels be required not just for MODUs but for all manned platforms as well. They assert that standby vessels have proven to be a necessary supplement to rescue capsules, covered lifeboats, and other lifesaving equipment, particularly in the rough sea conditions common on the OCS. Thirty-nine comments stated that oil well blowouts are still too common on the OCS and that standby vessels are particularly effective in responding to these hazards.

On the other hand, 28 comments were opposed to requiring standby vessels. They stated that while standby vessels have been and continue to be used within the oil industry, the evacuation of personnel from offshore facilities occurs under many different conditions. The need for a vessel to augment the evacuation equipment otherwise provided is dependent upon a myriad of factors. These factors include, but are not limited to, onboard evacuation equipment, geographic location of the facility, anticipated environmental conditions, traffic density of support vessels and aircraft, distance from shore, and activity ongoing aboard the facility. Further, some comments stated that regulations requiring specific equipment, such as standby vessels, might degrade the overall safety of a facility by stifling the owner or operator of a facility from exploring the use of other equipment that might better serve a particular facility's needs. Other comments stated that the effectiveness of standby vessels has not been demonstrated. Further, some of the comments stated that the expense of providing a standby vessel at every manned facility engaged in OCS activities would not be justified by the commensurate gain in safety. One comment stated that the costs for standby vessels for Alaskan waters are expected to be much higher, approximately $3,000 per day, due to the need for larger, better equipped and manned vessels. Many of these comments urged the Coast Guard to consider evacuation plans that are performance oriented and allow flexibility in the type of equipment and methods used to effect evacuation.

A study of Coast Guard and Minerals Management Service casualty reports indicates that, between 1980 and 1986, there have been six deaths on MODUs located on the U.S. OCS and nine deaths on other OCS facilities attributable to conditions in which evacuation of the facility was prudent. Some of the deaths occurred onboard the facility and were due to the initial incident or to the fact that the persons decided to stay onboard the facility to control a well, for example, after the rest of the facility's personnel had been safely evacuated. This same study indicates that approximately one in 16,000 workers on MODUs and one in 22,000 workers on other OCS facilities died during situations in which evacuation of the facility was prudent. By comparison, a person in the U.S. has a risk of approximately one in 20,000 of being struck by an automobile. Although unconfirmed by the Coast Guard, the records maintained by the manufacturer of one type of covered lifeboat show that, from 1970 through 1986, his product alone has been responsible for saving 786 lives in the Gulf of Mexico in incidents where 13 people died (a 98.35% success ratio). The lifeboat manufacturer claims that all 13 deaths occurred during rescue/retrieval of survivors after a successful evacuation.

Although the Coast Guard does have a system to collect and analyze marine and offshore casualty data, that system is not designed to discriminate between the evacuation process and those events which may have led to the evacuation of those events following the evacuation, such as personnel retrieval. Further, the Coast Guard does not require that evacuations be reported, but only those incidents currently identified in 33 CFR 146.30. As a consequence, the Coast Guard's information is limited with respect to the number of facility evacuations that have occurred on the OCS, the number of personnel safely evacuated, the number of personnel injuries that occurred during the process of an evacuation, and the type of equipment used, or available but not used, during an evacuation. The Coast Guard, therefore, is specifically requesting information from the public regarding these issues.

In complying with the congressional directive contained in the Omnibus Budget Reconciliation Act mentioned earlier, the Coast Guard has considered requiring standby vessels for the evacuation of personnel from manned OCS facilities. The Coast Guard recognizes that there have been many incidents where vessels employed to stand by an OCS facility have rendered invaluable aid to personnel evacuating OCS facilities in an emergency. Further, the Coast Guard agrees that standby vessels could, in some cases, enhance the safety of some OCS facilities. However, the high cost of providing a properly equipped and manned standby vessel at every manned OCS facility, or even within six miles of every manned OCS facility, is not always justified by the benefits. The Coast Guard concurs with the comments stating that evacuations of personnel from offshore facilities occur under many different conditions. Therefore, the Coast Guard believes that evacuation measures using equipment other than standby vessels may prove to be equally effective and cost-efficient in many, if not most, emergency evacuation situations. This proposed approach would establish a performance standard and would provide sufficient flexibility so that the most effective means of evacuation could be employed.

The Coast Guard concurs with the respondents and Congress in that standby vessels should be properly equipped and manned. Therefore, the Coast Guard also proposes equipment and manning standards for vessels designated as standby vessels in the required evacuation plan. The proposed standards for standby vessels are based on the Coast Guard's experience with the U.S. offshore mineral and oil industry and the results of a review conducted by the Coast Guard of standards imposed by other countries with active OCS areas. The Coast Guard believes that the proposed standby vessel standards, albeit modified to accommodate the environmental conditions encountered on the U.S. OCS, are consistent with those standards applied by other countries to vessels in similar service.

Discussion of Proposed Regulations

The proposed regulations would establish a requirement for operators with manned OCS facilities to develop an Emergency Evacuation Plan (EEP) for each facility and submit a copy of the EEP to the Coast Guard for examination. Further, these proposed regulations would establish standards for each

standby vessel, if any are specified in the EEP.

Proposed section 140.10. This proposal would amend the definitions section to include a definition of "standby vessel".

Proposed Subpart E. A new subpart, "Standby Vessels", would be added to 33 CFR Part 143, Design and Equipment.

Proposed section 143.400. This proposed new section states that Subpart E would apply to all vessels specified as standby vessels in an EEP required under §§ 146.140 or 146.210.

Proposed section 143.401. This new section would set forth the requirements that a vessel would hve to comply with in order to be designated as a standby vessel in an EEP.

Proposed section 143.401(a). This new paragraph proposes minimum inspection standards. Forty seven comments to the ANPRM urged that standby vessels be inspected and certificated. Therefore, this new paragraph proposes regulations that would require standby vessels to be inspected and certificated by the Coast Guard under the provisions of Subchapter T (Small Passenger Vessels), Subchapte H (Passenger Vessels), or Subchapter I (Cargo and Miscellaneous Vessels) of 46 CFR Chapter I.

Proposed section 143.401(b). This new paragraph would require that standby vessels be certificated to carry all of the persons on the most populated OCS facility that the standby vessel is designated in the EEP to serve. This provision would allow one standby vessel to serve more than one OCS facility.

Proposed section 143.403. This is a new section that would require standby vessels to be highly maneuverable. Standby vessels can be expected to be called to maneuver close to facilities and survivors in heavy seas and strong currents. Therefore, the Coast Guard believes that a standby vessel must be highly maneuverable in order to provide for the safety of the standby vessel itself and the survivors being rescued from the water.

Proposed section 143.405. This new section specifies additional equipment required for standby vessels. Further, the installation of this equipment would be approved by the Coast Guard.

Proposed section 143.405(a). This new paragraph specifies the equipment that would be required in addition to the equipment required by the vessel's certificate of inspection.

Proposed section 143.405(a)(1). This new paragraph would require that standby vessels be equipped with a minimum of two screws or other propulsion devices. The requirement is proposed to further ensure the maneuverability of a standby vessel.

Proposed section 143.405(a)(2). During a night time rescue operation, it is imperative that sufficient illumination be provided. Therefore, that new paragraph would require that standby vessels be equipped with two searchlights. Most certificated vessels employed in the offshore oil industry are already equipped with two searchlights.

Proposed section 143.405(a) (3) and (4). A line throwing apparatus is considered to be a necessity in many rescue situations. These new paragraphs would require a line throwing appliance.

Proposed section 143.405(a)(5). Forty nine comments (as well as the 596 form letters) stated that standby vessels should be equipped with either a rescue platform, a rescue boat, or an inflatable liferaft for retrieving persons from the water. Of the three, only the rescue boat is specifically designed to assist in retrieving people from the water in other than the most favorable conditions. Therefore, this new paragraph would require a powered rescue boat and would specify some design and equipment criteria for the rescue boat. Currently, the Coast Guard is developing a Notice of Proposed Rulemaking (NPRM) entitled "Lifeboats and Rescue Boats", which will revise the standards for life boats and rescue boats. Most rescue boats currently available on the international market meet the standards of SOLAS 74 as amended by SOLAS 83. Rescue boats are approved by the Coast Guard as meeting the standards of SOLAS 74 as amended by SOLAS 83 will be acceptable.

Proposed § 143.405(a)(6) . Forty one comments suggested that standby vessels be equipped with a Stokes litter. This recommendation has been incorporated into this proposed paragraph.

Proposed § 143.405(a)(7) . Forty one comments (as well as the 596 form letters) recommended that standby vessels be equipped with blankets for the survivors to help treat or avoid hypothermia. Although hypothermia is usually associated with water temperatures below 60 ° F, it can occur at higher temperatures. Further, persons recovered from water need not remove wet clothing as soon as possible in order to prevent further body cooling. This proposed paragraph would require a standby vessel to carry a blanket for each person it is certificaed to carry.

Proposed § 143.405(a)(8) . Comments were received suggesting different requirements for getting injured persons from the water. The suggestions specify various devices, such as special retrieval nets and cranes equipped with baskets. Rather than specify particular devices, this proposed paragraph would require that standby vessels have some means of retrieving injured and helpless persons from the water.

Proposed § 143.405(a)(9) . This proposed paragraph would require a scramble net that can be rigged on either side of the standby vessel. Some comments recommended that a boarding net be rigged on both sides of the standby vessel. Others recommended that the standby vessel be capable of rescue and assistance. The Coast Guard agrees with the concept of scramble or boarding nets. However, the Coast Guard believes that having nets on both sides at one time is not necessary. A net on only one side of the standby vessel will allow the master of the standby vessel sufficient maneuvering room to protect the vessel and persons in the water.

Proposed § 143.405(a)(10) . One comment suggested that additional ring life buoys be provided. Other comments suggested that additional lifesaving equipment be provided. The Coast Guard agrees that, in some cases, additional ring life buoys are needed. This proposed paragraph would require a minimum of four approved ring life buoys equipped with 15 fathoms of line. Operators of vessels that meet this proposed criteria with their standard lifesaving equipment would not have to put additional ring life buoys on board.

Proposed § 143.405(a)(11) . One comment recommended personal protective gear for the standby vessel crew. Because the Coast Guard anticipates that the entire crew of a standby vessel will be on deck at some time to assist the survivors, the crew will be exposed to a greater risk of being washed or falling overboard. The members of the rescue boat crew will be exposed to an even greater risk. Immersion suits approved under 46 CFR160.071, while cumbersome, would provide the crew of the standby vessel, including the rescue crews, protection against hypothermia and drowning. Additionally, buoyant suits approved under 46 CFR 160.053 and meeting ANSI/UL–1123–1987, while providing only short term protection against hypothermia, are designed as a working garment and would allow greater freedom of movement than immersion suits. Therefore, the proposed paragraph would require that Coast Guard approved immersion suits or buoyant suits be provided for the crew of a standby vessel.

Proposed § 143.405(a)(12) . This paragraph would require two boat hooks to assist the crew of the standby vessel in retrieving survivors from the water.

Proposed § 143.405(a)(13) . This paragraph would require a fire monitor with a minimum flow rate of 600 GPM that is capable of discharging an effective stream . The Coast Guard agrees with the 40 comments (as well as the 596 form letters) recommending that standby vessels be equipped with a fire monitor. While the comments recommended that a fire monitor be optional, the Coast Guard feels that it should be mandatory. Fire monitors can be used to protect persons on the facility while they are being evacuated and to divert floating debris and burning oil from survivors in the water.

Proposed § 143.405(a)(14) . This paragraph would require that a standby vessel have a radio or radios capable of communicating with the facility being protected, shore bases, rescue boats, and rescue aircraft. The 596 form letters recommended that standby vessels be equipped to communicate with the facility. Other comments recommended that the standby vessel be able to communicate with the facility and the shore bases and have two means of communication or a radio. The Coast Guard agrees that the standby vessel should have at least one two-way radio capable of communicating with the facility and the shore base. Additionally, the Coast Guard believes that the standby vessel should have the capability to communicate by radio with its rescue boat and rescue aircraft.

Proposed § 143.405(a)(15) . One comment addressed the need to illuminate the water in way of the boarding areas and rescue boat launching area. The Coast Guard concurs with the need to provide illumination in these areas. The night time recovery of survivors from the water requires that survivors see the boarding nets and other boarding aids. Similarly, the crew of the standby vessel needs to be able to see the survivors.

Proposed § 143.405(a)(16) . This paragraph would require the standby vessel to have on board the latest edition of the Department of Health and Human Services publication entitled "The Ship's Medicine Chest and Medical Aid at Sea." This publication is a reference book for the initial treatment of survivors. It also makes recommendations as to the medical supplies and equipment to be maintained on board vessels. Sections dealing with hypothermia, burns, and transportation of victims by helicopter would be helpful to pesons providing first aid to the survivors.

Proposed § 143.405(a)(17) . Forty six comments (as well as the 596 form letters) recommended that standby vessels have first aid kits on board. One of the comments recommended that the first aid kit be sized for 50 persons, and 40 comments recommended that the first aid kit be sized for either 10 or 20 persons. This proposed paragraph would require the standby vessel to have an industrial first aid kit on board sized for 50 percent of the persons that the standby vessel is certificated to carry.

Proposed § 143.405(b). This paragraph would require all the equipment required by proposed § 143.405 to be installed to the satisfaction of the Officer in Charge, Marine Inspection. This would entail inspections by a Coast Guard marine inspector to ensure compliance with the applicable subchapters of 46 CFR Chapter I.

Proposed § 143.407. Forty two comments suggested that standby vessels could be adequately manned by a three person crew. Three comments suggested that no additional crew is needed and one comment suggested that a minimum of six persons would be needed to adequately crew a standby vessel. This proposal would authorize the Officer in Charge, Marine Inspection, to require that the crew required under the standby vessel's certificate of inspection be augmented by additional persons as needed to provide lookouts, retrieve and crew the rescue boat, care for survivors, and deploy the retrieval equipment. Small passenger vessels (crew boats) probably would need extra persons, while large offshore supply vessels (OSVs) might not. All additional crewmembers would have to be authorized by the vessel's certificate of inspection.

Proposed § 146.140. This section concerns the EEP and applies to manned OCS facilities other than MODUs. These same requirements would be applicable to MODUs under proposed § 146.210.

Proposed § 146.140(a). This proposed paragraph would require each manned OCS facility to have on board an EEP that has been examined by the Coast Guard. The proposed EEP requirements would allow industry to adequately address the methods for evacuating personnel during an emergency situation yet allow sufficient flexibility for operators to utilize the methods they judge to be most effective for a particular facility.

Proposed § 146.140(b). This proposed paragraph would require operators to submit the EEPs to the Officer in Charge, Marine Inspection (OCMI) for examination before placing the facility in operation. The OCMI will examine the EEP to ensure that it addresses all of the items contained in proposed § 146.140(d). It includes a provision that would allow operators of facilities existing on the effective date of the final rule to take up to 180 days after that date to submit the EEP.

Proposed § 146.140(c). This proposed paragraph would require that the EEP be resubmitted for examination when substantive changes are made. Examples of substantive changes are the installation of a platform drilling unit onboard or a change from helicopters to a standby vessel as the primary means of evacuation. Changes considered nonsubstantive and not requiring resubmittal of the EEP would include a change in the name or telephone number of a contact person.

Proposed § 146.140(d). This proposed paragraph lists the items that the EEP must contain. The Coast Guard's experience with MODU operating manuals has shown that the manuals often are written in highly technical language which can be difficult for the operating personnel to understand. Proposed paragraph (d)(1) would require that the EEP be written in language that is easily understood by the facility's operating personnel. The required securement and abandonment plans should set forth the order in which personnel will be evacuated, identify the transportation resources to be used in the evacuation, and include time and distance factors for the initiation of the evacuation. These proposed requirements are aimed at reducing confusion during emergency situations by clarifying the responsibilities of personnel on the facility and at the support base. Additionally, they would provide facility personnel with a ready source of information on weather, recommended actions and timetables, and available transportation.

Proposed § 146.140(e). This proposed section would require the operator to ensure that all equipment specified in the EEP is made available and located as indicated in the EEP. Further, the operator shall ensure that the equipment is properly maintained and is actually capable of performing its function during an emergency evacuation. Also, this proposed paragraph would require the operator to ensure that personnel specified in the EEP are available and located as called for in the EEP and are trained in fulfilling their roles under the EEP.

Proposed § 146.140(f). This proposed section would require a complete copy of the EEP be made available to the facility's operating personnel and that every person newly reporting aboard a facility be given a brief written summary of the facility's EEP.

Proposed § 146.140(g). The investigation of the capsizing and sinking of the OCEAN RANGER and the

PENROD 01 indicated that, in an emergency situation, a break in the functional chain of command can create extensive confusion. In an effort to ensure that all parties with responsibilities and authorities under the EEP are informed as to what those responsibilities and authorities are, this proposed paragraph states that the EEP must detail the responsibilities and authorities of the various parties and that a copy must be provided to each party.

Proposed § 146.210. This new section would require operators employing a MODU in OCS activities to provide an EEP for the MODU. EEPs for MODUs would be the same as for other manned OCS facilities. Operators employing MODUs in OCS activities on the date these rules become effective would be allowed 180 days from that date for the submission of the EEP covering those MODUs.

Information required by these proposed regulations which is already contained in the MODU's operating manual required by 46 CFR 109.121 may be incorporated or referenced in order to prevent duplication of effort.

Incorporation by Reference

This proposal would add a new item to § 140.7, which lists materials incorporated by reference. The International Convention for the Safety of Life at Sea (SOLAS) in § 143.405(a)(5) and ANSI/UL–1123–1987 in § 143.405(a)(11) are proposed for incorporation by reference in those sections respectively. Copies of this material are available for inspection at U.S. Coast Guard Headquarters, Room 1216, 2100 Second Street, SW., Washington, DC 20593–0001. Copies of the material may be obtained at the address listed in proposed § 140.7(b).

Before the final rule is published, the Coast Guard will submit this material to the Director of the Federal Register for approval of the incorporation by reference.

E.O. 12291 and DOT Regulatory Policies and Procedures

The parent proposed regulations, entitled "Revision of Regulations for Outer Continental Shelf Activities" (CGD 84–098), are considered to be non-major under Executive Order 12291 but significant under DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). This extracted portion, entitled "Emergency Evacuation Plan for Manned OCS Facilities" (CGD 84–098b), is considered to be non-major and non-significant under the same Executive Order and DOT policies. A draft regulatory evaluation has been prepared and placed in the rulemaking docket. It may be inspected or copied at the Office of the Marine Safety Council, Room 2110, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC, (202) 267–1477, from 8 a.m. to 3 p.m. Copies may also be obtained by contacting that office.

The cost of preparing an EEP may vary due to the varying complexity of the manned facilities operating on the OCS and the experience of the preparer in drafting emergency evacuation plans. Much of the required information is already available and is customarily provided to operating personnel; however, some information not previously required must be compiled.

The cost of preparing an EEP which meets the proposed requirements is estimated to be between $500 and $800 per facility. The total initial cost to the industry for providing an EEP for each manned facility, including MODUs, is estimated to be between $486,500 and $778,400. The total cost to the Coast Guard for the examination of the EEP is estimated to be $100 per plan. Comments are solicited on the costs of preparing EEPs for facilities and the cost of updating an EEP each time MODUs change their location.

The cost of equipping a certificated offshore supply vessel or crew boat to comply with the proposed standby vessel requirements is estimated to be between $47,000 and $64,000. The Coast Guard has no basis for estimating how many standby vessels, if any, might be employed. For the purpose of evaluating this proposal, we have assumed that up to 30 standby vessels may be employed. Based on these assumptions, the total initial cost to the support vessel industry to outfit certified vessels as standby vessels is estimated to be between $1.41M and $2.01M. Further, the total cost to the owners, operators and leaseholders employing these 30 standby vessels is estimated to be between $9.78M and $10.47M per year. Comments are solicited on the costs of equipping a certificated vessel as a standby vessel and on the anticipated use of standby vessels.

Recent regulations (52 FR 6974; March 6, 1987) resulting from MODU sinkings in which 165 lives were lost require that MODU operating manuals provide information for use in emergency situations. EEPs may incorporate certain portions of the operating manual (46 CFR 109.121) to avoid unnecessary duplication and cut preparation costs.

The primary objective of this proposal is to address evacuation planning for fixed facilities as well as MODUs, thereby enhancing the safety of life and property on the OCS. It is, however, difficult, if not impossible, to quantify the benefits of the proposed regulations because of the unpredictable occurrence and limitless variety of emergency situations in which EEPs would be of assistance. Though the EEPs would not replace well trained personnel, they can be of significant benefit. Using the minimally accepted value of a human life of $1,000,000, the saving of a few lives each year would make the preparation of the evacuation plans cost beneficial.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 601 through 612), the Coast Guard must consider whether the rule it is proposing is likely to have significant economic impact on a substantial number of small entities. "Small entities" include independently owned and operated small businesses which are not dominant in their field and which would otherwise qualify as "small business concerns" under section 3 of the Small Business Act (15 U.S.C. 632). These regulations would affect owners and operators of manned OCS facilities and the owners, builders, and suppliers of standby vessels. Because of the extremely high costs of these manned facilities, their owners and operators tend to be major corporations. However, it is likely that at least some of the companies opting to enter the standby vessel business may be considered small entities. An estimate for outfitting a typical certificated vessel as a standby vessel is between $47,000 and $64,000, or less than 6% of the cost of the vessel. Because the usage of standby vessels is voluntary, we have no basis for estimating how many standby vessels, if any, might be employed. For the purposes of evaluating the proposed rule, we have assumed that a total of 30 standby vessels would be employed, which represent less than 5% of the U.S. fleet of offshore supply vessels. Based on these assumptions, the total initial cost to the support vessel industry to outfit certificated vessels as standby vessels would be between $1.41M and $2.01M. Further, we estimate that the day rate for a standby vessel outfitted according to the proposed rules would have to increase by approximately $307 a day over the day rate of the same vessel without standby vessel equipment in order to cover the added expenses.

For the above reasons, the Coast Guard certifies that this proposal will not have a significant economic impact on a substantial number of small entities. If, however, you feel that your business may qualify as a small entity and that the proposed rules would have a significant economic impact on the business, please notify the Coast Guard (see **ADDRESSES**) and explain why you feel your business qualifies and in what way and to what degree the proposed regulations would economically affect your business. Cost data submitted in response to the above will be evaluated thoroughly before final rules are issued.

Paperwork Reduction Act

This proposed rulemaking contains information collection requirements in §§ 146.140 and 146.210. They have been submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Persons desiring to comment on these information collection requirements should submit their comments to: Office of Regulatory Policy, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, ATTN: Desk Officer, U.S. Coast Guard. Persons submitting comments to OMB are also requested to submit a copy of their comments to the Coast Guard as indicated under "**ADDRESSES**".

Environmental Assessment

The Coast Guard has considered the environmental impact of the regulations and concluded that preparation of an environmental impact statement is not necessary. The proposed amendments concern the development of emergency evacuation plans and the equipping of standby vessels for emergency assistance and would have no effect on the environment.

They do not affect the prevention, control, or protective systems installed on the facility to prevent damage to the environment. Therefore, an environmental assessment with a finding of no significant impact has been prepared and is on file in the rulemaking docket.

List of Subjects

33 CFR Part 140

Administrative practice and procedure, Authority delegation, Continental shelf, Incorporation by reference, Law enforcement, Marine safety, Reporting and recordkeeping requirements.

33 CFR Part 143

Continental shelf, Marine safety.

33 CFR Part 146

Continental shelf, Marine safety, Reporting requirements.

For the reasons set out in the preamble, Parts 140, 143, and 146 of Title 33 of the Code of Federal Regulations are proposed to be amended as follows:

PART 140—GENERAL

1. The authority citation for Part 140 is revised to read as follows:

Authority: 43 U.S.C. 1333(d)(1), 1348(c), 1356; 49 CFR 1.46.

2. Section 140.7 is revised to read as follows:

§ 140.7 Incorporated by reference.

(a) In this subchapter, portions of the entire text of certain standards and specifications are incorporated by reference as the governing requirements for materials, equipment, tests, or procedures to be followed. These standards and specification requirements specifically referred to in this subchapter are the governing requirements for the subject matters covered, unless specifically limited, modified, or replaced by the regulations.

(b) These materials are incorporated by reference into this subchapter under 5 U.S.C. 552(a) with the approval of the Director of the Federal Register. The Office of the Federal Register publishes a table, "Material Approved for Incorporation by Reference," which appears in the Finding Aids section of this volume. In that table is found citations to the particular sections of this part where the material is incorporated. To enforce any edition other than the one listed in paragraph (c) of this section, notice of the change must be published in the **Federal Register** and the material made available. All approved material is on file at the Office of the Federal Register Information Center, Room 8301, 1100 L Street NW., Washington, DC 20408 and at U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593–0001. Copies may be obtained from the sources indicated in paragraph (c) of this section.

(c) The materials approved for incorporation by reference in this subchapter are:

American National Standards Institute (ANSI), 1430 Broadway, New York, NY 10018.

ANSI A10.14–1975–Requirements for Safety Belts, Harnesses, Lanyards, Lifelines, and Drop Lines for Construction and Industrial Use.

ANSI/UL–1123–1987–Standards for Marine Buoyant Devices.

ANSI Z41–1983–American National Standard for Personal Protection-Protective Footwear.

ANSI Z87.1–1979–Practice for Occupational and Educational Eye and Face Protection.

ANSI Z88.2–1980–Practices for Respiratory Protection.

ANSI Z89.1–1981–Safety Requirements for Industrial Head Protection.

International Maritime Organization (IMO)

IMO Sales, New York Nautical Instrument and Service Corp., 140 W. Broadway, New York, NY 10013.

International Convention for the Safety of Life at Sea—Consolidated Text of the 1974 SOLAS Convention, the 1978 SOLAS Protocol, the 1981 and 1983 SOLAS Amendments, 1986.

IMO Assembly Resolution A.414 (XI)–Code for Construction and Equipment of Mobile Offshore Drilling Units.

3. In § 140.10, a new term is added in alphabetical order to read as follows:

§ 140.10 Definitions.

* * * * *

"Standby vessel" means a vessel meeting the requirements of Part 143 of this chapter and intended for positioning near a manned OCS facility to provide rapid evacuation assistance in the event of an emergency.

* * * * *

PART 143—DESIGN AND EQUIPMENT

4. The authority citation for Part 143 is revised to read as follows:

Authority: 43 U.S.C. 1333(d)(1), 1348(c), 1356; 49 CFR 1.46.

5. A new Subpart E is added to read as follows:

* * * * *

Subpart E—Standby Vessels

Sec.
143.400 Applicability.
143.401 Vessel inspection and certification.
143.403 Maneuverability.
143.405 Equipment.
143.407 Manning.

Subpart E—Standby Vessels

§ 143.400 Applicability.

This subpart applies only to standby vessels specified in an Emergency Evacuation Plan (EEP) required by §§ 146.140 or 146.210 of this chapter.

§ 143.401 Vessel inspection and certification.

Standby vessels must—

(a) Have a valid certificate of inspection under Subchapters H, I, or T of 46 CFR Chapter I; and

(b) Be certificated to carry all of the persons on the most populated OCS

facility that the standby vessel is designated in the EEP to serve.

§ 143.403 Maneuverability.

Standby vessels must be highly maneuverable in order to facilitate the removal of persons from the water.

§ 143.405 Equipment.

(a) Standby vessels must have the following equipment:

(1) Multiple propellers or propulsion devices.

(2) Two searchlights.

(3) For vessels certificated under Subchapter H of 46 CFR Chapter I, a line throwing appliance that meets the requirements in 46 CFR 75.45.

(4) For vessels certificated under Subchapters I or T of 46 CFR Chapter I, a line throwing appliance that meets the requirements of 46 CFR 94.45.

(5) A self-propelled rescue boat of rigid or inflatable construction or combination of both, capable of carrying at least nine persons including a two person crew. The rescue boat and its launching device must be approved by the Coast Guard and the rescue boat must meet the requirements of regulation 47 of the Annex to the International Convention for Safety of Life at Sea (1974 SOLAS), as amended. The rescue boat must be equipped with a two-way radio capable of voice communication with the standby vessel and the OCS facility.

(6) A Stokes or comparable litter.

(7) One blanket for each person that the standby vessel is certificated to carry.

(8) A means of retrieving injured or helpless persons from the water.

(9) A scramble net that can be rigged on either side of the standby vessel.

(10) A minimum of four Coast Guard approved ring life buoys, each equipped with 15 fathoms of line.

(11) An immersion suit that is approved by the Coast Guard under 46 CFR 160.171 or a buoyant suit meeting Supplement A of ANSI/UL–1123–1987 and approved under 46 CFR 160.053 for each member of the standby vessel's crew.

(12) Two boat hooks.

(13) A fire monitor with a minimum flow rate of 600 gallons per minute.

(14) One or more two-way radios capable of voice communications with the OCS facility, rescue boat, and shore side support personnel.

(15) Floodlights to illuminate the rescue boat launching area, the scramble net when deployed, and the water around the rescue boat launching and scramble net deployment areas.

(16) A copy of "The Ship's Medicine Chest and Medical Aid at Sea", DHHS Publication No. (PHS) 84–2024, available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

(17) An industrial first aid kit sized for 50 percent of the number of persons the standby vessel is certificated to carry.

(b) Equipment required by paragraph (a) of this section shall be to the satisfaction of the Officer in Charge, Marine Inspection.

§ 143.407 Manning.

Standby vessels must be crewed in accordance with their certificate of inspection for 24 hour operation. The Officer in Charge, Marine Inspection, may require the crew to be augmented, as necessary, to provide for maneuvering the standby vessel, for lookouts, for rigging retrieval equipment, for launching, retrieving, and manning the rescue boat, and for retrieving and caring for survivors.

PART 146—OPERATIONS

6. The authority citation for Part 146 is revised to read as follows:

Authority: 43 U.S.C. 1333(d)(1), 1348(c), 1356; 49 CFR 1.46.

7. New § 146.140 is added to read as follows:

§ 146.140 Emergency Evacuation Plan.

(a) Each manned OCS facility must have on board an Emergency Evacuation Plan (EEP) that is applicable to the facility and that addresses all items listed in paragraph (d) of this section.

(b) The operator shall submit an EEP for each manned OCS facility to the cognizant Officer in Charge, Marine Inspection (OCMI), for examination. For facilities existing on [*Insert effective date of the final rule*], the EEP must be submitted before [*Insert date 180 days after effective date of the final rule*]. For facilities not existing on [*Insert effective date of the final rule*], the EEP must be submitted before placing the facility in operation. The OCMI will examine the EEP to determine whether all items listed in paragraph (d) of this section are addressed.

(c) The EEP must be resubmitted for examination when substantive changes are made. Only the pages affected by a change need be submitted if the EEP is bound in such a way as to allow old pages to be removed easily and new ones inserted. Substantive changes include all items affecting the means or methods of evacuation, or the time required to accomplish evacuation, including response time.

(d) EEP must, at a minimum,

(1) Be written in language that is easily understood by the facility's operating personnel;

(2) Have a table of contents and general index;

(3) Have a record of changes;

(4) List the names, telephone numbers, and function of each person to be contacted under the EEP and state the circumstances in which they should be contacted;

(5) List the facility's communications equipment, their available frequencies, and the communications schedules with shore installations, standby vessels, and other OCS facilities specified in the EEP;

(6) Identify the primary source of weather forecasting relied upon in implementing the EEP and state the frequency of reports when normal weather is forecasted, the frequency of reports when heavy weather is forecasted, and the method of transmitting the reports to the facility;

(7) Designate the person who is assigned primary responsibility for implementing the EEP;

(8) Designate those facility and shoreside support personnel who have the authority to advise the person in charge of the facility as to the best course of action to be taken and initiate actions to assist facility personnel;

(9) Describe the recognized circumstances, such as a fire or blowout, and environmental conditions, such as an approaching hurricane or ice floes, in which the facility or its personnel would be placed in jeopardy and a mass evacuation of the facility's personnel would be recommended;

(10) For each of the circumstances and conditions described under paragraph (d)(9) of this section, identify the means and procedures for the ultimate evacuation of all persons on the facility to land, another facility, or other safe place;

(11) For each of the circumstances and conditions described under paragraph (d)(9) of this section, list the pre-evacuation steps for securing operations, whether drilling or production, including time estimates for completion and personnel required; and

(12) For each of the circumstances and conditions described under paragraph (d)(9) of this section, describe the order in which personnel would be evacuated, the transportation resources to be used in the evacuation, the operational limitations for each mode of transportation specified, and the time and distance factors for initiating the evacuation.

(e) The operator shall ensure that—

(1) All equipment specified in the EEP, whether the equipment is located on or off the facility, is made available and located as indicated in the EEP and is designed and maintained so as to be capable of performing its function during an emergency evacuation.

(2) All personnel specified in the EEP are available and located as specified in the EEP and are trained in fulfilling their role under the EEP.

(f) A complete copy of the EEP must be made available to the facility's operating personnel and a brief written summary of the EEP must be given to each person newly reporting on board the facility.

(g) A copy of the EEP must be on board each standby vessel, if any are specified in the EEP, and provided to all shoreside support personnel, if any are specified in the EEP.

8. A new § 146.210 is added to read as follows:

§ 146.210 Emergency Evacuation Plan.

(a) The requirements for an Emergency Evacuation Plan (EEP) in § 146.140 apply to mobile offshore drilling units.

(b) To avoid unnecessary duplication, the EEP may incorporate by reference pertinent sections of the MODU's operating manual required by 46 CFR 109.121.

Dated: December 16, 1987.

J.W. Kime,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Safety Security and Environmental Protection.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[Gen. Docket No. 87–570; FCC 87–367]

Implementation of Debt Collection Act of 1982 and Related Statutory Provisions

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission commenced a rule making proposing to adopt specific procedures for the collection of delinquent debts. These procedures would be used for expediting the collection of delinquent forfeitures, salary overpayments, or travel payments that exceed authorized payments.

DATES: Interested parties may file comments on or before February 4, 1988, and reply comments on or before February 19, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Steve Bailey, Office of General Counsel, (202) 254–6530.

SUPPLEMENTARY INFORMATION: The full text of the discussion portion of this action is included here. However, in the interest of minimizing printing costs, the proposed rule amendments are not printed herein. The full text of the proposed amendments is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's Copy Contractor, International Transcription Service, (202) 857–3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Adopted: November 23, 1987.

Released: December 14, 1987.

By the Commission.

Introduction

1. In 1982, Congress enacted the Debt Collection Act, Pub. L. 97–365, 96 Stat. 1749, codified at 31 U.S.C. 3701, 3711, 3716, 3718, and 5 U.S.C. 5514 which authorizes new procedures designed to improve the ability of federal agencies to collect debts owed the United States. The Act also contains certain notification requirements and other protections for debtors. In 1984, Congress enacted the Deficit Reduction Act, Pub. L. 98–369, 98 Stat. 1153, which provides for the collection of money owed to the Federal Government through offsets to tax refunds. This notice proposes rules and regulations to implement the provisions of both statutes.

2. Generally, the Debt Collection Act authorizes new procedures for the collection of debts, including provisions that enable the use of administrative and salary offsets as a means of collecting money owed the Government.[1] In addition, the Act allows the Government to disclose to consumer reporting agencies information regarding delinquent debtors. Finally, the Act allows heads of agencies to make contracts with private collection services to recover indebtedness owed the United States.

3. The Act requires that agency regulations implementing the provisions of the law be consistent with uniform standards issued by the Department of Justice and the General Accounting Office. 31 U.S.C. 3711(e).[2] In addition, regulations pertaining to salary offset must conform to offset regulations issued by the Office of Personnel Management.[3] The regulations proposed herein, we believe, conform to the standards and procedures promulgated by these departments and offices.[4]

4. Section 2653 of the Deficit Reduction Act, codified at 31 U.S.C. 3720A, authorizes the Secretary of the Treasury to offset against income tax refunds any delinquent debt obligations to the Federal Government. Like the Debt Collection Act, the statute contains notice requirements and other protections for debtors.

5. In the paragraphs below, we discuss in more detail the provisions of the Debt Collection Act and the Deficit Reduction Act. The proposed rules implementing these statutes are set forth in the appendix hereto. Interested persons are invited to comment on the proposed rules; however, for the most part, the rules parallel the implementing regulations issued by DOJ, GAO, and OPM. Therefore, commenters should be aware that the Commission has limited discretion to make substantive changes in the rules.

Disclosure to Consumer Reporting Agencies

6. Section 3 of the Debt Collection Act, 31 U.S.C. 3711(f), authorizes agencies to report delinquent individual debtors to consumer reporting agencies. This provision applies only to individuals and, hence, includes only natural persons. As indicated above, the Act requires that certain procedural protections be provided to individuals before the release of any information concerning overdue payments. In addition, the Act requires that agencies report any significant change in circumstance (e.g., payment of the debt) to the consumer reporting agency.

7. Section 1.1918 of the proposed rules is intended to implement the Act's provisions relating to disclosure of debt information to consumer reporting

[1] The term "administrative offset" is defined as "withholding money payable by the United States to, or held by the Government for a person to satisfy a debt the person owes the Government." 31 U.S.C. 3701. Salary offset, a form of administrative offset, enables the Federal Government to recover debts payable from federal employees through deductions against salary or other benefits that accrue from Federal employment. 5 U.S.C. 5514 (1982).

[2] *See* 4 CFR Part 102—Standards for the Administrative Collection Claims.

[3] 5 CFR Part 550, Subpart K—Collection by Offset from Indebted Government Employees.

[4] Toward that aim, we will forward a copy of this Notice and the proposed rules to the General Accounting Office and Office of Personnel Management for their review and comment.

agencies. Under this section, the Commission would release information only after a determination had been made that the debt is valid and overdue and a written notice has been sent to the individual debtor. The written notice would state that the individual's payment of a debt is overdue and that the Commission will disclose this information to a consumer reporting agency in not less than 60 days. In addition, the notice would provide that the debtor has a right to a full explanation of the debt and is entitled to review applicable FCC records pertaining to the debt. The debtor may avoid the reporting of the claim to a consumer reporting agency by entering into an agreement to repay the debt under terms agreeable to the Commission.

Contracts for Collection Services

8. Section 13 of the Debt Collection Act, 31 U.S.C. 3718, authorizes heads of agencies to enter into contracts with private collection services to recover debts owed the United States. The Act requires that any contract entered into contain certain provisions. Section 1.1919 of the proposed rules sets out the statutory conditions that must be included in contracts for collection services. These include:

1. A provision that the FCC retains authority to resolve the debt dispute, including authority to terminate collection action and authority to refer the matter to the Attorney General for civil remedies; and

2. A provision specifying that the collection service is subject to the Privacy Act of 1974 as it applies to private contractors and subject to State and Federal laws governing debt collection practices, such as the Debt Collection Practices Act.

Section 1.1919 also sets forth other requirements applicable to collection contractors, as well as provisions relating to Commission funding of collection service contracts, the depositing of amounts recovered under collection service contracts, and other procedures governing the Commission's use of collection agencies.

Administrative Offset

9. Section 10 of the Debt Collection Act, 31 U.S.C. 3716, authorizes procedures for administrative offset, pursuant to which amounts owed to the Government may be deducted from amounts due to the debtor. As with the statutory provision for reporting to a consumer reporting agency, the Act requires that notice procedures be observed by the agency before any offset takes place. For example, it requires that debtors be provided notice of their debts and opportunities to review the record and enter into written agreements for repayment before the Government attempts to collect money by offset. The Act also provides that these offset provisions do not apply to an agency of the United States government, a state government or a local government.

10. Sections 1.1911–1917 of the proposed rules contain provisions for administrative offset. Generally, these provisions cover the manner of coordinating collection with other federal agencies (e.g., when the debt is owed to the Commission but is collected by another federal agency through offset), the type of notice that will be provided to a debtor before the offset begins, the debtor's right to inspect Commission's records relating to the particular debt, the debtor's opportunity to enter into a repayment agreement with the Commission, and the debtor's right to obtain review within the agency of the determination of indebtedness. The provisions also set forth the circumstances in which the debtor is entitled to a reasonable opportunity for an oral hearing when it requests Commission review.

11. Section 1.1913 of the proposed rules contains procedures for offset against amounts payable from the Civil Service Retirement and Disability Fund. The Commission intends to apply these offset procedures to amounts payable from this fund from either the Civil Service Retirement System or the newly-established Federal Employee Retirement System (FERS), which Congress created when it enacted the Federal Employee Retirement System Act of 1986, Pub. L. 99–335. If any changes are made to the offset procedures applicable to these retirement systems by DOJ/GAO in the Federal Claims Collection Standards or by OPM in its offset regulations, they will be incorporated into our rules.

Salary Offset

12. Section 5 of the Debt Collection Act, 5 U.S.C. 5514, establishes new procedures that permit agencies to collect debts by offsets against the salaries of federal employees. The salary offset provisions provide opportunities for affected employees to review determinations of indebtedness before offsets are implemented. In addition, each agency's regulations must be consistent with the Office of Personnel Management's regulations.

13. The regulations proposed by the Commission are contained in §§ 1.1925 through 1.1935. The procedures for salary offset are similar to those for administrative offset. Under the salary offset procedures, however, an employee against whom an offset is sought has a right to a hearing before an Administrative Law Judge or person outside the control or authority of the Commission, to review the Commission's determination of the debt, the amount of the debt, and the repayment schedule, if applicable. An employee must give notice of his or her intent to take advantage of the hearing procedures within a specified time period.

Interest, Penalties, Administrative Costs and Other Sanctions

14. Sections 1.1940 through 1.1942 contain provisions relating to the imposition of interest, penalties, and administrative costs in connection with debts owed the United States. These provisions are intended to implement the Federal Claims Collections Standards (4 CFR 102.13) promulgated by the General Accounting Office and the Department of Justice.

Deficit Reduction Act

15. As stated earlier, section 2653 of the Deficit Reduction Act, 31 U.S.C. 3470A, authorizes federal agencies to refer delinquent debts to the Department of the Treasury for collection by offsets against tax refunds owed to named persons. The statute provides that a federal agency must furnish a debtor with notice of a proposed IRS offset and afford the debtor at least 60 days within which to present evidence regarding the debt. Section 1.1951 of the proposed rules provides that actions intended to effectuate administrative offsets against tax refunds shall be undertaken in accordance with the statute and Treasury Department regulations. In addition, the proposed rules include provisions governing the reporting of discharged debts to the Internal Revenue Service, in compliance with the Treasury Fiscal Requirements Manual. The rules also incorporate the IRS directive that federal agencies report the outstanding balance, not including interest, of certain defaulted federal obligations.

Applicability of Debt Collection Measures to Forfeitures

16. We note that the applicability of the debt collection measures discussed above to debts owed the United States is considerably broad because it encompasses any "claim" of the United States as that term is defined in section 13(b) of the Debt Collection Act, Pub. L. 97-365, 96 Stat. 1758.[5] Accordingly, we intend to utilize these measures for the collection of forfeitures imposed under the Communications Act. Although section 503 of the Communications Act directs the Commission to refer forfeiture matters to the Attorney General where a person has failed to pay an assessment of a forfeiture after a final and unappealable order has been issued, we are of the view that this provision should not be read to preclude the use of debt collection measures. Similarly, although section 504 provides for a trial de novo in any suit for recovery of a forfeiture imposed under the provisions of the Communications Act, we do not read it as foreclosing us from utilizing administrative offset procedures or the other debt collection measures we propose to adopt. In short, we believe that applicability of debt collection provisions to forfeitures should be interpreted to be consistent with, rather than mutually exclusive, to the forfeiture provisions contained in the Communications Act and, accordingly, we invite comment on this position.

Administrative Matters

17. Authority for the proposed rules is contained in sections 4(i), 4(j), and 303(r) of the Communications Act of 1934, as amended (47 U.S.C. 154(i), 154(j) and 303(r)), the Federal Claims Collection Act (31 U.S.C. 3701 *et seq.*), as amended by the Debt Collection Act of 1982, and section 2563 of the Deficit Reduction Act of 1984 (31 U.S.C. 3470A). Pursuant to §§ 1.415 and 1.419 of the Commission's Rules, interested parties may file comments on or before February 4, 1988, and reply comments on or before February 19, 1988. All relevant and timely comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the Commission's reliance on such information is noted in the Report and Order.

18. In this non-restricted rule making proceeding, ex parte contacts are permitted from the time the Commission adopts this Notice of Proposed Rule Making until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting, or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. A written ex parte presentation is any written presentation (except written comments or reply comments in the proceeding) made to decision-making personnel by another person that is not served on the participants to the proceeding. An oral ex parte presentation is an oral presentation made to decision-making personnel without advance notice to the other participants or a reasonably opportunity for them to be present when the presentation is made. Any person who submits a written ex parte presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral ex parte presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, the summary must be submitted to the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each ex parte presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally § 1.1206 of the Commission's Rules (47 CFR 1.1206).

19. In accordance with the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), the FCC finds that the proposed rules will have no "significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Pub. L. 96–354, 94 Stat. 1164, 5 U.S.C. 605(b). The FCC shall so certify to the Chief Counsel for Advocacy of the Small Business Administration. This conclusion has been reached because the proposed rules do not, in themselves, impose any additional requirements upon small entities. Accordingly, no regulatory flexibility analysis is required.

20. In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), any reporting and recordkeeping provisions that are included in the rules will be submitted for approval to the Office of Management and Budget (OMB).

21. To file formally in this proceeding, participants must file an original and five copies of all comments, reply comments, and supporting documents. If participants want each Commissioner to receive a personal copy of their comments, an original plus eleven copies must be filed. Persons who wish to participate informally may submit one copy of their comments, stating thereon the docket number of this proceeding. Comments and reply comments should be sent to the Office of Secretary, Federal Communications Commission, 1919 M Street, NW., Washington, DC 20554. Comments and reply comments will be available for public inspection during regular business hours in the Dockets Public Reference Room (Room 239) at that address. For additional information on this proceeding, please contact Steve Bailey, Office of General Counsel, (202) 254–6530.

Federal Communications Commission.

William J. Tricarico,

Secretary.

List of Subjects in 14 CFR Part 1

Collection of claims owed the United States.

[FR Doc. 87–29260 Filed 12–23–87; 8:45 am]

BILLING CODE 6712–01–M

[5] That section provides that the term "claim" includes "amounts owing on account of loans insured or guaranteed by the United States and all other amounts due the United States from fees, duties, leases, rents, royalties, services, sales of real or personal property, overpayments, fines, penalties, damages, interest, taxes, forfeitures, and other sources."

47 CFR Part 65

[CC Docket No. 87–463]

Refinement of Procedures and Methodologies for Represcribing Interstate Rates of Return for AT&T Communications and Local Exchange Carriers; Extension of Reply Comment Period

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; extension of reply comment period.

SUMMARY: The Commission has granted the Pacific Bell and Nevada Bell's request for a one week extension of time for reply comments in CC Docket No. 87–463, concerning the refinement of procedures and methodologies for represcribing interstate rates of return. The extension was granted upon a good cause showing that the comments filed November 23, 1987, were voluminous, the extension sought was limited, and the public interest request adequate opportunity to prepared reply comments. The filing dates were established in the Notice of Proposed Rulemaking, published at 52 FR 39251 (October 21, 1987).

ADDRESS: Federal Communications Commission, Washington, DC 20554.

DATE: Reply comments shall be filed by Friday, December 18, 1987.

FOR FURTHER INFORMATION CONTACT: Giovanna M. Longo, Industry Analysis

VOL 52 ISS 247 DEC 24 1987 UMI

Division, Common Carrier Bureau, (202) 632-0745.

Memorandum Opinion and Order

Adopted: December 7, 1987.
Released: December 9, 1987.
By the Chief, Common Carrier Bureau:

1. Pacific Bell and Nevada Bell (the Pacific Companies) filed a motion for extension of time on December 4, 1987. Pacific requests that the December 11, 1987, filing date for reply comments in this proceeding be extended one week until December 18, 1987, pursuant to FCC Rules and Regulations, § 1.46. In support, Pacific notes the voluminous comments filed on November 23, 1987, and technical nature of the economic analyses therein.

2. In view of the public interest in adequate opportunity for comment upon refinement of procedures and methodologies for represcribing interstate rates of return, the limited extension of time sought, and Pacific's showing of good cause, the filing date for reply comments shall be extended to December 18, 1987.

3. Wherefore, for all the reasons above stated, Pacific's motion is granted.

Gerald Brock,
Chief, Common Carrier Bureau.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 87-564, RM-5846]

Radio Broadcasting Services; Augusta, AR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Dixie Broadcasting, Inc., licensee of Station KABK-FM (Channel 249A), Augusta, Arkansas, proposing the substitution of FM Channel 249C2 for Channel 249A and modification of its Class A license accordingly, to provide that community with its first wide coverage area FM service.

DATES: Comments must be filed on or before February 8, 1988, and reply comments on or before February 23, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Eugene T. Smith, Esq., Law Offices of Eugene T. Smith, 715 G Street SE., Washington, DC 20003.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87-564 adopted December 2, 1987, and released December 17, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 320), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

GENERAL SERVICES ADMINISTRATION 6820-61-M

48 CFR Parts 508 and 553

[GSAR Notice No. 5-65]

Acquisition Regulation; Utility Contracts

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice invites written comments on a proposed change to the General Services Administration Acquisition Regulation (GSAR) which would revise Part 508 to clarify the Federal Acquisition Regulation definition of utility services, to prescribe policies governing the acquisition of utility services, to prescribe procedures for precontract review for utility contracts, to provide for annual rate reviews, to provide for use of GSA forms for acquiring utility services; and to revise Part 553 to illustrate GSA Forms 1533, Utilities Contract; 1683, Negotiated Electric Utility Contract, and 1684, Technical Provisions (Electric Utility Contract). The intended effect is to improve the regulatory coverage and to provide uniform procedures for contracting under the regulatory system.

DATE: Comments are due in writing on or before January 25, 1988.

ADDRESS: Requests for a copy of the proposal and comments should be addressed to Ms. Marjorie Ashby, Office of GSA Acquisition Policy and Regulations, 18th and F Streets, NW, Room 4024, Washington, DC 20405, (202) 523-3822.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Loeb, Office of GSA Acquisition Policy and Regulations, 18th and F Streets, NW, Room 4029, Washington, DC 20405, (202) 523-4764.

SUPPLEMENTARY INFORMATION: The Director, Office of Management and Budget (OMB), by memorandum dated December 14, 1984, exempted certain procurement regulations from Executive Order 12291. The exemption applies to this proposed rule. The GSA certifies that the document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The substance of the proposed rule primarily relates to internal processing of utility contracts within GSA. Therefore, no regulatory flexibility analysis has been prepared. The rule does not contain information collection requirements which require the approval of OMB under (44 U.S.C. 3501 et seq.)

DEPARTMENT OF THE TREASURY

48 CFR Part 1033

Acquisition Regulations; Submission and Disposition of Protests

AGENCY: Department Offices, Treasury.

ACTION: Proposed Rule.

SUMMARY: This regulation would establish uniform procedures in 48 CFR Part 1033 for submission and disposition of protests filed with the Department of the Treasury. The proposed regulation is intended to provide standard time frames for filing of agency-level protests, a clear format for such protests, and guidance to Treasury bureau procurement offices for handling agency protests.

DATE: Comments should be submitted to the address below by February 22, 1988.

ADDRESS: Interested parties should submit written comments to: Department of the Treasury, Departmental Offices, Office of Procurement, Room 1458, 1500 Pennsylvania Avenue NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Robert E. Lloyd, Procurement Analyst, telephone (202) 566-2115.

SUPPLEMENTARY INFORMATION:

A. Regulatory Flexibility Act

It is hereby certified that the proposed rule will not have a significant economic impact on a substantial number of small entities. Accordingly, the analysis requirements of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) do not apply. The proposal would clarify protest procedures and does not affect the rights of any entity to make a protest.

B. Paperwork Reduction Act

The collection of information contained in the proposed regulation has been submitted to the Office of Management and Budget pursuant to section 3504(h) of the Paperwork Reduction Act (44 U.S.C. 3501). Comments on these requirements should be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attention: Desk Officer for Departmental Offices, Department of the Treasury. Copies of these documents also should be sent to the Department at the address previously specified.

C. Executive Order 12291

Because this document relates to agency organization and management, it is not subject to Executive Order 12291. Accordingly, a regulatory impact analysis is not required.

Lists of Subjects in 48 CFR Part 1033

Government procurement, Protests, Disputes, Appeals.

Dated: December 15, 1987.

Thomas P. O'Malley,

Director, Office of Procurement [Procurement Executive].

Title 48 of the Code of Federal Regulations is amended as set forth below:

PART 1033—PROTESTS, DISPUTES, AND APPEALS

1. The authority citation for Part 1033 continues to read as follows:

Authority: 41 U.S.C. 418b (a) and (b), as delegated by Department of the Treasury Orders 101–30 and Treasury Directive 12–11.

2. Subpart 1033.1, consisting of section 1033.103, is added to read as follows:

Subpart 1033.1—Protests

1033.103 Protests to the Agency.

(a) *Policy.* It is the Department's policy to resolve protests in an informal manner whenever possible. Protesters are strongly encouraged to address their concerns to the contracting officer prior to resorting to litigation or other formal, external means of resolution.

(b) *Procedures.* (1) Agency protests may be submitted by interested parties to the contracting officer. Protests based on alleged improprieties in a solicitation must be received before the time specified for receipt of bids, proposals, or quotations; other protests must be received by the contracting officer no later than 10 working days after the basis for the protest is known or should have been known, whichever is earlier. These time limits may be extended by the contracting officer if it is determined to be in the Government's best interest.

(2) Protests shall be in writing and shall include, as a minimum, the following information:

(i) Name, address, and telephone number of the protestor;

(ii) Solicitation or contract number;

(iii) Detailed statement of the legal and factural grounds for the protest, including copies of relevant documents;

(iv) Request for a ruling by the contracting officer to whom the protest is submitted;

(v) Statement as to the form of relief requested.

(3) Protest submissions shall be concise, logically arranged, and state sufficient grounds of protest. If an oral protest is received, the protestor shall be required to submit the protest in writing within the time specified in paragraph (b)(1) above. Failure to comply with any of the above requirements may be grounds for dismissal of the protest.

(4) Upon receipt of an agency protest, the contracting officer shall:

(i) Immediately notify legal counsel and the Departmental Office of Procurement (MMK) and provide each with a copy of the protest;

(ii) Prepare a report similar to that prescribed in FAR 33.104(a)(2);

(iii) Ensure that the protest response is received by the protestor and interested parties no later than 25 working days after receipt of the protest;

(iv) Obtain review of the protest response by legal counsel and forward the protest response of MMK review and approval at least three working days prior to the due date;

(v) Ensure that any pre-award protest is answered prior to award.

(5) The contracting officer shall advise all interested parties of any delays in responding to the protest. If the contracting officer and the protestor agree on corrective action, a report is not required; however, in addition to amending the solicitation or taking other corrective action, the contracting officer shall inform the protestor and all interested parties in writing of the proposed corrective action and shall obtain from the protestor a written notice withdrawing the protest. A copy of this notice shall be provided to MMK.

(6) If a written protest before award has been lodged with the contracting officer, only the bureau chief procurement officer may make the determination described in FAR 33.103(a). Prior to making an award of a contract under the circumstances in FAR 3.103(a), the advice of legal counsel shall be obtained.

(7) If a written protest after award has been lodged with the contracting officer, contract performance need not be suspended if the bureau chief procurement officer makes a written determination that contract performance will be in the Government's best interest.

DEPARTMENT OF AGRICULTURE

Federal Grain Inspection Service

Advisory Committee Meeting

Pursuant to the provisions of section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), a notice is hereby given of the following committee meeting:

Name: Federal Grain Inspection Service Advisory Committee.
Date: January 22, 1988.
Place: Hyatt Regency Houston, 1200 Louisiana Street, Houston, Texas 77002.
Time: 8:30 a.m.
Purpose: To provide advice to the Administrator of the Federal Grain Inspection Service on the efficient and economical implementation of the U.S. Grain Standards Act of 1976 and to assure the normal movement of grain in an orderly and timely manner.

The agenda includes: (1) Wheat classification; (2) quality control; (3) FGIS response to sorghum recommendations; (4) financial matters; (5) CUSUM; and (6) other matters.

The meeting will be open to the public. Public participation will be limited to written statements unless otherwise requested by the Committee Chairman. Persons, other than members, who wish to address the Committee at the meeting or submit written statements before or at the meeting should contact W. Kirk Miller, Administrator, FGIS, U.S. Department of Agriculture, P.O. Box 96454, Washington, D.C. 20090–6454, telephone (202) 382–0219.

Dated: December 18, 1987.

W. Kirk Miller,

Administrator, Federal Grain Inspection Service.

DEPARTMENT OF COMMERCE

Agency Information Collections Under Review by Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration
Title: Application for Commission in the NOAA Corps
Form Numbers: NOAA–56–42, 56–42A, 56–42C, and 56–42D; OMB–0648–0047
Type of Request: Extension of the expiration date of a currently approved collection
Burden: 216 respondents; 396 reporting hours
Needs and Uses: This collection is used to apply for a Commission in the NOAA Corps. The information is used to evaluate the qualifications of applicants.
Affected Public: Individuals
Frequency: On occasion
Respondent's Obligation: Required to obtain or retain a benefit
OMB Desk Officer: John Griffen 395–7340
Agency: National Oceanic and Atmospheric Administration
Title: Sea Grant Budget
Form Numbers: NOAA–90–4; OMB–0648–0034
Type of Request: Extension of the expiration date of a currently approved collection
Burden: 40 respondents; 200 reporting hours
Needs and Uses: Under the National Sea Grant Program Act, NOAA awards both single and multi-project grants for the purpose of improving ocean and coastal resources. Each element of a multi-project grant is judged both individually and as part of the complete proposal. The information collected is used by both the grantor and grantee to determine the cost of each project in a proposal and to determine the allowability of matching costs. It is also used in negotiating costs and in the administrative control of expenditures.
Affected Public: State or local governments; nonprofit institutions
Frequency: Annually
Respondent's Obligation: Required to obtain or retain a benefit
OMB Desk Officer: John Griffen 395–7340
Agency: National Oceanic and Atmospheric Administration
Title: Sea Grant Control
Form Number: NOAA–90–1; OMB–0648–0008
Type of Request: Extension of the expiration date of a currently approved collection
Burden: 40 respondents; 20 reporting hours
Needs and Uses: Under the authority of the National Sea Grant Program Act, NOAA awards grants for research and other activities for the purpose of improving ocean and coastal resources. This data collection requests respondents to summarize information on the content of grant proposals. The information primarily concerns identification of the participating organizations and personnel involved in a project. It is

VOL 52 ISS 247 DEC 24 1987 UMI

used by program staff to evaluate the overall proposal to assure that the resources to be cummitted are adequate for the project.
Affected Public: State or local governments; nonprofit institutions
Frequency: Annually
Respondent's Obligation: Required to obtain or retain a benefit
OMB Desk Officer: John Griffen 395–7340

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (203) 377–3271, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: December 17, 1987.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3516-CW-M

Agency Form Under Review by Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration
Title: Logbook Family of Forms—Catcher/Processor Transfer Logs
Form Number: Agency—N/A; OMB—0X15-0016
Type of Request: Revision of a currently approved collection
Burden: 25 respondents; 324 new reporting hours
Needs and Uses: This new collection will require catcher/processor and mothership processor vessels operating in the Gulf of Alaska or in the Bering Sea and Aleutian Islands area to maintain onboard a transfer log and to report information weekly about transfers and off-loadings of groundfish products. The information is needed to monitor compliance with quotas and bycatch limits for catcher/processors and motherships in the Alaskan groundfisheries.
Affected Public: Businesses or other for-profit institutions; small businesses or organizations
Frequency: On occasion; weekly
Respondent's obligation: Mandatory
OMB Desk Officer: John Griffen 385–7340

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer Edward Michals (202) 377–3271, Department of Commerce, Room 6622, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: December 18, 1987.

Edward F. Michals,

Departmental Clearance Officer, Office of Management and Organization.

BILLING CODE 3510-CW-M

Foreign-Trade Zones Board

[Docket No. 45–87]

Foreign-Trade Zone 23, Buffalo, NY; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by Erie County, New York, grantee of Foreign-Trade Zone 23, requesting authority to expand the zone to include an additional site in Erie County, within the Buffalo Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on December 16, 1987.

The Buffalo Zone was approved in March 1976, and comprises five sites (124 acres) in Buffalo, Erie County, New York. The requested change would enlarge existing zone Site 1 (Gateway Trade Center—36,000 sq. ft. bldg.) to include two parcels of industrial park space totaling 225 acres within the Gateway Trade Center: parcel A (150 acres) is the former Bethlehem Steel plant bounded by the Union and Lackawanna Canals; and, parcel B (75 acres) is bounded by Lohr Ave. and Ridge Road. The Site operator is Gateway Trade Center, Inc., a subsidiary of Buffalo Crushed Stone, Inc.

The proposed site, which has been designated a State of New York Opportunity Zone, is being requested as part of Erie County's efforts to improve foreign-trade zone services for potential industrial users. Specific manufacturing approvals would be requested from the Board on a case-by-case basis as specific proposals arise.

In accordance with the Board's regulations, an examiners committee has been appointed to investigate the application and report to the Board. The committee consists of: Joseph Lowry (Chairman), Foreign-Trade Zones Staff, U.S. Department of Commerce, Washington, DC 20230; Edward A. Goggin, Assistant Regional Commissioner, U.S. Customs Service, Northeast Region, 100 Summer Street, Boston, MA 02110–2104; and Colonel Daniel R. Clark, District Engineer, U.S. Army Engineer District Buffalo, 1776 Niagara Street, Buffalo, NY 14207–3199.

Comments concerning the proposed expansion are invited in writing from interested parties. They should be addressed to the Board's Executive Secretary at the address below and postmarked on or before February 5, 1988.

A copy of the application is available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, 1312 Federal Building, 111 West Huron Street, Buffalo, NY 14202
Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, 14th & Pennsylvania Ave. NW., Room 1529, Washington, DC 20230

Dated: December 18, 1987.

John J. Da Ponte,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[C–475–702]

Preliminary Negative Countervailing Duty Determination; Certain Granite Products From Italy

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in Italy of certain granite products as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is 0.36 percent *ad valorem* for Granitex S.p.A. and for all non-respondent manufacturers, producers and exporters in Italy of certain granite products. This rate is *de minimis*. The rate for all other respondent companies is either *de minimis* or zero.

We have notified the U.S. International Trade Commission (ITC) of our determination. If this investigation proceeds normally, we will make a final determination by March 3, 1988.

EFFECTIVE DATE: December 24, 1987.

FOR FURTHER INFORMATION CONTACT: Mark Linscott, Lori Cooper or Barbara Tillman, Office of Investigation, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–8330, 377–8320 or 377–2438.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based on our investigation, we preliminary determine that no benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in Italy of certain granite products. For purpose of this investigation, the following programs are preliminarily found to be countervailable:

- Reduction of Social Security Payments for Companies Located in the Mezzogiorno Region.
- Regional Loan Program under Law 902.
- Local Tax Concessions under Law 614.

We preliminarily determine the estimated net subsidy to be 0.36 percent *ad valorem* for Granitex S.p.A. and for all non-respondent manufacturers, producers and exporters in Italy of certain granite products. This rate is *de minimis* and, as such, does not constitute a subsidy.

Case History

Since the last **Federal Register** publication pertaining to this investigation (the Notice of Initiation (52 FR 31651, August 21, 1987)), the following events have occurred. On August 27, 1987, we presented a questionnaire to the Government of Italy in Washington, DC, concerning petitioner's allegations. Due to the large number of Italian producers and exporters of the subject merchandise, we followed our practice of requesting the government to identify the largest producers and exporters in rank order comprising 60 percent of the value of the subject merchandise exported to the United States in 1986, and to forward questionnaires to them.

On September 21, 1987, all of the companies identified by the Italian government as comprising the top 60 percent filed timely requests for exclusion from any countervailing duty order (*See* section on exclusion requests, below). On September 27, 1987, the following firms submitted responses to our questionnaire, which included responses on behalf of their related companies: Campolonghi Italia S.p.A., Euromarble S.p.A., Formai & Mariani S.R.L., Fratelli Guarda S.p.A., Henraux S.p.A., Pisani Brothers S.p.A., and Savema S.p.A. On September 30, 1987, we received a response from the Government of Italy.

Because the largest firms accounting for 60 percent requested exclusion, thereby setting themselves on a separate investigative track from those Italian companies that did not request exclusion, we chose a new representative group of companies and requested questionnaire responses from them. In accordance with our standard practice, we selected the largest producers and exporters accounting for at least 60 percent of the value of the remaining pool of the subject merchandise exported to the United States after deducting from total exports of subject merchandise to the United States and value of exports of the companies requesting exclusion.

Based on our analysis, we determined that responses from the following ten additional companies were necessary to ensure that our investigation covered a group of companies that is representative of all Italian companies which export the subject merchandise to the United States: Alimonti Fratelli S.p.A., Antolini Luigi & Company S.p.A., Cremar S.p.A., Granitex S.p.A., Guglielmo & Alberto Bonotti S.n.C., Marcolini Marmi S.p.A., Margraf S.p.A., Porcelli Marmi S.p.A., Serio Carlo & Company S.p.A., and Valsega Marmi S.n.C.

On October 30, 1987, we informed the Italian government that we would seek questionnaire responses from the ten additional companies listed above, and on November 2, 1987, we presented a questionnaire to the Government of Italy concerning these companies. Responses from the additional companies and from the government were received on December 3, 1987. In addition, on November 18, 1987, we delivered supplemental/deficiency questionnaires to the Government of Italy and all companies requesting exclusion. This questionnaire included questions concerning programs that were not alleged by petitioner but which we discovered in reviewing the original responses. We received supplemental responses on December 4, 1987.

On September 23, 1987, the petitioner requested that the preliminary determination be postponed for 21 days. Pursuant to section 703(c)(1)(A) of the Act, we postponed the preliminary determination to no later than November 12, 1987. On November 4, 1987, the petitioner requested that we further postpone the preliminary determination by an additional 36 days. Accordingly, we extended the date of the preliminary determination to December 18, 1987.

Exclusion Requests

On September 21, 1987, in accordance with § 355.38 of the Commerce regulations (19 CFR 355.38) and § 355.14 of the proposed regulations (50 FR 24207, June 10, 1985), the largest companies comprising 60 percent of the value of exports of the subject merchandise to the United States in 1986 requested exclusion from any possible countervailing duty order which might result from this investigation, claiming not to have benefited from any subsidies. On September 29, 1987, we sent the Italian embassy a letter explaining the requirements for government certification of the exclusion requests, as required under the proposed regulations. We confirmed that a company would be eligible for exclusion if it either did not participate, or participated only at a *de minimis* level overall, in the programs under investigation. We also informed the Italian government that it was required to certify either non-use by the companies of these programs, or that the overall net benefit received under these programs during the review period was *de minimis*. In addition, we requested that the government provide information on the amounts of benefits received and a calculation of any net benefits for each company requesting exclusion. Finally, we confirmed that only those companies which produce and export the subject merchandise to the United States are eligible for exclusion. We received the government certifications on November 9, 1987.

Based upon our analysis of the responses submitted by the companies requesting exclusion and of the government certification, we have determined preliminarily that those companies producing and exporting the subject merchandise would qualify for exclusion. Only two of these companies used any of the countervailable programs and the estimated net subsidy for each is *de minimis* (*See* sections I.A. and B.). However, exclusion is only

BEST COPY AVAILABLE

relevant within the context of an affirmative determination for which there would be an estimated net subsidy rate and corresponding provisional measures from which to be excluded. Here, we have preliminarily found the estimated net subsiody for respondent companies that did not request exclusion to be *de minimis*. Therefore, for purposes of this preliminary negative determination, the exclusion provision does not apply. If our final determination is affirmative, we will exclude companies only if verification confirms the accuracy of the company responses and of the government certification.

Scope of Investigation

The products covered by this investigation are certain granite products from Italy. Certain granite products are ⅜ inch (1 cm) to 2½ inches (6.34 cm) in thickness and include the following: rough sawed granite slabs; face-finished granite slabs; and finished dimensional granite including, but not limited to, building facing, flooring, wall and floor tiles, paving, and crypt front. Certain granite products do not include monumental stones, crushed grranite, or curbing. Certain granite products are currently classified under *TSUSA* item number 513.7400 and under *HS* item numbers 2516.12.00, 6802.23.00 and 6802.VI.IXI.

Analysis of Programs

Throughout this notice, we refer to certain principles applied to the facts of the current investigation. These general principles are described in the "Subsidies Appendix" attached to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (49 FR 18006, April 26, 1984).

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses however, are subject to verification. If the responses cannot be supported at verification, and a program is otherwise countervailable, it will be considered a subsidy in the final determination.

For those respondent companies that requested exclusion yet received benefits under countervailable programs, we calculated individual company subsidy rates (*See* sections I.A. and B. of this notice). When we receive exclusion requests, we calculate rates company by company to determine whether each firm does in fact qualify for exclusion.

For respondent companies that did not request exclusion, we would typically calculate a country-wide rate. This calculation would not include companies that did not participate in any of the countervailable programs. Of those respondent companies that did not request exclusion, only one actually participated in a countervailable program. We have calculated the estimated net subsidy based on the benefits received by the one additional company that did participate in a countervailable program. This benefit is divided by that company's sales to yield a country-wide rate that applies to this company and to all non-respondent companies (*See* section I.C. of this notice). As stated above, this rate is *de minimis*; therefore, our preliminary determination is negative.

For purposes of this preliminary determination, the period for which we are measuring subsidization ("the review period") is calendar year 1986. This period coincides with the most recently completed fiscal year of all but one of the respondent companies.

Based upon our analysis of the petition, the responses to our questionaires, and the government certification of exclusion requests, we preliminarily determine the following:

I. Programs Preliminary Determined to Confer Subsidies

We preliminarily determine that subsidies are being provided to manufacturers, producers or exporters in Italy of certain granite products under the following programs:

A. Reductions in Social Security Payments for Companies Located in the Mezzogiorno Region

According to the government responses, all Italian companies that operate facilities in the Mezzogiorno region of southern Italy are entitled to a reduction in social security payments owed to the National Social Security Institute (INPS) equivalent to ten percent of the wages subject to the INPS contribution for all workers employed in this region. The reduction may be increased to 20 percent of wages for all employees hired after September 30, 1968, over and above the number of individuals employed by the company on that date. For staff hired after July 1, 1976, but before December 31, 1980, qualifying companies can receive a total exemption from payments owed to the INPS.

According to the company response, only Henraux owns facilities in the Mezzogiorno. The company response states that Henraux owns five stockyards in the Mezzogiorno. Henraux received reductions in social security payments during the review period for employees at these stockyards.

Because benefits under this program are available only to firms that locate facilities in the Mezzogiorno, we preliminarily determine that this program is limited to a specific enterprise or industry, or group of enterprises or industries and, therefore, is countervailable.

Henraux filed a timely request for exclusion and was certified by the Government of Italy as having received only *de minimis* benefits under this program during the review period. According to the responses, Henraux did not participate in any other Mezzogiorno program (*See* section III.D. of this notice).

We calculated a company-specific rate for Henraux under this program because it requested exclusion from any countervailing duty order that may be imposed through this investigation. A company-specific rate is necessary to determine preliminarily whether Henraux qualifies for exclusion. To calculate the benefit under this program, we divided the total value of the social security reductions Henraux received the review period by its total sales of all products during the review period and arrived at an estimated net subsidy of 0.08 percent *ad valorem* for Henraux. The rate is zero for all others.

B. Regional Loan Program Under Law 902

According to the responses, Italian Law 902 authorizes loans at less than prevailing market rates to small- and medium-sized businesses located in northern and central Italy. Firms participating in this program must use the financing for plant modernization. These loans carry fixed interest rates with terms of seven to ten years.

Loans pursuant to Law 902 may be given for up to 60 percent of the total cost of the project. The total project cost upon which the 60 percent calculation is based may include up to 40 percent of the value of the raw materials necessary to begin production using the intended facility. The interest rates are 50 to 60 percent of a "reference rate" periodically set by the Ministry of the Treasury, plus a commission charge to cover the lending institution's expenses and profits. Giuseppe Furrer, a related company of Henraux, was the only company with a 902 loan outstanding during the review period.

Because only firms that have facilities located in designated regions in Italy are eligible to receive loans under Law 902, we preliminarily determine that they are limited to a specific enterprise or industry, or group of enterprises or industries. To determine whether 902 loans are inconsistent with commercial considerations, we compared the interest rate on the 902 loan to the appropriate benchmark.

For long-term loans, it is our practice to use a company-specific benchmark, based on the company's cost of long-term financing from commercial sources in the year in which the terms of the loan in question were agreed upon. Because the responses contained insufficient information to establish a company-specific benchmark, we used as our benchmark the national average long-term interest rate for the stone-processing industry in 1983, the year in which the terms of the loan were agreed upon, as reported in the government response. Because the interest rate on the 902 loan received by Giuseppe Furrer was below the benchmark rate, we preliminarily determine that the loan was provided on terms inconsistent with commercial considerations.

Giuseppe Furrer filed a timely request for exclusion and was certified by the Government of Italy as having received only *de minimis* benefits under this program during the review period. Because Giuseppe Furrer requested an exclusion in this investigation, we calculated a company-specific rate under this program. A company-specific rate is necessary to determine preliminarily whether Giuseppe Furrer qualifies for exclusion.

To calculate the benefit from the 902 loan received by Giuseppe Furrer, we used our long-term fixed-rate loan methodology, as set forth in the Subsidies Appendix. For the discount rate, we used the benchmark interest rate. The benefit allocated to the review period was divided by Giuseppe Furrer's total sales of all products during this review period. We calculated an estimated net subsidy of 0.07 percent *ad valorem* for Giuseppe Furrer. The rate is zero for all others.

C. Local Tax Concessions Under Law 614

Under Article 30 of Law 614, Italian companies that establish or expand facilities in designated depressed territories in northern and central Italy are entitled to reductions in local corporate income tax rates. Reductions may be claimed for ten years following the establishment or expansion of a facility. According to the government response, this program expired on December 31, 1985, although it was extended until December 31, 1990, exclusively for depressed territories in the regions of Friuli-Venezia Giulia and Marches. Residual bendits under this program may continue for ten years following expiration.

Because this program is available only to firms that invest in designated areas in northern and central Italy, we preliminarily determine that it is limited to a specific enterprise or industry, or group of enterprises or industries and, therefore, is countervailable.

Of the respondent companies, only Granitex received a reduction in corporate income taxes under this program for the tax return filed during the review period. We calculated the benefit under this program based on the company's overall corporate tax liability, which includes national corporate tax and local corporate tax, for the tax return filed during the review period. We first determined the difference between what Granitex paid in total corporate income taxes during the review period and what it would have paid absent this program. We then divided this amount by Granitex's total sales of all products during this period. Based on this calculation, we arrived at an estimated net subsidy of 0.36 percent *ad valorem* for Granitex and for all-nonrespondent producers, manufacturers and exporters in Italy of certain granite products. The rate is zero for all others.

II. Programs Preliminarily Determined not to Confer A Subsidy

We preliminarily determine that subsidies are not being provided to manufacturers, producers or exporters in Italy of certain granite products under the following programs. These programs were discovered in the course of our review of the company responses and were alleged by petitioner.

A. Reinvestment Fund Under Article 54 of DPR 597/73

According to the responses, Italian firms are permitted to claim a tax exemption for any capital gains earned on the sale of fixed assets, provided that the gains are reinvested in capital assets. Article 54 of Presidential Decree (DPR) 597/73 states that firms must establish a special liability fund for capital gains, and reinvest these tax-exempt gains in depreciable assets in the second fiscal year following the one in which the gains were realized.

According to the government response, this provision of Italian tax law is available to all entities in Italy, regardless of geographic location or type of industry. Receipt of this exemption is only contingent upon a company's subsequent use of the gains for reinvestment in capital assets. Because benefits under Article 54 of DPR/73 are available to all Italian firms, we preliminarily detemine that this provision is not limited to a specific enterprise or industry, or group of enterprises or industries.

B. Accelerated Depreciation

According to the responses, Articles 68 of DPR 597 sets forth rules governing the depreciation of assets under Italian tax law. The normal deductible depreciation of a company's assets is dependent upon how the asset is classified in the Italian government's depreciation schedule. The deduction may be increased during each fiscal year if assets are used more intensely than is normal for that particular production activity. In addition, accelerated depreciation above the normal rate can be claimed for the first three years after the asset is acquired.

The government response states that these rates of depreciation under Article 68 of DPR 597, including the accelerated rate, are available to all Italian companies regardless of geographic location or type of industry. Therefore, we preliminarily determine that this program is not limited to a specific enterprise or industry, or group of enterprises or industries.

C. Revaluation of Assets under Law 72 of 1983 and Law 576 of 1975

According to the responses, the Italian government allowed all companies to revalue assets in 1975 and again in 1983 to reflect market value rather than book value. The revaluations were necessary to account for periods of high inflation which preceded these years. Because all Italian firms, regardless of geographic location or type of industry, were permitted to revalue assets, we preliminarily determine that these revaluations were not limited to a specific enterprise or industry, or group of enterprises or industries.

D. Contributions Under Article 55 of DPR 597

According to the responses, Article 55 of DPR 597, relating to "contingent assets," authorizes all Italian companies to establish a reserve fund which postpones the payment of taxes on certain monies received by a company until such funds are distributed as profits to that company's shareholders. Funds received from the government in the form of a reimbursement, for

VOL 52 ISS 247 DEC 24 1987 UMI

example, would be included on the asset side of a company's balance sheet. Article 55 permits the company to preserve the tax-exemption by establishing an offsetting reserve fund on the debit side of its balance sheet, such that the money held on reserve becomes taxable only when distributed as profits.

Because Article 55 applies to all taxpayers regardless of geographic location or type of industry, we preliminarily determine that this program is not limited to a specific enterprise or industry, or group of enterprises or industries.

III. Programs Preliminarily Determined Not to be Used

We primarily determine that the following programs were not used by manufacturers, producers or exporters in Italy of certain granite products during the review period.

A. Rebates of Indirect Taxes Under Law 509

Italian Law 639 authorizes the rebate of customs duties and certain indirect taxes upon the export of products containing certain raw materials. According to the responses, the respondent companies were not eligible to receive benefits under this program because it is available only to mechanical industries which do not include the stone-processing industry.

B. Export Credit Financing

Under Italian Law 227, a medium-term export credit line is available to foreign purchasers that import Italian goods and services. Administered by Mediocredito Centrale, this program applies only to export credits of greater than 18 months. According to the responses, no U.S. purchasers of the subject merchandise produced or exported by the respondent companies had outstanding credit lines under this program during the review period.

C. Preferential Transportation Rates

Under Italian State Act 210/85, Italian firms may apply for and receive preferential transportation rates from the State-owned railroad of Italy. Rate reductions are provided to companies agreeing to ship a certain amount of freight within a certain period of time. According to the responses, none of the respondent companies claimed or received preferential transportation rates under this program during the review period.

Italian State Act 877/84 provides a 30 percent reduction in state-owned railroad rates for shipments of raw mineral substances produced in the Italian islands. For raw mineral substances produced and processed in the Italian islands, the rate is reduced by 60 percent. The responses indicate that none of the companies under investigation received benefits under this program.

D. Mezzogiorno Regional Assistance Programs

According to the responses, companies with facilities located in the Mezzogiorno region of southern Italy are eligible for certain goernment programs aimed at the economic development of this region. The programs alleged by the petitioner under this regional development plan are: (1) National corporate tax exemptions; (2) local corporate tax exemptions; (3) capital grants; (4) interest rate reductions; and (5) reductions in social payments. According to the responses, the first four programs were not used by the respondent companies during the review period. The last program, reductions in the social security payments, is described in section I.A. of this notice.

IV. Program Preliminarily Determined Not To Exist

We preliminarily determine that the following program does not exist.

Loans Under Law 908

Petitioner alleged that, under Italian Law 908, manufacturers, producers and exporters in Italy of certain granite products receive subsidized loans at below market rates and on preferential terms for certain industrial projects in northern and central Italy. According to the government and company responses, Law 908 does not exist.

V. Programs for Which Additional Information Is Needed

We preliminarily determine that we need additional information in order to determine whether the following programs confer subsidies on the manufacture, production or exportation of certain granite products from Italy.

A. Sabatini Law

Although this program was not alleged by the petitioner, the company responses indicate that several firms received assistance under the Sabatini Law during the review period. In our supplemental questionnaire, we requested information on the purpose and administration of the law.

According to the supplemental responses, the Sabatini Law was enacted to stimulate investments in machine tools and production machinery in order to modernize and revitalize Italian industry. Manufacturers of capital equipment may sell equipment in exhcnage for notes payable within five years. These five-year notes, in turn, can be discounted with medium-term Italian credit institutions at less than prevailing market rates. Since 1985, the Sabatini Law has been extended to capital equipment of foreign origin. In addition, the government response indicates that purchasers of equipment may receive discounts on interest rates that are charged on the notes payable to the manufacturer of the equipment.

The government's response raised several questions concerning the operation and administration of the Sabitini Law. Although the response indicates that purchasers of capital equipment may benefit from reduced interest rates on the notes payable, it does not describe to what degree these interest rates are reduced nor whether any other terms of purchase are affected.

Furthermore, although the government and company responses state that all companies, regardless of region or industry, are eligible to participate in this program, it is not clear whether benefits under the Sabatini Law have in fact been provided to more than a specific enterprise or industry or group of enterprises or industries. To determine whether benefits granted under the Sabatini Law are limited in any way, we are requesting the following information: (1) Further information on the process through which purchasers of capital equipment apply for and receive assistance under this law; (2) a translated copy of all provisions of the Sabatini Law; and (3) a complete list of the Italian industries which have received loans or assistance under this program.

B. Law 696/83

Although this program was not alleged by the petitioner, the company responses indicate that several firms received assistance under Law 696/83 during the review period. In our supplemental questionnaire, we requested information on the purpose and operation of this program.

According to the supplemental responses, Law 696/83 provides an incentive for Italian companies to invest in high technology equipment. All Italian companies with a net worth below a specified level that are engaged in mining or manufacturing are eligible under Law 696/83 to receive a refund of 25 percent of the purchase price for purchases of certain highly sophisticated electronic equipment. Orders for such equipment made before May 31, 1984, are eligible for the 25 percent refund.

The government's response does not identify specific classes of electronic equipment that are eligible for treatment under Law 696/83. Absent such information, we cannot determine whether eligibility criteria are drawn so narrowly as to preclude many industries from taking advantage of benefits offered under this program. Furthermore, although the government and company responses state that all small- and medium-sized companies operating in the mining and manufacturing sectors are eligible for benefits under Law 696/83, it is not clear whether these benefits have in fact been provided to more than a specific enterprise or industry or group of enterprises or industries.

To determine whether benefits granted under Law 696/83 are limited to a specific enterprise or industry, or group of enterprises or industries, we are requesting the following information: (1) A full explanation of all criteria that determine what types of equipment qualify under this program; (2) a translated copy of all provisions of Law 696/83; and (3) a complete list of industries which have received benefits under this program.

Verification

In accordance with section 776(a) of the Act, we will verify the information used in making our final determination.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC or our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 75 days after the Department makes its final determination.

Public Comment

In accordance with 19 CFR 355.35, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination on February 2, 1988, at 2:00 p.m. at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Assistant Secretary for Import Administration, Room B-099, at the above address within ten days of the publication of this notice in the **Federal Register**.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, ten copies of the business proprietary version and seven copies of the nonproprietary version of the pre-hearing briefs must be submitted to the Assistant Secretary by January 26, 1988. Oral presentations will be limited to issues raised in the briefs. In accordance with 19 CFR 355.33(d) and 355.34, written views will be considered if received not less than 30 days before the final determination is due or, if a hearing is held, within seven days after the hearing transcript is available.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

December 18, 1987.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[C-469-702]

Preliminary Affirmative Countervailing Duty Determination; Certain Granite Products From Spain

AGENCY: Import Administration, International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers or exporters in Spain of certain granite products as described in the "Scope of Investigation" section of this notice. The estimated net subsidy is 2.51 percent *ad valorem* for all manufacturers, producers or exporters in Spain of certain granite products, except Granitos Ibericos-Grayco, S.A. ("GIG"), and Santal, S.A. ("Santal"), whose estimated net subsidy rates are *de minimis* (less than 0.50 percent).

We have notified the U.S. International Trade Commission (ITC) of our determination. We are directing the U.S. Customs Service to suspend liquidation of all entries of certain granite products from Spain, with the exception of those certain granite products produced and exported by GIG and Santal, that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and to require a cash deposit or bond on entries of these products in the amount equal to the estimated net subsidy. Although entries produced and exported by GIG and Santal are not subject to the suspension of liquidation, these companies are not excluded from the preliminary determination.

If this investigation proceeds normally, we will make a final determination by March 3, 1988.

EFFECTIVE DATE: December 24, 1987.

FOR FURTHER INFORMATION CONTACT: Loc Nguyen or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-0167 or 377-2438.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based on our investigation, we preliminarily determine that there is reason to believe or suspect that benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers or exporters in Spain of certain granite products. For purposes of this investigation, the following programs are preliminarily found to confer subsidies:

- Short-term loans provided under the Privileged Circuit Export Credits Program
- Grants under the Large Area of Industrial Expansion of Galicia Program (LAIEG)
- Preferential access to official credit under LAIEG
- Certain grants provided by the Basque regional government

We preliminarily determine the estimated net subsidy to be 2.51 percent *ad valorem* for all manufacturers, producers or exporters in Spain of certain granite products, except GIG and Santal.

Case History

Since the last **Federal Register** publication pertaining to this investigation [the Notice of Initiation (52 FR 31652, August 21, 1987)], the following events have occurred. On August 27, 1987, we presented a

questionnaire to the government of Spain in Washington, DC, concerning petitioner's allegations. On October 14, 1987, we received responses from the government of Spain and the following companies: GIG, Artemarmol, S.A. ("Artemarmol"), Ingemar, S.A. ("Ingemar") and Ingemarga, S.A. ("Ingemarga"). These were the only companies the government of Spain identified as producing and exporting the subject merchandise to the United States. We received an additional response from the government on October 27, 1987. On November 6, we received a request for exclusion pursuant to 19 CFR 355.38 and a voluntary response from Modulgranito Iberico, S.A. ("MGI"). On November 18, we notified counsel for MGI that MGI's request for exclusion was not timely pursuant to 19 CFR 355.38 and that the company will, therefore, not be excluded from any countervailing duty order that the Department might issue in this investigation. We further informed counsel for MGI that the Department will not investigate the response submitted by MGI because this newly formed company did not begin exporting the subject merchandise to the United States until mid-1987, which is outside our review period of calendar year 1986. On December 4, 1987, we sent a letter to MGI's counsel to confirm the November 18 notification regarding MGI.

On November 13, 1987, we presented supplementary questionnaires to the government of Spain and the above-referenced companies. In addition, we also requested information from four other companies which we discovered were exporting the subject merchandise to the United States. These companies are Granitos Espanoles, S.A. ("GE"), Marmoles y Granitos de Espana, S.A. ("M&G"), Ramilo, S.A. ("Ramilo") and Santal. On November 25, we received a supplemental response from the Government of Spain. On November 27 and December 1, we received responses from Ramilo and Santal. On November 27, December 2, December 4, December 8, December 11, and December 16, 1987, we received supplemental responses from Artemarmol, GIG, Ingemar, Ingemarga and Ramilo.

Because we have not received responses from GE and M&G, we were unable to include them in the calculations for the preliminary determination. Therefore, for purposes of the preliminary determination, the country-wide rate will apply to these two companies as well. If we receive GE's and M&G's responses by the date of the preliminary determination, we will verify the responses and include them in the calculation of the final determination. If we do not receive their responses by this date, we may have to use best information available, in accordance with section 776(b) of the Act, to calculate a rate for these two companies in the final determination.

On September 23, 1987, the petitioner requested that the preliminary determination be postponed for 21 days. Pursuant to section 703(c)(1)(A) of the Act, we postponed the preliminary determination to no later than November 12, 1987. On November 4, 1987, the petitioner requested that we further postpone the preliminary determination by an additional 30 days. Accordingly, on November 6, 1987, we extended the date of the preliminary determination to December 18, 1987.

Scope of Investigation

The products covered by this investigation are certain granite products from Spain. Certain granite products are ⅜ inch (1 cm) to 2½ inches (6.34 cm) in thickness and include the following: rough sawed granite slabs; face-finished granite slabs; and finished dimensional granite including, but not limited to, building facing, flooring, wall and floor tiles, paving, and crypt fronts. Certain granite products do not include monumental stones, crushed granite, or curbing. Certain granite products are currently classified under *TSUSA* item number 513.74.00 and under #S item numbers 2516.12.00, 6802.23.00 and 6802.93.00.

Analysis of Programs

Throughout this notice, we refer to certain principles applied to the facts of the current investigation. These general principles are described in the "Subsidies Appendix" attached to the notice of *Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Countervailing Duty Order* (49 FR 18006, April 26, 1984).

Consistent with our practice in preliminary determinations, when a response to an allegation denies the existence of a program, receipt of benefits under a program, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses, however, are subject to verification. If the response cannot be supported at verification, and a program is otherwise countervailable, it will be considered a subsidy in the final determination.

In doing our subsidy rate computation, we first calculated an overall company-specific rate for each company. We found that, during the review period, two companies, GIG and Santal, had *de minimis* and zero rates, respectively. Therefore, they were not included in the calculation of the country-wide rate. We based our calculation of the country-wide rate on the countervailable benefits and sales of those respondents whose overall company-specific rates are above *de minimis*. Although GIG's and Santal's rates are *de minimis* during the review period, there are indications that these two companies might have received countervailable benefits after the review period but before the preliminary determination. Therefore, we will not exclude them from our preliminary determination. We will verify their responses and will consider whether these companies should be excluded from the final determination.

For purposes of this preliminary determination, the period for which we are measuring subsidization ("the review period") is calendar year 1986. This period coincides with the most recently completed fiscal year of the respondent companies.

Based upon our analysis of the petition and the responses to our questionnaires, we preliminarily determine the following:

I. Programs Preliminarily Determined to Confer Subsidies

We preliminarily determine that subsidies are being provided to manufacturers, producers or exporters in Spain of certain granite products under the following programs:

A. Short-Term Loans Under the Privileged Circuit Export Credits Program

Petitioner alleged that exporters of certain granite products from Spain are benefiting from a system of short-term preferential loans mandated by the government of Spain for exporters. Under this system of "privileged-circuit export credits," at least four types of loans are alleged to be avilable to exporters of certain granite products: (1) Working capital loans, (2) pre-financing of exports, (3) short-term export credits or post-financing of exports, and (4) commercial service loans.

In its response, the government of Spain stated that it required all Spanish commercial banks to maintain a specific percentage of their lendable funds (the "investment coefficient") in privileged-circuit accounts. These funds were made available to exporters at below-market interest rates through a variety of credit programs, including pre-financing and post-financing of exports and commercial service loans.

Under the terms of a Treasury Order, dated April 14, 1982, the working-capital loan program for exporters was gradually phased out and terminated on January 12, 1986. With respect to the other three types of export financing available under this program, Royal Decree 2254/85 of November 20, 1985, increased interest rates applicable to these loans and is gradually reducing the maximum amount to be financed. The maximum interest rate applicable to these loans is now the average rate paid on Spanish Treasury bills of one year or more in the semester preceding the loan, plus two percentage points. According to the government response, the maximum amount of allowable financing has gradually been decreased, starting on January 1, 1986, by 10 percent at the beginning of each semester until the program is totally eliminated in four-and-a-half years. The maximum amount of allowable financing for short-term export post/financing was reduced to 59 percent of the export value as of July 1, 1987, and to 55.8 percent of the export value for the pre-financng of exports as of the same date. Furthermore, the government of Spain stated that the "investment coefficient," which was the source of the funding for the privileged circuit loans to exporters, was discontinued as of February 28, 1987, by Royal Decree 321/1987 of February 27, 1987.

While there is no direct outlay of government funds, the benefits conferred on the companies are the result of government-mandated program to promote exports. According to the government and company responses, the producers and exporters of granite benefited from three of the four privileged circuit programs available to exporters: the working-capital loan program and the pre-financing and post-financing export programs.

1. *Working capital loans.* Under the privileged circuit programs, firms may obtain working capital loans for one year, although, from the company responses, it appears that the terms may be slightly longer than one year in duration. The amount of loans for which a firm is eligible is based on a specified percentage of its previous year's exports. According to the government response, these loans were no longer available as of January 1, 1986, pursuant to a Treasury Order of April 14,1982. GIG, Ingemar, and Ramilo reported that they had working capital loans outstanding during the review period.

As stated in section I.A. above, although no direct outlay of government funds is used to finance these loans, they are the result of a government-mandated program to promote exports. Because availability of this type of financing is contingent upon exports, we preliminarily determine that it is countervailable to the extent that it is offered at preferential rates.

To determine whether these loans are made at preferential rates, we compared the interest rates charged on working-capital loans with the appropriate benchmark. Because the terms of these loans were a year or longer, we determine that the most appropriate benchmark is the "one to three years" lending rate charged by Spanish private banks as published in the *Boletin Estadistico* of the *Banco de Espana*. This comparison shows that the interest rates on these export loans are below the benchmark. Accordingly, we preliminarily determine this program to be countervailable.

To calculate the benefit, we used our short-term loan methodology and compared the amount of interest actually paid during the review period to the amount the companies would have had to pay under the benchmark. In this case, the government of Spain's response does not indicate that working-capital export loans are tied to specific export transactions. Therefore, for the country-wide rate, we allocated Ingemar and Ramilo's 1986 benefits over the value of exports of those respondent companies whose overall estimated net subsidy rates are above *de minimis* (0.50 percent or above). The country-wide rate for this program is 0.20 percent *ad valorem*. The rate is 0.02 percent *ad valorem* for GIG and zero for Santal.

Although the government response states that the provision of these types of loans was terminated on January 1, 1986, our calculations do not reflect this change. The respondent companies report having working-capital export loans outstanding through 1987, loans which are financing current exports of the subject merchandise from Spain. We will carefuly examine changes in this program during verification.

2. *Pre-financing of exports.* Artemarmol, Ingemar and Ramilo reported that they received pre-financing export loans. According to the government of Spain, the maximum term of these loans is up to six months. Although no direct outlay of government funds is used to finance these loans, they, like the working-capital loans, are the result of a government-mandated program to promote exports. Because availability of this type of financing is contingent upon exports, we preliminarily determine that it is countervailable to the extent that it is offered at preferential rates.

To determine whether these loans were made at preferential rates, we compared the interest rates charged on export pre-financing loans to the appropriate benchmark, which we determine is the "three-month" lending rate charged by Spanish private banks as published in the *Boletin Estadistico* of the *Banco de Espana*. This comparison shows that the interest rates on these export loans are below the benchmark. Accordingly, we preliminarily determine this program to be countervailable.

To calculate the benefit arising from these loans, we used our short-term loan methodology and compared the amount of interest actually paid during the review period to the amount the companies would have had to pay under the benchmark. The government of Spain's response states that pre-financing loans are tired to specific export transactions. Artemarmol did tie each loan to a specific shipment. Ingemar and Ramilo did not. Therefore, as best information available in accordance with section 776(b) of the Act, we allocated the 1986 benefits for Artemarmol, Ingemar and Ramilo over the value of exports of the subject merchandise to the United States of all non-*de minimis* companies to calculate an estimated net subsidy of 1.82 percent *ad valorem*. The rate is zero for GIG and Santal.

Although the government response states that the current rates of interest charged under this program are higher than those charged during the review period and that the "investment coefficient" which was the source of funding for privileged circuit loans to exporters was discontinued as of February 28, 1987, our calculations do not reflect these changes because we do not have complete information concerning the current level of utilization of these loans. We will carefully examine the changes in this program during verification.

3. *Post-financing of exports.* Artemarmol reported that it received post-financing export loans with 120 day terms. Because availability of this type of financing is contingent upon exports, we preliminarily determine that it is countervailable to the extent that it is offered at preferential rates.

To determine whether these loans were made at preferential rates, we compared the interest rates charged on post-financing export loans during the review period to the appropriate benchmark, which we determine is the "three-month" lending rate charged by Spanish private banks as published in the *Boletin Estadistico* of the *Banco de*

Espana. This comparison shows that the interest rates on these export loans are below the benchmark. Accordingly, we preliminarily determine this program to be countervailable.

To calculate the benefit arising from these loans, we used our short-term loan methodology and compared the amount of interest actually paid during the review period to the amount the companies would have had to pay under the benchmark. The loans reported by Artemarmol are tied to specific shipments of the subject merchandise to the United States. For the country-wide rate, we therefore allocated the company's 1986 benefit over the value of exports of the subject merchandise to the United States of all non-*de minimis* companies. The estimated net subsidy is 0.02 percent *ad valorem*. The rate is zero for GIG and Santal.

B. *Regional Investment Incentives*

Petitioner alleged that the granite industry in Spain may have benefited from certain regional investment programs.

1. *Grants under the Large Area of Industrial Expansion of Galicia Program (LAIEG)—Royal Decree 1409/1981.* The government of Spain stated that, through Royal Decree 1409/1981 of June 19, 1981, a program entitled "Large Area of Industrial Expansion of Galicia" was established to award grants or loans for investment in new capital goods and/or for generation of employment to companies in the region of Galicia and in other parts of Spain that plan to invest in Galicia. The government of Spain stated that similar programs are available for other less develop regions in Spain such as Andalusia, Castille-La Mancha, Old Castille and Leon, and Extramadura. There is no indication, however, the these grant programs are available to to all regions of Spain. Nor is these any indication that the programs are the same for all regions in which these programs are available.

Because this program is limited by the central Government of Spain to companies in a specific region (Galicia), we preliminarily determine that this program confers a subsidy. GIG and Ingemarga reported that they received grants under this program.

To calculate the value of the subsidy, we used the grant methodology outlined in the Subsidies Appendix. For grant calculations, we prefer to use as the discount rate a company-specific weighted cost of capital; however, in this case, the government of Spain was unable to give us the national average rate of return on equity. Therefore, we were unable to calculate a company-specific rate. Instead, we are using as the discount rate the national average commercial interest rate for loans of over three years for the year in which the grant was authorized. This rate is published by the *Banco de Espana* in its *Boletin Estodistico*. To calculate the country-wide rate, we allocated Ingemarga's 1986 benefit over total sales of all non-*de minimis* companies to calculate an estimated net subsidy of 0.39 percent *ad valorem*. The rate is 0.43 percent *ad valorem* for GIG and zero for Santal.

2. *Preferential access to official credit under LAIEG—Royal Decree 1409/1981.* Ingemarga reported that it received long-term financing from official lines of credit through the LAIEG program.

Because this program is provided by the central government of Spain to a specific region of Spain (Galicia), we preliminarily determine that this program is limited to a specific enterprise or industry or group of enterprises or industries. To determine whether these loans are given at rates that are inconsistent with commercial considerations, we compared the interest rates to the appropriate benchmark.

For fixed rate long-term loans to creditworthy companies, we prefer to use a company-specific commercial loan rate whenever possible. However, in this case, Ingemarga did not receive comparable commercial long-term credit in the year in which it received the LAIEG loan. Therefore, we used as our benchmark the national average commercial interest rate for loans of "over three years" applying to the year in which the terms of the loan were agreed upon. This rate is published by the *Banco de Espana* in its *Boletin Estadistico*. Because we were unable to obtain the national average rate of return on equity, we used the benchmark interest rate as the discount rate as well.

For the country-wide rate, we allocated Ingemarga's 1986 benefit over total sales of all non-*de minimis* companies to calculate an estimated net subsidy of 0.05 percent *ad valorem*. The rate is zero for GIG and Santal.

3. *Grants provided by the Basque Regional Government—Decree 153/1985.* According to the response of Ingemar, the only company under investigation located in the Basque region, the Basque regional government issued Decree 153 in 1985, which established grants for commercial promotion activities, such as market studies, market survey studies, and establishment or expansion of commercial entities or divisions specializing in promotional activities The amount of the grant can be up to 20 percent of investment costs in capital goods with a cap of 5,000,000 pesetas and up to 25 percent of operating costs during the initial period, with a cap of two years and 4,000,000 pesatas. The funding for the program is provided by the Basque regional government from its general revenue.

Ingemar stated that all companies located in the Basque region are eligible for benefits under this decree. The decree, however, states that grants are to be used for commercial promotion activities that will contribute to "the exportation of the productive sectors of the Basque country." Since no other purpose except "exportation" is specified in the decree, we preliminarily determine that these grants are provided solely to promote exports and, as such, constitute export subsidies. Ingemar reported that it received a grant under this program to commence commercial activities in the United States and to establish a company in the United States.

To calculate the benefit from this grant, we used the grant methodology detailed in the Subsidies Appendix. Since Ingemar received a grant under this program during the review period, and the amount received was less than 0.50 percent of the value of its exports to the United States for that year, we allocated the entire amount of this grant to the review period.

For the country-wide rate, we allocated the amount of the grant over the value of exports to the United States of all non-*de minimis* companies to calculate an estimated net subsidy for of 0.03 percent *ad valorem*. We allocated the benefit over exports to the United States because the grant was given specifically to establish commercial activities in the United States. The rate is zero for GIG and Santal.

II. Programs Preliminarily Determined Not to Confer a Subsidy

We preliminarily determine that subsidies are not being provided to manufacturers, producers or exporters in Spain of certain granite products under the following programs:

A. *Reduction in Import Duties on Imported Tools and Equipment*

In our initiation, we stated that we would investigate whether the producers and exporters of granite receive countervailable benefits from reduction in import duties. According to the response, as part of Spain's entry into the European Economic Community (EEC), any Spanish manufacturer importing machinery for new investment from an EEC country is entitled to an exemption of import duties if such machinery is not produced in Spain. These exemptions were authorized by Royal Decree 2386/1985 and are administered by the General Directorate of Customs and the Ministry of Economy and Finance. The decree authorizes tariff suspensions and reductions on investment goods imported from the EEC which are not manufactured in Spain, and which are intended for the modernization or conversion of, among others, the textile, chemical, pharmaceutical, automotive, capital goods, household appliances, foodstuffs, computer technology, electronics, shipbuilding, steel, mining and energy industries. Because this program is not limited to a specific enterprise or industry or group of enterprises or industries, we preliminarily determine that it is not countervailable.

B. *Provincial Grants Provided by the Basque Regional Government*

In our initiation, we stated that we would investigate whether the producers and exporters of granite receive countervailable benefits from cash grants given either by the central government of Spain or by the regional governments. According to Ingemar's response, the Basque regional government and the governments of each of the three Basque provinces administer assistance programs for all companies in the Basque region that make investments in capital goods. Under decree 149/85 the Basque regional government administers grants to "large" companies (more than 750,000,000 pesetas total capital and more than 400 employees) throughout the Basque region. The three provincial governments within the Basque region administer these grants to "small- and medium-size" companies (less than 750,000,000 pesetas total capital and less than 400 employees) within their provinces.

Decree 41/85 of the provincial government of Guipuzcoa applies to the small companies within the province of Guipuzcoa. The decree specifically lists a wide range of sectors and industries that are eligible to receive assistance under this program including chemicals, aviculture, hotels, land transportation, technical investigations, services rendered to companies, recovery of products and other manufacturing industries. Ingemar submitted a chart showing that 329 applicants in 23 sectors and industries including fishing, smelting and iron works, mon-metal minerals, metallurgy, mechanical shops, electronics, machinery, food, textiles, paper, rubber and plastics, construction, repairs, transport, and services were approved for grants in 1985, the year the program went into effect.

Because this program is not limited to a specific enterprise or industry or group of enterprises or industries, we preliminarily determine that it is not countervailable.

C. Interest Rebates on Long-term Loans under Basque Regional Government Programs

Petitioner alleged that producers of the subject merchandise benefit from subsidies in the form of preferential loans, loan terms and loan guarantees. We requested information from each company under investigation on all long-term loans outstanding during the review period. Ingemar and Ingemarga reported long-term loans outstanding during the review period.

According to the responses, none of the companies involved in this investigation received medium or long-term loans on terms inconsistent with commercial considerations. However, Ingemar reported that it did receive reimbursement of a part of the interest it paid on long-term loans under an agreement made between the Basque regional government and the banks in the Basque region. The agreement stated that the program is available to all industries in those regions. The Basque government also provided us with information indicating that over 2,000 companies in a number of industries, including food, chemicals, textiles, paper, electronics and transportation, have received interest rebates under this program. Because these rebates are funded by the Basque regional government and have been provided to a wide range of industries within the Basque region, we preliminarily determine that this program is not limited to a specific enterprise or industry or group of enterprises or industries and, therefore, is not countervailable.

III. Programs Preliminarily Determined Not To Be Used

We preliminarily determine that the following programs were not used by manufacturers, producers or exporters in Spain of certain granite products during the review period:

A. Commercial Service Export Loans under the Privileged Circuit Export Credits Program

Petitioner alleged that exporters of certain granite products from Spain are benefiting from commercial service export loans under the Privileged Circuit Export program which provide for financing for market activities abroad. According to the responses, none of the companies had any such loans outstanding during the review period.

B. Warehouse Construction Loans

Petitioner alleged that the granite industry in Spain receives loans on terms inconsistent with commercial considerations to construct warehouse facilities adjacent to export loading zones. According to the responses, none of the companies have received any such loans.

C. Loans and Loan Guarantees from the Instituto Nacional de Industria (INI)

In our notice of initiation, we stated that we would investigate whether the producers and exporters of granite receive countervailable benefits under the loan and loan guarantee programs administered by the INI. According to the responses, none of the companies have received any such loans or loan guarantees.

D. Other Regional Investment Incentives

In our notice of initiation, we stated that we would investigate whether the producers and exporters of granite receive countervailable benefits under other regional investment incentives such as:

1. Reduction in import duties on imported tools and equipment. According to the responses, the only reduction and/or exemption in import duties which the companies received was that provided for in the program dealing with imports coming in from the EEC (see section II.A. above).

2. Reduction in taxes. According to the responses, none of the respondents receive any regional reduction in taxes.

3. Free or inexpensive land. According to the responses, none of the respondents have acquired free or inexpensive land as a result of any government-mandated program.

E. Grants from the Regional Board of the Province of Alava

According to the responses, none of the respondents are located in the Province of Alava; therefore, they are not eligible for benefits provided under this program.

IV. Programs for Which Additional Information is Needed

We preliminarily determine that we need additional information in order to determine whether the following programs confer subsidies on the manufacture, production or exportation of certain granite products from Spain.

VOL 52 ISS 247 DEC 24 1987 UMI

A. Grants Provided by the Galician Ministry of Industry, Energy and Commerce—Decree 107/1984

According to the responses, GIG, Ingemar and Ingemarga received grants under Decree 107/1984 of the regional government of Galicia, which established financial support measures for companies that research in or exploit mineral resources throughout Galicia. The funding for this program is from the general budget of Galicia and not from the central government of Spain. We have not been provided with any information as to the extent of Galicia's mining sector, nor do we have any information to indicate whether this program covers Galicia's mining sector as a whole or whether it is limited to specific industries within the mining sector. Therefore, we will seek further information on this program prior to and at verification in order to make a decision on whether this program is countervailable in our final determination.

B. Grants Provided by the Basque Regional Government—Decree 146/1985

Ingemar responded that it received a grant from the Basque regional government under Decree 146/1985 for the generation of employment. The goal of this program is to facilitate the generation of employment in the Basque country in order to resolve social needs, provide access to the job market, provide job training, create jobs and reduce unemployment. Funding for this program comes from the Basque regional government's general budget. According to the decree, any company within the Basque region is eligible to receive grants under this program as long as it has a net increase in the number of its staff. However, we have not received any information on the types of industries within the Basque region which have actually received benefits under this program nor on the extent to which the government may exercise discretion in selecting such industries. Therefore, we will seek further information prior to and at verification in order to make a decision on whether this program is limited to a specific enterprise or industry or group of enterprises or industries in the final determination.

C. Interest Rebates on Long-Term Loans Provided by the Regional Government of Galicia

In its response, GIG reported that it received interest rebates on long-term loans under an agreement made between the Galician regional government and the banks in Galicia. The agreement stated that all small and medium-sized companies in Galicia are eligible to receive rebates under these agreements; however, we have not received any information on the types of industries which actually have received these rebates nor on the extent to which the government may exercise discretion in selecting such industries. Therefore, we will seek further information on this program prior to and at verification in order to make a decision on whether this program is countervailable in the final determination.

Verification

In accordance with section 776(a) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 703(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all entries of certain granite products from Spain, with the exception of those certain granite products produced and exported by GIG and Santal, which are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register** and to require a cash deposit or bond for each such entry of this merchandise equal to 2.51 percent *ad valorem*. Although entries produced and exported by GIG and Santal are not subject to the suspension of liquidation, these companies are not excluded from the preliminary determination. This suspension will remain in effect until further notice.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 120 days after the Department makes its preliminary affirmative determination, or 45 days after the Department makes its final determination, whichever is later.

Public Comment

In accordance with 19 CFR 355.35, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination on February 2, 1988, at 10:00 a.m. at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Assistant Secretary for Import Administration, Room B–099, at the above address within ten days of the publication of this notice in the **Federal Register**.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, ten copies of the business proprietary version and seven copies of the nonproprietary version of the pre-hearing briefs must be submitted to the Assistant Secretary by January 26, 1987. Oral presentations will be limited to issues raised in the briefs. In accordance with 19 CFR 355.33(d) and 355.34, written views will be considered if received not less than 30 days before the final determination is due or, if a hearing is held, within seven days after the hearing transcript is available.

This determination is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

December 18, 1987.

Gilbert B. Kaplan,

Acting Assistant Secretary for Import Administration.

[FR Doc. 87–29535 Filed 12–23–87; 8:45 am]
BILLING CODE 3510–DS–M

[Docket Nos. 7111–01 and 7111–02]

Actions Affecting Export Privileges; Dieter Enderlein et al.

Summary

Pursuant to § 388.8 of the Export Administration Regulations, 15 CFR Parts 368 through 399 (1987), Dieter Enderlein, individually and doing business as Elmont International, also known as Elmont AG, both with an address at Hauptstrasse 23, CH–8280 Kreuzlingen, Switzerland, is hereby denied all export privileges for an indefinite period from the date of this Order.

Order

On November 17, 1987, the Administrative Law Judge (ALJ) issued his Recommended Decision and Order in the above referenced matter. The Recommended Decision and Order was referred to me pursuant to the Export Administration Act of 1985, 50 U.S.C. App. 2412, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985) and 15 CFR 388.17(a), for final action.

Having examined the record and based on the facts adduced in this case, I affirm the Recommended Decision and Order of the ALJ.

Date: December 17, 1987.

Paul Freedenberg,

Acting Under Secretary for Export Administration.

In the matter of Dieter Enderlein, individually and doing business as Elmont International, a/k/a Elmont AG, Respondent, Docket Numbers 7111–01 and 7111–02.

Appearance for Respondents: Dr. Jost Gross, RA, Gross, Linder und Frischknecht, Poststrasse 18, CH–9000 St. Gallen, Switzerland.

Appearance for Agency: Thomas C. Barbour, Esq., Attorney-Advisor, Office of the Deputy Chief Counsel for Export Administration, U.S. Department of Commerce, Room H–3329, Washington, DC 20230.

Default Decision and Order

An administrative proceeding was initiated against Dieter Enderlein, individually and doing business as Elmont International, also known as Elmont AG (hereinafter "Respondents"), pursuant to section 13(c) of the Export Administration Act of 1979 (50 U.S.C.A. app. 2401–2420), as amended by the Export Administration Amendments Act of 1985, Pub.L. 99–64, 99 Stat. 120 (July 12, 1985)) (the Act), and the Export Administration Regulations (currently codified at 15 CFR Parts 368–399 (1987)), (the Regulations). The Office of Export Administration issued a charging letter on June 30, 1987, alleging that Respondents violated §§ 387.4, 387.5, and 387.6 of the Regulations.

The Respondents submitted a letter, dated August 27, 1987, written in German, to the Department, which was received by the Office of Export Enforcement on September 10, 1987.[1] On September 11, 1987 Agency counsel transmitted a copy to this Tribunal and requested that the Administrative Law Judge order the Respondents to file an answer in compliance with the Regulations, particularly § 388.7(d), which calls for the answer and all other documentary evidence to be submitted in English or have translations into English filed simultaneously. On September 18, 1987 an Order was issued by the undersigned granting the Agency's motion and extending the period of time for the Respondents' answer to October 8, 1987. On October 14, 1987, another filing was received from the Respondents' counsel in Germany. It was written in German and was not accompanied by a translation. On October 15, 1987, the undersigned issued an Order finding that this letter did not constitute an answer or a timely filing pursuant to the Regulations, and finding the Respondents in default.

Section 388.8 of the Regulations provides:

DEFAULT

(a) General

If a timely answer is not filed, the Department shall file with the administrative law judge a proposed order together with supporting evidence for the allegations in the charging letter. The administrative law judge may require further submissions and shall issue any order he deems justified by the evidence of record. Any order so issued shall have the same force and effect as an order issued following the disposition of contested charges.

In accordance with this section, and as directed by the October 15, 1987 Order of the Administrative Law Judge, Agency counsel filed such a motion for a default order on November 5, 1987. The Agency also submitted documentary evidence to support the allegations made in the charging letter. Based on the record before me I make the following findings of fact:

On four separate occasions, December 27, 1981, April 30, 1982, May 26, 1982, and October 7, 1983, Respondents reexported or caused to be reexported, from Switzerland to the Union of Soviet Socialist Republics (U.S.S.R.), U.S.-origin computers and computer parts without the report authorization from the Department which Respondents knew or had reason to know was required by § 374.1 of the Regulations, in violation of §§ 387.4 and 387.6 of the Regulations.

On or about February 22, 1982 and March 16, 1982, Respondents ordered U.S.-origin computers and computer parts from MLPI Business Systems, Inc. (MLPI-Canada) of Quebec, Canada, allegedly for an end-user in the Federal Republic of Germany. When Respondents ordered those goods they knew that the goods were intended to be reexported from the Federal Republic of Germany through Switzerland to the U.S.S.R. without the reexport authorization from the Department required by § 374.1 of the Regulations. In doing do, Respondents violated § 387.4 of the Regulations.

On or about June 30, 1982, the U.S.-origin computers and computer parts which Respondents ordered from MLPI-Canada were exported from the United States through Canada to the Federal Republic of Germany. In connection with that Export, Respondents made a false and misleading statement of material fact on the Shipper's export Declaration (SED) submitted on behalf of the exporter to the U.S. Customs Service (Customs). Based on information provided by Respondents to MLPI-Canada, the SED for that shipment stated that the end-user for the equipment was in the Federal Republic of Germany. In fact, as Respondents well knew, the intended end-user for that equipment was located in the U.S.S.R. By making a false and misleading statement of material fact to Customs in order to effect an export from the United States, Respondents violated § 387.5 of the Regulations.

Based on the foregoing, I find that the Respondents committed six violations of § 387.4 of the regulations, one violation of § 387.5 of the Regulations, and four violations of § 387.6 of the Regulations, for a total of eleven violations as alleged in the charging letter of June , 1987. Each of these violations involves U.S.-origin goods controlled under section 5 of the Act for national security reasons.

I find that an Order denying export privileges to the Respondents for an indefinite period from the date of the final order entered in this proceeding is reasonably necessary to protect the public interest and to achieve effective enforcement of the Export Administration Act, and the Regulations.

Accordingly, pursuant to the authority delegated to me by Part 388 of the Regulations, it is therefore:

Ordered

I. For an indefinite period of time,

Respondents:
Dieter Enderlien,
individually and doing business as
Elmont International,
a/k/a Elmont AG,
Hauptstrasse 23,
CH–8280 Kreuzlingen,
Switzerland

and all successors, or assignees, officers, partners, representatives, agents, and employees hereby are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported from the United States in whole or in part, or to be exported, or that are otherwise subject to the Regulations.

II. Participation prohibited in any transaction, either in the United States or abroad, shall include, but not be limited to, participation:

[1] While the nature of the document is not determined, based on an informal interpretation by the Agency, it appears to relate to the Charging Letter of June 30, 1987.

(i) As a party or as a representative of a party to a validated export license application;

(ii) In preparing or filing any export license application or reexport authorization, or any document to be submitted therewith;

(iii) In obtaining or using any validated or general export license or other export control document;

(iv) In carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of, in whole or in part, any commodities or technical data exported from the United States, or to be exported; and

(v) In the financing, forwarding, transporting, or other servicing of such commodities or technical data.

Such denial of export privileges shall extend to matters which are subject to the Act and the Regulations.

III. After notice and opportunity for comment, such denial of export privileges may be made applicable to any person, firm, corporation, or business organization with which the Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of export trade or related services.

IV. All outstanding individual validated export licenses in which the Respondents appear or participates, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Licensing for cancellation. Further, all of Respondents' privileges of participating, in any manner or capacity, in any special licensing procedure, including, but not limited to, distribution licenses, are hereby revoked.

V. No person, firm, corporation, partnership, or other business organization, whether in the United States or elsewhere, without prior disclosure and specific authorization from the Office of Export Licensing, shall, with respect to U.S.-origin commodities and technical data, do any of the following act, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related person, or whereby any Respondent or related person may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly:

(i) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported in whole or in part, or to be exported by, to, or for any Respondent or related party denied export privileges, or

(ii) Order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance or otherwise service or participate in any export, reexport, transshipment or diversion of any commodity or technical data exported or to be exported from the United States.

VI. This Order, as affirmed or modified, shall become effective upon entry of the Secretary's final action in this proceeding pursuant to the Act (50 U.S.C.A. app. 2412(c)(1)).

Date: November 17, 1987.

Hugh J. Dolan,

Administrative Law Judge.

[FR Doc. 87-29477 Filed 12-23-87; 8:45 am]

BILLING CODE 3510-DT-M

National Bureau of Standards

National Voluntary Laboratory Accreditation Program

AGENCY: National Bureau of Standards, Commerce.

ACTION: Notice of public workshop.

SUMMARY: The National Bureau of Standards will host a public workshop on March 22, 1988 to provide interested parties an opportunity to participate in the development of the scope of accreditation for laboratories that perform plumbing fixtures equipment testing.

DATES: The worksh ip will be held on March 22, 1988 from 9:00 a.m. to 4:00 p.m. In order to receive draft material prior to the meeting and to indicate plans to attend the meeting call no later than March 4, 1988.

PLACE: The workshop will be held at the National Bureau of Standards, Lecture Room A340 Metrology Building No. 220, Gaithersburg, Maryland.

FOR FURTHER INFORMATION CONTACT: Lawrence Galowin, Senior Project Leader, Laboratory Accreditation, National Bureau of Standards, Room A527 Administration, Gaithersburg, MD 20899; (301) 975-4022.

SUPPLEMENTARY INFORMATION: On March 13, 1987 the National Bureau of Standards (NBS) received a request from the California Energy Commission to establish a laboratory accreditation program under the Procedures of the National Voluntary Laboratory Accreditation Program (NVLAP), for laboratories that test flow rates of plumbing fixtures and/or fittings based on American National Standards Institute (ANSI) A112.18.1. On May 18, 1987 NBS published a Federal Register notice (52 FR 18592) requesting comments from interested parties on the proposed accreditation program. Based on submitted comments, the NBS Director, on September 22, 1987, determined that there is a need to establish the accreditation program and approved its development.

Responses from the New York State Department of Environmental Conservation and the State of Florida Department of Community Affairs proposed broadening the scope of the program to include test methods pertaining to water conservation, in addition to the energy conservation test method in the original request. ANSI Standard A112.19.2M-1983 testing procedures for water closet and urinal wate consumption will be included in the expanded scope to fulfill requirements for water conservation. (It is anticipated that the hydraulic test methods in the nearly completed draft ANSI A112.19.6 standard, which replaces those items in the 19.2 standard, will be approved in time for application to the program.)

The following plans for the workshop have been established:

1. *Purpose:* The workshop will provide all interested persons with an opportunity to (1) discuss the applicability of specific test procedures from ANSI A112.18.1 and 19.2 or 19.6 to the program, (2) participate in the development of the scope of the accreditation to be offered to laboratories that perform plumbing fixture fittings testing, and (3) review and participate in establishing technical criteria, requirements and procedures for evaluation and accreditation of laboratories found competent to perform the test methods.

2. *Procedure:* The workshop will be an informal nonadversarial meeting. The presiding NBS chairperson will allocate the time available for discussion of each issue to be addressed, and exercise such authority as may be necessary to insure the equitable and efficient conduct of the workshop and to proceed in an orderly manner.

3. *Provisions:* This workshop will be open to the public.

Documents in Public Record: Summary minutes of the meeting will be prepared and made available for inspection and copying in the NVLAP program office, Room A527

Administration Building, Gaithersburg, Maryland.

Ernest Ambler,

Director.

Date: December 17, 1987.

[FR Doc. 87-29514 Filed 12-23-87; 8:45 am]

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

Mid-Atlantic Fishery Management Council; Public Hearings

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of public hearings and request for comments.

SUMMARY: The Mid-Atlantic Fishery Management Council (Council) will hold public hearings to allow for input to the Fishery Management Plan for the Summer Flounder Fishery (FMP).

DATES: See **"SUPPLEMENTARY INFORMATION"** for dates and locations of the hearings. All hearings will begin at 7:00 p.m. and will be tape recorded with the tapes filed as the official transcript of the hearing. Written comments will be accepted until February 19, 1988.

ADDRESS: Send comments to John C. Bryson, Executive Director, Mid-Atlantic Fishery Management Council, Room 2115, Federal Building, 300 South New Street, Dover, DE 19901.

FOR FURTHER INFORMATION CONTACT: John C. Bryson, 302-674-2331.

SUPPLEMENTARY INFORMATION: This FMP will provide management for the summer flounder (*Paralichthys dentatus*) fishery. The management unit is summer flounder in U.S. waters in the western Atlantic Ocean from North Carolina northward. The objectives of the FMP are to (1) reduce fishing morality on immature summer flounder; (2) increase the yield from the fishery; (3) promote compatible State and Federal management regulations between the Territorial Sea and the EEZ; and (4) minimize regulations for achieving the management objectives recognized above.

The FMP is being developed jointly by the Atlantic States Marine Fisheries Commission, the States, and the Council. Some measures in this FMP, such as the mesh size and minimum fish size, support current State regulations. Mesh size is scheduled to increase in two years to a larger 5" minimum mesh size, and to a 14" minimum fish size and a 5.5" minimum mesh size if the biological/fishery indicators continue to show stock declines. The FMP also provides that a vessel holding a Federal permit will fish under the more stringent of Federal or State rules. It is critical to the success of the FMP that the States be given time to allow them to adjust their regulations to those of the FMP.

The Council requests public comments on the following management measures:

1. It would be illegal to possess summer flounder or parts thereof less than 13" total length.

2. It would be illegal to land summer flounder less than 14" total length north of the line connecting the points 40 degrees 31'N. latitude, 73 degrees 58.5'W. longitude and 40 degrees 23'N. latitude, 73 degrees 43'W. longitude and extending seaward to the boundary of the EEZ. There would be no minimum mesh size north of the line.

3. Vessels south of the line specified above would be required to use a 4.5" minimum net mesh size for trips possessing 500 pounds or more of summer flounder.

4. The 4.5" minimum mesh size south of the line specified above would increase to 5" two years after implementation of the FMP.

5. In all cases, the minimum net mesh size would apply to finfish otter trawl vessels with trips landing 500 pounds or more of summer flounder. After 500 pounds of summer flounder have been retained, only nets of the legal size would be allowed on deck and in use. In no case does the minimum mesh provision apply to nets with a mesh equal to or greater than 16" in the body and/or wings of the net.

6. Vessels with permits issued under this FMP would be required to fish and land under the provisions of this FMP unless the vessels land in States with larger minimum fish sizes or larger minimum net mesh sizes than those provided in the FMP. Under these circumstances, the vessel would be required to meet the State limits for the minimum fish sizes or minimum net mesh sizes.

7. Foreign fishermen would not be permitted to retain summer flounder, since U.S. fishermen, by definition, would be harvesting the optimum yield.

8. Vessels fishing commercially for summer flounder, either directly or as a bycatch in other fisheries, and vessels for hire in the recreational fishery (party and charter boats) would be required to obtain annually renewable permits.

9. State with minimum sizes and minimum mesh regulations larger than those in the FMP are encouraged to maintain them.

10. After years of FMP implementation, the Council would examine certain criteria to measure the effectiveness of the size and mesh limits relative to the FMP's objectives. If (1) the summer flounder stock continues to decline, (2) the Council finds that the adjustment criteria have been met, and (3) the Director, Northeast Region concurs with the Council, then the minimum fish length would be increased to 14" total length; and the minimum net mesh size would be increased to 5.5"; eliminating the line specified above from the management regime.

The size increases would be imposed if both the primary and a secondary indicator demonstrate continued stock decreases.

Other Public Hearing Issues

The Council Seeks comments on three other issues related to these management measures.

1. *Penalities or Penalty schedule.* The provision that allows multiple nets on board a vessel and in use until the 500 pounds of summer flounder criterion is met creates a need for a at-sea enforcement. It is necessary to establish a rigorous penalty shedule, in that if there is a relatively low probability of detection of an offense, then the known penalty for those detected must provide an adequate deterrent.

2. *Discard mortality.* Management alternatives assume that all fish discarded in the trawl fishery die. However, the Council has received comments that discard mortality may be less than 100 percent.

3. *Amount of unregulated catch.* The preferred alternative specifies 500 pounds of summer flounder as the minimum for a trip for which the minimum net mesh size applies.

The dates and locations of the public hearings are as follows:

January 11, 1988—Skipper Motor Inn, Route 6, Fairhaven, Ma

January 11, 1988—Carteret Community College, Joselyn Auditorium, 3505 Arendell Street, Morehead City, NC.

January 12, 1988—Dutch Inn, Great Island Road, Galilee, RI

January 12, 1988—NC Aquarium, Airport Road, Roanoke Island Manteo, NC

January 13, 1988—Holiday Inn Riverhead, Exit 72, LI Expressway & Rt. 25, Riverhead, LI, NY

January 13, 1988—Quality Inn Lake Wright, Virginia Rm., 6280 Northampton Blvd., Norfolk, VA

January 14, 1988—Holiday Inn of Rockville Center, 173 Sunrise Highway, Rockville Center, LI, NY

January 14, 1988—Dept. of Legislative Reference Bldge., 90 State Circle (Joint Hearing Room, Mail Entr.), Annapolis, MD

January 15, 1988—Cannon Bldg., Room 104, College of Marine Studies, University of Deleware, Lewes, DE

January 27, 1988—Cape May Extension Office, Dennisville Road, Cape May Court House, NJ

January 28, 1988—Wall Township Fire Hall, West Atlantic Avenue at Rt. 34, Wall, NJ

(16 U.S.C. 1801 et seq.)

BILLING CODE 3510-22-M

National Oceanic and Atmospheric Administration

Marine Mammals; Issuance of Permit: Dolfinarium Brugge (P390)

On July 28, 1987, notice was published in the **Federal Register** (52 FR 28782) that an application had been filed by Dolfinarium Brugge, A. De Baechestraat 12, B-8200 Brugge, St. Michiels, Belguim to export Atlantic bottlenose dolphins (*Tursiops truncatus*) from Florida for public display.

Notice is hereby given that on December 18, 1987, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), the National Marine Fisheries Service issued a Permit for the above taking subject to certain conditions set forth therein.

The Permit is available for review by interested persons in the following offices:

Office of Protected Species and Habitat Conservation, National Marine Fisheries Service, 1825 Connecticut Avenue NW., Room 805, Washington, DC, and

Director, Southeast Region, National Marine Fisheries Service, 9450 Koger Boulevard, St. Petersburg, FL 33702.

Date: December 10, 1987.

Nancy Foster,

Director, Office of Protected Resources and Habitat Programs.

BILLING CODE 3510-04-M

COMMISSION ON EDUCATION OF THE DEAF

Educational Programs for the Deaf; Meetings

AGENCY: Commission on Education of the Deaf.

ACTION: Notice of meetings.

SUMMARY: Pursuant to Pub. L. 92-463, notice is hereby given of forthcoming meetings of the Commission on Education of the Deaf and its Committees. The purposes of the Commission and Committee meetings are to review the rough draft of the Commission's final Report, to approve it for publication, and to develop final recommendations on LRE, FAPE, and other topics. These meetings will be open to the public.

DATES: January 4, 8:30 a.m. to 5:00 p.m.; January 5, 8:30 a.m. to 5:00 p.m.; and January 6, 8:30 a.m. to 3:00 p.m.

ADDRESS: All meetings will be held in the Holiday Inn-Capitol, 550 C Street SW., Washington, DC. On Monday morning, the Executive Committee will meet in the Columbia A Room. From 10:00 a.m. to 5:00 p.m. Monday, the Precollege and Postsecondary Committees will meet in the Gemini and Columbia A Rooms, respectively. On Tuesday, the joint Committee will meet from 8:30 a.m. to 12:00 noon in the Columbia A Room. That afternoon, the Precollege and Postsecondary Committees will hold working sessions in the Gemini and Columbia A Rooms, respectively. Wednesday, the Joint Committee will meet from 8:30 a.m. to 12:00 noon in the Columbia A Room. That afternoon, the full Commission will meet from 1:00 to 3:00 in the Columbia A Room.

FOR FURTHER INFORMATION CONTACT: Monica Hawkins, Commission on Education of the Deaf, GSA Regional Office Building, Room 6646, 7th and D Streets SW., Washington, DC 20407. [202] 453-4353 (TDD) or [202] 453-4684 (Voice). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The Executive Committee will meet Monday, January 4, from 8:30 a.m. to 10:00 a.m. to receive reports, and to discuss activities of the Commission between February 4th and May 4th, and the date of official presentation of the Report. The remainder of the Committee meetings are working sessions at which the draft of the Final Report will be reviewed. The full Commission will meet January 6 from 1:00 p.m. to 3:00 p.m. to receive reports and to approve the final recommendations and final Report.

The proposed agenda for the Commission meeting on January 6 includes the following:

I. Approval of minutes.
II. Reports
  Chairperson's Report
  Vice Chairperson's Report
  Executive Committee Chairperson's Report
  Precollege Committee Chairperson's Report
  Postsecondary Committee Chairperson's Report
  Staff Director's Report
III. New Business
IV. Adjournment

These meetings will be open to the public. Interpreters and captioning will be provided. If you need audio-loop systems or other special accommodations, please contact Monica Hawkins at [202] 453-4353 (TDD) or [202] 453-4684 (Voice) no later than December 28th, 1987, 5:00 p.m. E.S.T. These are not toll-free numbers.

Records will be kept of the proceedings and will be available for public inspection at the office of the Commission on Education of the Deaf, GSA Regional Office Building, Room 6646, 7th and D Streets SW., Washington DC.

Pat Johanson,

Staff Director.

[FR Doc. 87-22501 Filed 12-23-87; 8:45 am]

BILLING CODE 6820-SC-M

DEPARTMENT OF DEFENSE

Department of the Navy

Intent To Prepare a Draft Environmental Impact Statement for Electronic Installations on Tinian, Commonwealth of the Northern Mariana Islands and on Guam, Mariana Islands

Pursuant to regulations implementing the procedural provisions of the National Environmental Policy Act and the requirements of Executive Order 12372, Intergovernmental Review of Federal Programs, the Navy announces its intention to prepare a Draft Environmental Impact Statement (DEIS) for the construction of Electronic Installations on Tinian, Commonwealth of the Northern Mariana Islands (CNMI) and on Guam, Mariana Islands (MI). The proposed action would construct and operate antenna arrays, ground screens, and support facilities for radar operations necessary for the national defense.

An Environmental Assessment (EA) on Electronic Installations at Tinian and Guam was prepared in June 1987 and submitted for review to federal agencies, Government of Guam agencies, Commonwealth of the Northern Mariana Islands agencies, and environmental organizations. Several briefing meetings were held on Guam and Saipan prior to distribution of the EA for review. It is in response to substantive concerns raised by agencies and the public that the Navy has made the decision to prepare a DEIS in order to allow full public interaction with the proposed action. In addition, Navy will hold formal scoping meetings on Guam, Tinian, and Saipan to receive commonts from concerned agencies and individuals. Letters of notification for the scoping meetings will be distributed as soon as places and dates are established.

Pursuant to the requirements of the Endangered Species Act, the Navy has entered into consulation with the U.S. Fish and Wildlife Service (FWS). The FWS has responded to the consultation with a report finding of "No Jeopardy" for the proposed action and has recommended several conservation measures which the Navy now has under consideration. These concerns will be addressed in the DEIS. Additional information to be included pertains to public access, electromagnetic interference, radiation analysis, and alternative site considerations.

Local and regional concerns will be carefully considered in the preparation of the DEIS. Scoping comments should be forwarded to: Commanding Officer, Pacific Division, Naval Facilities Engineering Command, Pearl Harbor, Hawaii 96860-7300, ATTN: CODE 09P.

If further assistance is required in regard to the Notice of Intent, please contact CDR E.C. Rushing, Jr., Head, Facilities Planning Department at (808) 471-3088.

Date: December 21, 1987.

Jane M. Virga,

Lt. JAGC, USNR, Alternate Federal Register Liaison Officer.

[FR Doc. 87-29505 Filed 12-23-87; 8:45 am]

BILLING CODE 3810-AE-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Technology Services, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before January 25, 1988.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster, (202) 732-3915.

VOL 52 ISS 247 DEC 24 1987 UMI

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

The Director, Information Technology Services, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of collection; (5) The affected public; ;(6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: December 21, 1987.

Carlos U. Rice,

Director for Information Technology Services.

Type of Review: Extension
Title: Quarterly Cumulative Caseload Report
Agency Form Number: RSA–113
Frequency: Quarterly
Affected Public: State or local governments
Reporting Burden: Responses: 336; *Burden Hours:* 336
Recordkeeping: Recordkeepers: 84; *Burden Hours:* 84

Abstract: This report is used by State Vocational Rehabilitation (VR) agencies to provide caseload data. The Department uses the information collected to assess the accomplishments of program goals and objectives and to aid in effective program management.

Office of Special Education and Rehabilitative Services

Type of Review: Revision
Title: Services for Deaf-Blind Children and Youth
Agency Form Number: B20–10P
Frequency: Annually
Affected Public: State or local governments
Reporting Burden: Responses: 38; *Burden Hours:* 152
Recordkeeping: Recordkeepers: 38; *Burden Hours:* 190

Abstract: These forms will be used by State agencies that have received funds under the Services for Deaf-Blind Children and Youth Program. The Department uses the information in preparing the Annual Report to Congress.

Office of Vocational and Adult Education

Type of Review: Extension
Title: State Plan under the Carl D. Perkins Vocational Education Act of 1984.
Agency Form Number: ED 576–3
Frequency: Annually and Biennially
Affected Public: State or local governments
Reporting Burden: Responses: 53; *Burden Hours:* 5300
Recordkeeping: Recordkeepers: 0; *Burden Hours:* 0

Abstract: State Boards for Vocational Education must submit state plans to apply for grants under the Carl D. Perkins Vocational Education Act, as amended. The Department uses the information to determine compliance with the Act and to make grant awards.

Office of Vocational and Adult Education

Type of Review: Extension
Title: Performance Report for State Administered Vocational Education
Agency Form Number: C30–2R
Frequency: Annually
Affected Public: State or local governments
Reporting Burden: Responses: 53; *Burden Hours:* 2544
Recordkeeping: Recordkeepers: 0; *Burden Hours:* 0

Abstract: This performance report will be used by State administration agencies of vocational education participating in the Carl D. Perkins Act, as amended. The Department uses the information to monitor and evaluate states' performance in providing services.

Office of Planning, Budget, and Evaluation

Type of Review: New
Title: Study of State and Local Response to the Perkins Act
Agency Form Number: P75–12P
Frequency: One time only
Affected Public: State and Local governments
Reporting Burden: Responses: 2000; *Burden Hours:* 2000
Recordkeeping: Recordkeepers: 0; *Burden Hours:* 0

Abstract: This study will collect data from States about the status of vocational education and the effects of implementing the Carl D. Perkins Act, as amended, The Department uses the information to assess the practices of vocational education activities and prepare a report to Congress on the effects of the Act.

BILLING CODE 4000–01–M

Intergovernmental Advisory Council on Education; Partial Closing of Meeting

AGENCY: Education.

ACTION: Notice.

SUMMARY: Notice is hereby given of the decision to partially close the Intergovernmental Advisory Council on Education Executive Committee Meeting scheduled for December 29, 1987, in Washington, DC, as published in the **Federal Register** on Monday, December 14, 1987, Volume 52, No. 239, page 47448. The meeting will be closed to the public from 3:00 p.m. to 4:30 p.m.

SUPPLEMENTARY INFORMATION: A portion of the Executive Committee meeting on December 29, 1987, will be closed to the public because the Committee will be conducting interviews of candidates for the position of Executive Director. The meeting will be closed from 3:00 p.m. to 4:30 p.m. under the authority of section 10(d) of the Federal Advisory Committee Act Pub. L. 92–463; 5 U.S.C. Appendix 2) and under exemption (6) of section 552b(c) of the Government in the Sunshine Act Pub. L. 94–409; 5 U.S.C. 552b(c)(6)). The interviews and subsequent discussion will touch upon matters that would disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy if conducted in open session.

A summary of the activities at the closed session and related matters which are informative to the public consistent with the policy of Title 5 U.S.C. 552b will be available to the public within fourteen days of the meeting.

The proposed agenda is therefore amended to include:

—Old Business
—Update on Status of Job Training and Retraining Report
—Budget Overview
—Discussion of 1988 Conference Planning
—Interviews of Candidates for Executive Director Position
—Other New Business

Dated: December 18, 1987.

Peter R. Greer.

Deputy Under Secretary for Intergovernmental and Interagency Affairs.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Office of Fossil Energy

Liquids Transportation Task Group, Coordinating Subcommittee on Petroleum Storage & Transportation, National Petroleum Council; Notice of Open Meeting

Notice is hereby given of the following meeting:

Name: Liquids Transportation Task Group, Coordinating Subcommittee on Petroleum Storage & Transportation of the National Petroleum Council.

Date and Time: Tuesday, January 12, 1988, 1:00 p.m.

Place: Hyatt Regency—Dallas-Fort Worth, Room 345, International Parkway, Dallas-Fort Worth Airport, Texas.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC 20585, Telephone: 202/586–4695.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the Meeting: Discuss pipeline survey and progress on individual assignments.

Tentative Agenda:

—Opening remarks by Chairman and Government Cochairman.
—Discuss the pipeline survey.
—Review progress on individual assignments.
—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

Public Participation: The meeting is open to the public. The Chairman of the Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms. Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m. Monday through Friday, except Federal holidays.

J. Allen Wampler,

Assistant Secretary, Fossil Energy.

Coordinating Subcommittee on Petroleum Storage & Transportation, Committee on Petroleum Storage and Transportation, National Petroleum Council; Open Meeting

Notice is hereby given of the following meeting:

Name: Coordinating Subcommittee on Petroleum Storage & Transportation of the Committee on Petroleum Storage & Transportation of the National Petroleum Council.

Date and Time: Wednesday, January 20, 1988, 9 a.m.

Place: Hyatt Regency—West Tower, Room 215, Dallas-Fort Worth Int'l Airport, Dallas-Fort Worth Airport, Texas.

Contact: Margie D. Biggerstaff, U.S. Department of Energy, Office of Fossil Energy (FE–1), Washington, DC 20585, Telephone: 202/586–4695.

Purpose of the Parent Council: To provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and gas or the oil and gas industries.

Purpose of the Meeting: Discuss study assignment and review task group assignments.

Tentative Agenda:

—Opening remarks by Chairman and Government Cochairman.
—Discuss study assignment.
—Review task group assignments.
—Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

Public Participation: The meeting is open to the public. The Chairman of the Subcommittee on Petroleum Storage & Transportation is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Subcommittee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Ms.

Margie D. Biggerstaff at the address or telephone number listed above. Requests must be received at least 5 days prior to the meeting and reasonable provisions will be made to include the presentation on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

BILLING CODE 6450–01–M

Economic Regulatory Administration

[ERA Docket No. 87–48–NG]

Victoria Gas Corp.; Order Granting Blanket Authorization To Export Natural Gas

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of order granting blanket authorization to export natural gas.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice that it has issued an order granting Victoria Gas Corporation (Victoria) blanket authorization to export natural gas to Canada. The order issued in ERA Docket No. 87–48–NG authorizes Victoria to export up to 72 Bcf of natural gas over a two-year period beginning on the date of first delivery.

A copy of this order is available for inspection and copying in the Natural Gas Division Docket Room, GA–076, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586–9478. The docket room is open between the hours of 8:00 a.m., and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 18, 1987.

Constance L. Buckley,

Director, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 87–29499 Filed 12–23–87; 8:45 am]

BILLING CODE 6450–01–M

[Docket No. ERA C&E 88–02; Certification Notice—8]

Filing of Certification of Compliance: Coal Capability of New Electric Powerplants

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of filing.

SUMMARY: Title II of the Powerplant and Industrial Fuel Use Act of 1978, as amended ("FUA" or "the Act") (42 U.S.C. 8301 *et seq.*) provides that no new electric powerplant may be constructed or operated as a base load powerplant without the capability to use coal or another alternate fuel as a primary energy source (section 201(a)). In order to meet the requirement of coal capability, the owner or operator of any new powerplant to be operated as a base load powerplant proposing to use natural gas or petroleum as its primary energy source may certify, pursuant to section 201(d) to the Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) as of the date it is filed with the Secretary. The Secretary is required to publish in the **Federal Register** a notice reciting that the certification has been filed. Three owners or operators of proposed new electric base load powerplants have filed self certifications in accordance with section (d). Further information is provided in the **SUPPLEMENTARY INFORMATION** section below.

SUPPLEMENTARY INFORMATION: The following companies filed self certifications:

Name	Date received	Type facility	Megawatt capacity	Location
Albany Cogeneration Associates, New York	11–18–87	Combined cycle	25	Albany County, New York
Simpson Paper Co., Ripon, CA	11–23–87	Combined cycle	49.5	Ripon, CA
Pepperell Power Associates, Pepperell, MA*	11–09–87	Combined cycle	85	Pepperell, MA*

*This notice of this certification originally appeared in the FEDERAL REGISTER on December 1, 1987, erroneously indicating that it was located in Maine instead of Massachusetts (52 FR 45677).

Amendments to FUA on May 22, 1987 (Pub. L. 100–42) altered the general prohibitions to include only new electric baseload powerplants and to provide for the self certification procedure.

Issued in Washington, DC, on December 17, 1987.

Robert L. Davies,

Director, Office of Fuels programs, Economic Regulatory Administration.

BILLING CODE 6450–01

Federal Energy Regulatory Commission

[Docket Nos. ER88–140–000 et al.]

Arizona Public Service Co. et al.; Electric Rate and Corporate Regulation Filings

December 21, 1987.

Take notice that the following filings have been made with the Commission:

1. Arizona Public Service Company

[Docket No. ER88–140–000]

Take notice that on December 15, 1987, Arizona Public Service Company (APS) tendered for filing a Notice of Cancellation of the Power Agreement (Agreement) among Southern California Edison (SCE), Nevada Power Company (NPC), Tucson Gas & Electric (TEP) (collectively known as APS) and the Arizona Power Pooling Association, APS Rate Schedule No. 70.

SCE, the Administrator of the Power Agreement (APS Rate Schedule No. 70) gave notice to the Western Area Power Administration terminating the Power Sale Agreement among the above parties and the United States Government Bureau of Reclamation for the interim purchase of layoff Power from the Navajo Project, effective May 31, 1987. APS FERC Rate Schedule No. 70 provides for the sale of APS' portion of said power.

APS requests waiver of §35.11 of the Federal Energy Regulatory Commission's Rules and Regulations to allow cancellation of APS FERC Rate Schedule No. 70 as of May 31, 1987.

Copies of this filing have been served upon APPA, SCE, NPC, TEP and the Arizona Corporation Commission.

Comment date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. Arizona Public Service Company

[Docket No. ER88–141–000]

Take notice that on December 16, 1987, Arizona Public Service Company (APS) tendered for filing Supplement No. 1 to the Letter Agreement for transmission Service to the Town of Wickenburg (Wickenburg), and an Indemnity Regarding Non-Application of the Tax Charge (Indemnity Agreement) to the aforementioned Letter Agreement.

Supplement No. 1 provides for extension of the Letter Agreement for Transmission Services until January 31, 1988 when a comprehensive agreement is anticipated to be finalized. No changes in rates, facilities, or conditions of service other than the extension of the term of the Agreement and increase in kW to be transmitted are proposed therein.

The Indemnity Agreement provides for the Non-Application of the "Arizona Transaction Privilege" and "Maricopa County Excise" taxes while APS protests and appeals imposition of such assessments and provides for indemnity for such assessments from Wickenburg in the event APS' appeal is unsuccessful.

Inasmuch as the term of the Letter Agreement for Transmission service expired on October 1, 1987, APS respectfully requests waiver of the Commission's Notice Requirements to allow service to continue subsequent to said date.

A copy of this filing has been served upon Wickenburg, their attorney and the Arizona Corporation Commission.

Comment date: January 4, 1988, in accordance with Standard paragraph E at the end of this notice.

3. Idaho Power Company

[Docket No. ER88–135–000]

Take notice that on December 14, 1987, Idaho Power Company (Company) tendered for filing in compliance with the Federal Energy Regulatory Commission's Order of October 7, 1978, a summary of sales made under the Company's 1st Revised FERC Electric Tariff, Volume No. 1 (Supersedes Original Volume No. 1) during October 1987, along with cost justification for the rate charged. This filing includes the following supplements.

Pacific Power & Light Co., Supplement No. 24

Utah Power & Light Co., Supplement No. 71
Washington Water Power Co., Supplement No. 54
Sierra Pacific Power Co., Supplement No. 69
Sacramento Municipal Utility District, Supplement No. 5

Comment date: January 4, 1988, in accordance with Standard Paragraph B at the end of this notice.

4. Kansas City Power & Light Company

[Docket No. ER88-136-000]

Take notice that on December 14, 1987, Kansas City Power & Light Company (KCPL) tendered for filing with the Commission proposed changes in Service Schedules for Firm Power Service to supersede and replace Service Schedules for Firm Power Service in contracts and agreements with the following wholesale customers:

1. City of Gardner, Kansas (Gardner), FPC No. 79
2. City of Pomona, Kansas (Pomona), FPC No. 82
3. City of Prescott, Kansas (Prescott), FERC No. 76
4. City of Baldwin, Kansas (Baldwin), FERC No. 85
5. City of Garnett, Kansas (Garnett), FERC No. 78
6. City of Osawatomie, Kansas (Osawatomie), FPC No. 77
7. City of Ottawa, Kansas (Ottawa), FERC No. 90
8. Kansas Electric Power Cooperative, Inc.—Coffey County (KEPCo-Coffey) FPC No. 69
9. Kansas Electric Power Cooperative, Inc.—United Electric (KEPCo-United), FPC No. 84

The proposed changes would decrease revenues from jurisdictional sales and revenues by $65,194.31 based on the 12-month period ending September 30, 1985.

These new Schedules are filed in compliance with Joint Offers of Settlement in Dockets Nos. ER86-273-001 and ER86-273-002 approved by the Commission by orders dated July 31, 1986. The result of the change will be to reduce the test year increase reflected by the rates in the present rate schedules for the Company's Kansas Sales for Resale customers by 2%.

A copy of the filing was sent to each customer affected and to the Kansas Corporation Commission.

Comment date: January 4, 1988, in accordance with Standard Paragraph B at the end of this notice.

5. Kansas Gas and Electric Company

[Docket No. ER88-120-000]

Take notice that on December 14, 1987, Kansas Gas and Electric Company (KGE) tendered for filing an amendment to include in its previous filing of November 27, 1987, 3 additional executed contracts from the cities of Arcadia and La Harpe, Kansas, and Mindenmines, Missouri. KGE states that the executed agreements replace the unexecuted agreements originally filed. The only difference between the unexecuted and executed agreements is a reduction in the initial term, specified in Article X, section 10.1, from 10 years to 5 years.

Comment date: January 4, 1988, in accordance with Standard Paragraph E at the end of this document.

6. MSU System Services, Inc.

[Docket No. EL88-50-004]

Take notice that on December 14, 1987, MSU System Services, Inc. (MSSI) tendered for filing a compliance refund report pursuant to the Commission's September 15, 1987, letter order approving a settlement in the instant proceeding. In the compliance report, MSSI states that all amounts collected in excess of the settlement rate levels have been refunded, together with interest computed under § 35.19(a) of the Commission's Regulations.

MSSI indicates that it originally dispatched the compliance report to the Commission by Airborne Express on November 2, 1987, but that it apparently never reached the proper parties so as to be formally filed. Accordingly, MSSI requests that its compliance report be considered to be timely filed. MSSI also states that, because it has no reason to believe that the other parties to the instant proceeding did not receive copies of the compliance report when it was originally dispatched on November 2, 1987, MSSI was not providing such parties with another copy of the filing.

Comment date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

7. Northern States Power Company (Minnesota); Northern States Power Company (Wisconsin)

[Docket No. ER88-136-000]

Take notice that on December 15, 1987, Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin) jointly tendered for filing revised Exhibits VII, VIII and IX to the Agreement to Coordinate Planning and Operations and Interchange Power and Energy Between Northern States Power Company (Minnesota) and Northern States Power Company (Wisconsin).

Exhibit VII sets forth the specification of the rate of return on common equity to determine the overall cost of capital. The return on common equity for calendar year 1988 is the FERC generic rate of return effective November 1, 1987. A Statement of the impact of the return on common equity on each Company has been filed.

Exhibit VIII sets forth the specification of average monthly coincident peak demands for calender year 1988 for each of the Companies. A statement of the impacts of these coincident peak demands on each Company has been filed. These coincident peak demands were determined based upon three year data. The three year data consists of 18 months actual and 18 months projected. The change from the use of the average of the 12 monthly peak demand allocation method to the use of 36 months was approved in Docket No. ER87-279-000.

Exhibit IX sets forth a specification of depreciation rates certified by the Minnesota Public Utilities Commission and the Wisconsin Public Service Commission for NSP (Minnesota) and NSP (Wisconsin).

The NSP Companies request an effective date of January 1, 1988, for this filing. Copies of the filing letter and revised Exhibits VII, VIII and IX have been served upon the wholesale and wheeling customers of the Companies. Copies of the filing have been mailed to the state Commissions of Michigan, Minnesota, North Dakota, South Dakota and Wisconsin.

Comment date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

8. Upper Peninsula Power Company

[Docket No. ER88-22-000]

Take notice that on December 14, 1987, Upper Peninsula Power Company tendered for filing revisions to the proposed reduction in rates schedule for wholesale electric service to the Alger-Delta Cooperative Electric Association, the Ontonagon County Rural Electrification Association, Village of Baraga, City of Escanaba, City of Gladstone, Village of L'Anse, City of Negaunee, and the Wisconsin Electric Power Company.

Based on the Period II test year ending December 31, 1983, when UPPCO's rates for wholesale electric service were last changed, the proposed rates would decrease revenues from sales to these customers by 2.35%. UPPCO states that the revisions are necessary to reflect more accurately the effect of changes in the Federal corporate income tax rate enacted in the Tax Reform Act of 1986.

Comment date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

9. Western Area Power Administration

[Docket No. EF88-5131-000]

Take notice that on December 4, 1987, by Rate Order No. WAPA-36, the Under Secretary of the Department of Energy confirmed and approved on an interim basis an extension of the existing Resources Coordination Program Rate Schedule RCP-1.

The rate extension will be in effect on an interim basis pending the Federal Energy Regulatory Commission's [FERC] approval of it, or a substitute rate, on a final basis, or until superseded. The Under Secretary has filed the rate schedule with FERC for confirmation and approval on a final basis, for the period from November 30, 1987, to September 30, 1989, pursuant to authority vested in the FERC by Delegation Order No. 0204-108.

Comment date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

10. Wisconsin Power & Light Company

[Docket No. EC87-17-000]

Take notice that on December 14, 1987, Wisconsin Power & Light Company (WPL) tendered for filing pursuant to Section 203 of the Federal Power Act and the Commission's regulations 18 CFR Part 33, an Amendment to Application for approval by the Commission of a proposed corporate restructuring. By this Amendment to its Application, WPL requests that the Commission disregard the matters stated in paragraph 14 on pages 9 and 10 of WPL's Application as originally filed and to treat such Application as if paragraph 14 had not been included. WPL states that the purpose of this Amendment is to submit unconditionally to the subject matter jurisdiction of the Commission under Section 203 with respect to the proposed corporate restructuring and thereby to enable the Commission to act expeditiously with respect to the Application.

Copies of this filing have been served upon all parties affected by this proceeding.

Comment date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29544 Filed 12-23-87; 8:45 am]

BILLING CODE 6717-01-M

Mojave Pipeline Co. et al., Availability of the Mojave and Kern River Natural Gas Pipeline Projects Final EIR/EIS

December 16, 1987.

In the matter of Mojave Pipeline Company, Kern River Gas Transmission Company, El Dorado Interstate Transmission Company, Northwest Pipeline Corporation, El Paso Pipeline Corporation, Transwestern Pipeline Company; Docket Nos. CP85-437-003, CP85-552-002, CP86-205-001, CP85-625-001, CP86-197-003, CP86-212-001.

Notice is hereby given that the Federal Energy Regulatory Commission (FERC) and the California State Lands Commission (SCL) have available a final joint environmental impact report/statement (EIR/EIS) for the above-listed projects. The EIR/EIS was prepared under the direction of the FERC and SLC staffs to satisfy the requirements of the National Environmental Policy Act and the California Environmental Quality Act. The FERC has determined that approval of any of these projects "would be a major Federal action significantly affecting the quality of the human environment."

The primary projects proposed by Mojave Pipeline Company (Mojave) and Kern River Gas Transmission Company (Kern River), are competing to transport natural gas from various sources outside California to the Bakersfield, California, area for use in enhanced recovery (EOR) and related cogeneration projects. A previously proposed project, El Dorado Interstate Transmission Company (El Dorado), is examined in the EIR/EIS as an alternative but is not a direct competitor to Mojave or Kern River. On October 27, 1986, FERC Administrative Law Judge Isaac D. Benkin ordered that the El Dorado application be dismissed with prejudice. On October 20, 1987, the Commission adopted the initial decision, dismissed El Dorado's application, and terminated the docket. Also, on June 30, 1987, the SLC denied, without prejudice, El Dorado's application.

In each case, producers of crude oil in the San Joaquin Valley would use the natural gas as boiler fuel to create steam which would then be injected into the oil fields to produce crude oil not recoverable by primary recovery methods. Some of the steam would be used to generate electricity.

The projects proposed by Northwest Pipeline Company (Northwest), El Paso Natural Gas Company (El Paso), and Transwestern Pipeline Company (Transwestern) would deliver natural gas to the primary projects.

The primary projects are competing for the FERC's approval; however, it is unlikely that all projects would be approved. The EIR/EIS treats each primary project with its associated feeder projects as an alternative to the other. Additional alternative systems and routes are also analyzed. The proposed facility requirements for each system are outlined below:

	Mojave [1]	El Dorado	Kern River [2]
Pipeline (miles)	756.2	753.2	837
Compression (horsepower)	22,500		35,500

[1] Includes El Paso and Transwestern.
[2] Includes Northwest.

Facilities for the proposed systems would be located in Arizona, California, Nevada, New Mexico, Texas, Utah, and Wyoming. Alternatives would involve the State of Colorado as well. Detailed listings of proposed facilities and affected counties were published in the **Federal Register** on August 23, 1985, December 13, 1985, and May 19, 1986. (See 50 FR 34174, 50941, and 51 FR 18357.)

The EIR/EIS will be used in the regulatory decisionmaking process at both the FERC and SLC and will be presented as evidentiary matter in formal hearings at the FERC. While the period for filing motions to intervene in these cases has expired, motions to intervene out-of-time can be filed with the FERC in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR 385.214(d). Further, anyone desiring to file a protest with the FERC should do so in accordance with 18 CFR 385.211.

The EIR/EIS has been placed in the public files of the FERC and SLC and is available for public inspection in the FERC's Division of Public Information, Room 1000, 825 North Capitol Street,

BEST COPY AVAILABLE

NE., Washington, DC 20426 and at the SLC, 1807–13th Street, Sacramento, CA 95814. Copies have been sent to the public, all parties to the proceeding, and Federal, state, and local officials, and are available in limited quantities from the FERC's Division of Public Information and the SLC.

Additional information about the project is available either from Mr. Robert Arvedlund, FERC Project Manager, telephone (202) 357–9043, or Ms. Mary Griggs, SLC Project Manager, telephone (916) 322–0354.

Lois Cashell,

Acting Secretary, FERC.

BILLING CODE 6717–01–M

[Docket Nos. ID–2323–000 et al.]

Bernard J. O'Keefe et al.; Interlocking Directorate Applications

December 21, 1987.

Take notice that the following filings have been made made with the Commission:

1. Bernard J. O'Keefe

[Docket No. ID–2323–000]

Take notice that on December 15, 1987, Bernard J. O'Keefe filed an application pursuant to section 305(b) of the Federal Power Act for Commission authorization to hold concurrently the following positions:

Position	Name of corporation	Classification
Director	Boston Edison Co	Public utility.
Director	John Hancock Mutual Life Insurance Co.	Mutual life insurance company.

Comment Date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

2. Helene R. Cahners

[Docket No. ID–2321–000]

Take notice that on December 15, 1987, Helene R. Cahners filed an application pursuant to section 305(b) of the Federal Power Act for Commission authorization to hold concurrently the following positions:

Position	Name of corporation	Classification
Director	Boston Edison Co	Public utility.
Director	Berkshire Life Insurance Co.	Mutual life insurance company.

Comment Date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

3. Nelson S. Gifford

[Docket No. ID–2322–000]

Take notice that on December 15, 1987, Nelson S. Gifford filed an application pursuant to section 305(b) of the Federal Power Act for Commission authorization to hold concurrently the following positions:

Position	Name of corporation	Classification
Director	Boston Edison Co	Public utility.
Director	John Hancock Mutual Life Insurance Co.	Mutual life insurance company.

Comment Date: January 4, 1988, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87–29545 Filed 12–23–87; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. CP86–143–008, et al.]

Texas Gas Transmission Company et al.; Natural Gas Certificate Filings

December 18, 1987.

Take notice that the following filings have been made with the Commission.

1. Texas Gas Transmission Co.

[Docket No. CP86–143–008]

Take notice that on November 30, 1987, Texas Gas Transmission Corporation (Texas Gas), P.O. Box 1160, Owensboro, Kentucky 42302, filed in Docket No. CP86–143–008, a petition to amend further the Commission order issued in Docket No. CP86–143–000 on February 14, 1986, as amended, so as to extend the term of transportation service authorized beyond the present expiration date of February 12, 1988, all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is stated that by order issued February 14, 1986, in Docket No. CP86–143–000, Texas Gas was granted authorization to provide interruptible transportation service for 52 end-users for a period of one year from the date of the order. Texas Gas indicates that by subsequent order issued February 12, 1987, in Docket No. CP86–143–005, the Commission amended the February 14, 1986, order and executed the term of Texas Gas' authorization until February 12, 1988 (one year), or the date on which Texas Gas accepted a blanket certificate under § 284.221 of the Commission Regulations, which ever occurred first.

Texas Gas in the present application is requesting authority to extend this transportation service beyond February 12, 1988, until the earlier of one year from the expiration date of the present certificate or the date on which Texas Gas accepts a blanket certificate under § 284.221 of the Commission's Regulations. No other changes are proposed.

Comment date: January 8, 1988, in accordance with the first paragraph of Standard Paragraph F at the end of this notice.

Arkla Energy Resources, a division of Arkla, Inc.

[Docket No. CP88–113–000]

Take notice that on December 7, 1987, Arkla Energy Resources, a division of Arkla, (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP88–113–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the establishment of a new sales rate schedule, Rate Schedule CD,. all as more fully set forth in the application, which is on file with the Commission and open to public inspection.

AER states that the proposed service would serve the public convenience and necessity because it would provide AER an opportunity to effectively compete for new large volume sale for resale customers, increase its system load factor, and thereby lower unit costs.

Comment date: January 8, 1988, in accordance with Standard Paragraph F at the end of this notice.

East Tennessee Natural Gas

[Docket No. CP88–115–000]

Take notice that on December 8, 1987, East Tennessee Natural Gas Company, (Applicant), P.O. Box 10245, Knoxville, Tennessee 37939–0245, filed in Docket No. CP88–115–000, a request pursuant to §§ 157.205 and 157.212(b) of the Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) that Applicant be allowed to construct and operate a new delivery point for Stauffer Chemical Company (Stauffer), under the certificate issued in Docket No. CP82–412–000, pursuant to the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant proposes to establish a new delivery point for its existing customer, Stauffer, southwest of the present Stauffer facilities in Maury County, Tennessee. The new delivery point will provide a second delivery point to Stauffer's Mt. Pleasant facilities. It is stated that the volumes delivered would be within the certified entitlements of Stauffer and that there would be no impact on Applicant's peak day deliverability.

Comment date: February 1, 1988, in accordance with Standard Paragraph G at the end of this notice.

4. Arkla Energy Resources, a Division of Arkla, Inc.

[Docket No. CP88–116–000]

Take notice that on December 8, 1987, Arkla Energy Resources, a division of Arkla, Inc. (AER), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP88–116–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate two sales taps and related jurisdictional facilities necessary to deliver gas from its jurisdictional system for delivery to consumers served by Arkansas Louisiana Gas Company, a division of Arkla, Inc. (ALG) under the authorization issued in Docket Nos CP82–384–000 and CP82–384–001 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file and open to public inspection.

AER proposes to construct and operate a sales tap and related facilities on its Line 2–AD in Hughes County, Oklahoma to deliver gas to ALG for service to Betty J. Williams, a residential user who would use the gas for normal domestic purposes. It is estimated that Betty J. Williams would consume approximately 160 Mcf per year and about 1.5 Mcf on a peak day. It is further started that the proposed jurisdictional facilities would cost approximately $1,350 to install.

Applicant further proposes to construct and operate a sales tap and related facilities on its Line 25 in Cowley County, Kansas to deliver gas to ALG for service to Ron Dust, a residential user who would use the gas for normal domestic purposes. AER estimates that Ron Dust would consume approximately 140 Mcf per year and 2 Mcf on a peak day. The proposed jurisdictional facilities would cost approximately $1,350 to install. AER explains that the gas would be delivered from its general system supply and asserts that its system supply is adequate to provide the proposed service.

Comment date: February 1, 1988, in accordance with Standard Paragraph G at the end of this notice.

5. Transcontinental Gas Pipe Line Corporation

[Docket No. CP88–92–000]

Take notice that on November 24, 1987, Transcontinental Gas Pipe Line Corporation (Transco), Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP88–92–000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of facilities and the firm transportation of natural gas, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Transco states that these proposed facilities would cost approximately $24,534,000 and would be necessary to enable it to provide firm transportation service for up to 73,500 dt equivalent of natural gas per day for its affiliate Transco Energy Marketing Company (TEMCO) for an initial period ending October 31, 2002.

It is stated that the gas to be transported is sold to TEMCO by Sulpetro Limited under assignment by Transco of a long-term purchase contract. Transco states that TEMCO will seek authorization from the Economic Regulatory Administration to import the Canadian purchase quantities on a long-term basis.

The application states that this gas would be transported to Transco's system by TransCanada Pipelines Limited, Tennessee Gas Pipeline Company, and National Fuel Gas Supply Corporation (National Fuel). Transco states that National Fuel has applied for section 7(c) transportation authority in Docket No. CP86–94–000.

It is stated that the gas would then be transported by Transco for TEMCO to make firm, long-term sales to the following local distribution company customers:

	Maximum daily quantity (dt)
1. Baltimore Gas and Electric Company	25,000
2. Long Island Lighting Company	15,000
3. Public Service Electric and Gas Company	32,875

Transco states that it would charge an initial transportation rate consisting of a monthly reservation rate D–1 of $1.70 per dt and D–2 of $0.056 per dt and a commodity rate of $0.146 per dt of gas transported derived on a modified fixed variable rate design methodology to recover the cost of service for the proposed expansion and for the facilities proposed in Docket No. CP87–196–000 on a rolled in basis.

Specifically, Transco states that it seeks authority to construct and operate the following facilities:

1. 3.97 miles of 36-inch diameter pipeline loop from M.P. 64.99 to MP. 68.96 on its Leidy Line located in Luzerne and Monroe counties in Pennsylvania.

2. 10.88 miles of 36-inch diameter pipeline loop from M.P. 68.96 on its Leidy Line to M.P. 10.88 on its Leidy "B" Line located in Luzerne County, Pennsylvania.

3. 3.43 miles of 30-inch diameter pipeline loop from M.P. 190.63 to M.P. 194.06 on its Leidy Line located in Clinton County, Pennsylvania.

4. 2.25 miles of 16-inch diameter pipeline loop from M.P. 2.25 on its 12-inch Leidy Line to M.P. 0.00 at its Compressor Station No. 535 located in Potter County, Pennsylvania.

5. Metering and regulation facilities at M.P. 2.25 of the proposed loop located in Potter County, Pennsylvania.

Transco states that these Canadian impact quantities have been flowing since 1980 on a best efforts basis and will now be sold to discrete markets. Transco states that it believes this application is distinguished from open season proposals that may be filed in response to the Commission's Northeast open-season proceeding at Docket No. CP87–451–000.

Comment date: January 8, 1988, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs:

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North

Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29433 Filed 12-23-87; 8:45am]

BILLING CODE 6717-01-M

[Docket Nos. QF88-109-000 et al.]

Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, etc; Archer-Daniels-Midland Co. et al.

December 21, 1987.

Comment Date: January 25, 1988, in accordance with Standard Paragraph E at the end of this notice.

Take notice that the following filings have been made with the Commission.

1. Archer-Daniels-Midland Co.

[Docket No. QF88-109-000]

On November 23, 1987, Archer-Daniels-Midland Company (Applicant), of 4666 Faries Parkway, Decatur, Illinois 62526, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Lincoln, Nebraska. The facility will consist of a multi-bed fluidized bed steam generator and a back pressure steam turbine generator. Thermal energy recovered from the facility will be used in the plant for process purposes. The net electric power production capacity of the facility will be 6,400 kW. The primary source of energy will be coal. Construction of the facility began in September 1986.

2. Archer-Daniels-Midland Co.

[Docket No. QF88-116-000]

On November 30, 1987, Archer-Daniels-Midland Company, of 4666 Faries Parkway, Decatur, Illinois 62526, submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located in Des Moines, Iowa. The facility will consist of a multi-bed fluidized bed steam generator and a back-pressure steam turbine generator. Thermal energy recovered from the facility will be used in the plant for process purposes. The net electric power production capacity of the facility will be 6,400 kW. The primary source of energy will be coal. Construction of the facility began in September 1986.

3. General Electric Credit Corp. and The Connecticut National Bank, as Owner Trustee

[Docket No. QF83-332-003]

On November 30, 1987, General Electric Credit Corporation of 260 Long Ridge Road, Stamford, Connecticut 06902 and The Connecticut National Bank, as Owner Trustee of 777 Main Street, Hartford, Connecticut 06115 submitted for filing an application for recertification of a facility as a qualifying small power production facility pursuant to §292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Wilmington, Delaware. The facility will consist of five combustion units, four heat recovery steam generators, and three steam turbine generating units. The primary energy source will be biomass in the form of a combination of refuse derived fuel and unprocessed municipal solid waste. The net electric power production capacity of the facility will be 17.5 MW.

The original application (QF83-332-000) was filed on July 1, 1983 granted certification as a qualifying cogeneration facility on September 8, 1983 (24 FERC ¶ 62,286). The facility was also certified as qualifying small power production facility by operation of law on February 1, 1984, in Docket No. QF83-332-001.

The first application for recertification (QF83-332-002) reflecting changes in the ownership from the Crouse Group to Crouse Recovery of Delaware, Inc. an increase in net electric power production capacity from 13.8 MW to 17.5 MW was filed on November 17, 1986 and granted on April 30, 1987 (39 FERC ¶ 62,106). The instant recertification is requested due to change in legal and beneficial facility's ownership from Crouse Recovery of Delaware, Inc. to The Connecticut National Bank, as Owner Trustee and General Electric Credit Corporation, respectively. All other facility's characteristics will essentially remain the same.

4. Simpson Paper Co.

[Docket No. QF88-110-000]

On November 23, 1987, Simpson Paper Company (Applicant), Post Office Box 757, Ripon, California 95366 submitted for filing an application for certification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The proposed topping-cycle cogeneration facility will be located on the premises of Simpson Paper Company's Ripon, Paper Mill Processing Plant, in the City of Ripon, of San Joaquin County, California. The facility will consist of a combustion turbine generator, and a heat recovery steam generator. Heat recovered from the facility will be used in the existing paper mill in the processing of pulp, paper machine drying, and other process heating associated with paper production. The net electric power production capacity of the facility will be 48 megawatts. The primary source of energy will be natural gas with No. 2 fuel oil as a backup. The installation of the facility commenced in 1988, and is expected to be operational in February 1988.

5. Stockton GoGen Co.

[Docket No. QF85-225-001]

On December 2, 1987, Stockton CoGen Company (Applicant), of Allentown, Pennsylvania 18195 submitted for filing an application for recertification of a facility as a qualifying cogeneration facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The topping-cycle cogeneration facility will be located at 1010 Zephyr Drive, Stockton, California. The facility will consist of a circulating fluidized bed boiler and an extraction-condensing steam turbine generating unit. Extraction steam produced from the facility will be used to dry corn and to make other corn products. The primary energy source for the facility will be either coal or petroleum coke. The net electric power production capacity of the facility will be 49.9 MW.

The original application was filed by Corn Products and was granted certification as a qualifying cogeneration facility on April 24, 1985 (31 FERC ¶ 62,108 (1985)).

The recertification is requested due to change in ownership from Corn Products to Stockton CoGen Company. Stockton CoGen Company is a California general partnership consisting of two partners, Stockton CoGen (I) Inc. ("CoGen I") and Stockton Cogen (II), Inc. ("CoGen II").

CoGen I is a Delaware corporation and wholly-owned subsidiary of Air Products and Chemicals, Inc. CoGen II is a Delaware corporation and a wholly-owned subsidiary of Rincon Investing Company, which is a wholly-owned subsidiary of Tucson Electric Power Company, an Electric Utility.

The installation of the facility began in the summer of 1986. All other facility's characteristics essentially remain the same.

6. Ultrasystems Development Corp.—Algoma, WV

[Docket No. QF88-112-000]

On November 24, 1987, Ultrasystems Development Corporation (Applicant) of 12500 Fair Lakes Circle, Suite 260, Fairfax, Virginia 22033 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located at Algoma, Wyoming County, West Virginia. The facility will consist of a fluidized bed combustion boiler, an extraction/condensing steam turbine generator, and related auxiliary equipment. Applicant states that the primary energy source of the facility will be "waste" in the form of bituminous coal refuse. The net electric power production capacity of the facility will be 50 megawatts. The electric power produced by the facility will be wheeled to the Virginia Power Company.

Ultrasystems Development Corp.—Big Rock, VA

[Docket No. QF88-136-000]

On December 2, 1987, Ultrasystems Development Corporation (Applicant) of 12500 Fair Lakes Circle, Suite 260, Fairfax, Virginia 22033 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located at Big Rock, Buchanan County, Virginia. The facility will consist of a fluidized bed combustion boiler, an extraction/condensing steam turbine generator, and related auxiliary equipment. Applicant states that the primary energy source of the facility will be "waste" in the form of bituminous coal refuse. The net electric power production capacity of the facility will be 50 megawatts. The electric power produced by the facility will be wheeled to the Virginia Power Company.

Ultrasystems Development Corp.—Energy Mountain Facility—Tucker County, WV

[Docket No. QF88-113-000]

On November 24, 1987, Ultrasystems Development Corporation (Applicant) of 12500 Fair Lakes Circle, Suite 260, Fairfax, Virginia 22033 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located in Tucker County, West Virginia. The facility will consist of a fluidized bed combustion boiler, an extraction/condensing steam turbine generator, and related auxiliary equipment. Applicant states that the primary energy source of the facility will be "waste" in the form of bituminous coal refuse. The net electric power production capacity of the facility will be 50 megawatts. The electric power produced by the facility will be wheeled to the Virginia Power Company.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29546 Filed 12-23-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. GP88-4-000]

Barnhart Co.; Petition for Declaratory Order

December 21, 1987.

Take notice that on November 2, 1987, Barnhart Co. (Barnhart) filed with the Commission pursuant to Rule 207 of the Commission's rules of practice and procedure a petition for a declaratory order. Barnhart asks that the Commission remove uncertainty by declaring that the NGPA section 102(c) well determination for Barnhart's Wilmont #1 well, Katy S. (First Wilcox) Field, Waller and Fort Bend Counties, Texas is final and cannot be reopened based on a subsequent state pooling order.

In support of its petition, Barnhart states that on March 18, 1982, it filed with the Railroad Commission of Texas

(Texas) an application for a section 102(c) or, alternatively, a section 103 determination for production from the Wilmot #1 well. Barnhart states that its application acknowledged awareness of a separate proceeding before Texas where another company proposed that the Katy S. (First Wilcox) Field and the Katy (First Wilcox) Field be combined. Barnhart states that it indicated to Texas that a scheduled hearing might affect on its section 102 application; however, no final action was taken before Texas granted the section 102(c) and 103 well determinations on August 18, 1982. Barnhart states that these determinations were forwarded to the Commission and became final on October 24, 1982.

On June 23, 1983 (effective July 1, 1983), Texas issued an order determining that the Katy and Katy S. Fields were to be combined and designated as a single field called the Katy Field. Barnhart believes that if the Katy S. and Katy Fields had been designated as a single field before the determinations were granted, commercial production from the Katy Field prior to April 20, 1977, may have disqualified the Wilmot #1 from receiving a section 102(c) determination. However, because the determination was made on the basis that the two fields were separate, Barnhart argues that the section 102(c) determination should be deemed final, since Texas did not rely on any untrue statements of material fact nor were any material facts omitted from its application. Barnhart cites *Petroleum Management Inc.*, 19 FERC ¶61,322 (1982) and *Mobil Oil Exploration and Producing Southeast, Inc., et al.*, 34 FERC ¶ 61,359 (1986) as support for its request that the Commission declare the subject well category determination final and not subject to reopening. Barnhart argues that the Commission declared in those cases that information which becomes available subsequent to a final well category determination is not relevant where the applications are correct and complete at the time of the determination. Barnhart claims that, as in *Petroleum Management*, and *Mobil, et al.*, reopening of the Wilmot #1 well determination is not required by the NGPA or applicable Commission regulations and to do so would be unreasonable and unfair.

Any person desiring to be heard or to protest this petition should file a motion to intervene or protest in accordance with Rule 211 and 214 of the Commission's rules of practice and procedure. All motions to the intervene or protests should be submitted to the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426 not later than 30 days after publication of this notice in the **Federal Register**. All protests filed will be considered, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene in accordance with Rule 214. Copies of the petition filed in this proceeding are on file with the Commission and available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29548 Filed 12-23-87; 8:45 am]

BILLING CODE 6717-01-M

Citizens Utilities Co.; Application

[Docket No. E388-23-000]

December 16, 1987.

Take notice that on December 9, 1987, Citizens Utilities Company (Applicant) filed an application pursuant to section 204 of the Federal Power Act seeking an order authorizing the issuance of not more than $100,000,000 of commercial paper and other unsecured promissory notes from time to time on or before January 20, 1990, with final maturities no later than January 19, 1991.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before January 7, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any persons wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29434 Filed 12-23-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP88-40-000]

Mountain Fuel Resources, Inc.; Tariff Filing

December 18, 1987.

Take notice that on December 14, 1987, Mountain Fuel Resources, Inc. (MFR), pursuant to 18 CFR 154.63, tendered for filing and acceptance First Revised Sheet Nos. 18, 26, 27, and 30 to its FERC Gas Tariff, Original Volume No. 2.

MFR states that the purpose of this filing is to update its S-1 Rate Schedule under which storage service is provided to Northwest Pipeline Corporation (Northwest) at MFR's Clay Basin Storage Field (Clay Basin) located in Daggett County, Utah. Changes reflect (1) an amended method of calculating the general plant allowance which is a portion of the monthly demand charge billed to Northwest under Rate Schedule S-1, (2) a four percent increase in the injection and withdrawal fees at Clay Basin assessed by the United States Department of the Interior, and (3) the addition of a provision to allow MFR to withdraw storage gas for Northwest during the injection period. MFR states that the amended method of calculating the general plant allowance will reduce the 1987 demand charge to Northwest under Rate Schedule S-1 by approximately $124,000.

MFR requests waiver of the notice requirements under 18 CFR 154.22 to allow the tendered tariff sheets to be effective February 23, 1988 (First Revised Sheet No. 18), June 1, 1988 (First Revised Sheet Nos. 26 and 27), and January 1, 1987 (First Revised Sheet No. 30).

Copies of the filing were served on Northwest and on the Public Service Commissions of Utah and Wyoming.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before December 28, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

[Docket No. CI61-945-000 et al.]

Pennzoil Products Co.; Application

December 21, 1987.

Take notice that on December 10, 1987, Pennzoil Products Company (Products), of P.O. Box 2967, Houston, Texas 77252-2967, filed an application pursuant to § 154.92(d) of the Commission's Regulations, requesting authorization to continue certain sales of natural gas in interstate commerce previously made by Pennzoil Company (Pennzoil) under the certificates of public convenience and necessity granted in the dockets shown on the attached Appendix. Products also requests that Pennzoil Company's rate schedules be redesignated as those of Pennzoil Products Company. This application is on file with the Commission and open to public inspection.

By Deed, Assignment and Conveyance dated October 28, 1986, and made effective November 1, 1986, Pennzoil assigned to Products certain real property interests in the State of West Virginia.

Any person desiring to be heard or to make any protest with reference to said applications should on or before January 6, 1988, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any proceeding herein must file a petition to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or to be represented at the hearing.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[ER-FRL-3305-4]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared December 7, 1987 through December 11, 1987 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382-5075/76.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 24, 1987 (52 FR 13749).

Draft EISs

ERP No. D-AFS-L65108-OR, Rating EC2, Malheur National Forest, Land and Resource Management Plan, Implementation, Grant, Malheur, Baker and Harney Counties, OR.

Summary: EPA had concerns regarding: insufficient presentation of existing conditions; inadequate protection standards relating to fish habitat, riparian areas, water, soil and air; lack of a clear commitment that activities unable to meet the adopted standards would not be allowed to occur unmodified; insufficient analysis of risks to water quality and beneficial uses caused by stream sedimentation from planned activities; lack of any monitoring plan proposed from water quality and soils; and insufficient monitoring plans proposed for fisheries and riparian areas.

ERP No. D-BLM-K61087-00, Rating EC2, Yuma District Wilderness Study Areas, Wilderness Designation, Recommendation, Havaru and Yuma Resource Areas, LaPaz, Mohave and Yuma Counties, AZ and Imperial, Riversiade, and San Bernardino Counties, CA.

Summary: EPA supports BLM's decision to recommend full or partial wilderness designation for 12 of 22 wilderness study areas. However, EPA expressed concern over impacts to water quality from projected motorized vehicle use within the areas.

ERP No. D-BLM-L70009-AK, Rating EC2, Utility Corridor Planning Area Resource Management Plan and Central Arctic Management, WSA Recommendations, Implementation, AK.

Summary: EPA had no objections to the Central Arctic Management Area Wilderness Study. EPA expressed environmental concerns about the preferred alternative for the resource management plan (RMP). Degradation of water quality from nonpoint sources, impacts to beneficial uses of rivers and streams, adverse effects on wildlife and wildlife habitat, and restrictions of subsistence use streams could result from the activities managed by BLM. EPA recommended consideration of a new alternative that combines features of the preferred alternative and the environmental protection aspects of Alternative B.

ERP No. DS-COE-K32038-CA, Rating 3, Oakland Outer and Inner Harbors, Deep Draft Navigation Improvements,

Alcatraz Dredge Material Disposal Site Changed Conditions, Implementation, Alameda County, CA.

Summary: EPA rated the document inadequate because of potential sediment toxicity; lack of thorough characterization of the project site; lack of baseline information for the proposed ocean disposal site; and the preferred alternative's potential adverse impacts on San Francisco Bay and oceanic living resources from dredging and dumping activities.

ERP No. D-COE-K34006-CA, Rating EO2, New San Clemente Project, Carmel River Dam Construction, 404 Permit, Monterey County, CA.

Summary: EPA expressed environmental objections because the proposed project fails to comply with Clean Water Act, section 404(b)(1) Guidelines. EPA stated that the document did not adequately assess alternatives to a Carmel River reservoir; did not fully consider less-damaging, practicable alternatives; and did not commit to specific mitigation measures. EPA suggested that COE prepare a new draft EIS that would demonstrate compliance with the CWA and more adequately discuss the project's environmental impacts.

Note.—The above summary should have appeared in the 12-18-87 FR Notice.

ERP No. D-IBR-G28012-TX, Rating EC2, San Jacinto River Basin Water Supply Project, Municipal and Industrial Water Use, Implementation, Montgomery, Harris, Grimes, Walker, San Jacinto, Fort Bend and Liberty Counties, TX.

Summary: EPA believes that mitigation for the unavoidable loss of wetlands should be presented in the draft EIS and suggests such measures be incorporated into the recommended mitigation plan. Also, EPA requests information addressing methods to control aquatic weeds and the impacts on water quality.

Final EISs

ERP No. F-AFS-K65073-AZ, Apache-Sitgreaves National Forest, Land and Resource Management Plan, Implementation, Apache, Coconino, Greenlee and Navajo Counties, AZ.

Summary: EPA supports the plan as proposed. Further, EPA commends the commitment to provide better protection for riparian resources, thus improving and protecting water quality and protecting beneficial uses such as coldwater fisheries.

ERP No. F-AFS-K65105-CA, Angeles National Forest, Land and Resource Management Plan, Implementation, Los Angeles Ventura and San Bernardino Counties, CA.

Summary: EPA commends the commitment to protect riparian resources and to better manage off-road vehicle use, but requests that increased grazing allotments be deferred pending adequate baseline data on riparian and aquatic resources.

ERP No. F1-BLM-K65065-NV, Walker Resource Area, Wilderness Recommendations Designation or Nondesignation, Gabbs Valley Range and Burbank Canyon WSA's, Mineral and Douglas Counties, NV.

Summary: EPA is concerned that the document does not adequately identify environmental impacts from mineral exploration activities and off-road vehicle use under the "no wilderness" alternative.

ERP No. F-COE-G30011-LA, West Bank of the Mississippi River Hurricane Surge Protection, New Orleans Vicinity, Implementation, Funding, Jefferson Parish, LA.

Summary: EPA maintains its previous position that the V-levee south plan would result in unacceptable degradation to nationally significant environmental resources and reiterated that construction by the COE within the Bayou aux Carpes site is unauthorized and prohibited as set forth in the Agency's section 404 C Determination of October 1985. EPA continues to stress that more environmentally acceptable alternatives to accomplish the planning objectives of the proposed hurricane protection are available. EPA does not object to the V-levee north and/or would support the Modified Development Area Plan.

ERP No. F-ERA-B08002-00, New Hampshire/Hydro-Quebec 450 kV Transmission Line, Interconnection Phase II, Construction and Operation, 404 Permit, Amendment to Presidential Permit PP-76, Town of Monroe, New Hampshire and Town of Groton, MA.

Summary: EPA has no objections to the proposed project at this time. However, EPA will continue to pursue measures to reduce impacts to special aquatic sites, and to pursue compensatory wetland mitigation for unavoidable wetland impacts. EPA believes that efforts to reduce wetland impacts and develop adequate wetland mitigation can be concluded to our mutual satisfaction during the ongoing 404 Permit review process.

ERP No. F-FHW-F40285-MN, MN-Forest Highway-11 Construction, St. Louis CSAH-10 and St. Louis CR-565 in Hoyt Lake to TH-61 in Silver Bay, 404 Permit, Funding, Lake and St. Louis Counties, MN.

Summary: While EPA normally recommends that the alternative impacting or taking the least amount of wetlands be the one chosen for implementation. We would consider the preferred alignment acceptable as long as adequate mitigation for wetlands losses is incorporated into the final project design. Because EPA will be involved in reviewing the Section 404 permit application for this project, the ROD should stipulate that EPA will be involved in the development of the plans for wetlands mitigation.

ERP No. F-OSM-L01005-WA, Black Diamond Petition Area, Designation of Lands Suitable for Surface Coal Mining Operations, King County, WA.

Summary: Review of the final EIS has been completed and the project found to be satisfactory. EPA made no formal comments.

ERP No. F-SFW-L64037-AK, Innoko National Wildlife Refuge, Comprehensive Conservation Management Plan, Wilderness Review, Implementation, AK.

Summary: We have no objection to the project as described, based in part, on the assumption that the needed funding will become available to enact necessary management activities.

Dated: December 21, 1987.

William D. Dickerson,

Deputy Director, Office of Federal Acitivites.

Work Group Meeting; Indian Tribes and States; Water Quality Standards

AGENCY: United States Environmental Protection Agency.

ACTION: Work group meeting.

SUMMARY: Pursuant to section 518 of the Water Quality Act of 1987, EPA is authorized to treat Indian Tribes as States for various purposes specified in the Clean Water Act and is required to establish a mechanism to resolve unreasonable consequences arising from Tribes and States adopting differing water quality standards on common bodies of water. EPA will hold a work group meeting to discuss its proposed regulatory revision to establish such a dispute resolution mechanism.

DATE: January 26, 1988, EPA Regional Office, 999 18th St., Denver, Colorado, Rocky Mountain Room. The meeting will begin at 8:30 a.m.

FOR FURTHER INFORMATION CONTACT: Information on the meeting and copies of the material to be discussed are available from David K. Sabock, Chief, Standards Branch, WH-585, Office of Water Regulations and Standards, 401 M Street SW., Washington, DC 20460. Telephone number is 202-475-7315.

Edmund Notzon,

Director, Criteria and Standards Division.

EXPORT-IMPORT BANK OF THE UNITED STATES

[Public Notice 9]

Agency Forms Submitted for OMB Review

AGENCY: Export-Import Bank of the United States.

ACTION: In accordance with the provisions of the Paperwork Act of 1980, Eximbank has submitted a proposed collection of information in the form of a survey to the Office of Management and Budget for Review.

Purpose: The proposed Annual Competitiveness Report Survey of Exporters and Bankers as authorized by 12 U.S.C. 635(b), Export-Import Bank of the U.S. Act of 1945, as amended, is to be completed by U.S. banks and exporters familiar with Eximbank's programs as a means of evaluating the private sector's view on the extent to which Eximbank has provided export credit programs competitive with the export credit programs offered by the major foreign OECD governments.

The collection of the information will enable Eximbank to assess and report to the U.S. Congress the private sector's view of its programs' competitiveness, as required by law.

SUMMARY: The following summarizes the information collection proposal submitted to OMB:

(1) *Type of request:* revision.

(2) *Number of forms submitted:* one.

(3) *Form number:* EIB No. 85-3 (Rev. 12/87).

(4) *Title of information collection:* Annual Competitiveness Report Survey to Exporters and Bankers.

(5) *Frequency of use:* annual.

(6) *Respondents:* commercial banks and exporters in the United States.

(7) *Estimated total number of responses:* 80.

(8) *Estimated total number of hours needed to fill out the form:* 60.

Additional Information or Comments: Copies of the proposed survey may be obtained from Helene Wall, Agency Clearance Officer (202) 566-8111. Comments and questions should be directed to Francine Picoult, Office of Management and Budget, Information and Regulatory Affairs, Room 3235, Washington, DC 20503, (202) 395-7340. All comments should be submitted within two weeks of the date of this notice; if you intend to submit comments but are unable to meet this deadline, please advise Francine Picoult by telephone that comments will be submitted late.

Dated: December 2, 1987.

Helene Wall,

Agency Clearance Officer.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for clearance in accordance with the Paperwork Reduction Act (44 U.S.C. Ch. 35).

Type: Extension of 3067-0044.

Title: Request for Grant-in-Lieu.

Abstract: This form is designed to standardize the information requirements for an applicant who decides to receive a grant-in-lieu for damages.

Type of Respondents: State or local governments, Non-profit institutions.
Number of Respondents: 500.
Burden Hours: 500.
Frequency of Recordkeeping or Reporting: On occasion.

Copies of the above information collection request and supporting documentation can be obtained by calling or writing the FEMA Clearance Officer, Linda Shiley, (202) 646–2624, 500 C Street SW., Washington, DC 20472.

Comments should be directed to Francine Picoult, (202) 395–7231, Office of Management and Budget, 3235 NEOB, Washington, DC 20503 within two weeks of this notice.

Wesley C. Moore,
Director, Office of Administrative Support.

FEDERAL MARITIME COMMISSION

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202–005200–053
Title: Pacific Coast European Conference
Parties: Compagnie Generale-Maritime
Hapag-Lloyd AG
Incotrans B.V.
Johnson Scanstar
Sea-Land Service, Inc.
Synopsis: The proposed amendment would clarify that no member line may enter into any loyalty contract in the agreement trade whether through independent action or otherwise.

Agreement No.: 202–009735–020
Title: Steamship Operators Intermodal Committee
Parties:
Associated Container Transportation (Australia Ltd.)
Barber Blue Sea Line
Companhia de Navegacao Maritima Netumar
Coordinated Caribbean Transport, Inc.
Evergreen Marine Corp., Ltd.
Farrell Lines, Inc.
Flota Mercante Grancolombiana
Hamburg-Suedamerikknische-Dampfschiffahrts-Gesellschaft
Japan Line, Ltd.
Kawasaki Kisen Kaisha, Ltd.
Lykes Bros. Steamship Co., Inc.
A.P. Moller-Maersk Line
Neptune Orient Lines Ltd.
Nippon Yusen Kaisha, Ltd.
Sea-Land Service, Inc.
South African Marine Corp.
Venezuelan Line
Yamashita-Shinnihon Steamship Co. Ltd.
Yang Ming Line
Zim Israel Navigation Co. Ltd.
American President Lines, Ltd.
Mitsui O.S.K. Lines, Ltd.
Showa Line, Ltd.
Trans Freight Lines
Atlantic Container Line (BV)
Synopsis: The proposed amendment would delete United States Lines, Inc. as a party to the agreement.

Agreement No.: 212–010320–016
Title: Brazil/U.S. Gulf Ports Agreement
Parties:
Companhia de Navegacao Lloyd Brasileiro
Companhia Maritima Nacional
American Transport Lines, Inc.
Empresa Lineas Maritimas Argentinas S.A.
A. Bottacchi S.A. de Navegacion C.F.I.I.
Transportacion Maritima Mexicana S.A.
Synopsis: The proposed amendment would provide for a 15 month pool period beginning October 1, 1987 through December 31, 1988, and would establish minimum sailing and port call requirements for the pool period. It would also extend toDecember 31, 1988, provisions governing the accounting for U.S. Gulf cargoes under alternate coast service, and certain cargo and accounting provisions related thereto. The parties have requested a shortened review period.

Agreement No.: 203–011160
Title: U.S.-North Europe Compliance Agreement
Parties:
Atlantic Container Line BV
Compagnie Generale Maritime
Dart-ML, Ltd.
Gulf Container Line "GCL" BV
Hapag-Lloyd A.G.
Johnson Scanstar
Nedlloyd Lijnen
Pacific Europe Express
P & OCL "Trans Freight Lines" Limited
Polish Ocean Lines
Sea-Land Service, Inc.
South Atlantic Cargo Shipping NV
Synopsis: The proposed agreement would provide for neutral body policing of the activities of the parties in the trades between the United States and Northern Europe. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.
Dated: December 21, 1987.
Joseph C. Polking,
Secretary.
[FR Doc. 87–29541 Filed 12–23–87; 8:45 am]
BILLING CODE 6730–01–M

Agreements Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200076.
Title: Port Everglades Terminal Agreement.
Parties:
Port Everglades Authority
SeaEscape Limited (SeaEscape)
Synopsis: The proposed agreement would (1) provide SeaEscape port and terminal facilities on a preferential basis for the operation of its cruise vessel; and (2) authorize the parties to agree upon charges to be assessed for the terminal services.

Agreement No.: 224–200077.
Title: Virginia International Terminals' Agreement.
Parties:
Virginia International Terminals, Inc.
Mitsui O.S.K. Lines, Ltd.
Nippon Yusen Kaisha
Yamashita-Shinnihon Steamship Co., Ltd.
Synopsis: The proposed agreement provides for non-exclusive use of terminal facilities and for specified reduced wharfage, dockage and crane rental rates in return for certain threshold tonnage levels.

Joseph C. Polking,
Secretary.
Dated: December 21, 1987.

FEDERAL RESERVE SYSTEM

Harris Bankshares, Inc.; Formation of, Acquisition by, or Merger of Bank Holding Companies

The company listed in this notice has applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.24) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that application or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Comments regarding this application must be received not later than January 15, 1988.

A. **Federal Reserve Bank of Dallas** (W. Arthur Tribble, Vice President), 400 South Akard Street, Dallas, Texas 75222:

1. *Harris Bankshares, Inc.*, Milford, Texas; to become a bank holding company by acquiring 100 percent of the voting shares of Ellis County State Bank, Milford, Texas.

Board of Governors of the Federal Reserve System, December 18, 1987.
James McAfee,
Associate Secretary of the Board.
[FR Doc. 87–29430 Filed 12–23–87; 8:45 am]
BILLING CODE 6210–01–M

Valley Bancorporation; Application To Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage de novo, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than January 4, 1988.

A. **Federal Reserve Bank of Chicago** (David S. Epstein, Vice President), 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Valley Bancorporation*, Appleton, Wisconsin; to engage *de novo* in underwriting, as reinsurer, home mortgage redemption insurance pursuant to section 225.25(b) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, December 18, 1987.
James McAfee,
Associate Secretary of the Board.

FEDERAL TRADE COMMISSION

Performance Review Board; Membership

AGENCY: Federal Trade Commission.
ACTION: Notice of appointment.

SUMMARY: Notice is hereby given that the Chairman of the Federal Trade Commission has made appointments to the agency's Performance Review Board, which makes recommendations to the appointing authority on the performance of senior executives in the agency. The individuals appointed are:

Deputy Executive Director for Management, Office of the Executive Director;
Deputy Director for Operations and Consumer Protection, Bureau of Economics;
Deputy Director for Mergers and Administration, Bureau of Competition;
Deputy General Counsel, Office of the General Counsel; and
Deputy Director, Bureau of Consumer Protection.

DATE: This action is effective as of December 23, 1987.

ADDRESS: Copies of the appointment documentation are available at the following location: Division of Personnel, Federal Trade Commission, Room 151–H, 6th & Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Rosemarie A Straight, Director of Personnel, at the address above; telephone 202/326–2022, (FTS) 676–2022.

Emily H. Rock,
Secretary.

Centers for Disease Control

Interagency Committee on Smoking and Health; Meeting

Action: Notice of meeting.

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix 2), the Centers for Disease Control announces the following committee meeting.

Name: Interagency Committee on Smoking and Health.

Time and Date: 9:00 am–4:00 pm—February 18, 1988.

Place: Room 503–A, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201.

Status: Open.

Purpose: The Interagency Committee on Smoking and Health advises the Secretary, Department of Health and Human Services, and the Assistant Secretary for Health on the: (a) Coordination of all research and education programs and other activities within the Department and with other Federal, State, local and private agencies, and (b) establishment and maintenance of liaison with appropriate private entities, Federal agencies, and State and local public health agencies, with respect to smoking and health activities.

Agenda: The entire meeting will be open to the public. It will include a discussion of the issue of tobacco and United States trade policy. Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Substantive program information as well as summaries of the meeting and roster of Committee members may be obtained from John Bagrosky, Executive Secretary, Interagency Committee on Smoking and Health, Park Building, Room 1–10, 5600 Fishers Lane, Rockville, Maryland 20857,Telephone: FTS: 443–1575; Commercial: 301/443–1575.

Dated: December 8, 1987.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160–18–M

Public Meeting Between Centers for Disease Control (CDC) and the Cruise Ship Industry, Private Sanitation Consultants, and Other Interested Parties

Time and Date: 9:00 a.m.—Wednesday, January 20, 1988.

Place: Federal Building, 26 Federal Plaza, Room 305C, New York, New York.

Status: Open to the public for participation, comment, and observation, limited only by space available.

SUPPLEMENTARY INFORMATION: As part of the revised Vessel Sanitation Program. CDC announced its intention to conduct quarterly public meetings with members of the cruise ship industry, private sanitation consultants, and other interested parties. This meeting is a continuation of that series of public meetings.

Matters To Be Considered: Experience to date with the operation of the Vessel Sanitation Program. Analysis of data relating to diarrheal illness occurring on board passenger cruise ships during the period 1975–1985.

For a period of 12 days following the meeting, through February 1, 1988, the official record of the meeting will remain open so that additional material or comments may be submitted to be made part of the record of the meeting.

Contact Person for More Information: Vernon N. Houk, M.D., Director, Center for Environmental Health and Injury Control, CDC, Atlanta, Georgia 30333. Telephones: FTS; 236–4111; Commercial: (404) 488–4111.

Dated: December 18, 1987.

Elvin Hilyer,

Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160–18–M

Public Health Service

National Commission on Orphan Diseases; Public Hearing and Public Meeting

AGENCY: Office of the Assistant Secretary for Health, HHS.

ACTION: Notice.

SUMMARY: The Department of Health and Human Services (DHHS) and the Office of the Assistant Secretary for Health are announcing a hearing and meeting of the National Commission on Orphan Diseases scheduled on February 4 and 5, 1988, respectively.

DATE: *Date, time and place:* Public Hearing on February 4, 1988 at 8:30 a.m., Section E, Reunion Ballroom; Commission meeting on February 5, 1988, 8:30 a.m., Bryan Room; Hyatt Regency at Reunion, 300 Reunion Blvd., Dallas, TX 75207. The entire proceedings are open to the public.

FOR FURTHER INFORMATION CONTACT: Written requests to participate in the public hearing should be sent to: Mary C. Custer, Ph.D., Executive Secretary, National Commission on Orphan Diseases, Office of the Assistant Secretary for Health, 5600 Fishers Lane, Room 18–38, Rockville, MD 20857, 301–443–6156. Persons desiring more information regarding the responsibilities and activities of the Commission should contact Stephen C. Croft, Pharm. D., Executive Director, National Commission on Orphan Diseases, at the same address and phone number.

Agenda: Open Public Hearing (February 4)

The Commission has identified a series of issues and questions to be addressed at the public hearings. These issues were published in the Federal Register notice announcing the Commission's first public hearing (52 FR, page 23083, June 17, 1987). Copies of these issues may be obtained from the contact persons listed above.

Persons desiring to make oral presentations that address these issues should notify either of the contact persons before January 25, 1988 and submit a written copy of the statement to be presented to the Commission. Oral presentations will be limited to ten minutes. Longer presentations should be summarized orally and submitted in writing in their entirety. Any person attending the hearing who did not request an opportunity to speak in advance may be allowed to make an oral presentation at the conclusion of the hearing, if time permits, at the chairperson's discretion.

Persons who are not able to attend the public hearing, but want to submit information, may do so in writing. These statements should be forwarded to the Executive Secretary.

Agenda: Open Public Meeting (February 5)

The Commission will discuss the activities of the National Center for Toxicological Research in relation to pre-clinical trials for potential orphan drugs. The Commission will also hear reports from workgroups on the liability issue and the peer review process for grant applications in the Federal sector. Other workgroups established to review the rare disease research activities of drug and medical device manufacturers, voluntary support groups, and private foundations will also present reports on their progress in obtaining information about their respective areas.

SUPPLEMENTARY INFORMATION: Meetings of the Commission will be conducted, as far as it is practical, in accordance with the agenda published in this **Federal Register** notice. Any changes in the agenda will be announced at the beginning of the meeting.

Persons interested in specific agenda items may contact Mary Custer, Ph.D., Executive Secretary of the Commission, for the approximate time of discussion.

A list of Commission members and the charter of the Commission will be available at the meeting. Interested persons who are unable to attend the meeting may request this information or summary minutes of the meeting from the Executive Secretary.

This notice is issued under 10(a) (1) and (2) of the Federal Advisory Committee Act, Pub. L. 92–463 (5 U.S.C. Appendix I).

Dated: December 17, 1987.

Robert E. Windom,

Assistant Secretary for Health.

[FR Doc. 87–29537 Filed 12–23–87; 8:45 am]

BILLING CODE 4160–17–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

Emergency Closure of Public Lands; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of emergency closure of public lands.

SUMMARY: Notice is hereby given that effective immediately all public lands in the SW¼, SW¼ of Section 30, T.5S., R.33E., MDM, located within the fenced exclosure at BLM Spring in the Fish Slough Area of Critical Environmental Concern are closed to swimming and related aquatic activities. The authority for this closure is 43 CFR 8365.1–6. The closure will remain in effect until further notice.

FOR FURTHER INFORMATION CONTACT: James S. Morrison, Area Manager, 873 N. Main Street, Suite 201, Bishop, CA 93514, (619) 872–4881.

Date: December 15, 1987.

Nancy J. Cotner,

Associate District Manager.

[FR Doc. 87–29444 Filed 12–23–87; 8:45 am]

BILLING CODE 4310–45–M

[CA–067–08–4352–12]

Emergency Closure of Public Lands; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Closure notice for public lands in the San Sebastian Marsh/San Felipe Creek Area of Imperial County, California.

SUMMARY: This closure notice affects public lands under the administrative responsibility of the El Centro Resource Area, California Desert District. The area includes public lands in:

San Bernardino Meridian

T. 12 S., R. 9 E.
- Sec. 24, north and east of Tarantula Wash excluding the pole line road

T. 12 S., R. 10 E.
- Sec. 14, S½
- Sec. 18, S½
- Sec. 20
- Sec. 22
- Sec. 24
- Sec. 26, north of Kane Spring Road
- Sec. 28
- Sec. 30
- Sec. 32

T. 12 S., R. 11 E.
- Sec. 18, S½
- Sec. 20, southwest of Highway 86 and northwest of Kane Spring Road
- Sec. 30, north of Kane Spring Road

T. 13 S., R. 9 E.
- Sec. 3, north of Kane Spring Road

The above listed public lands are hereby closed to vehicle use and vehicular camping. Persons exempt from this order include law enforcement personnel, and other State or Federal employees in the performance of their official duties.

A smaller closure has been in effect in this area since November 1, 1974. The closed area is being enlarged because the smaller closure has not been adequate in limiting impacts to sensitive biological and cultural resources. Since the 1974 closure, the status of three wildlife species of concern has become increasingly precarious. The desert pupfish has been listed by the U.S. Fish and Wildlife Service as Endangered, with designated Critical Habitat at the San Felipe Creek area. The flat-tailed horned lizard and Colorado Desert fringe-toed lizard have become candidates for USFWS listing. Vehicle use within this sensitive area has increased significantly to unacceptable levels, negatively impacting fish and wildlife habitat as well as individual desert pupfish in contravention of the Bureau's mandates under the Endangered Species Act. The closure boundary is therefore expanded to provide greater protection to sensitive biological resources. Additionally, exceptional cultural resource values have been identified in this area since the 1974 order. Closure to vehicle use and vehicular camping will also limit impacts to cultural resources.

A permanent closure is proposed under the 1987 California Desert Conservation Area Plan amendment process. The effects of this closure are analyzed on pages 4–16 and 4–17 of the Environmental Assessment prepared to support the amendment process.

The closure is being expanded under the authority of 43 CFR 8341.2(a) and 43 CFR 8364.1(a). This closure order was effective December 14, 1987, and shall remain in effect until a final determination has been made through the Desert Plan amendment process. Boundaries of the affected lands have been posted with "Closed Area" signs. Maps showing the location of the

closure are available from the El Centro Resource Area, 333 S. Waterman Avenue, El Centro, California 92243. Any person who knowingly and willfully violates this closure order may be subject to a fine of up to $1,000.00, or imprisonment of up to 12 months, or both under the authority of 43 CFR 8340.0–7 and 43 CFR 8360.0–7

FOR FURTHER INFORMATION CONTACT: California State Office, Bureau of Land Management, 2800 Cottage Way, Room E–2841, Sacramento, California 95825, 916–978–4743, or the Area Manager, El Centro Resource Area, Bureau of Land Management.

H.W. Riecken,

Acting District Manager.

[FR Doc. 87–29445 Filed 12–23–87; 8:45 am]

BILLING CODE 4310–40–M

[MT–921–08–4121–10]

Deactivation of Fort Union Federal Coal Production Region; Request for Public Comment

ACTION: Request for public comment on proposal to deactivate the Fort Union Federal Coal Production Region.

SUMMARY: The Fort Union Regional Coal Team (RCT) requests comments on their recommendation to operate in a Lease by Application mode by January 29, 1988. On November 9, 1979, in the **Federal Register**, the Bureau of Land Management (BLM) established the Fort Union Coal Production Region for management of federally-owned coal (44 FR 65198–65197). Recent assessments by the RCT indicate that existing market conditions do not justify the federally-initiated coal lease sale program procedures of 43 CFR 3420.3–3420.6 Activity Planning—The Leasing Process. On November 5, 1987, the RCT voted to recommend operating in a Lease by Application mode using 43 CFR Part 3425—Leasing on Application Procedures. Before the RCT can operate in a Lease by Application mode, the Fort Union Federal Coal Production Region must be deactivated.

ADDRESS: Comment regarding the RCT's recommendation to operate in a Lease by Application mode should be sent to William J. Frey, Bureau of Land Management, P.O. Box 36800, Billings, MT 59107.

FOR FURTHER INFORMATION CONTACT: William J. Frey, Telephone (406) 657–6841, or FTS 585–6841, Montana State Office, Bureau of Land Management, P.O. Box 36800, Billings, MT 59107.

SUPPLEMENTARY INFORMATION: Comments received by January 29, 1988, will be reviewed and considered by the Fort Union RCT prior to submitting the final recommendations on whether or not to deactivate the Fort Union Coal Production Region. Deactivation of the region will allow the RCT to operate in a Lease by Application mode. The Fort Union Federal Coal Production Region was established by the BLM on November 9, 1979, together with a number of other regions, to implement competitive coal leasing under regulations contained in 43 CFR Part 3420. The Fort Union Coal Region includes the following counties:

Montana

Carter, Custer, Daniels, Dawson, Fallon, Garfield, McCone, Prairie, Richland, Roosevelt, Sheridan, Valley, Wibaux.

North Dakota

Adams, Billings, Bowman, Burke, Burleigh, Divide, Dunn, Golden Valley, Grant, Hettinger, McHenry, McKenzie, McLean, Mercer, Morton, Mountrail, Oliver, Renville, Sheridan, Slope, Stark, Ward, Williams.

The RCT considered current and projected market conditions, potential for emergency leasing, level of industrial interest, and administrative efficiencies prior to making its recommendations not to continue the regional level of activity planning. Production forecasts, as shown in the Fort Union Long Range Coal Market Analysis, range from 24 to 31 million tons annually by the year 2000.

Year	Production estimates [1]		Productive capacity estimates [1]	
	Low	High	Low	Maximum
1990	22	25		
1995	23	28	32	32
2000	24	31	34.4	40.8

[1] Millions of tons annually.

The analysis concluded that the productive capacity may be adequate to meet the demand for Fort Union coal at least through 1995, assuming no significant increases occur in coal demand.

Public comments were solicited on the Long Range Market Analysis through the **Federal Register** of September 17, 1987, and a public mailing. Six letters of comment were received from the solicitation. None of the comments challenged the conclusion of the market analysis.

Administrative efficiencies would be enhanced by shifting to the Lease by Application mode. A round of activity planning beginning with a call for expression of leasing interest, and ending with a regional coal lease sale, would take up to 36 months to complete. The processing of a lease application through a lease sale would take about 12 months. A similar savings in preparation cost would be expected.

The Montana State Office reviewed the likely need for emergency leasing of federal coal for existing mines during the next 5 years. It is possible that up to three emergency coal leasing applications could be made containing an estimated 12 million tons of recoverable coal. If emergency lease applications were received, they would likely be for the purpose of preventing the bypass of federal coal for existing mining operations.

If coal market conditions change, and interest in leasing of federal coal is renewed in the region, the coal team has the option of reactivating the Fort Union Federal Coal Production Region. Activity planning, as described in 43 CFR 3420.3–3420.6, would be initiated.

Deactivating the Fort Union Federal Coal Production Region would allow the leasing of federal coal by the Lease by Application procedures in 43 CFR Part 3425—Leasing on Application. In addition, as described in Section c. of the Fort Union Regional Coal Team Charter, the Fort Union Coal Team would review all leasing applications, preference right lease applications and exchange proposals, and call RCT meetings, as necessary, to fully and openly discuss and make recommendations on any that appear to have significant regional implication.

The RCT and those on the Fort Union Coal Region mailing list interested in receiving a notice will receive a notification that an application to lease or exchange Federal coal has been received. Any comments received on the need for an RCT meeting will be analyzed and sent to the RCT members. Within 14 days after issuance of comments to the RCT members, the chairperson (or designated representative) will contact the RCT members to determine if, and when, an RCT meeting is needed. It may not be necessary to convene an RCT meeting on every coal lease application, especially those that do not have regional implications such as small emergency lease applications. At the request of a voting member of the RCT, an RCT meeting will be called.

On activities that appear to have significant regional implications, the coal team would solicit and consider, to the maximum extent possible, the views of the public at each decision point.

The team would guide the preparation of EISs on coal leasing actions that appear to have significant regional implications.

On an annual basis, the team would review market assessments prepared by the Bureau and recommend whether the region should return to a regional activity planning mode.

Ray Brubaker,

Acting State Director.

BILLING CODE 4310–DS–M

[CO–050–4332–09]

Availability of Final Environmental Impact Statement for Canon City District, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability of Final Environmental Impact Statement (EIS) on the Wilderness Recommendations for the Canon City District, Colorado.

SUMMARY: This EIS assesses the environmental consequences of managing seven wilderness study areas (WSAs) as wilderness or nonwilderness. The alternatives analyzed included: (1) An All Wilderness alternative for each WSA; (2) No Wilderness/No Action alternative for each WSA; (3) one or more Partial Wilderness alternatives for each WSA except Browns Canyon (CO–050–002). The names of the WSAs analyzed in the EIS, their total acreage, and the proposed action for each are as follows:

Area	Suitable	Nonsuitable
Browns Canyon (CO–050–002)	6,914	0
McIntyre Hills (CO–050–013)	0	15,800
Lower Grape Creek (CO–050–014)	0	11,220
Beaver Creek (CO–050–016)	20,790	5,460
Upper Grape Creek (CO–050–017)	0	10,200
Sand Castle (CO–050–139)	0	1,644
San Luis Hills (CO–050–141)	0	10,240
Total	27,364	55,304

The Bureau of Land Management wilderness proposals will ultimately be forwarded by the Secretary of the Interior to the President and from the President to the Congress. The final decision on wilderness designation rests with Congress. In any case, no decision on these proposals can be made by the Secretary during the 30 days following the filing of this EIS. This complies with the Council on Environmental Quality Regulations, 40 CFR 1506.10B(2).

SUPPLEMENTARY INFORMATION: A limited number of individual copies of the EIS may be obtained from the District Manager, Canon City District, P.O. Box 311, 3170 East Main Street, Canon City, Colorado 81212. Copies are also available for inspection at the following locations: Department of the Interior, Bureau of Land Management, 18th and C Street NW., Washington, DC 20240, and Bureau of Land Management, Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215.

FOR FURTHER INFORMATION CONTACT: Donnie Sparks, District Manager, Canon City District, P.O. Box 311, 3170 East Main Street, Canon City, Colorado 81212.

Date: December 16, 1987.

Bruce Blanchard,

Director, Office of Environmental Project Review.

BILLING CODE 4310–JB–M

[MT–930–08–4332–09]

Availability of Final Environmental Impact Statement for Missouri Breaks Wilderness Recommendations; Miles City and Lewistown Districts, MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Final Missouri Breaks Wilderness Environmental Impact Statement assesses the environmental consequences of managing 12 Wilderness Study Areas as wilderness or nonwilderness. The alternatives assessed include: (1) A "No Wilderness Alternative" for each Wilderness Study Area, (2) an "All Wilderness Alternative" for each Wilderness Study Area, and (3) a "Partial Wilderness Alternative" for 5 of the Wilderness Study Areas.

The names of the Wilderness Study Areas, their total acreages, and the proposed actions for each are as follows:

- Dog Creek South—5,150 acres (all nonsuitable)
- Stafford—4,800 acres (all nonsuitable)
- Ervin Ridge—10,200 acres (all nonsuitable)
- Woodhawk—8,100 acres (all nonsuitable)
- Cow Creek—34,050 acres (21,590 acres suitable; 12,460 acres nonsuitable)
- Antelope Creek—12,350 acres (9,600 acres suitable; 2,750 acres nonsuitable)
- Bridge Coulee—5,900 acres (all nonsuitable)
- Musselshell Breaks—8,650 acres (all nonsuitable)
- Billy Creek—3,450 acres (all nonsuitable)
- Seven Blackfoot—20,250 acres (5,710 acres suitable; 14,540 acres nonsuitable)
- Burnt Lodge—13,730 acres (all suitable)
- Terry Badlands—42,950 acres (28,520 acres suitable; 14,430 acres nonsuitable)

The Bureau of Land Management wilderness proposals will ultimately be forwarded by the Secretary of the Interior and the President to Congress. The final decision on wilderness designation rests with Congress.

California; Proposed Reinstatement of Terminated Oil and Gas Lease

Under the provisions of Pub. L. 97–451, a petition for reinstatement of oil and gas lease CA 15657 for lands in Los Angeles County, California, was timely filed and was accompanied by all required rentals and royalties accruing from February 1, 1987, the date of termination.

No valid lease has been issued affecting the lands. The Lessee has agreed to new lease terms for rentals and royalties at rates of $5.00 per acre and 16⅔ percent, respectively. Payment of a $500.00 administrative fee has been made.

Having met all the requirements for reinstatement of the lease as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease effective February 1, 1987, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above, and the reimbursement for cost of publication of this notice.

Kurt T. Mueller,

Acting Chief, Leasable Minerals Section, Branch of Adjudication and Records.

Date: December 17, 1987.

Conveyance and Order Providing for Opening of Public Land; MT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This notice and order will open certain lands and minerals that were reconveyed to the United States in an exchange completed pursuant to the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 *et seq.*) (FLPMA) to the operation of the public land laws, the mineral leasing laws and the mining laws as appropriate. It will also inform the public and interested local governmental officials of the issuance of the patent.

EFFECTIVE DATE: 9 a.m. on February 10, 1988.

FOR FURTHER INFORMATION CONTACT: Edward H. Croteau, BLM MT State Office, P.O. Box 36800, Billings, Montana 59107, 406–657–6062.

SUPPLEMENTARY INFORMATION: 1. Notice is hereby given that pursuant to sec. 206 of FLPMA, the following described surface and mineral estate was transferred to the State of Montana:

Principal Meridian, Montana

T. 11 N., R. 11 W.,
Sec. 14, lot 1;
Sec. 22, N½, NW¼SW¼, NE¼SE¼.
T. 8 N., R. 15 W.,
Sec. 21, W½SW¼, SE¼SE¼;
Sec. 28, E½NE¼.
T. 11 N., R. 16 W.,
Sec. 4, SW¼SW¼.
T. 12 N., R. 17 W.,
Sec. 13, lots 1, 2, 3, 5, 6, 8, 9, NW¼NE¼, NE¼NW¼, W½W½, SE¼SW¼, SW¼SE¼.
Sec. 24, lots 6, 7, NW¼.

2. The following described surface estate and all minerals except oil and gas were also transferred to the State of Montana:

Principal Meridian, Montana

T. 8 N., R. 15 W.,
Sec. 5, lots 2, 3, 4, S½NW¼, SW¼, W½SE¼;
Sec. 8, all;
Sec. 17, W½E½, W½.
T. 12 N., R. 15 W.,
Sec. 21, N½N½.

Upon termination or relinquishment of the existing oil and gas leases on the lands described in paragraph 2, all rights and interests to the oil and gas deposits shall automatically vest in the State of Montana, its successors or assigns.

Total acreage patented (paragraphs 1 and 2): 3,210.57 acres.

3. In exchange for the above selected land, the United States acquired the following described surface and mineral estate:

Principal Meridian, Montana

T. 13 N., R. 12 W.,
Sec. 16, lots 1, 2, 3, E½, S½NW¼, SW¼.
T. 13 N., R. 13 W.,
Sec. 16, all;
Sec. 36, lots 1–7, W½NE¼, NW¼, N½SW¼, NW¼SE¼.
T. 14 N., R. 13 W.,
Sec. 36, all.

A total of 3,189.79 acres of surface and mineral estate was acquired by the United States in this exchange.

4. Also, the following described land was segregated from location under the mining laws by the Notice of Proposed Exchange published in the **Federal Register** on July 31, 1986 (51 FR 27467):

Principal Meridian, Montana

T. 8 N., R. 15 W.,
Sec. 21, NE¼SE¼.

The land was not used in the exchange and the segregation from mining is no longer necessary. At 9 a.m. on February 10, 1988, the land will be opened to location and entry under the United States mining laws. See paragraph No. 7 below.

5. The values of Federal public land and the non-Federal land in the exchange were appraised at $2,260,000 each.

Opening Dates

6. At 9 a.m. on February 10, 1988, the lands described in paragraph 3 above will be opened to the operation of the public land laws generally, location and entry under the United States mining laws and to application and offers under the mineral leasing laws, subject to valid existing rights and the requirements of applicable law. All valid applications received under the public land laws at or prior to 9 a.m. on February 10, 1988, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

All valid offers under the mineral leasing laws received from 9 a.m. on February 3, 1988, to 9 a.m. on February 10, 1988 for the lands described in paragraph 3, will be considered as simultaneously filed on the opening date. Those received thereafter shall be considered in the order of filing. Those offers received prior to 9 a.m. on February 3, 1988, will be rejected.

7. Appropriation of any of the lands described in paragraphs 3 and 4 under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, shall vest no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

James Binando,

Acting Deputy State Director, Division of Lands and Renewable Resources.

December 17, 1987.

Realty Action; Public Land Classification; Mohave County, AZ

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action; classification for recreation and public purposes, Mohave County, Arizona.

SUMMARY: The following public land has been examined and found suitable for lease and subsequent conveyance under the provisions of the Recreation and Public Purpose (R&PP) Act of June 14, 1926, as amended (44 Stat. 741; 43 U.S.C. 869 et seq.).

Gila and Salt River Meridian

T. 21 N., R. 18 W.,
Sec. 8, NE¼SE¼NE¼NE¼.
Containing 2.5 acres, more or less.

The classification shall become effective sixty (60) days after the publication of this notice in the **Federal Register.**

The proposed use of the public land is for an American Legion Post.

A lease with the option to patent shall be offered to the American Legion. The lease and patent will be subject to the following conditions:

1. Provisions of the Recreation and Public Purposes Act and to all applicable regulations of the Secretary of the Interior.

2. A right-of-way (R/W) for ditches and canals constructed by the authority of the United States.

3. All minerals shall be reserved to the United States, together with the right to prospect for, mine and remove the minerals.

4. Mohave County Planning and Zoning regulations.

5. Those rights for public roadway purposes granted to Mohave County by R/W A–17931.

Detailed information concerning these terms and provisions is available for review at the Kingman Resource Area Office, 2475 Beverly Avenue, Kingman, Arizona 86401.

Publication of this notice shall segregate the land from all appropriations under the public land laws including location under the mining laws but not from appropriations under the mineral leasing laws, the R&PP Act or Title V of the Federal Land Policy and Management Act of 1976.

For a period of forty-five (45) days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Henri R. Bisson,

District Manager.

Realty Action; Conveyance of Mineral Interests in California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of segregation; conveyance of the reserved mineral interests.

SUMMARY: The private lands described in this notice will be examined for suitability for conveyance of the reserved mineral interests pursuant to section 209 of the Federal Land Policy and Management Act of October 21, 1976. The mineral interests will be conveyed in whole or in part upon favorable mineral examination.

Serial number—CA 20604

Mount Diablo Meridian

T. 4 S., R. 16 E.,
Sec. 13, SE¼SE¼, SW¼SE¼;
Sec. 24, NE¼NE¼, NW¼NE¼, SE¼NE¼, NE¼SE¼ (fractional).
T. 4 S., R. 17 E.,
Sec. 18, Lots 7 and 8, SE¼SW¼;
Sec. 19, Lots 1 thru 4, Lot 6, E½NW¼, NE¼SW¼.
Acres 600.95.

County Mariposa

Upon publication of this Notice of Segregation in the **Federal Register** as provided in 43 CFR 2720.1–1(b), the mineral interests owned by the United States in the private lands covered by the application shall be segregated to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. The segregative effect of the application shall terminate by publication of an opening order in the **Federal Register** specifying the date and time of opening; upon issuance of a patent or other document of conveyance of such mineral interests; or two years from the date of filing of the application, which ever occurs first.

Date: December 15, 1987.

Realty Action; Sale of Public Land in Cass County, MN; Modified; Competitive Sale ES–37285

AGENCY: Bureau of Land Management, Interior.

ACTION: Sale of Public Land in Cass County, Minnesota—Modified—Competitive Sale ES–37285.

SUMMARY: The following public land has been examined and determined to be suitable for sale under section 203(a)(1) of the Federal Land Policy and Management Act (FLPMA) of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than the appraised fair market value shown below. All minerals shall be reserved to the United States.

Fifth Principal Meridian, Minnesota

T. 136 N., R. 32 W.,
Sec. 06, Lot 4.
Containing 35.74 acres.

Appraised Fair Market Value: $2,700.

Date of Sale: February 24, 1988 at 3:00 PM.

Place of Sale: Milwaukee District Office, Bureau of Land Management, P.O. Box 0631, Milwaukee, Wisconsin 53203–0631.

Minimum Bid and Requirements: The minimum bid is the appraised fair market value of $2,700. Potential purchasers are required to submit 20 percent of their bid as down payment. The bid must be enclosed in a sealed envelope clearly marked "Public Sale ES 37285" on the left hand side of the envelope. The successful high bidder will be allowed 180 days to submit the remainder of the bid price. If the remainder of the bid price has not been received from the successful bidder within the specified time period, the bid deposit will be forfeited. If for any reason the land remains unsold after the specified sale date, the land will remain

available for sale over the counter until sold.

Example: If your bid is $2,700 you must submit 20 percent ($540.00). If your bid is $3,000 you must submit 20 percent ($600.00).

Bidder Qualifications: Purchasers must be citizens of the United States 18 years of age or over; a corporation; State; State instrumentality or political subdivision; or other legal entity, subject to the laws of any state or the United States. The lands are being offered for sale subject to a preference consideration to allow Mr. William Weisbrod, adjacent landowner, to meet the high bid. The sale will be conducted by modified competitive bidding procedures (sealed bid envelope). An apparent high bidder will be declared. The apparent high bidder and the designated bidder, (Mr. Weisbrod) will be notified.

Publication of this notice will segregate the land from all appropriation, including the mining laws, for 270 days, or until issuance of patent, whichever occurs first. For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Milwaukee, Wisconsin.

For Further Information: Detailed information concerning this sale is available at the Milwaukee District Office, Bureau of Land Management, 310 West Wisconsin Avenue, Suite 225, Milwaukee, Wisconsin 53203; or by calling Larry Johnson at (414) 291–4413.

Bert Rodgers,

District Manager.

BILLING CODE 4310-GJ-M

[ES-030-08-4212-14; ES-00157-007]

Realty Action; Sale of Public Land in St. Louis County MN;

AGENCY: Bureau of Land Management, Interior.

ACTION: Sale of Public Land in St. Louis County, Minnesota—Direct Sale Es-37722.

SUMMARY: The following public land has been examined and determined to be suitable for sale under section 203(a)(1) of the Federal Land Policy and Management act (FLPMA) of 1976 (90 Stat. 2750; 43 U.S.C. 1713), at no less than the appraised fair market value shown below. The sale also includes conveyance of the mineral estate under the authority of section 209(b)(1)(1) of FLPMA.

Fifth Principal Meridian, Minnesota

T.62N., R.16W., Section 23, Tract #51 containing .48 acres.

Appraised Fair Market Value: $5,000.

The land described is hereby segregated from appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from the date of publication of this notice, whichever occurs first.

This land is being offered by direct sale to Jerome and Carol Kolstad. It has been determined that the subject parcel contains no known mineral values; therefore, mineral interests may be conveyed simultaneously. Acceptance of the direct sale offer will qualify the purchaser to make application for conveyance of those mineral interests. Patent will be subject to valid existing rights.

For a period of 45 days from the date of publication of this notice in the **Federal Register,** interested parties may submit comments to the District Manager, Milwaukee District, P.O. Box 631, Milwaukee, Wisconsin 53203–0631. In the absence of timely objections, this proposal shall become the final determination of the Department of Interior.

FOR FURTHER INFORMATION: Detailed information concerning this sale is available at the Milwaukee District Office, Bureau of Land Management, 310 West Wisconsin Avenue, Suite 225, Milwaukee, Wisconsin 53203; or by calling Larry Johnson at (414) 291–4413;

Proposed Continuation of Land Withdrawal; Colorado

December 18, 1987.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, U.S. Department of Agriculture, proposes that the order which withdrew lands for an indefinite period of time for various ranger stations be modified and the withdrawal be continued for 20 years insofar as it affects 20 acres of National Forest System land. The land will remain closed to surface entry and mining, but not to mineral leasing.

DATE: Comments should be received on or before March 23, 1988.

ADDRESS: Comments should be addressed to State Director, Colorado State Office, 2850 Youngfield Street, Lakewood, Colorado 80215.

FOR FURTHER INFORMATION CONTACT: Doris E. Chelius, BLM Colorado State Office, (303) 236–1768.

The Forest Service, U.S. Department of Agriculture, proposes that the existing withdrawal made by Secretarial Order dated December 15, 1906, as amended, for an indefinite period of time, be modified to expire in 20 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714, insofar as it affects the following described lands:

Sixth Principal Meridian

Gunnison National Forest

T. 14 S., R. 85 W.,
Sec. 23, SE¼NE¼SW¼, S½NE¼N W¼SW¼, and N½SE¼NW¼SW¼.

The area described aggregates 20 acres in Gunnison County.

The purpose of the withdrawal is for the administration and protection of the Cement Ranger Station. No change is proposed in the purpose or segregative effect of the withdrawal. The land will continue to be withdrawn form surface entry and mining, but not from mineral leasing.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with this proposed action may present their views in writing to this office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be modified and continued and, if so, for how long. Notice of the final determination will be published in the **Federal Register.** The existing withdrawal will continue until such determination is made.

James D. Crisp,

Chief, Branch of Adjudication.

[FR Doc. 87–29528 Filed 12–23–87; 8:45 am]

BILLING CODE 4310-JB-M

[NM-940-08-4220-11; NM 094303]

Proposed Continuation of Withdrawal; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, U.S. Department of Agriculture proposes that a 133.125-acre withdrawal for the Beaverhead Work Center (formerly Beaverhead Administrative Site), Lookout Mountain Lookout (formerly Lookout Mountain Administrative Site) and part of Hillsboro Lookout (formerly Hillsboro Peak Administrative Site) continue for an additional 20 years. The land would remain closed to location and entry under the mining laws and has been and would remain open to leasing under the mineral leasing laws.

DATE: Comments should be received by March 23, 1988.

ADDRESS: Comments and meeting requests should be sent to the New Mexico State Director, BLM, P.O. Box 1449, Santa Fe, New Mexico 87504–1449.

FOR FURTHER INFORMATION CONTACT: Kay Thomas, BLM New Mexico State Office, 505–988–6589.

The Forest Service, U.S. Department of Agriculture proposes that the existing land withdrawal made by Public Land Order No. 2830 of December 3, 1962, be continued for a period of 20 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714. The land is described as follows:

New Mexico Principal Meridian

Gila National Forest, Beaverhead Work Center (formerly Beaverhead Administrative Site)

T. 10 S., R. 12 W.,
Sec. 19, SW¼NE¼SE¼, SE¼NW¼SE¼, W½NW¼SE¼, SW¼SE¼, W½SE¼ SE¼.

The area described contains 100 acres in Catron County.

Hillsboro Lookout (formerly Hillsboro Peak Administrative Site)
T. 16 S., R. 9 W.,
Sec. 4, unsurveyed, if and when surveyed would be that portion of NE¼NW¼ lying outside Aldo Leopold Wilderness Area (Pub. L. 98–550).

The area described contains 13.125 acres in Grant County.

Lookout Mountain Lookout (formerly Lookout Mountain Administrative Site)
T. 11 S., R. 9 W.,
Sec. 18, N½ of Lot 10.

The area described contains 20 acres in Sierra County.

The portion of the Hillsboro Lookout lying outside the Aldo Leopold Wilderness Area, Beaverhead Work Center, and Lookout Mountain Lookout are the minimum size essential to accommodate the administrative sites/lookouts, and there are no necessary buffer zones included. The withdrawal closed the described land to mining but not mineral leasing. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the New Mexico State Director at the address indicated above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether the withdrawal will be continued, and if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register.** The existing withdrawal will continue until such determination is made.

Monte G. Jordan,

State Director.

Dated: November 23, 1987.

BILLING CODE 4310-FB-M

[OR-943-08-4220-11; GP-08-034; OR-7983]

Proposed Continuation of Withdrawal; Oregon

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The National Park Service proposes that a portion of an existing land withdrawal continue for 20 years and requests that the land remain closed to mining. The land has been and would remain open to mineral leasing subject to National Park Service concurrence.

FOR FURTHER INFORMATION CONTACT: Champ Vaughan, BLM, Oregon State Office, P.O. Box 2965, Portland, Oregon 97208, 503–231–6905.

SUPPLEMENTARY INFORMATION: The National Park Service proposes that a portion of the existing land withdrawal made by Public Land Order No. 5226 of July 14, 1972 continue for 20 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land involved is located in the Siskiyou National Forest in T. 40 S., R. 6 W., W.M., Oregon.

The area described contains 20 acres in Josephine County.

The purpose of the withdrawal is to protect the Oregon Caves Administrative Site. The withdrawal currently segregates the land from operation of the mining laws but not the mineral leasing laws. The National Park Service requests no changes in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal continuation may present their views in writing to the undersigned officer at the address specified above.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register.**

The existing withdrawal will continue until such final determination is made.

B. LaVelle Black,

Chief, Branch of Lands and Minerals Operations.

Dated: December 16, 1987.

Fish and Wildlife Service

Receipt of Applications for Permits; Honolulu Zoo, et al

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Honolulu Zoo, Honolulu, HI, PRT-723707

The applicant requests a permit to import one pair of captive born Asian elephants (Elephas maximus) from the Arignar Anna Zoo, Tamil Nadu, South India, for captive breeding purposes and zoological display. The applicant's request to import two female Asian elephants from Burma (PRT-719813) was withdrawn.

Applicant: The Peregrine Fund, Boise, ID, PRT-723408

The applicant requests a permit to import up to 20 live Aplomado falcons (Falco femoralis ssp septentrionalis) taken from the wild in Mexico over a period of two years for the purpose of enhancement of propagation and survival of the species.

Applicant: Dallas Zoo, Dallas, TX, PRT-722701

The applicant requests a permit to import four captive born Round Island boas (Casarea dussumieri) from the Jersey Wildlife Presevation Trust, Jersey, Channel Islands, for enhancement of propagation and exhibition.

Applicant: International Animal Exchange, Ferndale, MI, PRT-723405

The applicant requests a permit to export one pair of Diana guenons (Cercopithecus diana) to the Parque Metropolitano de Santiago, Santiago, Chile, for enhancement of the propagation of the species. The male was imported from Ghana in 1966; the female was born in the United States.

Applicant: Staten Island Zoological Society, Staten Island, NY, PRT-723755

The applicant requests a permit to export one captive born male leopard (Panthera pardus) to the Guadalajara Zoological Park, Guadalajara, Mexico, for enhancement of propagation of the species and public exhibition.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 403, 1375 K. Street NW., Washington DC 20005, or by writing to the Director, U.S. Office of Management Authority, P.O. Box 27329, Central Station, Washington, DC 20038-7329.

Interested persons may comment on any of these applications within 30 days of the date of this publication by submitting written views, arguments, or data to the Director at the above address. Please refer to the appropriate PRT number when submitting comments.

Date: December 16, 1987.

Larry LaRochelle,

Acting Chief, Branch of Permits, U.S. Office of Management Authority.

Minerals Management Service

Development Operations Coordination Document

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Exxon Company, U.S.A. has submitted a DOCD describing the activities it proposes to conduct on Lease OCS-G 2104, Block 295, Eugene Island Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an existing onshore base located at Intracoastal City, Louisiana.

DATE: The subject DOCD was deemed submitted on December 14, 1987.

ADDRESS: A copy of the subject DOCD is available for public review at the Public Inforamtion Office, Gulf of Mexico OCS Region, Minerals Management Service, 1201 Elmwood Park Boulevard, Room 114, New Orleans, Louisiana (Office Hours: 8 a.m. to 4:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Warren Williamson; Minerals Management Service, Gulf of Mexico OCS Region, Field Operations, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Telephone (504) 736-2874.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected local governments, and other interested parties became effective December 13, 1979 (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Date: December 15, 1987.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310-MR-M

Office of Surface Mining Reclamation and Enforcement

Information Collection Submitted to Office of Management and Budget for Review Under Paperwork Reduction Act

The proposal for the collection of information listed below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms and explanatory material may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the requirements should be made within 30 days directly to the Bureau clearance officer and to the Office of Management and Budget Interior Department Desk Officer, Washington, DC 20503, telephone (202) 395-7340.

Title: Permanent Program Performance Standards—Surface Mining Activities 30 CFR 816.

Abstract: Section 515 of Pub. L. 95-87 provides that permittees conducting surface coal mining operations shall meet all applicable performance standards of the Act. This information is used by the regulatory authority in monitoring and inspecting mining activities to ensure that they are conducted in a manner which preserves and enhances environmental and other values of the Act.

Bureau Form Number: None.

Frequency: On occasion, quarterly, and annually.

Description of Respondents: Surface coal mining operators.

Annual Responses: 597,716.

Annual Burden Hours: 266,078.

Bureau clearance officer: David Collegeman (202) 343-5447.

Dated: December 10, 1987.

Carson W. Culp,

Assistant Director for Budget and Administration.

BILLING CODE 7035-01-M

[Ex Parte No. 290 (Sub-No. 5) (88-1)]

Rail Carriers; Quarterly Rail Cost Adjustment Factor

AGENCY: Interstate Commerce Commission.

ACTION: Notice of Approval of Rail Cost Adjustment Factor and Decision.

SUMMARY: The Commission has decided to approve the cost index and Rail Cost Adjustment Factor (RCAF) for the first quarter 1988 filed by the Association of American Railroads (AAR) under the procedures of Ex Parte No. 290 (Sub-No. 2), *Railroad Cost Recovery Procedures.* We have rebased the denominator of the RCAF in order to comply with a provision of the Staggers Rail Act of 1980. Application of the index after forecast error adjustment provides for a first quarter 1988 RCAF of 1.122 before rebasing. The rebased first quarter 1988 RCAF is 1.027. Because there is a bank of credits available to offset a portion of the increase in maximum RCAF rate levels, RCAF rate levels may be increased by a maximum of 4.2 percent over the levels authorized in our decision served October 17, 1986. Since the bank of credits will be exhausted during the first quarter, future maximum RCAF rate levels will rise and fall with the level of the quarterly RCAF.

DATE: Effective January 1, 1988.

FOR FURTHER INFORMATION CONTACT: William T. Bono, (202) 275-7354 or Robert C. Hasek, (202) 275-0938—TDD for hearing impaired (202) 275-1721.

SUPPLEMENTARY INFORMATION: By decision served January 2, 1985 (50 FR 87, January 2, 1985) we outlined the procedures for the calculation of the all inclusive index of railroad input prices and the methodology for the computation of the RCAF. These procedures replaced an interim methodology which was formerly used. AAR is required to calculate the forecasted index on a quarterly basis and submit it on the fifth day of the last month of each calendar quarter.

We have reviewed AAR's calculations of the index for the first

BEST COPY AVAILABLE

VOL 52 ISS 247 DEC 24 1987 UMI

quarter of 1986 and find that these calculations comply with the rules.

In our decision served December 27, 1985, we restated a lump sum payment to certain members of the United Transportation Union by amortizing it over the life of the present union contract with interest calculated using the three-month Treasury Bill rate. We instructed AAR to continue this calculation by amortizing the principal balance over the remaining quarters using the three-month Treasury Bill interest rate available seven days prior to the submission date of the quarterly index. We have verified AAR's lump sum calculations and find that they comply with our instructions.

The Staggers Rail Act of 1980 (Staggers Rail Act) (49 U.S.C. 10707a(2)(B)) requires that the denominator of the RCAF be rebased in the fourth quarter of 1987. Although we have rebased the denominator of the RCAF, we have calculated the authorized increase using RCAF values before rebasing. These "pre-rebasing" values include an adjustment for forecast error occurring during the third quarter of 1987. For the last year there has been a bank of credits available to offset increases in maximum RCAF rate levels. That bank of credits will become exhausted during the first quarter of 1988. Only a portion of the difference between the current maximum RCAF rate level, 1.057, and the "pre-rebasing" first quarter 1988 RCAF, 1.122, will be offset by credits. The current maximum RCAF rate level of 1.057 was prescribed in our decision served October 17, 1986. That decision rolled back maximum RCAF rate levels effective November 15, 1986 and no RCAF increases have been permitted since then. Subtracting the total remaining credits, .021, from the "pre-rebasing" RCAF of 1.122 produces a first quarter 1988 effective maximum RCAF rate level of 1.101 which in turn produces a maximum allowable increase of 4.2 percent.

The indices and RCAF derived from AAR's first quarter 1988 calculations are shown in Table A set forth below. The adjustment for third quarter 1987 forecast error is also shown in Table A. Table B shows the third quarter 1987 index and RCAF calculated on both an actual basis and a forecasted basis. The difference between the actual data calculation and the forecasted data calculation is the basis for the forecast error adjustment.

Table C shows our calculation of the bank of credits used to offset RCAF rate level increases. We note that the application of the proper opportunity cost adjustment does not increase the bank of credits. Since the bank of credits is now exhausted, these calculations will not appear in future decisions.

AAR should calculate a rebased fourth quarter 1987 RCAF on both a forecasted and an actual basis as a part of its second quarter 1988 proposed index and RCAF. Those rebased calculations will be used to adjust the second quarter 1988 RCAF for fourth quarter 1987 forecast error. Future RCAF's should be calculated on the basis of the index rebased at October 1, 1987 and adjusted for forecast error as shown herein.

In order to comply with a provision of the Staggers Rail Act, we have rebased the denominator of the RCAF using the fourth quarter 1987 index, after restatement for forecast error, as the base. The Staggers Rail Act requires us to use the fourth quarter 1987 index value as the denominator and the first quarter 1988 index value as the numerator in the rebasing process. Although the Staggers Rail Act is silent on the use of a forecast error adjustment such an adjustment is now a part of our RCAF procedures. Accordingly, it would be incorrect to restate the denominator of the RCAF without considering forecast error. We have restated the linked indices for the fourth quarter 1987 and the first quarter 1988 using the difference between the forecast and actual linked indices for the second and third quarters of 1987 respectively. This is the same basic procedure that we use to adjust the quarterly RCAF forecast error adjustment. We note that adjusting the indices on a ratio basis would produce the same results. Our calculations are shown in Table D.

We find that the first quarter 1988 RCAF is 1.122 before rebasing and 1.027 after rebasing. For the past year RCAF rate increases have been held down by a bank of credits established by our decision served October 17, 1986. The current maximum is 1.057 or the maximum RCAF rate level in effect on December 31, 1985. The increase authorized in this decision will be partially offset by the remaining credits. Subtraction of the remaining credits, .021, from the "pre-rebasing" first quarter 1988 RCAF, 1.122, produces an effective maximum first quarter 1988 RCAF rate level of 1.101 which is 4.2 percent above the current maximum RCAF rate level. Maximum RCAF rate levels may be increased by a maximum of 4.2 percent over the levels directed in our decision served October 17, 1986. Since the bank of credits will be exhausted during the first quarter, future maximum RCAF rate levels will rise and fall with the level of the quarterly RCAF.

This decision will not significantly affect the quality of the human environment or the conservation of energy resources. This proceeding will not have a significant adverse impact on a substantial number of small entities because these procedures simplify a formerly complex and burdensome rate increase procedure.

Authority: 49 U.S.C. 10321, 10707a, 5 U.S.C. 553.

Decided: December 16, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons. Vice Chairman Lamboley dissented in part with a separate expression.

Noreta R. McGee,

Secretary.

Table A.—Ex Parte No. 290 (Sub-No. 5) (88–1) All Inclusive Index of Railroad Input Costs

Line No	Index component	1986 weights (percent)	Fourth quarter 1987 forecast	First quarter 1988 forecast
1	Labor	46.7	164.9	171.2
2	Fuel	5.9	57.8	58.8
3	Materials and supplies	6.9	99.7	102.2
4	Equipment rents	9.2	141.4	144.5
5	Depreciation	12.3	115.5	115.7
6	Other items [1]	19.0	124.5	126.6
7	Weighted average	100.0	138.7	142.6
8	Linked index [2]		131.4	135.1
9	Preliminary rail cost adjustment factor [3] (10/1/82=100) 120.9		1.087	1.117
10	Adjustment for forecast error [4]		.008	.005
11	RCAF (line 9 plus line 10)		1.093	1.122

[1] Other items are a combination of Purchased Services, Casualties and Insurance, General and Administrative, Other Taxes and Loss and Damage, all of which are measured by the Producer Price Index for Industrial Commodities Less Fuel and Related Products and Power.

[2] Linking is necessitated by a change to 1986 weights beginning with the fourth quarter 1987. The following formula was used for the fourth quarter 1987 index:

$$\frac{\text{1st quarter 1988 index (1986 weights)}}{\text{4th quarter 1987 index (1986 weights)}} \times \text{4th quarter 1987 index (linked index)} = \text{Linked index (1980 weights to 1986 weights)}$$

or:

$$\frac{142.6}{138.7} \times 131.4 = 135.1$$

[3] The denominator was rebased to an October 1, 1982 level in accordance with the requirements of the Staggers Rail Act of 1980.

[4] Third quarter 1987 forecast error adjustment is calculated as follows:

1. Third quarter 1987 RCAF calculated using forecasted data—1.079
2. Third quarter 1987 RCAF calculated using actual data—1.084
3. Difference (Line 2 minus Line 1). Since the actual third quarter 1987 RCAF was higher than the forecast the difference will be added to the first quarter 1988 preliminary RCAF—.005

Table B.—Ex Parte No. 290 (Sub-No. 5) (88–1) Comparison of Third Quarter 1987 Index Calculated on Both a Forecasted and an Actual Basis

Line No.	Index component	1985 weights (percent)	Third quarter 1987 forecast	Third quarter 1987 actual
1	Labor	48.6	164.2	164.2
2	Fuel	9.7	50.2	55.9
3	Materials and supplies	7.6	98.6	98.6
4	Equipment rents	9.0	140.2	140.9
5	Depreciation	8.7	115.4	116.0
6	Other items	16.4	123.4	124.2
7	Weighted average	100.0	136.0	136.8
8	Linked index		130.4	131.1
9	Rail cost adjustment factor		1.079	1.084

Table C.—Ex Parte No. 290 (Sub-No. 5) (88–1) Calculation of RCAF Credits and Application of Opportunity Cost Adjustment

1. Bank of RCAF credits 9–30–87	.057
2. Maximum RCAF rate level, fourth quarter 1987	1.057
3. Published RCAF fourth quarter 1987	1.093
4. Reduction ( ) or addition to bank of credits for second quarter 1987 (line 2 minus line 3)	(.036)
5. Bank of RCAF credits 12–31–87 (line 1 plus line 4)	.021
6. Third quarter allowance for opportunity cost (Three-month Treasury Bill rate for sale of 11–23–87 (5.7 percent) divided by 4)	1.425%
7. Bank of RCAF credits 12–31–87 adjusted for opportunity cost (line 5×(1.0+line 6))	.021

TABLE D.—EX PARTE NO. 290 (SUB-NO. 5) (88-1) CALCULATIONS SHOWING REBASING THE DENOMINATOR OF RCAF TO FOURTH QUARTER 1987 LEVEL AS REQUIRED BY THE STAGGERS RAIL ACT OF 1980

Line number	
1. Fourth quarter 1987 linked index	131.4
2. Second quarter 1987 linked index calculated using actual data	130.0
3. Second quarter 1987 linked index calculated using forecasted data	129.2
4. Difference (line 2 minus line 3) Since the actual was higher than the forecast the difference will be added to the fourth quarter 1987 linked index	.8
5. Fourth quarter 1987 linked index adjusted for second quarter 1987 forecast error (line 1 plus line 4) equals rebased denominator of the RCAF fraction	132.2
6. First quarter 1988 linked index	135.1
7. Third quarter 1987 linked index calculated using actual data	131.1
8. Third quarter 1987 linked index calculated using forecasted data	130.4
9. Difference (line 7 minus line 8) Since the actual was higher than the forecast the difference will be added to the first quarter 1988 linked index	.7
10. First quarter 1988 linked index adjusted for third quarter 1987 forecast error (line 6 plus line 9)	135.8
11. Rebased rail cost adjustment factor (line 10 divided by line 5)	1.027

BILLING CODE 7035-01-M

[Finance Docket No. 31172]

G. Richard Abernathy; Continuance in Control Exemption; Georgia Northeastern Railroad Co., Inc., Walking Horse and Eastern Railroad Co., Columbia and Silver Creek Railroad Co., and Sequatchie Valley Railroad

Mr. G. Richard Abernathy has filed a notice of exemption under 49 CFR 1180.4(g) regarding his continuance in control of Georgia Northeastern Railroad, Company, Inc. (GNRC), Walking Horse & Eastern Railroad Company (WH&E), Columbia & Silver Creek Railroad Company (C&SC), and Sequatchie Valley Railroad (SVR) under the provisions of 49 CFR 1180.2(d)2.

Mr. Abernathy is a principal shareholder of GNRC, a noncarrier, which has filed a concurrent notice of exemption in Finance Docket No. 31171, *Georgia Northeastern Railroad Company, Inc.—Acquisition and Operation Exemption—CSX Transportation, Inc.*, to acquire and operate 67 miles of rail line in Georgia from CSX Transportation, Inc. Mr. Abernathy also controls WH&E, C&SC, and SVR.

Mr. Abernathy indicates that: (1) The railroads will not connect with each other or any railroad in their corporate family; (2) the continuance in control is not part of a series of anticipated transactions that would connect the railroads with each other or any railroad in their corporate family; and (3) the transaction does not involve a class I carrier. Therefore, this transaction involves the continuance in control of a nonconnecting carrier, and is exempt from the prior review requirements of 49 U.S.C. 11343. *See* 49 CFR 1180.2(d)(2).

As a condition to the use of this exemption, any employee affected by the transaction will be protected by the conditions set forth in *New York Dock. Ry.—Control—Brooklyn Eastern Dist., 360 I.C.C. 60 (1979).*

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 9, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 31171]

Georgia Northeastern Railroad Co., Inc.; Acquisition and Operation Exemption; CSX Transportation, Inc.

Georgia Northeastern Railroad Company, Inc. (GNE), has filed a notice of exemption to acquire and operate 67 miles of line of CSX Transportation, Inc. The property extends from milepost LKX 436.00 at Tate, GA, to milepost LKX 477.00, at Elizabeth, GA; and from milepost LKX 410.00, at Ellijay, GA., to milepost LKX 436.00 at Tate, GA. The transaction is expected to be consummated on or before December 14, 1987.

A transaction relating to the control of GNE by G. Richard Abernathy, is the subject of a notice of exemption filed concurrently in Finance Docket No. 31172, *G. Richard Abernathy—Continuance in Control Exemption—Georgia Northeastern Railroad Company, Inc.*. Any comments must be filed with the Commission and served on Mark M. Levin, Weiner, McCaffrey, Brodsky, & Kaplan, P.C., Suite 800, 1350 New York Avenue, Washington, DC 20005.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 9, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

[Finance Docket No. 31168]

Little Kanawha River Rail, Inc.; Acquisition and Operation Exemption; CSX Transportation, Inc. Line in Wood County, WV

Little Kanawha River Rail, Inc., has filed a notice of exemption to acquire and operate 3.1 miles of line of CSX Transportation, Inc. (CSXT). The property consists of CSXT's right-of-way and associated property between Ohio River Junction (valuation station 2+90, valuation section 61.1, map 65A), and South Parkersburg, WV (at the end of track 44+65, valuation section 58.1, map 51), in Wood County, WV. The transaction was scheduled to take place on or before November 30, 1987. Any comments must be filed with the Commission and served on John A. Alden, One East Livingston Avenue, Columbus, OH 43215-5764.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 8, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

BILLING CODE 7035-01-M

[Finance Docket No. 31176]

LNAC Acquisition Corp.; Acquisition and Operation Exemption; The Louisville, New Albany and Corydon Railroad Co.

LNAC Acquisition Corp. (LNAC Acquisition) (a non-carrier), has filed a notice of exemption to acquire and operate property of the Louisville, New Albany & Corydon Railroad Company (LNAC) consisting of approximately 7.7 miles of track between Corydon, IN and Corydon Junction, IN. LNAC also holds motor carrier authority in No. MC-54855. LNAC is a subsidiary of the Evans Transportation Company (Evans). LNAC Acquisition is wholly owned by Itel Rail Car Corporation (Itel Rail Car). Itel Rail Car, in turn, is wholly owned by Itel Rail Corporation (Itel Rail), which, in turn, is wholly owned by Itel Corporation (Itel).

Itel has negotiated an asset purchase agreement (agreement) with Evans and its affiliate the Ferdinand Railroad Company (Ferdinand), to acquire certain assets associated with the rail car businesses of Evans. These assets will be transferred to the Ferdinand and Huntingsburg Railroad Company (F&H), a newly created noncarrier indirect subsidiary of Itel. F&H has filed a notice pursuant to 49 U.S.C. 10901 to acquire the assets of Ferdinand, and Itel has filed a petition pursuant to 49 U.S.C. 10505 to exercise control of F&H.[1]

At the time of the agreement the parties anticipated that LNAC would be sold prior to the consummation of the agreement, and Itel advised the Commission that it did not intend to acquire LNAC. LNAC has not been sold; therefore, Itel has negotiated a railroad asset purchase agreement by which LNAC Acquisition will acquire LNAC pending disposition to a third-party purchaser. Itel Rail Car will place the stock of LNAC Acquisition in a voting trust pending sale of its assets and stock. The creation of LNAC Acquisition will permit Itel to consummate its acquisition of the Evans assets that are not subject to the Commission's jurisdiction and enable Itel to initiate efforts to integrate Evans' other assets immediately upon consummation of the transaction.

Any comments must be filed with the Commission and served on Thomas J. Byrne and Carl V. Lyon, 1101 3Oth Street, NW., Suite 302, Washington, DC 20007.

The notice is filed under 49 CFR 1150.51. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 10, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[Finance Docket No. 31174]

Railtex, Inc.; Continuance in Control Exemption; Virginia & North Carolina Railroad Co., Inc.

Railtex, Inc. (Railtex) has filed a notice of exemption under 49 CFR 1180.4(g) regarding its continuance in control of the Virginia & North Carolina Railroad Company, Inc. (V&NC), under the provisions of 49 CFR 1180.2(d)(3). At present, Railtex controls South Carolina Central Railroad Company, Inc. North Carolina & Virginia Railroad Company, Inc. (NC&V), the Austin Railroad Company, Inc. and the San Diego & Imperial Valley Railroad Company. V&NC, a wholly owned noncarrier subsidiary of Railtex, has filed concurrently a notice of exemption in Finance Docket No. 31173, *Virginia & North Carolina Railroad Company, Inc.—Acquisition and Operation Exemption—Rail Lines of North Carolina & Virginia Railroad Company, Inc.*, relating to V&NC's purchase and operation of a 2.4-mile line of railroad between the North Carolina-Virginia State border line and Boykins, VA. The line will be purchased from NC&V.

Railtex indicates that this transaction within the Railtex corporate family will not result in: (1) Adverse changes in service levels, (2) significant operational changes, or (3) a change in the competitive balance with carriers outside the corporate family. Therefore, this transaction is exempt from the prior review requirements of 49 U.S.C. 11343. *See* 49 CFR 1180.2(d)(3).

As a condition to the use of this exemption, any employees affected by the transaction will be protected by the conditions set forth in *New York Dock. Ry.— Control—Brooklyn Eastern Dist.*, 360 I.C.C. 60 (1979).

Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 4, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

[Finance Docket No. 31167]

SouthEastern Rail Corp.; Acquisition and Operation Exemption; Gulf and Mississippi Railroad Corp.

SouthEastern Rail Corporation (SRC), a subsidiary of MidSouth Corporation (MidSouth), has filed a notice of exemption to acquire from Gulf and Mississippi Railroad Corporation (G&M) and operate approximately 732 miles of rail line located in Mississippi, Tennessee, and Alabama. The rail lines extend between Corinth, MS (M.P. 330.50) and Meridian, MS (M.P. 138.80); between Meridian (M.P. 132.00) and Mobile, AL (M.P. 4.70); between Middleton, TN (M.P. 368.50) and Woodland, MS (M.P. 274.00); between Aberdeen, MS (M.P. 106.05) and Fentress, MS (M.P. 47.00); between Ackerman, MS (M.P. 239.50) and Laurel, MS (M.P. 110.00), including the branch line between Union, MS (M.P. 0.00) and Walnut Grove, MS (M.P. 22.80); between Artesia, MS (M.P. 0.00) and Tuscaloosa, AL (M.P. 79.50), including the branch line between Tuscaloosa (M.P. 79.50) and Fox, AL (M.P. 8.54); between Brookwood, AL (M.P. LK 429.20—LK 429.68) and Holt, AL (M.P. TM 441.68—TB 441.79); and includes incidental trackage rights in Meridian (between M.P. 132.00 and M.P. 138.80); in Mobile (between M.P. 4.70 and the Alabama State Docks); between Ruslor Junction,

[1] The control application is Finance Docket 31143, Petition of Itel Corporation for exemption from 49 U.S.C. 11343 pursuant to 49 U.S.C. 10505. The acquisition and operation exemption is Finance Docket 31144, *The Ferdinand and Huntingsburg Railroad Co.; Acquisition and Operation of Rail Line, Ferdinand Railroad Co.*, published at 52 *Fed. Reg.* 44500 (November 19, 1987).

VOL 52 ISS 247 DEC 24 1987 UMI

MS (M.P. 330.50) and Corinth, MS (M.P. 328.90); between Middleton, TN (at or near M.P. 481.00) and Corinth, MS (at or near M.P. 459.00); and between New Albany, MS (M.P. 562.30) and Tupelo, MS (M.P. 588.20).

The agreement between SRC and G&M is expected to be consumated on or about February 15, 1988. This transaction will also involve the issuance of securities by SRC. Since SRC will be a Class II carrier, the issuance of these securities will be an exempt transaction under 49 CFR 1175.1.

Any comments must be filed with the Commission and served on: Mark M. Levin; Weiner, McCaffrey, Brodsky & Kaplan, P.C.; Suite 800, 1350 New York Avenue, NW., Washington, DC 20005–4797; (202) 628–2000.[1]

This notice is related to Finance Docket No. 31186 in which MidSouth has concurrently filed a petition pursuant to 49 U.S.C. 10505 for exemption from the prior approval requirements of 49 U.S.C. 11343 to continue in control of SRC upon SRC's acquisition of the G&M lines. MidSouth presently controls MidSouth Rail Corporation, a Class II rail carrier, and MidLouisiana Rail Corporation, a Class III rail carrier.[2]

This notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 15, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 87–29216 Filed 12–23–87; 8:45 am]

BILLING CODE 7035–01–M

[1] The Railway Labor Executives' Association (RLEA) filed an unsupported request for labor protection, claiming that this transaction is subject to the mandatory labor protection provisions of 49 U.S.C. 11347. Since this transaction involves an exemption from 49 U.S.C. 10901, only a showing of exceptional circumstances will justify the imposition of labor protective conditions. RLEA's request is denied because the requisite showing has not been made. *See Class Exemption—Acq. & Oper. of R. Lines Under 49 U.S.C. 10901*, 1 I.C.C.2d 810 (1985).

[2] SRC's acquisition of the involved G&M properties must await an effective Commission decision in Finance Docket No. 31186, exempting the continuance in control described above or prior Commission approval of the common control relationship.

[Finance Docket No. 31173]

Virginia and North Carolina Railroad Co., Inc.; Acquisition and Operation Exemption; Rail Lines of North Carolina and Virginia Railroad Co., Inc.

Virginia & North Carolina Railroad Company, Inc. (V&NC), a noncarrier, has filed a notice of exemption to acquire and operate approximately 2.4 miles of railroad of North Carolina & Virginia Railroad, Inc. (NC&V), located in Virginia. The line extends from milepost 57.0 at the North Carolina-Virginia State border line to milepost 54.60 at Boykins, VA. The agreement for transfer of the lines between V&NC and NC&V was to be consummated on or before December 1, 1987.

This transaction will also involve the issuance of securities by V&NC, which will be a class III carrier. The issuance of these securities will be an exempt transaction under 49 CFR 1175.1.

A transaction relating to the control of V&NC by Railtex, Inc., is the subject of a notice of exemption filed concurrently in Finance Docket No. 31174, *Railtex Inc.—Continuance in Control Exemption—Virginia & North Carolina Railroad Company, Inc.* Any comments must be filed with the Commission and served on Mark M. Levin, Weiner, McCaffrey, Brodsky & Kaplan, P.C., 1350 New York Avenue, NW., Suite 800, Washington, DC 20005–4797.

The notice is filed under 49 CFR 1150.31. If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: December 4, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

[Docket No. AB–32 (Sub-No. 39X)]

Boston and Maine Corp. and Springfield Terminal Railway Co.; Exemption; Discontinuance of Service in Essex County, MA

Applicants, wholly owned subsidiaries of Guilford Transportation Industries, Inc., have filed a notice of exemption under 49 CFR 1152 Subpart F—*Exempt Abandonments* to discontinue service over the Eastern Route Main Line from milepost 18.70 in Beverly to milepost 36.88 in Newburyport, all in Essex County, MA. The rail line lies on property owned by the Massachusetts Bay Transportation Authority.

Applicants have certified that (1) no local traffic has moved over the line for at least 2 years and that overhead traffic is not moved over the line or may be rerouted, and (2) no formal complaint, filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line, either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from the discontinuance.

As a condition to use of this exemption, any employee affected by the discontinuance of service shall be protected under *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979) [1].

The exemption will be effective January 25, 1987 unless stayed pending reconsideration. Petitions to stay must be filed by January 4, 1987, and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by January 13, 1987 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicants' representative: Kristin Dorney, Esq., Boston and Maine Corporation, Iron Horse Park, North Billerica, MA 01862.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: December 14, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

BILLING CODE 7035–01–M

[1] The Railway Labor Executives' Association (RLEA) filed a request for the imposition of labor protective conditions. The United Transportation Union joins in RLEA's request. Since the subject discontinuance involves an exemption from 49 U.S.C. section 10903, such conditions have been imposed routinely.

[Docket No. AB–32 (Sub-No. 40X)]

Boston and Maine Corp. and Springfield Terminal Railway Co.; Exemption; Discontinuance of Service in Essex County, MA

Applicants, wholly owned subsidiaries of Guilford Transportation Industries, Inc., filed a notice of exemption under 49 CFR Part 1152 Subpart F—*Exempt Abandonments* to discontinue service over the Gloucester Branch from milepost 18.70 in Beverly to milepost 35.39 in Rockport, a distance of 16.69 miles all in Essex County, MA. This rail line lies on property owned by the Massachusetts Bay Transportation Authority.

Applicant has certified that (1) no local traffic has moved over the line for at least 2 years, and that overhead traffic is not moved over the line, or may be rerouted and (2) no formal complaint, filed by a user of rail service on the line (or by a State or local governmental entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Commission or any U.S. District Court, or has been decided in favor of the complainant within the 2-year period. The appropriate State agency has been notified in writing at least 10 days prior to the filing of this notice.

Applicant has filed an environmental report which shows that no significant environmental or energy impacts are likely to result from the discontinuance.

As a condition to use of this exemption, any employee affected by the discontinuance shall be protected pursuant to *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979).[1]

The exemption will be effective January 25, 1988 unless stayed pending reconsideration. Petitions to stay must be filed by January 4, 1988 and petitions for reconsideration, including environmental, energy, and public use concerns, must be filed by January 13, 1988 with: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423.

A copy of any petition filed with the Commission should be sent to applicants' representative: Kristin Dorney, Esq., Boston and Maine Corporation, Iron Horse Park, North Billerica, MA 01862.

If the notice of exemption contains false or misleading information, use of the exemption is void *ab initio*.

A notice to the parties will be issued if use of the exemption is conditioned upon environmental or public use conditions.

Decided: December 14, 1987.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

[1] The Railway Labor Executives' Association (RLEA) filed a request for the imposition of labor protective conditions. The United Transportation Union joins in RLEA's request. Since the sought discontinuance involves an exemption from 49 U.S.C. 10903, such conditions have been imposed routinely.

[Docket No. AB–290 (Sub-No. 4)]

Certificate and Decision on Southern Railway Co. Request to Abandon Railroad Lines in Dallas and Perry Counties, AL

Decided: December 21, 1987.

By application filed November 12, 1987, applicant seeks to abandon its 13.8-mile line of railroad between Marion Junction (milepost 14.0–P) and the end of the line at Marion (milepost 27.8–P) in Dallas and Perry Counties, AL. Public notice was properly given. Comments on the issue of labor protection were filed by the Railway Labor Executives' Association and the United Transportation Union.

Under 49 U.S.C. 10904(b), the Commission must grant an application for abandonment unless a protest is received within 30 days after the application was filed. Since the time for filing protests has expired and no protests were filed, an appropriate certificate and decision must be entered. As required by 49 U.S.C. 10903(b)(2), appropriate employee protective conditions will be imposed.

The environmental and energy impacts of this action have been examined and found not to be significant. Areas of consideration included, but were not limited to, energy consumption, air and water quality, noise levels, and public safety. It has been determined that the right-of-way would be suitable for alternative public use after abandonment. However, no party requested imposition of a public use condition. Accordingly, a public use condition will not be imposed.

The Commission's Section of Energy and Environment (SEE) has been informed by the State Historic Preservation Officer of Alabama that applicant's Marion depot may be eligible for listing in the *National Register*. Consequently, SEE recommends a condition that the railroad not engage in any salvage activities that would affect the potentially historic character of the depot until the Commission completes a section 106 National Historic Preservation Act review process.

The condition recommended by SEE is similar to conditions imposed in past abandonment proceedings. *See, e.g.*, Docket No. AB–6 (Sub-No. 291), *et al., Burlington Northern Railroad Company, The Denver and Rio Grande Western Railroad Company, and the Atchison, Topeka and Santa Fe Railway Company—Abandonment—In Denver and Jefferson Counties, CO* (not printed), served December 11, 1987. Accordingly, I will impose the condition. I would point out, however, that the condition does not preclude applicant from salvaging rails, ties and other railroad-related material apart from those related to the Marion depot.

Therefore, based on the record, I find:

1. Abandonment of the line will not result in a serious adverse impact on rural and community development.

2. The property is suitable for other public purposes.

3. This action will not significantly affect either the quality of the human environment or energy conservation.

It is certified: The present and future public convenience and necessity permit abandonment of the described line of railroad, subject to: (1) the employee protective conditions in *Oregon Short Line R. Co.—Abandonment—Goshen*, 360 I.C.C. 91 (1979); and (2) applicant may not engage in any salvage activities that would affect the potentially historic character of the Marion depot until the Commission completes a Section 106 National Historic Preservation Act review process.

It is ordered: 1. These findings will be published in the Federal Register on the date this decision is served. An offer of financial assistance to allow rail service to continue must be received by the railroad and the Commission within 10 days after publication. The offeror must comply with 49 U.S.C. 10906 and 49 CFR 1152.27(b).

2. Offers and related correspondence to the Commission must refer to this proceeding. The following notation must be typed in bold face on the lower left-hand corner of the envelope: "Rail Section, AB–OFA."

3. Subject to the conditions set forth above and provided no offer for continued rail operations is received, the railroad may abandon the line after the effective date of this certificate and decision.

4. The railroad may cancel its tariffs for this line on not less than 10 days' notice to the Commission. The cancellation tariffs must refer to this

certificate and decision by date and docket number.

5. This certificate and decision shall be effective 30 days from the date of service unless otherwise ordered by the Commission.

By the Commission. Jane F. Mackall, Director, Office of Proceedings.

Noreta R. McGee,

Secretary.

[FR Doc. 87-29509 Filed 12-23-87; 8:45 am]

BILLING CODE 7035-01-M

DEPARTMENT OF LABOR

Employment and Training Administration

[TA-W-19,968]

General Motors Corp., AC Spark Plug Division, Oak Creek, WI; Negative Determination Regarding Application for Reconsideration

After being granted a filing extension, the United Auto Workers of America (UAW) requested administrative reconsideration of the Department's negative determination on the subject petition for trade adjustment assistance for workers at General Motors Corporation, AC Spark Plug Division, Oak Creek, Wisconsin. The denial notice was signed on September 28, 1987 and published in the Federal Register on October 23, 1987 (52 FR 39717).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The union claims that auto imports with converters already attached increased in 1986 compared to 1985. The union states that General Motors' market share decreased in 1986 compared to 1986 and the A.C. Spark Plug's converter business is directly related to General Motors sales.

Investigative findings show that the Oak Creek plant produces catalytic converters mainly for General Motors cars and trucks. A small percentage of converters were produced for companies not affiliated with General Motors in 1986.

The Department's denial was based on the fact that the increased import criterion was not met. The Department's survey of major internal customers revealed that none of the respondents imported catalytic converters in model year 1986 or 1987.

Investigative findings further show that there is still not sufficient integration of Oak Creek production with other General Motors' plants whose workers are already under a certification to justify certifying workers at the Oak Creek plant. Most of General Motors' auto and truck assembly plants which are internal customers of Oak Creek do not have workers certified for adjustment assistance.

Imported finished articles (cars and trucks) incorporating component parts like catalytic converters would not serve as a basis for certification. This issue was addressed in *United Shoe Workers of America, AFL-CIO* v. *Bedell*, 506, F 2d 174 (D.C. Circ. 1974). The court held that imported finished women's shoes were not like or directly competitive with shoe counters. Similarly, catalytic converters cannot be considered as like or directly competitive with cars and trucks incorporating the converter. Section 222(3) of the Trade Act states that there must be increased imports of articles that are like or directly competitive with those produced at the workers' firm.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC. this 17th day of December 1987.

Stephen A. Wandner,

Deputy Director, Office of Legislation and Actuarial Services, UIS.

[FR Doc. 87-29528 Filed 12-23-87; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-20,199]

Westmoreland Coal Co., Clothier, WV.; Negative Determination Regarding Application for Reconsideration

By an application dated December 7, 1987, one of the petitioners requested administrative reconsideration of the Department's negative determination on the subject petition for trade adjustment assistance. The denial notice was published in the Federal Register.

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) If it appears that the determination complained of was based on a mistake in the determination of facts previously considered; or

(3) If, in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The petitioner claims, among other things, that oil and coal are like articles and that automobiles, steel and electricity are directly competitive with coal. Petitioner names a utility that terminated its contract for coal from Westmoreland and supplemented its coal supply by purchasing imported coal.

The Department's denial was based on the fact that the increased import criterion was not met. U.S. imports of coal are negligible. The ratio of imports to domestic production was less than one-half of one percent during the last five years ending in 1986 and U.S. imports of coal declined in the first six months of 1987 compared to the same period of 1986.

Also, the dominant cause for the worker separations and the cessation of production was the closing of the mine because the remaining coal was uneconomical to mine. The mine had been in operation since 1955.

The Department does not consider oil as an article like coal. Departmental regulations state that "like" articles are those that are substantially identical in inherent or intrinsic characteristics (i.e. materials from which the articles are made, appearance, quality, texture etc.). Further, automobiles, steel and electricity are not competitive with coal production within the meaning of section 222(3) of the Trade Act of 1974. Workers at a coal mine, however, can be certified for adjustment assistance on the basis of steel imports only if it is part of an integrated production process, i.e., the coal is shipped to an affiliated steel plant whose workers independently meet the statutory criteria for certification. The consideration was not met for the Westmoreland Coal Company because it is not affiliated with a steel company.

Lastly, the utility named by the petitioner of importing coal was not a customer of the Hampton Division of Westmoreland. Pending legislation on setting a tariff on coal imports would not provide a basis for certification.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC, this 18th day of December 1987.

Barbara Ann Farmer,

Acting Director, Office of Program Management, UIS.

[FR Doc. 87-29529 Filed 12-23-87; 8:45 am]

BILLING CODE 4510-30-M

Labor Surplus Area Classifications Under Executive Orders 12073 and 10582; Additions to Annual List of Labor Surplus Areas

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

DATE: The additions to the labor surplus area list are effective December 1, 1987.

SUMMARY: The purpose of this notice is to announce the classifications for the State of Wisconsin as well as the addition of two other areas to the list of labor surplus areas.

FOR FURTHER INFORMATION CONTACT: William J. McGarrity, Labor Economist, Employment and Training Administration, 200 Constitution Avenue, NW., Room N4470, Attention: TEESS, Washington, DC 20210. Telephone: 202-535-0185.

SUPPLEMENTARY INFORMATION: Executive Order 12073 requires executive agencies to emphasize procurement set-asides in labor surplus areas. The Secretary of Labor is responsible under that Order for classifying and designating areas as labor surplus areas.

Under Executive Order 10582 executive agencies may reject bids or offers of foreign materials in favor of the lowest offer by a domestic supplier, provided that the domestic supplier undertakes to produce substantially all of the materials in areas of substantial unemployment as defined by the Secretary of Labor. The preference given to domestic suppliers under Executive Order 10582 has been modified by Executive Order 12260. Federal Procurement Regulations Temporary Regulation 57 (41 CFR Chapter 1, Appendix), issued by the General Services Administration on January 15, 1981 (46 FR 3519), implements Executive Order 12260. Executive agencies should refer to Temporary Regulation 57 in procurements involving foreign businesses or products in order to assess its impact on the particular procurements.

The Department of Labor regulations implementing Executive Orders 12073 and 10582 are set forth at 20 CFR Part 654, Subparts A and B. Subpart A requires the Assistant Secretary of Labor to classify jurisdictions as labor surplus areas pursuant to the criteria specified in the regulations and to publish annually a list of labor surplus areas. Pursuant to those regulations the Assistant Secretary of Labor published the annual list of labor surplus areas on October 27, 1987 (52 FR 41338).

Subpart B of Part 654 states that an area of substantial unemployment for purposes of Executive Order 10582 is any area classified as a labor surplus area under Subpart A. Thus, labor surplus areas under Executive Order 12073 are also areas of substantial unemployment under Executive Order 10582.

The areas described below have been classified by the Assistant Secretary of Labor as labor surplus areas pursuant to 20 CFR 654.5(b) (48 FR 15615 April 12, 1983) and are effective December 1, 1987.

The list of labor surplus areas following is published for the use of all Federal agencies in directing procurement activities and locating new plants or facilities.

Signed at Washington, DC, on December 4, 1987.

Roger D. Semerad,

Assistant Secretary of Labor.

WISCONSIN CLASSIFICATIONS FOR FISCAL YEAR 1988

[December 1, 1987]

Eligible labor surplus areas	Civil jurisdictions included

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (87-103)]

NASA Advisory Council (NAC), Space and Earth Science Advisory Committee (SESAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space and Earth Science Advisory Committee, Informal Working Group.

DATE AND TIME: January 14, 1988, 1 p.m.-5 p.m., January 15, 1988, 8:30 a.m.-12 Noon.

ADDRESS: Engineering Center, Room AE-136, Boulder Campus, University of Colorado, Boulder, Colorado 80391.

FOR FURTHER INFORMATION CONTACT: Mr. Joseph Alexander, Code E, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1656).

SUPPLEMENTARY INFORMATION: The Space and Earth Science Advisory Committee's Working Group will meet to discuss the Office of Space Science and Applications (OSSA) strategic planning status and to plan in detail the February 1988 meeting agenda and future committee activities. The group is

chaired by Dr. Louis Lanzerotti and is composed of 5 members. The meeting will be open to the public up to the capacity of the room (approximately 15 people including members of the committee).

Type of Meeting: Open.

Agenda:

Thursday, January 14, 1988.

1 p.m.–Discussion of Office of Space Science and Applications Strategic Planning Status.

5 p.m.–Adjourn.

Friday, January 15, 1988.

8:30 a.m.–Planning of the Agenda for February 17–19, 1988 Meeting.

10:30 a.m.–Discussion of SESAC Plans for 1988.

12 Noon–Adjourn.

Ann Bradley,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

December 17, 1987.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Renewal of Advisory Committee on Preservation

This notice is published in accordance with the provisions of section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463) and advises of the renewal of the Advisory Committee on Preservation for a two-year period, until December 3, 1989.

The Archivist of the United States has determined that the renewal of this advisory committee is in the public interest so that the National Archives has up-to-date information on preservation technologies to ensure the preservation of permanently valuable records accessioned into the National Archives.

Dated: December 16, 1987.

Claudine J. Weiher,

Acting Archivist of the United States.

BILLING CODE 7515–01–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities; Panel Meetings

AGENCY: National Endowment for the Humanities, NFAH.

ACTION: Notice of meetings.

SUMMARY: Pursuant to the provisions of the Advisory Committee Act (Pub. L. 92–463, as amended), notice is hereby given that the following meetings of the Humanities Panel will be held at the Old Post Office, 1100 Pennsylvania Avenue NW., Washington, DC 20506:

FOR FURTHER INFORMATION CONTACT: Stephen J. McCleary, Advisory Committee Management Officer, National Endowment for the Humanities, Washington, DC 20506; telephone 202/786–0322.

SUPPLEMENTARY INFORMATION: The proposed meetings are for the purpose of panel review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. Because the proposed meetings will consider information that is likely to disclose: (1) Trade secrets and commercial or financial information obtained from a person and privileged or confidential; (2) information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy; or (3) information the disclosure of which would significantly frustrate implementation of proposed agency action, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated January 15, 1978, I have determined that these meetings will be closed to the public pursuant to subsections (c)(4), (6) and (9) (B) of section 552b of Title 5, United States Code.

1. *Date:* January 11, 1988
Time: 8:30 a.m. to 5:00 p.m.
Room: 430
Program: This meeting will review applications for History Centers, submitted to the Division of Education Programs, for projects beginning after April 1, 1988.

2. *Date:* January 14–15, 1988
Time: 8:30 a.m. to 5:00 p.m.
Room: 415
Program: This meeting will review applications submitted for Museums and Historical Organizations, to the Division of General Programs, for projects beginning after July 1, 1988.

3. *Date:* January 21–22, 1988
Time: 8:00 a.m. to 5:00 p.m.
Room: 415
Program: This meeting will review applications submitted for Museums and Historical Organizations to the Division of General Programs, for projects beginning after July 1, 1988.

4. *Date:* January 28, 1988
Time: 8:30 a.m. to 5:00 p.m.
Room: 315
Program: This meeting will review applications for Interpretive Research/Projects for Literature, Film, and Philosophy, submitted to the Division of Research Programs, for projects beginning after July 1, 1988.

5. *Date:* January 28–29, 1988
Time: 8:00 a.m. to 5:00 p.m.
Room: 315
Program: This meeting will review applications submitted for Museums and Historical Organizations to the Division of General Programs, for projects beginning after July 1, 1988.

Stephen J. McCleary,

Advisory Committee, Management Officer.

Media Arts Advisory Panel; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Media Arts Advisory Panel (American Film Institute Section) to the National Council on the Arts, will be held on January 5, 1988, from 9:00 a.m.–5:30 p.m. in room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the Agency by grant applicants. In accordance with the determination of the Chairman published in the Federal Register of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Yvonne M. Sabine,

Acting Director, Council and Panel Operations, National Endowment for the Arts.

SCIENCE AND TECHNOLOGY POLICY OFFICE

White House Science Council (WHSC); Meeting

The White House Science Council, the purpose of which is to advise the Director, Office of Science and Technology Policy (OSTP), will meet on January 7 and 8, 1988 in Room 5104, New Executive Office Building, Washington, DC. The meeting will begin at 6:00 pm on January 7, recess and reconvene at 8:00 a.m. on January 8, 1988. Following is the proposed agenda for the meeting:

(1) Briefing of the council, by the Assistant Directors of OSTP, on the current activities of OSTP.

(2) Briefing of the Council by OSTP personnel and personnel of other agencies on proposed, ongoing, and completed panel studies.

(3) Discussion of composition of panels to conduct studies.

The January 7 session and a portion of the January 8 session will be closed to the public.

The briefing on some of the current activities of OSTP necessarily will involve discussion of material that is formally classified in the interest of national defence or for foreign policy reasons. This is also true for a portion of the briefing on panel studies. As well, a portion of both of these briefings will require discussion of internal personnel procedures of the Executive Office of the President and information which, if prematurely disclosed, would significantly frustrate the implementation of decisions made requiring agency action. These portions of the meeting will be closed to the public pursuant to 5 U.S.C. 552b.(c) (1), (2), and (9)(B).

A portion of the discussion of panel composition will necessitate the disclosure of information of a personal nature the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Accordingly, this portion of the meeting will also be closed to the public, pursuant to 5 U.S.C. 552b.(c)(6).

Because of the security in the New Executive Office Building, persons wishing to attend the open portion of the meeting should contact Barbara J. Diering, at (202) 546–7740, prior to 3:00 p.m. on January 6, 1988. Mrs. Diering is also available to provide specific information regarding time, place and agenda for the open session.

Barbara J. Diering,

Special Assistant, Office of Science and Technology Policy.

December 23, 1987.

BILLING CODE 3170–01–M

SECURITIES AND EXCHANGE COMMISSION

Senior Executive Service Performance Review Board, List of Members; Schedule of Bonus Awards

AGENCY: Securities & Exchange Commission.

ACTION: Listing of Personnel Serving as Members of this Agency's Senior Executive Service Performance Review Board and Announcement of Schedule for Awarding Bonuses.

SUMMARY: Pub. L. 95–454 dated October 13, 1978 (Civil Service Reform Act of 1978) requires that Federal agencies publish notification of the appointment of individuals who serve as members of that agency's Performance Review Board (PRB). This notice announces the PRB membership and the schedule for awarding SES bonuses in the Commission. The Securities and Exchange Commission has established a Performance Review Board consisting of:

1. George Kundahl, Executive Director, PRB Chairman
2. Daniel Goelzer, General Counsel
3. Linda Fienberg, Executive Assistant to the Chairman

The Securities and Exchange Commission plans to award bonuses to Senior Executive Service members on or about January 15, 1988.

FOR FURTHER INFORMATION CONTACT: Mr. James McConnell, Office of the Executive Director, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549 (202) 272–2700.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

[Release No. 35–24532]

Filings Under Public Utility Holding Company Act of 1935 ("Act")

December 17, 1987.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by January 11, 1987 to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicants and/or declarant(s) at the address specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Jersey Central Power and Light Company (70-7134)

Jersey Central Power and Light Company ("JCP&L"), Madison Avenue at Punch Bowl Road, Morristown, New Jersey, a subsidiary of General Public Utilities Corporation, a registered holding company, has filed a post-effective amendment to its application pursuant to sections 9(a) and 10 of the Act.

By prior Commission order, JCP&L entered into a renewable six-month nuclear fuel lease agreement ("Lease") with PruLease, Inc. ("Lessor"), an affiliate of The Prudential Insurance Company of America ("HCAR No. 23841, September 24, 1985). Under the terms of the Lease, the Lessor would acquire from and simultaneously lease to JCP&L certain nuclear fuel, fuel assemblies and component parts ("Nuclear Material") for use in its Oyster Creek nuclear generating station ("Oyster Creek"). The Lessor would also make payments relating to milling, conversion, enrichment and fabrication services, pursuant to contracts for such services assigned to the Lessor by JCP&L, and other costs generally associated with the Nuclear Material. The Lease currently provides that the Lessor's unrecovered acquisition costs for Nuclear Material and payments for such related services and other costs ("Acquisition Costs"), may not exceed, in the aggregate, $80 million outstanding at any one time.

By subsequent order, JCP&L was authorized to increase the amount of nuclear material which it may sell and lease back from PruLease and the amount of other Acquisition Costs under the Lease to $100 million, which may be outstanding under the Lease at any one time, and to reduce the lease rate payable by JCP&L with respect to any Acquisitioin Costs in addition to those outstanding as of the date the Lease is amended to 1.5% (from 2%) above Prudential Funding Corporation's 30-day commercial paper rate (HCAR No. 24293, January 7, 1987). JCP&L now proposes to increase that amount to $125 million. In all other respects, the transactions as heretofore authorized by the Commission would remain in effect.

Columbus Southern Power Company (70-7453)

Columbus Southern Power Company (formerly, Columbus and Southern Ohio Electric Power Company) ("CSPCo"), 215 North Front Street, Columbus, Ohio 43215, a subsidiary of American Electric Company, Inc., a registered holding company, has filed a post-effective amendment to its declaration, pursuant to sections 6(a), and 7 and 12(c) of the Act and Rules 42, 50 and 50(a)(5) thereunder.

By prior Commission order, CSPCo was authorized to issue and sell in one or more issues from time to time through December 31, 1988, up to $260 million aggregate principal amount of its first mortgage bonds ("Bonds"), in one or more new series. As an alternative to the issuance of an equal principal amount of the Bonds, CSPCo was also authorized to issue and sell one or more new series of its Cumulative Preferred Shares, par value $25 and/or $100 per share, with an aggregate par value of up to $80 million. Additionally, as an alternative to the issuance of the Bonds, CSPCo was authorized to issue from time to time up to $260 million principal amount of unsecured promissory notes with maturity not less than two years nor more than ten years ("Notes") to one or more commercial banks or other financial institutions pursuant to a proposed term loan agreement ("Agreement") (HCAR No. 24511, December 2, 1987).

It is now proposed that as additional credit enhancement for one or more series of the Bonds, CSPCo may arrange for the payment of the principal and interest of such Bonds to be guaranteed by a bond issue insurance policy or surety bond to be issued by an insurance company or consortium of insurance companies. The cost of such policy to CSPCo would be no more than 9/10 of 1% of the outstanding principal amount of the Bonds, payable annually in advance. Also, the Agreement will be amended to provide that the Notes bear interest either at a fixed rate per annum until maturity ("Fixed Rate Loan") or at a fixed rate per annum for a portion of the term of the loan and thereafter until maturity at a fluctuating rate ("Fix/Fluctuating Rate Loan"). The Agreement and Notes thereunder would be for a term of not less than two nor more than twelve years from the date of borrowing. If the term of the Notes is more than ten years, the actual interest rate which each note will bear will be determined at the time of the sale or sales by competitive bidding. If the term of the Notes is ten years or less, the actual rate of interest, and the maturity thereof, shall be subject to further negotiations between CSPCo and the lender; provided that (a) the fixed rate of interest of the Notes will not be greater than 250 basis points above the yield at the time of issuance of the Notes to maturity of United States Treasury obligations that in the case of a Fixed Rate Loan mature on or about the date of maturity of the Notes, or that in the case of a Fixed/Fluctuating Rate Loan, mature on or about the date that such loan changes from a fixed to a fluctuating rate ("Conversion Date"), and (b) the fluctuating rate, if any, will not be greater than 200 basis points above the rate of interest announced publicly by the lending bank from time to time as its base or prime rate. If a loan is a Fixed/Fluctuating Rate Loan, the prepayment fee will be payable only in the event that the Note is paid prior to the Conversion Date and will be based only upon quarterly interest payments to the Conversion Date.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 87-29488 Filed 12-23-87; 8:45 am]

BILLING CODE 8010-01-M

[Rel. No. IC-16179; 812-6684]

Application for Exemption; Variable Account A of Monarch Life Insurance Co.

December 17, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of Application for Exemption Under the Investment Company Act of 1940 (the "1940 Act").

Applicants: Variable Account A of Monarch Life Insurance Company ("VAriable Account A"), Monarch Life Insurance Company ("Monarch") and Monarch Resources, Inc.

Relevant 1940 Act Sections: Exemption requested under section 6(c) from sections 2(a)(32), 2(a)(35), 22(c), 26(a)(2), 27(a)(1), 27(a)(3), 27(c)(1), 27(c)(2), 27(d), 27(f) and 27(h)(3) of the 1940 Act and Rules 6e-2 and 22c-1 thereunder.

Summary of Application: Applicants seek an order to permit, in connection with the issuance of scheduled premium variable life insurance policies (the "Policies") and substantially similar policies issued through Variable Account A and other Monarch separate investment accounts (the "Variable Accounts") those policies to include certain features, such as: (1) The right of the insured to pay unscheduled premiums under the Policies; (2) the deduction of a sales load chargeable to first year scheduled premiums and unscheduled premiums in the nature of a "deferred sales load," and the deduction of a premium tax charge for unscheduled premiums in the nature of a deferred charge; and (3) the deduction

from the Investment Base of the Policies and substantially similar policies for cost of insurance ("Mortality Cost") and the deduction from the assets of the Variable Accounts for the guaranteed benefits risk charge.

Filing Date: The application was filed on April 13, 1987 and amended on September 11, 1987 and November 11, 1987.

Hearing or Notification of Hearing: If no hearing is ordered the application will be granted. Any interested person may request a hearing on the application or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m. on January 11, 1988. A request for a hearing should be in writing and should state the nature of the requesting party's interest, the reason for the request, and the issues the requesting party contests. The requesting party should serve Applicants with the request, either personally or by mail, and also send a copy to the Secretary of the SEC, along with proof of service by affidavit or, in the case of an attorney-at-law, by certificate. A request for notification of the date of a hearing should be in writing addressed to the Secretary of the SEC.

ADDRESSES: Secretary, Securities and Exchange Commission 450 5th Street, NW., Washington, DC 20549. Variable Account A of Monarch Life Insurance Company and Monarch Life Insurance Company, One Monarch Place, Springfield, Massachusetts 01133. Monarch Resources, Inc., 780 Third Avenue, New York New York, 10017.

FOR FURTHER INFORMATION CONTACT: Jeffrey M. Ulness, Attorney, at (202) 272-2026, or Lewis B. Reich, Special Council, at (202) 272-2061, (Division Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Office in person or the SEC's commercial copier at (800) 231-3282 (in Maryland at (301) 253-4300).

Applicants' Representations:

1. Monarch is a stock life insurance company organized under the laws of the Commonwealth of Massachusetts, with its principal office located in Springfield, Massachusetts. Monarch is a wholly-owned subsidiary of Monarch Capital Corporation, a Delaware corporation organized in 1968 as a holding company. Monarch is authorized to do business in the District of Columbia, Puerto Rico and all states.

2. Variable Account A was established on March 31, 1980, as a separate investment account under the laws of Massachusetts and registered with the SEC as a unit investment trust to provide the basic funding to support the benefits under certain variable life insurance policies, including the Policies. In the future, policies substantially similar to the Policies (as described more fully in the Application) may be funded through Variable Account A or other Variable Accounts of Monarch. Unless otherwise indicated, the following representations and statements describe both Variable Account A and the other Variable Accounts that Manarch may use to fund policies substantially similar to the Policies.

3. Each Variable Account will consist of one or more investment divisions, each of which will invest in securities or, if organized as a unit investment trust, in shares or units issued by registered investment companies. Variable Account A's current divisions will invest in nine portfolios of Merrill Lynch Series Fund, Inc., and in designated trusts in The Merrill Lynch Fund of Stripped ("Zero") U.S. Treasury Securities, Series A, B, C and D (the "Merrill Trusts").

4. The Policies will be issued in two forms: one covering a single insured and the other covering two insured. Under the latter form, the death benefit will be paid only upon the death of the last surviving insured. Three plans are available under the Policies: Plan A, which offers both a level face amount and the choice of a scheduled premium payment period; Plan B, which offers a level face amount (but whose Variable Insurance Amount is calculated differently than under Plan A or Plan C); and Plan C, which offers a face amount that decreases at a later point in time.

5. Each Policy will provide for a death benefit equal to the larger of the Policy's face amount and the "Variable Insurance Amount" at the time of the insured's (or last surviving insured's) death. The Variable Insurance Amount for Policies issued under Plans A and C will be determined by multiplying a Policy's cash surrender value by the applicable net single premium factor. The Variable Insurance Amount for Policies issued under Plan B will be determined in the same manner as under Plans A and C during the first policy year, but thereafter will equal the sum of a Policy's face amount plus the applicable net single premium factor multiplied by the excess, if any, of the cash surrender value over the fixed base (which is calculated in the same manner as the cash surrender value except that the calculation is based on the guaranteed maximum cost of insurance rates and an assumed interest rate of 4% and assumes that all scheduled premiums have been duly paid but that no unscheduled premiums have been paid or any policy loans made).

6. The Policies also permit the payment of unscheduled premiums, subject to certain conditions, with or apart from scheduled premium payments. If the Policy owner stops paying scheduled premiums, the owner may or, if the owner makes no election, Monarch will continue the Policy under a variable non-forfeiture option. The variable non-forfeiture option available if the insured is in a standard or better underwriting class is variable extended term insurance ("ETI") (a fixed ETI option is also available), and the variable non-forfeiture option available if the insured is not in a standard or better underwriting class is variable reduced paid-up insurance. Under the variable non-forfeiture options, the Policy's Investment Base (which is the amount available under the Policy for investment in the Variable Account funding the Policy) remains in the Variable Account, and the owner may borrow against the Policy. Under the variable ETI option, the owner may also pay unscheduled premiums.

7. Applicants request an exemption from Rule 6e-2(c)(1) under the 1940 Act to the extent necessary to treat the Policies and substantially similar policies funded by the Variable Accounts as "variable life insurance contracts" within the meaning of Rule 6e-2(c)(1).

8. Applicants represent that the reduction in face amount for Policies issued under Plan C is designed to permit Policy owners to purchase as given face amount during early policy years for lower scheduled premiums than they would pay for the same face amount under Plan A or Plan B. During later policy years, afer the face amount of a Policy issued under Plan C has been decreased, the Policy's cash surrender value is likely to be significant due to cumulative investment experience and premium payments, and it is likely that the Policy's Variable Insurance Amount would provide a substantial death benefit. Applicants submit that the reduction in face amount in later policy years does not affect the variable nature of a Policy issued under Plan C, such as its Variable Insurance Amount, Investment Base or cash surrender value, and therefore should not be viewed as a feature disqualifying a Policy issued under Plan C as a variable life insurance contract under Rule 6e-2(c)(1).

9. Applicants submit that permitting unscheduled premium payments under

VOL 52 ISS 247 DEC 24 1987 UMI

the Policies merely provides an additional benefit to Policy owners and does not affect the fundamental nature of the Policies as scheduled premium variable life insurance contracts, and therefore, should not be viewed as a feature disqualifying the Policies as variable life insurance contracts under Rule 6e–2(c)(1).

10. Applicants submit that the variable ETI option and variable reduced paid-up insurance option provide an additional benefit to a Policy owner by making it possible for the owner to continue insurance protection and participation in the Variable Account even though the owner no longer desires, or may not be able, to pay scheduled premiums. Applicants assert that the availability of these variable non-forfeiture options does not affect the character of the Policy before the option takes effect and therefore should not be viewed as a feature disqualifying the Policies as variable life insurance contracts under Rule 6e–2(c)(1).

11. The Policies povide for deducations for sales loads and premium tax charges. An 8.5% charge (10.0% for a Policy covering joint insured), consisting of a 6.0% sales load (7.5% sales load for a Policy covering joint insured) and a 2.5% premium tax charge, is deducted from each scheduled premium paid under a Policy before allocation to the Policy's Investment Base. In addition, a deferred sales load of 24.0% (22.5% for a Policy covering joint insured) of each first year scheduled premium paid under a Policy is deducted from the Policy's Investment Base in equal installments of 2.4% (2.25% for a Policy covering joint insured) on each of the first through tenth policy anniversaries. No front-end sales load or permium tax charge is deducted from an unscheduled premium paid under a Policy before allocation to the Policy's Investment Base. Instead, a deferred charge of 7.0% (9.0% for a Policy covering joint insured) of each unscheduled premium payment, consisting of a 4.5% sales load (6.5% sales load for a Policy covering joint insured) and a 2.5% premium tax charge, is deducted from the Policy's Investment Base in ten equal installments of .70% (.9% for a Policy covering joint insured) on each of the ten policy anniversaries on or following receipt and acceptance of that payment.

12. A Policy's Investment Base includes the deferred sales loads and any deferred premium tax charges (the "deferred policy loading"). However, the cash surrender value of a Policy reflects a deduction from the Policy's Investment Base for the balance of any deferred policy loading not yet deducted. Upon surrender of a Policy, the balance of the deferred policy loading not previously deducted is subtracted in determining the net cash surrender value, which is the amount payable to the Policy owner, and is equal to the cash surrender value less any policy debt.

13. Applicants request an exemption from section 2(a)(35) of the 1940 Act and Rule 6e–2(b)(1) and 6e–2(c)(4) thereunder to the extent necessary for the term "sales load," as used in the 1940 Act and rules thereunder, to be deemed to include the deferred sales loads chargeable to first year scheduled premiums and any unscheduled premuims paid under the Policies and any substantially similar policies.

14. Applicants submit that the mere fact that the timing of deductions for deferred sales loads under the Policies may not fall within the literal pattern of section 2(a)(35) and Rule 6e-2(c)(4) does not change their essential nature as charges designed to defray sales expenses.

15. Applicants request an exemption from sections 27(a)(3) and 27(h)(3) of the 1940 Act and Rule 6e-2(b)(13)(ii) thereunder, to the extent necessary, to permit the deduction of a deferred sales load chargeable to unscheduled premium payments under the Policies (under which the deferred sales load so chargeable is 4.5% (6.5% for a Policy covering joint insured) of each unscheduled premium payment) and any substantially similar policies, even though sales loads so chargeable to subsequently paid scheduled premiums might result in a technical violation of such provisions.

16. Applicants submit that the mere fact that the sales load chargeable to an unscheduled premium payment is deferred, whereas the sales load for a subsequently paid scheduled premium is deducted up-front, is not inconsistent with the policies underlying Rule 6e-2(b)(13)(ii) because a Policy owner will ultimately pay the same amount of sales load for unscheduled premium payments that is ducted up-front from scheduled premium payments. Also, Applicants state that every Policy owner benefits from the fact that the full amount of the unscheduled premium payment is invested from the time the payment is accepted.

17. With respect to situations where the ability to pay unscheduled premiums between scheduled premiums results in a higher deferred or total sales load deducted from subsequent premiums than prior premiums, Applicants assert that every Policy owner benefits from the fact that a deferred sales load in amounts set forth above are assessed for unscheduled premiums. Moreover, Applicants represent that an unscheduled premium payment functions differently from scheduled premium payments. Whereas the payment of scheduled premiums ensures guaranteed policy benefits, the payment of unscheduled premiums does not affect the policy guarantees unless paid after the scheduled premium payment period (assuming all scheduled premiums have been duly paid) or unless paid after the Policy is applied to the variable ETI option. Unscheduled premium payments, however, affect the investment element of the Policy.

18. Applicants, request an exemption from sections 26(a)(2) and 27(a)(2) of the 1940 Act and Rule 6e-2(b)(13)(iii) and 6e-2(c)(4) thereunder, to the extent necessary, to permit the deduction from the Investment Base of the premium tax charge for an unscheduled premium payment in ten equal installments on the ten policy anniversaries on or following receipt and acceptance of that payment under the Policies and any substantially similar policies.

19. Applicants submit that the imposition of the premium tax charge in this deferred form is more advantageous to Policy owners than having the full amount deducted up-front. Applicants assert that this charge is cost-based, and that no additional or contingent charge will be due for the balance should the death benefit become payable before the premium tax charge has been fully deducted.

20. Applicants request an exemption from section 27(a)(1) of the 1940 Act and Rule 6e–2(b)(1), 6e–2(b)(13) and 6e–2(c)(4) thereunder, on the same terms specified in Rule 6e–2(b)(13)(i) and 6e–2(c)(4), except that life expectancy and the cost of insurance deduction for the Policies and any substantially similar policies will be based upon rates derived from the 1980 Commissioners' Standard Ordinary Male and Female ("1980 CSO Tables") rather than the 1958 Commissioners Ordinary Mortality Table ("1958 CSO Table").

21. Applicants represent that the 1980 CSO Tables were adopted subsequent to the adoption of Rule 6e–2 and reflect more recent information and data about mortality. In general, insurance charges based on the 1980 CSO Tables are lower than those based on the 1958 CSO Table.

22. Applicants represent that Monarch uses the 1980 CSO Tables in esablishing premium rates and determining reserve liabilities for the Policies. Accordingly, Applicants submit that it is appropriate that, in determining what is deemed to be sales load under the Policies, the deduction for the cost of insurance should be based on the 1980 CSO Tables, rather than the 1958 CSO Table.

23. Applicants request an exemption from sections 2(a)(32) and 27(c)(1) of the 1940 Act and Rule 6e–2(b)(12) and 6e–2(b)(13)(iv) thereunder to the extent necessary to permit the net cash surrender value to reflect a deduction of the balance of the deferred policy loading upon surrender of the Policies or any substantially similar policies.

24. Applicants assert that deducting the balance of deferred policy loading in determining the amount payable to a Policy owner upon surrender of the Policy does not restrict the Policy owner from receiving on redemption his or her "proportionate share," for purposes of section 2(a)(32), of the value of the Variable Account funding the Policy. Applicants represent that the deferred policy loading deducted at the time of surrender consists of sales loads and premium tax charges that were chargeable to premiums when paid but were intended to be deducted over period of time rather than up-front from those premiums. Applicants submit that their method of deferring the deduction of those charges results in a larger net amount for initial investment in the Variable Account, thus providing a benefit to Policy owners.

25. Applicants request an exemption from section 22(c) of the 1940 Act and Rules 6e–2(b)(12) and 22c–1 thereunder, to the extent necessary, to permit the deduction upon surrender of the balance of deferred policy loading under the Policies and substantially similar policies.

26. Applicants assert that their procedure of deducting the balance of deferred policy loading in determining the net cash surrender value payable to a Policy owner is not inconsistent with the policy and purposes of Rule 22c–1. Applicants contead that their procedure for determining the net cash surrender value under a Policy on a basis next computed after receipt of the Policy and written surrender request would not have the dilutive effect or encourage the speculative trading that Rule 22c–1 is designed to prevent.

27. Applicants request an exemption from sections 26(a)(2)(C), 27(c)(2), 27(d) and 27(f) of the 1940 Act, to the extent necessary, to permit the deduction upon surrender of the deferred policy loading under the Policies and substantially similar policies.

28. Applicants submit that, while the deduction upon surrender of deferred charges is not expressly contemplated by these Sections, it is not inconsistent with the policy and purposes of these sections.

29. Applicants represent that, in addition to the deferred policy loading, certain other charges and expenses will be deducted periodically under the Policies. These charges include: the Mortality Cost and quarterly administrative fee deducted from a Policy's Investment Base quarterly on each policy processing date; the first year administrative fee deducted quarterly from a Policy's Investment Base on the first four policy processing dates; the mortality and expense risk charge and guaranteed benefits risk charge deducted from the assets of the Variable Account funding a Policy (which charge is deducted from the daily investment results of each division in the Variable Accounts in determining its net rate of return); and the trust charge deducted from the assets of the investment divisions of Variable Account A investing in the Merrill Trusts (which charge is deducted from the daily investment results of those divisions in determining their respective net rates of return).

30. Applicants request an exemption from sections 26(a) and 27(c)(2) of the 1940 Act and Rule 6e–2(b)(13)(iii) thereunder, to the extent necessary, to permit the deduction from the Investment Base of the Policies or substantially similar policies of the Mortality Cost quarterly in arrears.

31. Applicants assert that, by determining and deducting the Mortality Cost quarterly in arrears from the Investment Base, the Policy owner avoids having a large charge deducted as a front-end load from each premium payment. Applicants state that the continual periodic deductions of the Mortality Cost benefits the Policy owner because it increases the initial amount available for investment by the Policy owner.

32. Applicants request an exemption from section 26(a)(2) and 27(c)(2) of the 1940 Act and Rule 6e–2(b)(13)(iii) thereunder, to the extent necessary, to permit the deduction of the guaranteed benefits risk charge under the Policies and substantially similar policies. This charge is currently deducted at an annual rate of 0.15% (The policies provide that this charge may be increased, but the sum of the charges for mortality and expense risks and guaranteed benefits risk charge may not exceed an annual rate of 0.90%. Applicants represent they will not increase the amount of the guaranteed benefits risk charge above 0.15% or the mortality and expense risk charge above an annual rate of 0.60% without first obtaining any necessary exemptive relief.)

33. Applicants represent that the guaranteed benefits risk charge is reasonable in relation to the risk assumed. Applicants have reviewed the level of the guaranteed benefits risk charge under comparable scheduled premium variable life insurance contracts currently being offered, and represent that the charge under the Policies is within the range of industry practice for comparable contracts.

34. Applicants represent that they believe that the sales load being imposed under the Policies may not cover the costs assocaited with them. Monarch has concluded that there is a reasonable likelihood that the distribution financing arrangement being used in connection with the Policies will benefit the Variable Accounts and Policy owners.

For the Commission by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SMALL BUSINESS ADMINISTRATION

[License No. 06/06–0219]

Filing of Application for Transfer of Ownership and Control; Allied Bancshares Capital Corp.

Notice is hereby given that an application has been filed with the Small Business Administration (SBA), pursuant to § 107.601 of the Regulations governing small business investment companies (13 CFR 107.601 (1987)) for a transfer of ownership and control of Allied Bancshares Capital Corporation (ABCC), 1000 Louisiana Street, Houston, Texas 77002, a Federal Licensee under the Small Business Investment Act of 1958 (the Act), as amended (15 U.S.C. 661 *et seq.*). The proposed transfer of ownership and control of ABCC, which was licensed November 1, 1979, is subject to the prior written approval of SBA.

The transfer of ownership and control relates to a proposed merger of Allied Bancshares, Inc. (the 100 percent owner of ABCC) with and into First Interstate Bancorp of Texas, Inc., eventual wholly-owned subsidiary of First Interstate Bancorp, 707 Wilshire Boulevard, Los Angeles, California 90017. Assuming consummation of the proposed transfer of control, management and 100 percent shareholder of ABCC will be:

Name and Address	Position
D. Kent Anderson, 12 E. Rivercrest Drive, Houston, Texas 77042.	Chairman of the Board.
Richard S. Smith, 2220 Troon Road, Houston, Texas 77018.	Vice Chairman.
Hollis L. Walters, 16410 Northmist, Houston, Texas 77073.	Vice President, Secretary.
Robert B. Goldstein, 367 North Post Oak Lane, #106, Houston, Texas 77024.	Treasurer.
Steven R. Felten, 3000 Greenridge, #1806, Houston, Texas 77057.	Assistant Treasurer.
Dillard Lawhorn, 3255 Briarwood Park, #288, Houston, Texas 77030.	Assistant Secretary.
Jay C. Creger, Jr., 1400 Hermann, #17E, Houston, Texas 77004.	Director.
J.T. Trotter, 2148 Troon Road, Houston, Texas 77018.	Director.
First Interstate Bancorp, 707 Wilshire Boulevard, Los Angeles, California 90017.	Shareholder.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the applicant under their management including profitability and financial soundness, in accordance with the Act and Regulations. Notice is hereby given that any person may, no later than 30 days from the date of publication of this Notice, submit written comments on the proposed transfer of control to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, DC 20416.

A copy of the Notice will be published in newspapers of general circulation in Houston, Texas and Los Angeles, California.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Fitness Determination of Nashville Eagle, Inc. d.b.a. American Eagle

AGENCY: Department of Transportation.

ACTION: Notice of commuter air carrier fitness Determination—Order 87-12-52 order to show cause.

SUMMARY: The Department of Transportation is proposing to find that Nashville Eagle, Inc. is fit, willing, and able to provide commuter air service under section 419(c)(2) of the Federal Aviation Act.

RESPONSES: All interested persons wishing to respond to the Department of Transportation's tentative fitness determination should file their responses with the Air Carrier Fitness Division, Room 6420, Department of Transportation, 400 7th Street SW., Washington, DC 20590, and serve them on all persons listed in Attachment A to the order. Responses shall be filed no later than December 28, 1987.

FOR FURTHER INFORMATION CONTACT: Janet A. Davis, Air Carrier Fitness Division, Department of Transportation, 400 7th Street SW., Washington, DC 20590, (202) 366-9721.

Dated: December 18, 1987.

Matthew V. Scocozza,

Assistant Secretary for Policy and International Affairs.

[FR Doc. 87-29493 Filed 12-23-87; 8:45 am]

BILLING CODE 4910-62-M

Federal Highway Administration

Environmental Impact Statement; Baltimore County, MD

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement is being prepared for the proposed widening of U.S. Route 1 in Baltimore County, Maryland.

FOR FURTHER INFORMATION CONTACT: Mr. Edward A. Terry, Jr., Field Operations Engineer, Federal Highway Administration, The Rotunda, Suite 220, 711 W. 40th Street, Baltimore, Maryland 21211, telephone 301/962-4010, and/or Mr. Louis Ege, Jr., Deputy Director Project Development Division, Maryland State Highway Administration, 707 North Calvert Street, Room 310, Baltimore, Maryland 21202, telephone 301-333-1130.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Maryland State Highway Administration, is preparing an environmental impact statement to develop an acceptable alternate to widen approximately a nine-mile portion of existing U.S. Route 1 from Silver Spring Road to Maryland Route 152.

In addition to the No-Build alternate, two Build Alternates are proposed. Under either Build Alternate, the southernmost portion of the project from Silver Spring Road to Joppa Road would consist of seven through lanes and a center lane for left turns. North of Joppa Road, the two Build Alternates would differ in that one alternate would provide four through lanes and the other six through lanes. Under either Build Alternate, the cross section would vary throughout the project, with a center turning lane being provided in areas of dense residential and commercial development, and a median barrier being provided through the sections of Gunpowder State Park and in the less intensely developed areas.

Environmental concerns of primary importance are residential and business displacements and impacts to parks and historic sites.

A public meeting to discuss the preliminary alternates has been held. A public hearing will be held after circulation of the DEIS. A public notice will give the time and place of the public hearing, and individual notices will be sent to those agencies, groups, and individuals on the mailing list. The DEIS will be available for public and agency review and comment prior to the public hearing. To ensure that the full range of issues relating to this proposal are addressed and all significant issues identified, comments and suggestion are invited from all interested parties.

(Catalog of Federal Domestic Assistance Program Number 20.025, Highway Research, Planning and Construction. The provisions of Executive Order 12372 regarding State and local review of Federal and Federally assisted programs and projects apply to this program.)

Emil Elinsky,

Division Administrator.

[FR Doc. 87-29461 Filed 12-23-87; 8:45 am]

BILLING CODE 4910-22-M

Environmental Impact Statement; New Haven County, CT

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an Environmental Impact Statement will be prepared for a proposed highway project in New Haven County, Connecticut.

FOR FURTHER INFORMATION CONTACT: James J. Barakos, Division Administrator, Federal Highway Administration, Abraham A. Ribicoff Federal Building, 450 Main Street, Room 635, Hartford, Connecticut 06103, Telephone (203) 240-3705; or Edgar T. Hurle, Director, Office of Environmental Planning, Connecticut Department of Transportation, 24 Wolcott Hill Road, Wethersfield, Connecticut 06109, Telephone (203) 566-5704.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the State of Connecticut Department of Transportation will prepare an Environmental Impact Statement (EIS) on a proposal to undertake expressway improvements in the vicinity of the I-91/I-95 interchange. Improvements in the corridor are considered necessary to provide for the existing and projected traffic demand.

Alternatives under consideration include: (1) Taking no action; (2) widening the existing I-95 bridge over the Quinnipiac River and improving the existing I-91/I-95 interchange; (3) constructing a new I-95 crossing of New Haven Harbor; and (4) construction of a tunnel under New Haven Harbor. Incorporated into and studies with the various build alternatives will be design variations of grade and alignment.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State, and local agencies and to private organizations and citizens who have previously expressed interest in this proposal.

A public information meeting will be held in the South Central Planning Region in the near future. This meeting will be conducted as a part of the scoping process for this action. Public notice will be given of the time and place of the meeting. The draft EIS will be available for public and agency review and comment.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA or the Connecticut Department of Transportation at the addresses provided above.

Issued on December 18, 1987.

James J. Barakos,

Division Administrator.

BILLING CODE 4910-81-M

National Highway Traffic Safety Administration

[Docket No. IP-86-09; Notice 2]

Ford Motor Company; Grant of Petition for Determination fo Inconsequential Noncompliance

This notice grants the petition by Ford Motor Company of Detroit, Michigan to be exempted from the notification and remedy requirements of the National Traffic and Motor Vehicle Safety Act (15 U.S.C. 138 *et seq.*) for an apparent noncompliance with 49 CFR 571.108, Federal Motor Vehicle Safety Standard No. 108 *Lamps, Reflective Devices and Associated Equipment.* The basis of the grant is that the noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of the petition was published in the **Federal Register** on February 19, 1987 and an opportunity afforded for comment (52 FR 5235).

Ford Motor Company produced approximately 27,300, 1986 Ford Tempo and 9,000 1986 Mercury Topaz 4-door vehicles through July 21, 1986, equipped with optional deck lid luggage racks which obstruct the 5 degree down sight lines, resulting in a noncompliance with Standard No. 108. Minimum design and photometric requirements for center high mounted stop lamps are found in Figure 10 of Standard No. 108. Following the discovery of this noncompliance, Ford began production of a revised shortened stanchion luggage rack which does not prevent the center-mounted stop lamp from complying with the photometric requirements.

Based on its investigation, testing and analyses, Ford argued,

"* * * we believe that the high mount stoplamps installed on 1986 Tempo and Topaz 4-door vehicles equipped with deck lid luggage racks more than amply perform their intended function as recited by NHTSA in the preambles to rulemaking applicable to these devices. Further, we believe that the high mount stoplamps in question perform their intended function equally well as such stoplamps installed on similar vehicles not equipped with deck lid luggage rack and which comply with applicable visibility requirements. Additionally, as we would fully expect, we are aware of no complaints, accidents or injuries related to obstruction of high mount stoplamps on these vehicles by their decklid luggage racks."

Ford Motor Company believes this failure to meet the 5 degree down test visibility requirements of Standard No. 108 is inconsequential as it relates to motor vehicle safety because the stoplamps still radiate light of sufficient intensity in the required rearward directions to intercept the eyes of the drivers of the following vehicles.

The following table provides a comparative analysis of the average photometric output measurements in candela between Ford Tempo and Mercury Topaz cars manufactured without a luggage rack, equipped with a tall deck lid luggage rack, and equipped with a short deck lid luggage rack.

5 degree down test points	No luggage rack	Original tall rack	New short rack	Minimum photometric requirements of FMVSS 108
5D–10L	43.47	10.48	43.47	16.00
5L	57.02	15.00	57.02	25.00
V	53.74	17.51	53.74	25.00
5R	52.67	17.41	52.67	25.00
10R	48.37	10.96	48.37	16.00

NOTE: Above values are average from two cars tested.

Four comments were received on the petition. It was supported by General Motors Corporation, the National Automobile Dealers Association, and the Automotive Parts and Accessories Association, all of whom agreed with Ford's arguments. Robert F. Schlegel, Jr., P.E., opposed it. He believes that the photometric requirements are important for cars of lower height that stop on hilly surfaces, where down angles are more important to safety.

The agency has carefully reviewed Ford's arguments and the comments received in response to the notice. It is impressed with the corrective action taken by Ford in its design of a new luggage rack whose installation does not create a noncompliance. NHTSA notes that the highmounted lamp will continue to provide 60 to 70 percent of the minimum photometric output required by Standard No. 108, and that the other stop lamps are not obscured. Although it is estimated that almost 15,000 rear end collisons yearly involve a car on a hill crest, given the relatively small number of noncompliant vehicles and the other factors discussed above, it is unlikely that allowing the vehicles to remain uncorrected will significantly affect safety.

Accordingly, it is hereby found for good cause shown that the noncompliance herein described is inconsequential as it relates to motor vehicle safety, and the petition is granted.

(Sec. 102, Pub. L. 93–492, 88 Stat. 1470 (15 U.S.C. 1417); delegations of authority at 49 CFR 1.50 and 49 CFR 501.8)

Issued on: December 18, 1987.

Barry Felrice,

Associate Administrator for Rulemaking.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Commissioner's Advisory Group; Open Meeting

The first meeting of the 1988 Commissioner's Advisory Group will be held on January 13 and 14, 1988 at the IRS Philadelphia Service Center. The Service Center is located at 11601 Roosevelt Boulevard, Philadelphia, Pennsylvania. The meeting will begin at 8:00 a.m. on Wednesday, January 13 and 8:00 a.m. on Thursday, January 14. The agenda will include the following topics:

Wednesday, January 13, 1988

Discuss Commissioner Advisory Group (CAG) Process
Overview of Service Center Operations and Tour of Facility

Thursday, January 14, 1988

Commissioner's Objectives
Discuss Advisory Group Theme(s) and Agenda(s); General Question/Answer Discussion

Due to the Service Center's security requirements and limited conference space, notification of intent to attend the meeting must be made with Robert F. Hilgen, Assistant to the Senior Deputy Commissioner, no later than January 7, 1988. Mr. Hilgen may be reached on (202) 566–4143 (not toll-free).

If you would like to have the Advisory Group consider a written statement, please call or write Robert Hilgen, Assistant to the Senior Deputy Commissioner, Internal Revenue Service, 1111 Constitution Ave. NW., Room 3014, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Robert Hilgen, Assistant to the Senior Deputy Commissioner, (202) 566–4143 (not toll-free).

Lawrence B. Gibbs,

Commissioner.

BILLING CODE 4830–01–M

VETERANS ADMINISTRATION

Medical Care Reimbursement Rates for Fiscal Year 1988

AGENCY: Veterans Administration.

ACTION: Notice.

In accordance with provisions of OMB Circular A–11 section 13.5(a), revised reimbursement rates have been established by the Veterans Administration (VA) for inpatient and outpatient medical care furnished to beneficiaries of other Federal Agencies during Fiscal Year 1988. These rates will be charged for such medical care provided at health care facilities under the direct jurisdiction of the Administrator on and after December 1, 1987:

Medical	[illegible]56
Surgery	516
Spinal Cord Injury	[illegible]26
Blind Rehabilitation	[illegible]67
Neurology	327
Rehabilitation	310
General Psychiatry	184
Intermediate Medicine	155
Nursing Home Care	140
Alcohol—Drug	[illegible]62
Prescription—Refill	13
Outpatient [1]	107

[1] Rate includes dialysis treatment.

Prescription refill charges in lieu of the outpatient visit rate will be charged when the patient receives no service other than the pharmacy outpatient service. These charges apply if the patient receives the prescription refills in person or by mail.

When medical services for beneficiaries of other Federal Agencies are obtained by the VA from private sources, the charges to the other Federal Agencies will be the actual amounts paid by the VA for such medical services.

Inpatient charges to other Federal Agencies will be at the current interagency per diem rate as set forth above for the type of bed section or discrete treatment unit providing the care.

Dated: December 10, 1987.

Thomas K. Turnage,

Administrator.

Correction

In proposed rule document 87-24769 beginning on page 39946 in the issue of Monday, October 26, 1987, make the following corrections:

1. On page 39946, in the second column, in the last paragraph, in the last line, after "program" insert a dash.

2. On page 39949, in the first column, in the second complete paragraph, in the second line, "the" should read "that".

3. On page 39950, in the first column, in the next to last line, "DOG" should read "DOJ".

4. On page 39952, in the first column, in paragraph (a), in the 18th line, "application must be on the" should read "applicant must meet the", and in the 24th line "unment" should read "unmet".

5. On page 39953, in the third column, in the first complete paragraph, in the fifth line, "§ 841.324" should read "§ 841.325" and in the last paragraph, in the third line from the bottom, "§§ 840.440(c)(5)" should read "§§ 840.400(c)(5)".

6. On page 39955, in the third column, in the second line, "The term does not" should begin a new unindented line.

§ 840.207 [Corrected]

7. On page 39959, in the third column, in § 840.207, in paragraph (a)(2), "ranking" was misspelled and in paragraph (b)(1), after the eighth line, insert "families with children or deinstitutionalized homeless persons and other homeless".

§ 840.210 [Corrected]

8. On page 39960, in the second column, in § 840.210, in paragraph (b)(2)(iv)(B), in the second line, "fully" should read "duly".

19. On the same page, in the third column, in § 840.210, in paragraph (b)(3)(ii)(D), in the 1st line, after "include" insert "rental", and in the 22nd line, after "income" insert ",anticipated resident income must be adjusted to reflect the rental income".

§ 840.320 [Corrected]

20. On page 39963, in the second column, in § 840.320, in the second line of the introductory paragraph, "transitional" was misspelled.

§ 840.330 [Corrected]

21. On page 39964, in the third column, in § 840.330, in paragraph (d)(2)(vii), in the 13th line, "accordance" was misspelled, and in paragraph (e)(2), in the 4th line, "may obtain a personal or" should begin a new unindented line.

§ 841.5 [Corrected]

22. On page 39966, in the second column, in § 841.5, in the definition for "Handicapped or Handicapped person", in paragraph (b), in the sixth line of the column, "personal" was misspelled, and in the definition for "Homeless", in paragraph (b)(3), in the fourth line, "The term does not" should begin a new unindented line.

§ 841.225 [Corrected]

23. On page 39972, in the first column, in § 841.225, in the seventh line, "§ 841-220" should read "§ 841.220".

§ 841.330 [Corrected]

24. On page 39974, in the second column, in § 841.330, in paragraph (d)(3), in the sixth line, "carriers" should read "carries".

25. On page 39974, in the second column, in § 841.330, in paragraph (e)(2), in the fourth line, "may obtain a personal or" should begin a new unindented line.

LIST OF PUBLIC LAWS

Last List December 23, 1987

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202-275-3030).

H.R. 2672/Pub. L. 100-198

Veterans' Home Loan Program Improvements and Property Rehabilitation Act of 1987. (Dec. 21, 1987; 101 Stat. 1315; 11 pages) Price: $1.00

H.J. Res. 426/Pub. L. 100-199

Authorizing the hand enrollment of the budget reconciliation bill and of the full-year continuing resolution for fiscal year 1988. (Dec. 21, 1987; 101 Stat. 1326; 1 page) Price: $1.00

H.J. Res. 427/Pub. L. 100-200

To provide for the temporary extension of certain programs relating to housing and community development, and for other purposes. (Dec. 21, 1987; 101 Stat. 1327; 1 page) Price: $1.00

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $340.00 per year, or $170.00 for 6 months in paper form, or $188.00 per year, or $94.00 for six months in microfiche form, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 52 FR 12345.

Vol. 52, No. 248
Monday, December 28, 1987

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 907

[Navel Orange Regulation 665]

Navel Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 665 establishes the quantity of California-Arizona navel oranges that may be shipped to market during the period December 25, 1987 through December 31, 1987. Such action is needed to balance the supply of fresh navel oranges with the demand for such oranges during the period specified due to the marketing situation confronting the orange industry.

DATES: Regulation 665 (§ 907.965) is effective for the period December 25, 1987, through December 31, 1987.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2528–S, P.O. Box 96456, Washington, DC 20090–6456. telephone: (202) 447–5120.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Order 907 (7 CFR Part 907), as amended, regulating the handling of navel oranges grown in Arizona and designated part of California. This order is effective under the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the Act.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of the use of volume regulations on small entities as well as larger ones.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 123 handlers of California-Arizona navel oranges subject to regulation under the navel orange marketing order, and approximately 4,065 producers in California and Arizona. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of California-Arizona navel oranges may be classified as small entities.

This action is consistent with the marketing policy for 1987–88 adopted by the Navel Orange Administrative Committee (Committee). The Committee met publicly on December 22, 1987, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by an 8 to 3 vote, a quantity of navel oranges deemed advisable to be handled during the specified week. The Committee reports that the market for navel oranges is fair.

Based on consideration of supply and market conditions, and the evaluation of alternatives to the implementation of prorate regulations, the Administrator of the AMS has determined that this final rule will not have a significant economic impact on a substantial number of small entities.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice, engage in further public procedure with respect to this action and that good cause exists for not postponing the effective date of this action until 30 day after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared policy of the Act. Interested persons were given an opportunity to submit information and view on the regulation at an open meeting. To effectuate the declared purposes of the Act, it is necessary to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 907

Marketing agreements and orders, California, Arizona, Oranges (navel).

For the reasons set forth in the preamble, 7 CFR Part 907 is amended as follows:

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

1. The authority citation for 7 CFR Part 907 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 907.965 is added to read as follows:

§ 907.965 Navel Orange Regulation 665.

The quantity of navel oranges grown in California and Arizona which may be handled during the period December 25, 1987, through December 31, 1987, are established as follows:

(a) District 1: 1,020,000 cartons;
(b) District 2: 108,000 cartons;
(c) District 3: 60,000 cartons;
(d) District 4: 12,000 cartons.

Dated: December 23, 1987.

Robert C. Keaney,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410–02–M

7 CFR Part 910

[Lemon Regulation 593]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 593 establishes the quantity of fresh California-Arizona lemons that may be shipped to market at 250,000 cartons during the period December 27, 1987, through January 2, 1988. Such action is needed to balance the supply of fresh lemons with market demand for the period specified, due to the marketing situation confronting the lemon industry.

DATES: Regulation 593 (§ 910.893) is effective for the period December 27, 1987, through January 2, 1988.

FOR FURTHER INFORMATION CONTACT: Raymond C. Martin, Section Head, Volume Control Programs, Marketing Order Administration Branch, F&V, AMS, USDA, Room 2534, South Building, P.O. Box 96456, Washington, DC 20090-6456; telephone: (202) 447-5697.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory action to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

This regulation is issued under Marketing Order No. 910, as amended 7 CFR Part 910 regulating the handling of lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act (the "Act", 7 U.S.C. 601-674), as amended. This action is based upon the recommendation and information submitted by the Lemon Administrative Committee and upon other available information. It is found that this action will not tend to effectuate the declared policy of the Act.

This regulation is consistent with the marketing policy for 1987-88. The committee met publicly on December 22, 1987, in Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended, by a 12 to 0 vote, a quantity of lemons deemed advisable to be handled during the specified week. The committee reports that the demand for lemons remains easier with lessened demand due to incumbent weather in the eastern states.

Pursuant to 5 U.S.C. 553, it is further found that it is impracticable, unnecessary and contrary to the public interest to give preliminary notice, and engage in further public procedures with respect to this action and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because of insufficient time between the date when information became available upon which this regulation is based and the effective date necessary to effectuate the declared purposes of the Act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting. It is necessary, in order to effectuate the declared purposes of the Act, to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

For the reasons set forth in the preamble, 7 CFR Part 910 is amended as follows:

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

1. The authority citation for 7 CFR Part 910 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

2. Section 910.893 is added to read as follows:

§ 910.893 Lemon Regulation 593.

The quantity of lemons grown in California and Arizona which may be handled during the period December 27, 1987, through January 2, 1988, is established at 250,000 cartons.

Dated: December 23, 1987.

Robert C. Kenney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

BILLING CODE 3410-02-M

7 CFR Parts 1002 and 1004

[Docket Nos. AO-160-A62 and AO-71-A74]

Milk in the Middle Atlantic and New York-New Jersey Marketing Areas; Order Amending the Orders Withdrawn

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule withdrawn.

SUMMARY: This action withdraws an order amending the Middle Atlantic and New York-New Jersey milk orders which was to become effective December 1, 1985. The action stems from a recent decision of the Third Circuit Court of Appeals affirming the order of the U.S. District Court for the Eastern District of Pennsylvania which enjoined the Secretary of Agriculture from implementing amendments to the above-mentioned orders.

EFFECTIVE DATE: December 28, 1987.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, (202) 447-7311.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued June 17, 1983; published June 23, 1983 (48 FR 28655).

Recommended Decision: Issued March 5, 1985; published March 11, 1985 (50 FR 9637).

Extension of time for filing exceptions: Issued April 5, 1985; published April 10, 1985 (50 FR 14110).

Final Decision: Issued August 9, 1985; published August 14, 1985 (50 FR 32716).

Final Order: Issued October 29, 1985; published November 1, 1985 (50 FR 45595).

Suspension of effective date of Final Order: Issued November 27, 1985; published December 4, 1985 (50 FR 49674).

This document is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674) and withdraws the order amending the orders regulating the handling of milk in the aforesaid marketing areas.

Basis for Withdrawing Final Rule

1. On October 29, 1985 (50 FR 45595) the Deputy Assistant Secretary, Marketing and Inspection Services issued an order amending the two aforesaid orders. The amending order was to become effective on December 1, 1985, and would have expanded the marketing areas of the two orders and revised each order's location adjustment provisions.

2. On November 22, 1985, the U.S. District Court for the Eastern District of Pennsylvania issued, on the basis of a civil action before it, a preliminary injunction restraining the Secretary from implementing the order amending the two orders. Shortly thereafter, the Department suspended the December 1, 1985, effective date of the order amending the two aforesaid orders that were issued on October 29, 1985 (50 FR 45595) until further notice.

3. On July 17, 1986, the U.S. District Court granted the plaintiffs' request for a permanent injunction enjoining the Secretary from implementing the order amending the two orders.

4. The Secretary appealed the U.S. District Court's ruling to the United States Court of Appeals for the Third Circuit. Thereafter, on September 21, 1987, the Third Circuit Court of Appeals affirmed the decision of the District Court which permanently enjoined the Secretary from implementing the order amending the two orders.

List of Subjects in 7 CFR Parts 1004 and 1002

Milk marketing orders, Milk, Dairy products.

It is therefore ordered, that on the basis of the Third Circuit Court of Appeals' September 21, 1987, decision, the order amending the aforesaid orders that was to be effective December 1, 1985 (50 FR 45595), is hereby withdrawn.

The authority citation for Parts 1004 and 1002 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended (7 U.S.C. 601-674).

Signed at Washington, DC on: December 17, 1987.

Kenneth A. Gilles,

Assistant Secretary for Marketing and Inspection Services.

[FR Doc. 87-29592 Filed 12-24-87; 8:45 am]

BILLING CODE 3410-02-M

Rural Electrification Administration

7 CFR Part 1738

Electric Standards and Specifications

AGENCY: Rural Electrification Administration, USDA.

ACTION: Final rule.

SUMMARY: The Rural Electrification Administration (REA) hereby revises 7 CFR Chapter XVII, REA Regulations, Part 1738, Electric Standards and Specifications, by revising REA Bulletin 50-70(U-1), REA Specification for 15 kV and 25 kV Primary Underground Power Cable. This bulletin contains the REA material specifications for underground power cable. The primary changes resulting from this revision are: (1) Removing all high molecular weight polyethylene as an acceptable insulating material; (2) increasing the minimum average insulation layer thickness from 175 to 220 mils for 15 kilovolt (kV) cable and from 260 to 345 mils for 25 kV cable; (3) requiring the application of an electrically insulating outer jacket on all such cables; and (4) modifying the present requirement to test each reel of cable produced to detect excessive partial discharge.

EFFECTIVE DATE: December 28, 1987.

FOR FURTHER INFORMATION CONTACT: Mr. James C. Dedman, Electrical Engineer, Electric Staff Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, DC 20250-1500, telephone (202) 382-9091.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 et seq.), REA is revising 7 CFR Chapter XVII, REA Regulations, Part 1736, Electric Standards and Specifications, by revising REA Bulletin 50-70(U-1), REA Specification for 15 kV and 25 kV Primary Underground Power Cable.

This action has been reviewed in accordance with Executive Order 12291, Federal Regulation. This action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, state or local government agencies; or (3) result in significant adverse effects on competition, employment, investment or productivity, and, therefore, has been determined to be "not major."

REA has concluded that promulgation of this rule will not represent a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq. (1976)) and, therefore, does not require an environmental impact statement or an environmental assessment.

This regulation contains no information or recordkeeping requirements which require approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507 et seq.). This action does not fall within the scope of the Regulatory Flexibility Act. This program is listed in the Catalog of Federal Domestic Assistance as 10.850, Rural Electrification Loans and Loan Guarantees. For the reasons set forth in the final rule **Federal Register** notice related to 7 CFR Part 3015, Subpart V, in 50 FR 47034, November 14, 1985, this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with state and local officials.

Background

REA maintains a system of bulletins that contains construction standards and specifications for materials and equipment which are applicable to electric system facilities constructed by REA electric borrowers in accordance with the REA loan contract. These standards and specifications contain standard construction units and material and equipment items commonly used in REA electric and telephone borrowers' systems.

REA Bulletin 50-70(U-1), REA Specification for 15 kV and 25 kV Primary Underground Power Cable, contains REA's requirements relative to the purchase of underground power cables by REA electric borrowers. The requirements in Bulletin 50-70(U-1) are minimum requirements and are based primarily on specifications of national standards setting organizations such as the Association of Edison Illuminating Companies (AEIC) and the Insulated Cable Engineers Association (ICEA). Bulletin 50-70(U-1) was last revised in 1984.

In recent years, cables purchased and installed by many REA electric borrowers have failed long before the end of the anticipated life of the cables. Since these prematurely failed cables were designed and manufactured in accordance with Bulletin 50-70(U-1) and the referenced national standards, REA has concluded that Bulletin 50-70(U-1) should be revised to exceed some requirements of the national standards.

The primary cause of underground cable failures is the formation and growth of electrochemical "trees" in the insulation layer of the cables. The tree-like voids usually form at impurities or voids in the insulation material. The growth of the trees is accelerated by moisture in the insulation layer and high voltage stress.

High molecular weight polyethylene (HMW) insulated cables have performed very poorly regarding failure due to trees. All manufacturers of underground cable have ceased production of cables insulated with HMW not containing tree-retardant additives. In 1986, REA removed HMW cables from REA Bulletin 43-5, List of Materials Acceptable for Use on Systems of REA Electrification Borrowers. REA has learned that each

VOL 52 ISS 248 DE 28 1987 UMI

manufacturer presently listed in Bulletin 43–5 for cable insulated with HMW with the tree-retardant additives (HMW–TR) recommends against its use. REA believes that the removal of all HMW insulated cable (including HMW–TR) from Bulletin 50–7(U–1) is certainly justified.

The voltage stress (measured in volts per mil) on the insulation of underground cable is a function of the voltage present and the thickness of the insulation layer (in mils). Increasing the thickness of the insulation wall will decrease the voltage stress and, therefore, retard the growth of trees in the insulation layer. Presently, Bulletin 50–70(U–1) requires the average thickness of the insulation layer to be at least as large as 175 mils for cables used on systems rated at 15 kilovolts (kV) and 280 mils for 25 kV systems. This action increases the minimum wall thickness to 220 mils for 15 kV systems and 345 mils for 25 kV systems.

The cables used on systems of REA electric borrowers are almost always buried in direct contact with the earth. They are, therefore, in constant contact with moisture, a major contributing factor in the growth of trees. Bulletin 50–70(U–1) presently allows, but does not require, the application of an electrically insulating jacket as an outer protective covering on underground cables. The jacket provides mechanical protection which decreases the likelihood of physical damage and moisture contact with the insulation layer within. Therefore, this action revises Bulletin 50–70(U–1) to require insulating jackets on all underground power cable.

The national standards and Bulletin 50–70(U–1) require manufacturers of underground cable to test each reel of cable to detect excessive partial discharge which could damage the insulation layer. REA revises its requirement to allow an alternate procedure under which a manufacturer could demonstrate to REA's satisfaction that the manufacturer can produce cables without excessive partial discharge and that its insulation material is sufficiently resistant to damage caused by excessive partial discharge, should it occur. Testing for resistance to partial discharge will be required periodically on cable produced by the manufacturer.

Numerous other changes, which are more minor or clerical in nature, are included in this action.

Comments

On August 10, 1987, REA published a Proposed Rule notice to revise 7 CFR Chapter XVII, Part 1736 by revising Bulletin 50–70(U–1). In the Proposed Rule notice, REA invited interested parties to file comments on or before October 9, 1987. Although some comments were received after that date, all responses received have been considered in preparing this Final Rule.

Sixty different organizations or groups commented on the Proposed Rule. They are:

1. Public Utility District No. 1 of Douglas County, Washington
2. Dalager Engineering Company
3. Cablec Corporation
4. Orville W. Zastrow, Consulting Engineer
5. Conductor Products, Inc.
6. Wisconsin Electric Cooperative Association
7. Tillamook People's Utility District
8. KBM, Inc.
9. Nodak Rural Electric Cooperative, Inc.
10. Lower Valley Power & Light, Inc.
11. Top O'Michigan Rural Electric Company (two responses)
12. CamWal Electric Cooperative, Inc.
13. Green River Electric Cooperative, Inc.
14. Pirelli Cable Corporation (two responses)
15. Hendrix Wire & Cable
16. Mille Lacs Electric Cooperative
17. Tarheel Electric Membership Association, Inc.
18. Wild Rice Electric Cooperative, Inc.
19. Slope Electric Cooperative, Inc.
20. James Valley Electric Cooperative, Inc.
21. Burke—Divide Electric Cooperative, Inc.
22. Union Carbide Corporation
23. Capital Electric Cooperative, Inc.
24. North Central Electric Cooperative, Inc.
25. Martin and Associates, Inc.
26. Verendrye Electric Cooperative, Inc.
27. Georgia Electric Membership Corporation
28. North Itasca Electric Co–op, Inc.
30. Joslyn Corporation
31. North Star Electric Cooperative, Inc.
32. Oliver—Mercer Electric Cooperative, Inc.
33. Northeast Nebraska Rural Public Power District
34. Red Lake Electric Cooperative, Inc.
35. McKenzie Electric Cooperative, Inc.
36. Meeker Cooperative Light & Power Association
37. Anoka Electric Cooperative
38. Dairyland Electric Co-op, Inc.
39. McLean Engineering Company, Inc.
40. McLean Electric Co-operative, Inc.
41. Reynolds Aluminum
42. SSR, Inc. Engineers
43. The Smoky Hill Electric Cooperative Association, Inc.
44. The Okonite Company
45. Allied Tube & Conduit
46. RTE Corporation
47. The Kerite Company
48. East Mississippi Electric Power Association
49. Cavalier Rural Electric Cooperative, Inc.
50. Itasca—Mantrap Co-op. Electrical Association
51. Cobb Electric Membership Corporation
52. Mid Carolina Electric Cooperative
53. Mor-Gran-Sou Electric Cooperative, Inc.
54. Ulteig Engineers, Inc.
55. Star Services Federation
56. Twin Valleys Public Power District
57. Palmetto Electric Cooperative, Inc.
58. Southern Engineering Company
59. Insulated Cable Engineers Association (ICEA)
60. Agralite Cooperative

For the purposes of discussion, the negative comments of these organizations have been categorized.

Conductor: Two organizations recommended inclusion of three-quarter hard aluminum temper, H16 or H28, as an acceptable material for solid aluminum conductors. The major drawback to using harder temper solid conductor has been decreased flexibility. However, since Bulletin 50–70(U–1) is being revised to require a thicker insulation layer and an outer jacket, the decrease in flexibility should be negligible at most. REA accepts the suggested change.

Two organizations recommended requiring, not just allowing, the use of material to fill the interstices (gaps) between the strands of stranded conductor. Strand fillers are designed to prevent the longitudinal migration, along the conductor, of moisture which may enter the conductor due to dig-in or natural migration from the outside. Although REA recognizes that strand fillers will prevent some damaging moisture from reaching the cable insulation layer, it is felt that its use should be recommended, not required.

Conductor Shield: A change has been made in this revision of Bulletin 50–70(U–1) to allow the use of insulating conductor shield (stress control layer) in addition to the semi-conducting shield required in the existing edition of the bulletin. Three organizations have objected to this change. The cable specifications of ICEA allow either insulating or semi-conducting conductor shields, so REA feels that this comment should not be accepted.

Bulletin 50–70(U–1), as proposed, would allow the use of an insulating or semi-conducting separator tape between the conductor and the conductor shield. Two commenters recommended allowing only semi-conducting tape, while three commenters recommended not allowing any separator tape. REA has accepted the second comment, and has removed any mention of separator tape from the bulletin. Some people feel that the separator tape allows moisture to enter the space between the tape and the conductor. Separator tapes are generally used only with large conductors (1,250 kcmil and larger). Since the bulletin covers only conductors up to 1,000 kcmil, the use of separator tapes is not justified.

Insulation: Seven organizations recommended removing tree retardant high molecular weight polyethylene (HMW–TR) as an acceptable insulation material. Four organizations recommended removing cross-linked polyethylene (XLP) without tree retardant additives. REA has removed HMW–TR, but not XLP. Each of the three cable manufacturers presently listed as manufacturers of HMW–TR cable no longer recommends the use of HMW–TR insulation. Therefore, REA has removed it from REA Bulletin 43–5 and from Bulletin 50–70(U–1). REA feels that insufficient data exists on failures of XLP insulated cables to justify its removal. Since the thickness of the insulation is increased and the use of a jacket is required by this action, the performance of XLP cable should be quite acceptable. Also, tree retardant XLP cable has not been in use for a sufficient length of time to justify its being the only accepted polyethylene insulation material.

Insulation Thickness: Some organizations have objected to REA's increasing the minimum average thickness of the insulation layer. The objections concerned several operational difficulties:

1. Borrowers will need to carry two sets of cable accessories in store rooms and on repair trucks.

2. Repair crews may have difficulty identifying the size of insulation on failed cables.

3. Borrowers have in stock supplies of cable and accessories in accordance with the former edition of Bulletin 50–70(U–1).

Other organizations have commented that increased insulation thicknesses are not necessary if quality insulation materials and workmanship and jackets are used.

Although REA recognizes that some minor, temporary operational difficulties may result from this change, the obvious benefits resulting from decreasing the voltage stress on the cable insulation outweigh the drawbacks. Several borrowers have converted to cables with increased insulation thicknesses with no major difficulty. Borrowers will be allowed to use cables with the thinner insulation walls until existing stocks are depleted. Of course, a supply of the older cable and accessories will be retained for future repairs.

The minimum average insulation thickness included in the proposed revision of Bulletin 50–70(U–1) were 220 mils for 15 kV cable and 320 mils for 25 kV cable. Eleven organizations objected to these minimum values for two major reasons. First, some commenters have used 280 mil thick insulation on their 15 kV cable and want to continue this practice. Since 220 mils is the *minimum* average thickness, the insulation thickness of 15 kV cable may be increased to a maximum of 280 mils. Secondly, several commenters object to the use of 320 mils, instead of the more commonly used 345 mils, for 25 kV cable. REA has accepted this comment since 345 is more commonly used and since it is the increased thickness specified by ICEA.

Insulation Shield: Four organizations commented that the listing of acceptable insulation shield materials in the proposed specification was unclear. Four semi-conducting materials were included: thermoplastic polyethylene, deformation resistant thermoplastic polyethylene, cross-linked polyethylene, and ethylene propylene rubber. Since REA has removed all high molecular weight (thermoplastic) polyethylene as acceptable insulation material, inclusion of the two types of thermoplastic polyethylene insulation shields is no longer necessary. The other two materials are actually thermosetting semi-conducting polymers, one of which is based upon cross-linked polyethylene while the other is based upon ethylene propylene rubber. The insulation shield material must be compatible with, but not necessarily the same material as, the insulation material. Therefore, in order to clarify this section, REA will require "a semi-conducting thermosetting (cross-linked polyethylene or ethylene propylene rubber) polymeric layer."

Manufacturing Process: The proposed revision added a requirement that the conductor shield, insulation, and insulation shield shall be extruded onto the conductor in one continuous manufacturing process (triple extrusion process). The triple extrusion process, a relatively recent development in cable manufacturing, is intended to make two primary improvements in cable quality. First, since the three layers are extruded in one pass through the manufacturing process, there is less opportunity for contaminants to appear between the insulation shield and insulation. Also, since the thermosetting insulation and insulation shield layers are cured at the same time, the adhesion between those two layers is increased. Poor adhesion (and voids) between the two layers can cause partial discharge (corona) which can damage insulation materials.

REA agrees that increased cleanliness and insulation shield adhesion are desirable qualities. However, we are aware that manufacturers which do not use the triple extrusion process have produced quality cable for many years by taking care to ensure cleanliness between the two extrusions and by using corona resistant insulation materials. (Note: Before being listed in REA Bulletin 43–5, each manufacturer must demonstrate that its cable passes the partial discharge test in the AEIC cable specification.) Therefore, REA has determined that, although use of the triple extrusion manufacturing process is desirable, sufficient justification does not exist to require its use.

Concentric Neutral: Several organizations commented that the minimum number of concentric neutral wires required by Bulletin 50–70(U–1) is not sufficient when an insulating overall outer jacket is applied. REA agrees with this requirement and has adopted the requirement in the ICEA specifications. Jacketed cable operated on single-phase systems shall have a full neutral as described in the ICEA specifications and cable operated on three-phase systems shall have at least a one-third neutral as per ICEA.

Overall Outer Jacket: The previous edition of Bulletin 50–70(U–1) allowed, but did not require, the application of an electrically insulating outer jacket over the concentric neutral wires. The proposed revision of the bulletin requires the jacket. Twenty-five organizations commented that jackets should not be required for several various reasons.

Most of the commenters reported that they have experienced little or no corrosion of the concentric neutral wires. The jacket is intended to serve many purposes, only one of which is corrosion mitigation. The jacket provides significant mechanical protection to the insulation shield and the underlying insulation layer. Also, the jacket delays moisture from reaching and damaging the insulation layer.

Others commented that jacketed cable is difficult to terminate and ground. Many borrowers have successfully terminated jacketed cable for many years. REA will soon consider for listing in Bulletin 43–5 products, manufactured by several companies, which are used to ground the concentric neutral wires and reseal the jacket. Other organizations have commented that the premium cost (approximately 10–15% more than non-jacketed cable) of jacketed cable is not justified. REA believes that the several benefits of jacketed cable will increase the useful life (and decrease costs due to repairs, lost revenues, etc.) of the cable. The value of the added life outweighs the increased cost of the jacket.

Some organizations expressed concern that rodents, such as gophers, will gnaw through the jacket material. A small hole in the jacket will allow moisture to enter. This moisture can damage the insulation layer and cause severe localized corrosion of the concentric neutral wires. A borrower which can provide sufficient written

justification to REA that the underground cable on its system is subject to rodent damage may request, from its REA area office, a waiver of the requirement that a jacket must be used.

One organization expressed an opinion that an insulating jacket will make adequate grounding of the neutrals more difficult to achieve, especially on systems which experience grounding difficulties due to the nature of the soil. Inadequate grounding can cause unsafe conditions. The neutral on jacketed underground cable is electrically similar to the neutral on overhead lines. The National Electrical Safety Code requires that multiple grounded systems, like those on REA borrower systems, must be "effectively grounded." In some locations, it may be necessary to install an array of multiple ground rods, or longer rods, at each grounding point. There also may be locations where especially high earth resistivity and/or rock make the use of cables with bare concentric neutrals desirable. In such situations REA will consider requests for waiver of the jacketing requirement.

Because of the general advantages of jacketed cable, REA retains its requirement that underground cables have an insulating jacket applied over the concentric neutral wires.

Two organizations have commented that REA should require that separator tapes not be allowed between the jacket and the concentric neutral wires. REA agrees that the jacket should encapsulate the neutral wires, leaving no voids. If a separator tape is used, the space between the individual neutral wires is open, allowing any moisture which may enter the gap to easily migrate longitudinally under the jacket. Therefore, Bulletin 50–70(U–1) will not allow the use of such separator tapes.

(Note: The encapsulated neutral wires must remain in intimate contact with the underlying insulation shield.)

Tests: Some organizations have commented that the list of AEIC qualification tests included in Bulletin 50–70(U–1) should be revised to match the tests required in the AEIC specifications which have been revised recently, but not yet printed. REA has accepted this comment and will require compliance with the production sampling tests and qualifications tests in the new AEIC specifications.

Partial Discharge Test: The AEIC specifications and the existing edition of REA Bulletin 50–70(U–1) require manufacturers to pass a partial discharge (corona) test as a qualification test and to test each reel of cable for excessive partial discharge before it is shipped. This test is intended to detect voids in the insulation layer or between the insulation layer and the shield layers. Corona can form in the voids, causing damage to most insulation materials. However, REA has been made aware that some cable is being manufactured with insulation material which is resistant to the effects of partial discharge. In the proposed revision of Bulletin 50–70(U–1), REA included an alternative procedure under which manufacturers which had passed the partial discharge qualification test could opt to perform the discharge resistance (U-bend) test, as described in ICEA specifications, on each manufacturing run of cable instead of performing the partial discharge test on each reel of cable. Some organizations commented that the option should not be allowed since the ICEA discharge resistance test is intended to apply to unshielded lower voltage cables only.

REA believes that, although the finished cables produced under Bulletin 50–70(U–1) are shielded, the U-Bend discharge resistance test is an acceptable test to assess the ability of an insulation material to resist the harmful effects of partial discharge. Therefore, REA has retained the optional procedure, with some clarification of the test procedures, described in the proposed revision. REA believes that most cable manufacturers will continue to test each reel of cable in accordance with the AEIC partial discharge test requirement.

Jacket Tests: Bulletin 50–70(U–1) requires a Cold Bend Test to be performed on "each length of jacketed cable shipped." Commenters have indicated that this testing frequency is unnecessary. REA agrees with this comment and has changed the testing frequency to "one test for each 50,000 feet of cable, or major fraction thereof, or at least once per jacket extruder run."

Cable Markings: Some organizations have suggested REA require the application of three red stripes running along the cable jacket, equally spaced around the jacket, to identify it as an electric power cable. REA realizes that red has been accepted as the standard color used to identify electric facilities and that some utilities, including some REA borrowers, have purchased jacketed cable with red stripes (or totally red jackets). However, REA also has been made aware that some questions exist concerning the possible adverse effects the red striping material may have on the quality of the jacket. Therefore, REA does not believe that sufficient information is available to justify requiring red stripes on jacketed cable.

Some organizations have suggested that REA should require a durable label to be attached to each reel of cable identifying the purchaser, cable description, number of feet of cable on the reel and weight of the reel. REA believes that this suggestion is reasonable and has accepted it.

Favorable Comments: The large number of comments received as a result of the proposed revision should not be misconstrued as general dissatisfaction with the proposed revision. Of the 60 responses to the proposed revision, several expressed complete satisfaction with the proposal. These generally were cable manufacturers or REA electric borrowers which already have used, with success, cable which exceeds the present minimum requirements. Concerning the requirement of an overall outer jacket, which produced the largest number of negative comments, some cable manufacturers commented that this change will have a greater positive impact on the quality of underground cable than any other change REA could make.

Also, it should be pointed out that copies of the proposed revision and proposed rule Federal Register notice were sent to approximately 1,100 organizations, including each electric borrower. REA believes that the fact that only 60 organizations responded indicates that no general dissatisfaction exists with this action.

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 212

[Order No. 1244–87]

Mariel Cuban Parole Determinations

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule establishes a separate immigration parole review process for certain detained, excludable nationals of Cuba who came to the United States during the 1980 Mariel Cuban boatlift. It permits a comprehensive and fair review of the cases of excludable Mariel boatlift participants, detained pursuant to the authority of the Immigration and Nationality Act, for parole consideration. The effect of this rule is to establish several levels of review to determine whether certain detained, excludable Mariel Cubans should be paroled, and to set forth the procedures governing such parole decisions. It establishes a new Departmental Release Review Program under the general supervision of the Associate Attorney General, which will provide eligible aliens, otherwise denied parole, with an additional review.

EFFECTIVE DATE: Final rule effective December 28, 1987.

FOR FURTHER INFORMATION CONTACT: Donald A. Couvillon, Attorney, Office of Immigration Litigation, Civil Division, telephone (202) 272–4397; or Craig Raynsford, Attorney, Office of the General Counsel, Immigration and Naturalization Service, telephone (202) 633–2895.

SUPPLEMENTARY INFORMATION:

General Background

Between the months of April and October of 1980 approximately 125,000 Cuban nationals without appropriate entry documentation arrived on the shores of the United States as a consequence of what has become known as the Mariel boatlift. Cuban government authorities inserted numerous hardened criminals and other undesirable aliens among the vast majority of peaceful, productive and law-abiding Cubans who came here as a result of the boatlift. Despite being hampered by incomplete information respecting the then newly arriving aliens, the United States attempted to identify those individuals whose release might present unacceptable risks to members of the American public and to return these aliens to Cuba. The Government of Cuba, however, refused to accept the repatriation of those found to be excludable from the United States.

Subsequent to the boatlift, several unsuccessful attempts were made to reach an agreement between the United States and Cuba on immigration matters. Finally, on December 14, 1984, the United States and Cuba entered into a bilateral migration agreement ("migration agreement"), which provides for normalized immigration between the two countries, and includes Cuba's agreement to accept the return of certain Mariel Cubans ordered excluded by the United States. The migration agreement, however, limits the United States to returning an average of only one hundred excluded aliens to Cuba per month. In May of 1985, not long after it took effect, the migration agreement was unilaterally suspended by the Government of Cuba. On November 20, 1987, however, the United States and Cuba announced the immediate reinstatement of the migration agreement of December 14, 1984, in all of its aspects.

The unprecedented arrival of the 125,000 Cuban nationals on our shores in 1980, and Cuba's initial refusal to accept repatriation of those ordered excluded under our immigration laws, created a situation of a magnitude that has never before existed in the immigration history of the United States. In response to this situation, and at a time prior to late 1984 when the repatriation of a Mariel excludable was not practicable, the Attorney General created a parole program for detained Mariel Cubans, namely, the Attorney General's Status Review Plan. That Status Review Plan was intended to balance the need to protect the American public from potentially dangerous aliens with the humanitarian problems created by Cuba's unjustified refusal to accept repatriation and the associated prospects for long-term confinement that faced excludable but unreturnable Mariel Cubans. With the original signing of the migration agreement in 1984, the Attorney General's Status Review Plan was terminated and actual deportations to Cuba were commenced. After the termination of the Status Review Plan, parole for Mariel Cubans was available only under the general regulatory authority of the District Directors of the Immigration and Naturalization Service (hereinafter referred to as the "Service").

As indicated earlier, in May of 1985, implementation of the migration agreement was unilaterally suspended by the Government of Cuba.

Accordingly, the renewed inability to repatriate detained, excludable Cubans caused a significant increase in the number of such criminals within the custody of the Service. Recognizing the need for another comprehensive parole review procedure, the Commissioner of the Immigration and Naturalization Service approved the establishment of a new Cuban Review Plan on May 25, 1987. The Cuban Review Plan has provided for a nationwide review of the cases of Mariel Cuban criminals in the custody of the Service for parole consideration, and has enabled many of those individuals approved for parole to be relocated to either halfway house placements or approved family units. Where upon review it was determined that an individual was not acceptable for parole, another opportunity for review has existed on an annual basis. Over the years, under the various parole mechanisms adopted to address the unique circumstances presented by the Mariel Cubans, eventually all but approximately 100 to 150 of these individuals were paroled into our society. Many paroled aliens, however, have committed crimes in the United States and have had their immigration parole revoked. Currently, there are approximately 7,800 Mariel boatlift participants who either are detained under the authority of our immigration laws or are serving criminal sentences in Federal, State, and local prisons.

The reinstatement of the migration agreement, and the disturbances at the Oakdale, Louisiana and Atlanta, Georgia institutions, have again focused the attention of the nation on the issues associated with the deportation or release on parole of detained Mariel excludables. In this light, it has been determined that, in addition to the current Cuban Review Plan administered by the Service, a Departmental Release Review Program will be established. These procedures in combination will ensure a thorough and fair parole review for each eligible detainee. Administered by the Associate Attorney General, the Departmental Program will review only those cases where parole has been denied by the Cuban Review Plan within the Service. In addition, a separate review mechanism is being established to look at the cases of those detainees who are likely candidates for deportation. An informational notice describing that program is being published separately. A detainee who is selected and approved for repatriation will not be entitled to a determination respecting release on parole under the procedures being established here.

Discussion of Specific Provisions

This regulation makes changes to 8 CFR Part 212 by incorporating distinct procedures for the parole review process in relation to Mariel Cubans.

In section 212(d)(5) of the Immigration and Nationality Act (the Act), 8 U.S.C. 1182(d)(5), Congress vested in the Attorney General broad discretion to parole into the United States an alien seeking admission, under any conditions as he may prescribe, for emergent reasons or for reasons deemed strictly in the public interest. Sections 212.12 and 212.13 of this new rule establish procedures for the exercise of the Attorney General's discretion to parole which will be applicable to the unusual circumstances presented by the Mariel Cubans. Section 212.12 incorporates with some modifications an on-going procedure within the Service which will result in periodic reviews of detained Mariel Cubans for possible parole. Section 212.13, on the other hand, establishes a new Departmental Release Review Program which will undertake a one-time, single level of further review by Departmental Panels composed of certain designated officials of the Department of Justice. Under both sections, the ultimate determination whether to grant or deny parole will be made in the exercise of the Attorney General's discretion under the Act. The Departmental Panel's determination to either grant or deny parole will result from an independent evaluation of each case. In keeping with its regular responsibilities under our immigration laws, the Service will retain the responsibility for the overall implementation of the parole program, including revocation of parole for violation of its conditions, execution of orders of exclusion or commencement of proceedings, or adjustments to meet unforeseen or changed circumstances.

New § 212.12. The scope of the Service's Cuban Review Plan is described in § 212.12(a). As stated therein, the new procedures apply to any Mariel Cuban, as defined, in the custody of the Service or who is detained anywhere in the United States pursuant to the authority of the Act. The Mariel boatlift took place approximately between April and October of 1980. The regulatory definition for a Mariel Cuban covers a time period for arrival in the United States from April 15, 1980, to October 20, 1980. This ensures as complete coverage as possible of boatlift participants, recognizing that there may have been departures from Cuba prior to the April 20, 1980, opening of the Port of Mariel as an embarkation point by Cuban authorities, and that aliens continued to arrive in the United States well after the September 26, 1980, closing of Mariel harbor by Cuban authorities. The Service's Plan does not apply to a Mariel Cuban who is still serving a sentence imposed pursuant to a criminal conviction, regardless of whether the Service has placed a detainer on the alien, until and unless his parole is revoked *after* he completes his criminal sentence and actually is taken into Service custody. Notwithstanding the establishment of these parole procedures, an excludable Mariel Cuban may be deported from the United States and repatriated to Cuba without first receiving a parole review under this rule.

In § 212.12(b) there is a delegation of the Attorney General's authority to the Commissioner and the Associate Commissioner for Enforcement (Associate Commissioner) who will possess the full discretion vested in the Attorney General pursuant to section 212(d)(5) of the Act. For effective day-to-day operation, the Associate Commissioner may in turn delegate in writing his powers to persons under his supervision. Under § 212.12(c), the Associate Commissioner will appoint a Director of the Cuban Review Plan who will administer the Cuban Review Plan. In § 212.12(d)(1), the rule provides that the Director shall designate Cuban Review Panels whose function is to make parole recommendations to the Associate Commissioner.

Set forth in § 212.12(d) are the criteria for the Panel's review and the factors, such as likelihood to engage in future acts of violence or likelihood to engage in future criminal activity, which the Panel should weigh in considering whether to recommend further detention or release on parole in each individual case. This parole recommendation process is also to take into account the roots an alien may have here in the United States by looking at such things as his family ties, and the danger that the alien will abscond, such as from any sponsorship program designed to assist his integration into society. The traditional considerations in most parole determinations (see 8 CFR 212.5) are appropriate here for obvious reasons. The procedures for Panel review include a review of the detainee's file, and possibly an interview of the detainee by the Panel. In addition, the detainee may submit to the Panel any information which he believes demonstrates that he should be released on parole. Finally, § 212.12(d)(4)(iii) provides that the Panel will forward to the Associate Commissioner a written recommendation either for or against parole.

Upon receipt of the Panel's recommendation, the Associate Commissioner shall determine whether to grant parole consistent with the delegation of discretionary authority. In this regard, it is important to note that the Associate Commissioner is not bound by the Panel or Director's findings pursuant to § 212.12(d)(2) or constrained by the factors which the Panel should consider and weigh as set forth in § 212.12(d)(3). Rather, the Associate Commissioner retains the full statutory authority in § 212(d)(5) of the Act. While the Panel's recommendation is designed to serve as an important guide to the exercise of discretion, the Associate Commissioner must also take into consideration changes in foreign and domestic affairs, the availability of fiscal as well as other resources, public policy and humanitarian concerns, and other factors which could weigh for or against the decision in an individual case. The Associate Commissioner must be free to assess all of the circumstances in arriving at his final determination to grant parole to a detained Mariel Cuban for emergent reasons or for reasons deemed strictly in the public interest.

In § 212.12(e), there is an admonition that a detainee approved for parole must maintain proper behavior while awaiting suitable sponsorship or placement, or his parole may be revoked. The Associate Commissioner must be free to withdraw his grant of parole to a detainee who exhibits behavior inconsistent with the determination to release him into the American community. Moreover, while it is well settled in the criminal context that a grant of discretionary parole can be revoked without additional procedural steps prior to release, this paragraph puts the detainee on notice.

The requirements of suitable sponsorships and placements are outlined in § 212.12(f), which also reiterates that no detainee will be released absent a suitable sponsorship or placement and that the parolee must abide by the parole conditions specified by the Service in relation to his sponsorship or placement.

The timing of the parole review process is set forth in § 212.12(g). It outlines three separate categories: (1) The process for a new detainee or detainee whose parole has recently been revoked will start ordinarily with the scheduling of a file review within approximately three months; (2) a detainee who has continued in custody and has been denied parole will receive a yearly review; and (3) a detainee may receive a discretionary review scheduled by the Cuban Review Plan Director. These goals for the timing of parole reviews are, of course, contingent upon the availability of adequate resources, which the Department is undertaking to obtain. As noted above, the Review Plan established by § 212.12 does not apply to detained Cubans who are still serving sentences imposed pursuant to criminal convictions.

Revocation of parole is covered by § 212.12(h). The Associate Commissioner will be responsible for the overall supervision of Mariel Cuban parole revocations. Local Service district directors will retain the power to revoke parole in emergency situations, but are expected to obtain prior clearance from the Associate Commissioner in routine cases. The grounds for parole revocation are listed in § 212.12(h). In the past, the district directors have revoked parole most often after the Mariel Cuban has been convicted of a serious misdemeanor or felony. Parole revocation has also occurred if an individual appears to present a danger to the community, displays serious mental health problems, is involved in repeated arrests or disturbances, or violates specific terms of parole. The new parole revocation guidelines contemplate a continuance of the same practices under day-to-day conditions. The guidelines also allow, however, for flexibility in meeting unusual or changing circumstances. These have been evident in foreign and domestic relations and changes in enforcement priorities. Now that Cuba has agreed to accept the return of the excludable Mariel Cubans, the guidelines also provide for revocation of parole as appropriate to enforce an order of exclusion or to commence proceedings.

New § 212.13. The scope of the Departmental Release Review Program, under the general supervision of the Associate Attorney General, is set forth in § 212.13(a). The Associate Attorney General is given the authority to establish additional day-to-day operating procedures as he deems necessary. The purpose of the Program, as set forth in § 212.13(b), is to provide a single parole review of eligible Mariel Cubans who have been denied parole after exhaustion of the procedures in § 212.12. A Mariel Cuban who is currently serving a sentence imposed after a criminal conviction is not eligible for review under the Departmental Program at this time; instead, the Program is limited to those Mariel Cubans in Service custody on the date of promulgation of this regulation. A decision will be made at a later date respecting any expansion of this Program. Likewise, nothing in § 212.13 is intended to preclude the repatriation of any Mariel Cuban regardless of whether he has received a parole review.

The rule specifically states, in § 212.13(b), that each eligible detainee shall be entitled to only one review before a Departmental Panel regardless of whether he is subsequently denied parole pursuant to § 212.12 or any successor plan. The composition of the panels is set forth in § 212.13(c), while § 212.13(d) contains a delegation of the Attorney General's discretionary authority, pursuant to section 212(d)(5) of the Act, 8 U.S.C. 1182(d)(5), to grant parole for emergent reasons or for reasons deemed strictly in the public interest.

The procedures for notifying a detainee that his case will be submitted to a Departmental Panel are contained in § 212.13(e). Under this paragraph, the detainee will be notified that he may submit a written statement to the Panel setting forth any factors he deems relevant. Although not required by the Act, the detainee will also be advised that he may, at no expense to the government, have a representative or counsel assist in the preparation of the statement. This is consistent with the provisions of section 292 of the Act, 8 U.S.C. 1362, which accord any alien the privilege of representation, at no expense to the government, in exclusion proceedings. Under no circumstances is it contemplated that counsel will be appointed for a detainee. The review is to be a record review, not an adversarial evidentiary hearing, such as that usually available in respect to a finding of excludability. Under § 212.13(f), the Departmental Panel may, in its sole discretion, designate one of its members to interview the detainee and report in writing to the full Panel.

Pursuant to § 212.13(g), the decision of the Departmental Panel will be based on a review of the record created during the procedure outlined in § 212.12, the written submission of the detainee, if any, and any interview deemed appropriate by the Panel. Except as provided in § 212.13(i), the decisions of the Panel will be final and subject to no further review. Under § 212.13(i), a Panel has discretionary authority to withdraw a grant of parole when, prior to release, the conduct of the detainee or other changes in circumstances warrant. It is important that the Panel have the flexibility to respond when, for example, a detainee who has been granted parole subsequently engages in conduct which undermines the Panel's decision, when such conduct occurs after submission of

VOL 52 ISS 248 DEC 28 1987 UMI

the case to the panel and thus is not a part of the record, or when foreign affairs or domestic conditions indicate that the parole determination is no longer in the public interest.

Specified in § 212.13(h) are the same caveats regarding release to suitable sponsorships or placements as contained in § 212.12(f). Likewise, § 212.13(h) provides that the paroled detainee must abide by the parole conditions specified by the Service. Under § 212.13(j), parole granted by a Departmental Panel may be revoked pursuant to § 212.12. Thus, the Departmental Panel is not vested with a role in the revocation of parole. The Departmental Review Program's specific and limited function is to provide a one-time review of eligible Mariel Cubans for possible parole. Neither the Review Program nor the Departmental Panels which implement the Program are intended to provide oversight into day-to-day parole decisions or placements, the execution of orders of exclusion, or any of the many matters encompassed in the general enforcement of our immigration laws. These matters are properly entrusted to the Service. Accordingly, the Service retains sole delegation of authority under § 212.12 to establish the conditions of parole and to revoke parole.

Justification for Final Rule

The promulgation of this rule setting forth the Cuban Review Plan and establishing the Departmental Release Review Program is effective immediately and not subject to notice and comment rulemaking because the Department of Justice "for good cause finds * * * that notice and public procedures thereon are impracticable, unnecessary, or contrary to the public interest" in accordance with 5 U.S.C. 553(b)(B). The immediate initiation of a special parole program for detained Mariel Cubans is necessary to assure that all parole determinations are promptly and fairly reviewed. Recently, well-publicized, volatile, and life-threatening disturbances took place at the Atlanta, Georgia and Oakdale, Louisiana institutions in which Mariel excludables were detained. In nine days of occupation, one detainee lost his life, both sites suffered extensive property damage amounting to tens of millions of dollars, detainees had fashioned weapons, and the prospect loomed for sharply escalating hostilities, threatening the health and safety, among others, of officials and citizens held hostage throughout the ordeal. The two incidents underscore the need for a system of parole determinations that ensures that the Cuban detainees will have confidence that they are receiving a just and fair review. By swiftly responding to the recent tensions, the risk is minimized that the public will again be exposed to imminent and direct physical harm. In addition, the Atlanta detainees released their hostages and terminated the disturbance at that facility with the express expectation that parole reviews for certain detainees would be completed by June 30, 1988. Given the short timetable to conduct this anticipated review of a large number of detainees, it would be contrary to the public interest to delay implementation of this parole program. Therefore, it is necessary to invoke the "good cause" exception to the notice of proposed rulemaking requirements of 5 U.S.C. 553(b) and the "good cause" exception to the 30 day delayed effective date requirement of 5 U.S.C. 553(d), and to implement the rule immediately.

In accordance with 5 U.S.C. 605(b), the Attorney General certifies that this rule will not have a significant economic impact on a substantial number of small entities.

This is not a major rule within the meaning of section 1(b) of E.O. 12291.

This rule contains information collection requirements; however, they are exempt from the requirements of the Paperwork Reduction Act in accordance with 5 CFR 1320.3(c).

List of Subjects in 8 CFR Part 212

Aliens, Parole, Detention, Exclusion, Cubans.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 212—DOCUMENTARY REQUIREMENTS; NONIMMIGRANT WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

1. The authority citation for Part 212 is revised to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1182, 1184, 1225, 1226, 1228, 1252; 8 CFR Part 2.

2. In § 212.5, a new paragraph (f) is added to read as follows:

§ 212.5 Parole of aliens into the United States.

* * * * *

(f) *Parole for certain Cuban nationals.* Notwithstanding any other provision respecting parole, the determination whether to release on parole, or to revoke the parole of, a native of Cuba who last came to the United States between April 15, 1980, and October 20, 1980, shall be governed by the terms of §§ 212.12 and 212.13.

3. Part 212 is amended by adding §§ 212.12 and 212.13 to read as follows:

§ 212.12 Parole determinations and revocations respecting Mariel Cubans.

(a) *Scope.* This section applies to any native of Cuba who last came to the United States between April 15, 1980, and October 20, 1980 (hereinafter referred to as "Mariel Cuban") and who is being detained by the Immigration and Naturalization Service (hereinafter referred to as the "Service") pending his or her exclusion hearing, or pending his or her return to Cuba or to another country. It covers Mariel Cubans who have never been paroled as well as those Mariel Cubans whose previous parole has been revoked by the Service. It also applies to any Mariel Cuban, detained under the authority of the Immigration and Nationality Act in any facility, who has not been approved for release or who is currently awaiting movement to a Service or Bureau Of Prisons (BOP) facility. In addition, it covers the revocation of parole for those Mariel Cubans who have been released on parole at any time.

(b) *Parole authority and decision.* Except as provided in § 212.13, the authority to grant parole under section 212(d)(5) of the Act to a detained Mariel Cuban shall be exercised by the Commissioner, acting through the Associate Commissioner for Enforcement, as follows:

(1) *Parole decisions.* The Associate Commissioner for Enforcement may, in the exercise of discretion, grant parole to a detained Mariel Cuban for emergent reasons or for reasons deemed strictly in the public interest. A decision to retain in custody shall briefly set forth the reasons for the continued detention. A decision to release on parole may contain such special conditions as are considered appropriate. A copy of any decision to parole or to detain, with an attached copy translated into Spanish, shall be provided to the detainee. Parole documentation for Mariel Cubans shall be issued by the district director having jurisdiction over the alien, in accordance with the parole determination made by the Associate Commissioner for Enforcement.

(2) *Additional delegation of authority.* All references to the Commissioner and Associate Commissioner for Enforcement in this section shall be deemed to include any person or persons (including a committee) designated in writing by the Commissioner or Associate Commissioner for Enforcement to exercise powers under this section.

(c) *Review Plan Director.* The Associate Commissioner for Enforcement shall appoint a Director of the Cuban Review Plan. The Director shall have authority to establish and maintain appropriate files respecting each Mariel Cuban to be reviewed for possible parole, to determine the order in which the cases shall be reviewed, and to coordinate activities associated with these reviews.

(d) *Recommendations to the Associate Commissioner for Enforcement.* Parole recommendations for detained Mariel Cubans shall be developed in accordance with the following procedures.

(1) *Review Panels.* The Director shall designate a panel or panels to make parole recommendations to the Associate Commissioner for Enforcement. A Cuban Review Panel shall, except as otherwise provided, consist of two persons. Members of a Review Panel shall be selected from the professional staff of the Service. All recommendations by a two-member Panel shall be unanimous. If the vote of a two-member Panel is split, it shall adjourn its deliberations concerning that particular detainee until a third Panel member is added. A recommendation by a three-member Panel shall be by majority vote. The third member of any Panel shall be the Director of the Cuban Review Plan or his designee.

(2) *Criteria for Review.* Before making any recommendation that a detainee be granted parole, a majority of the Cuban Review Panel members, or the Director in case of a record review, must conclude that:

(i) The detainee is presently a nonviolent person;

(ii) The detainee is likely to remain nonviolent;

(iii) The detainee is not likely to pose a threat to the community following his release; and

(iv) The detainee is not likely to violate the conditions of his parole.

(3) *Factors for consideration.* The following factors should be weighed in considering whether to recommend further detention or release on parole of a detainee:

(i) The nature and number of disciplinary infractions or incident reports received while in custody;

(ii) The detainee's past history of criminal behavior;

(iii) Any psychiatric and psychological reports pertaining to the detainee's mental health;

(iv) Institutional progress relating to participation in work, educational and vocational programs;

(v) His ties to the United States, such as the number of close relatives residing lawfully here;

(vi) The likelihood that he may abscond, such as from any sponsorship program; and

(vii) Any other information which is probative of whether the detainee is likely to adjust to life in a community, is likely to engage in future acts of violence, is likely to engage in future criminal activity, or is likely to violate the conditions of his parole.

(4) *Procedure for review.* The following procedures will govern the review process:

(i) *Record review.* Initially, the Director or a Panel shall review the detainee's file. Upon completion of this record review, the Director or the Panel shall issue a written recommendation that the detainee be released on parole or scheduled for a personal interview.

(ii) *Personal interview.* If a recommendation to grant parole after only a record review is not accepted or if the detainee is not recommended for release, a Panel shall personally interview the detainee. The scheduling of such interviews shall be at the discretion of the Director. The detainee may be accompanied during the interview by a person of his choice, who is able to attend at the time of the scheduled interview, to assist in answering any questions. The detainee may submit to the Panel any information, either orally or in writing, which he believes presents a basis for release on parole.

(iii) *Panel recommendation.* Following completion of the interview and its deliberations, the Panel shall issue a written recommendation that the detainee be released on parole or remain in custody pending deportation or pending further observation and subsequent review. This written recommendation shall include a brief statement of the factors which the Panel deems material to its recommendation. The recommendation and appropriate file material shall be forwarded to the Associate Commissioner for Enforcement, to be considered in the exercise of discretion pursuant to § 212.12(b).

(e) *Withdrawal of parole approval.* If a detainee approved for parole fails to maintain proper behavior while he is awaiting suitable sponsorship or placement, his parole approval may be revoked by the Associate Commissioner for Enforcement.

(f) *Sponsorship.* No detainee may be released on parole until suitable sponsorship or placement has been found for the detainee. The paroled detainee must abide by the parole conditions specified by the Service in relation to his sponsorship or placement. The following sponsorships and placements are suitable:

(1) Placement by the Public Health Service in an approved halfway house or mental health project;

(2) Placement by the Community Relations Service in an approved halfway house or community project; and

(3) Placement with a close relative such as a parent, spouse, child, or sibling who is a lawful permanent resident or a citizen of the United States.

(g) *Timing of reviews.* The timing of review shall be in accordance with the following guidelines.

(1) *Parole revocation cases.* The Director shall schedule the review process in the case of a new or returning detainee whose previous immigration parole has been revoked. The review process will commence with a scheduling of a file review, which will ordinarily be expected to occur within approximately three months after parole is revoked.

(2) *Continued detention cases.* A subsequent review shall be commenced for any detainee within one year of a refusal to grant parole under either § 212.12(b) or § 212.13, whichever is later, unless a shorter interval is specified by the Director.

(3) *Discretionary reviews.* The Cuban Review Plan Director, in his discretion, may schedule a review of a detainee at any time when the Director deems such a review to be warranted.

(h) *Revocation of parole.* The Associate Commissioner for Enforcement shall have authority, in the exercise of discretion, to revoke parole in respect to Mariel Cubans. A district director may also revoke parole when, in the district director's opinion, revocation is in the public interest and circumstances do not reasonably permit referral of the case to the Associate Commissioner. Parole may be revoked in the exercise of discretion when, in the opinion of the revoking official:

(1) The purposes of parole have been served;

(2) The Mariel Cuban violates any condition of parole;

(3) It is appropriate to enforce an order of exclusion or to commence proceedings against a Mariel Cuban; or

(4) The period of parole has expired without being renewed.

VOL 52 ISS 248 DEC 28 1987 UMI

§ 212.13 Departmental parole determinations respecting certain Mariel Cubans.

(a) *Scope.* This section, establishing a Departmental Release Review Program, applies to all excludable Mariel Cubans who on the effective date of this regulation are detained by virtue of the Attorney General's authority under the Immigration and Nationality Act and whose parole has been denied after the exhaustion of the procedures set forth in § 212.12. This Departmental Release Review Program shall be under the general supervision of the Associate Attorney General, who shall administer the Program and establish such additional procedures as may be required.

(b) *Single review.* Each detainee described in paragraph (a) above shall be entitled to only one review before a Departmental Panel. Should a detainee denied parole under this section subsequently receive further review pursuant to § 212.12 or any successor parole review plan of the Service, such detainee shall not be entitled to a second review before a Departmental Panel.

(c) *Departmental panels.* The Associate Attorney General shall establish panels which will be comprised of three persons from within the Department of Justice, one of whom must be an attorney, and one of whom must be a representative of the Community Relations Service. The Immigration and Naturalization Service shall not be represented on the panels. These panels shall consider the cases of those Mariel Cubans whose parole has previously been denied pursuant to the provisions set forth in § 212.12.

(d) *Parole authority.* Each Departmental Panel shall be vested with the full discretion of the Attorney General under section 212(d)(5) of the Act to grant parole for emergent reasons or for reasons deemed strictly in the public interest.

(e) *Notification and submission.* Prior to the submission by the Service of a case to a Departmental Panel, the detainee shall receive notification from the Service that he is about to receive Departmental Panel consideration. Such notification shall inform the detainee that he may submit a written statement to a Departmental Panel, within 30 days from the date of service of the notification, setting forth any factors he deems relevant to the parole consideration and he may, at no expense to the government, have his representative or counsel assist in the preparation of this written statement.

(f) *Interviews.* A Departmental Panel may designate one of its members to interview the detainee and report in writing to the full Panel whenever in its sole discretion it deems such action appropriate.

(g) *Panel decisions.* The written decision of a Departmental Panel will be based on a review of the record created during the review by the Service pursuant to § 212.12, the written submission, if any, from the detainee, and the information obtained from any Panel interview of the detainee. Except as provided in paragraph (i) of this section, all written decisions of a Departmental Panel will be final and subject to no further review.

(h) *Sponsorship.* No detainee may be released on parole until suitable sponsorship or placement has been found for the detainee. The paroled detainee must abide by the parole conditions specified by the Service in relation to his sponsorship or placement. The following sponsorships and placements are suitable:

(1) Placement by the Public Health Service in an approved halfway house or mental health project;

(2) Placement by the Community Relations Service in an approved halfway house or community project; and

(3) Placement with a close relative such as a parent, spouse, child, or sibling who is a lawful permanent resident or a citizen of the United States.

(i) *Withdrawal of parole approval.* A Departmental Panel may, in its discretion, withdraw its approval for parole of any detainee prior to release when, in its opinion, the conduct of the detainee, or any other circumstance, indicates that parole would no longer be appropriate.

(j) *Parole revocations.* Parole granted under this section may be revoked pursuant to § 212.12.

4. The Table of Contents to 8 CFR Part 212 is amended by adding before the "Authority" citation the following new headings:

BILLING CODE 4410-15-M

FEDERAL RESERVE SYSTEM

12 CFR Part 220

Regulation T

[Docket No. R-0611]

Credit by Brokers and Dealers (Regulation T); Exercise of Employee Stock Options

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final Rule.

SUMMARY: The Board is adopting an amendment to Regulation T that will permit broker-dealers to aid in the exercise of company stock options owned by employees of the company, its subsidiaries, or affiliates. In lieu of the securities to be received upon exercise, the amendment will allow broker-dealers to accept a fully-endorsed employee stock option and instructions to the issuer to deliver the securities to the broker-dealer.

EFFECTIVE DATE: January 25, 1988.

FOR FURTHER INFORMATION CONTACT: Laura Homer, Securities Credit Officer, or Scott Holz, Attorney, Division of Banking Supervision and Regulation, (202) 452-2781. For the hearing impaired *only*, Telecommunications Service for the Deaf, Earnestine Hill or Dorothea Thompson, (202) 452-3544.

SUPPLEMENTARY INFORMATION: The proposal to amend Regulation T was published in the **Federal Register** on August 26, 1987 (52 FR 32138). Twenty comments were received; all but two supported the amendment as proposed.

Many of the commenters asked for clarification of how the Board envisions the mechanics of these transactions. The following paragraphs respond to the comments.

The amendment will allow the broker-dealer to accept a fully-endorsed employee stock option with instructions signed by the customer instructing the issuer to deliver the securities to the broker-dealer. The customer is to designate the account into which the securities should be deposited, i.e. the margin account or the cash account. The rule does not preclude allowing the broker-dealer to advance funds to the issuer in cases where the employee has given the exercise notice to the issuer and not the broker-dealer, as long as the broker-dealer has a copy of the exercise notice and delivery instructions and has verified that the issuer will deliver the securities promptly to the broker-dealer.

If the customer wishes to immediately sell the stock to be received upon exercise in order to profit from the difference between the exercise price of the option and the current value of the resulting stock, the cash account would be the appropriate account. A customer who avails himself of the amendment using the cash account will be deemed to own the security for purposes of § 220.8(a)(2)(ii). The 90 day freeze provision (§ 220.8(c)) would therefore not apply to the transaction.

If the customer wishes to keep the stock he would most likely elect to use a margin account, assuming the stock to be received upon exercise is a margin security as defined in § 220.2(o). If the exercise price is greater than 50% of the current market price of the margin security, the broker-dealer should treat the transaction as creating a margin deficiency in the account. The broker-dealer would then issue a margin call for the additional funds, due within seven business days from the date the exercise notice is received by the broker-dealer.

In response to a request for clarification by the New York Stock Exchange, the Board indicated that the transactions will not be deemed a violation of the arranging provision of Regulation T (§ 220.13). Another commenter pointed out that many plans prohibit assignment of options. The Board stated that, in its view, delivery of the endorsed notice of exercise does not constitute an assignment of the option to the broker-dealer as the broker-dealer is receiving the stock on behalf of the customer. In response to another comment, the Board reiterated that Regulation T only applies to the amount of credit that is extended and does not regulate interest charges or other fees.

One commenter requested that the Board allow independent contractors who receive stock options as compensation to use the amendment. The Board has in the past created special exceptions in its margin regulations to aid the exercise of employee stock options (e.g., 12 CFR 207.5). This was in part due to the Board's perception that the favorable tax treatment given employee stock options reflected a Congressional intent to aid employee stock ownership. Since it is not clear that an independent contractor would be an "employee" entitled to favorable tax treatment for the exercise of an employee stock option, the Board is not prepared to enlarge the scope of this amendment at this time. The Board has changed the wording in the amendment, as requested by the same commenter, so that the creditor is required to verify that the "*issuer*" (rather than "the employer") of the option will make prompt delivery. This change recognizes that options are sometimes issued by an employer's holding company or affiliate and is consistent with the plan lender provisions of Regulation G. Retired employees are also covered.

Some commenters suggested allowing similar treatment for other financial instruments representing employee benefits issued by a company to its employees, such as warrants. Others suggested waiving the current margin of 50% equity in favor of good faith margin for the stock received upon exercise. The Board declines to adopt either suggestion at this time, as they would unduly complicate the rule.

Regulatory Flexibility Act

The Board certifies that the amendment will have no significant economic impact on a substantial number of small business entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601).

Paperwork Reduction Act

No additional reporting requirements or modification to existing reporting requirements are proposed.

List of Subjects in 12 CFR Part 220

Banks, Banking, Brokers, Credit, Margin, Margin requirements, Investments, Reporting and recordkeeping requirements, Securities.

For the reasons set out in this notice, and pursuant to the Board's authority under sections 3, 7, 8, 17, and 23 of the Securities Exchange Act of 1934, as amended, (15 U.S.C. 78c, 78g, 78h, 78q and 78w), 12 CFR Part 220 is amended as follows:

PART 220—CREDIT BY BROKERS AND DEALERS

1. The authority citation for Part 220 continues to read as follows:

Authority: 15 U.S.C. 78c, 78g, 78h, 78q, and 78w.

2. Section 220.3 is amended by adding a new paragraph (e)(4) to read:

§ 220.3 General Provisions

* * * * *

(e) Receipt of funds or securities.* * *

(4) A creditor may accept, in lieu of securities, a properly executed exercise notice for a stock option issued by the customer's employer and instructions to the issuer to deliver the resulting stock to the creditor. Prior to acceptance, the creditor must verify that the issuer will deliver the securities promptly and the customer must designate the account into which the securities are to be deposited.

By order of the Board of Governors of the Federal Reserve System, December 18, 1987.

William W. Wiles,

Secretary of the Board.

[FR Doc. 87-29464 Filed 12-24-87; 8:45am]

BILLING CODE 6210-01-M

12 CFR Part 265

Rules Regarding Delegation of Authority

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: This amendment to the Rules Regarding Delegation of Authority authorizes the Board's General Counsel to deny a request for stay of the effective date of a Board order. The Board itself would retain sole discretion to grant a request for stay of the effectiveness of any decision.

EFFECTIVE DATE: December 28, 1987. The amendment is effective for any request for stay pending on December 28, 1987 or received thereafter.

FOR FURTHER INFORMATION CONTACT: Sidney M. Sussan, Assistant Director, Division of Banking Supervision and Regulation (202/452-2638) or Scott G. Alvarez, Senior Counsel, Legal Division (202/452-3583). For the hearing impaired *only*, Telecommunication Device for the Deaf (TDD), Earnestine Hill or Dorthea Thompson (202/452-3544).

SUPPLEMENTARY INFORMATION: The General Counsel has been delegated authority to deny requests for reconsideration of a Board decision, 12 CFR 265.2(b)(7), but has not been delegated authority to deny a request for stay of the effective date of a Board order. Increasingly, requests for reconsideration of Board orders are being accompanied by requests that the effective date of a Board order be stayed.

In order to avoid the need to bring before the Board requests for a stay that present no new facts and raise no significant legal issues, the Board is amending its Rules Regarding Delegation of Authority to permit the Board's General Counsel to deny any request for stay that fails to satisfy all of the above criteria and that also raises no other significant issues. The decision to approve a request for stay would be preserved for Board action.

This amendment to the Board's Rules Regarding Delegation of Authority is expected to expedite processing of requests for stay and to decrease the number of Board agenda items that do not present significant legal or policy

issues. Any request being processed under delegated authority could always be brought to the Board's consideration if the circumstances so warrant.

Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. No. 96–354, 5 U.S.C. 601 *et seq.*), the Board certifies that the amendment will not have a significant economic impact on a substantial number of small entities. The amendment will ease the application of existing regulations and does not have any particular effect on small entities.

Public Comment

The provisions of section 553 of Title 5, United States Code, 12 U.S.C. 553, relating to notice, public participation, and deferred effective date have not been followed in connection with the adoption of this amendment because the change to be effected is procedural in nature and does not constitute a substantive rule subject to the requirements of that section. The Board's expanded rulemaking procedures have not been followed because the amendment is a technical one and because it relieves a burden that could obstruct necessary and prompt action that would be in the public interest.

List of Subject in 12 CFR Part 265

Authority delegations (Government agencies), Federal Reserve System.

Pursuant to the Board's authority under the Bank Holding Company Act and section 11(k) of the Federal Reserve Act, 12 CFR Part 265 is amended as follows:

PART 265—RULES REGARDING DELEGATION OF AUTHORITY

1. The authority citation for Part 265 continues to read as follows:

Authority: Section 11(K), 38 Stat. 261 and 80 Stat. 1314 (12 U.S.C. 248(k)).

§ 265.2 [Amended]

2. Section 265.2(b)(7) is revised to read as follows:

* * * * *

(b) * * *

(7) Pursuant to § 262.3(i) of this chapter (Rules of Procedure) to determine whether or not to grant a request for reconsideration or whether to deny a request for stay of the effective date of any action taken by the Board with respect to an action as provided in that part.

* * * * *

Board of Governors of the Federal Reserve System, December 18, 1987.

Secretary of the Board.

[FR Doc. 87–29463 Filed 12–24–87; 8:45 am]

BILLING CODE 6210–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–ASW–26; Amdt. 39–5900]

Airworthiness Directives; McDonnell Douglas Helicopter Company, Model 369D, E, F, and FF Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment amends an existing airworthiness directive (AD) which requires repetitive inspections of the main rotor transmission output shaft assembly ring gear carriers on McDonnell Douglas Helicopter Company (MDHC) Model 369D, E, F, and FF helicopters. This amendment extends the inspection to include all affected main rotor transmission assemblies. This action is prompted by reports that main rotor transmission output shaft assembly ring gear carriers have failed in flight which, if uncorrected, could result in loss in power to the main rotor or possible jamming of the main rotor transmission and loss of control of the helicopter.

DATES: *Effective Dates:* January 15, 1988.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 15, 1988.

Compliance: As indicated in the body of this AD.

ADDRESSES: The applicable service information notice may be obtained from McDonnell Douglas Helicopter Company, 500 E. McDowell Road, Mesa, Arizona 85205. A copy of each document supporting the AD is contained in the Rules Docket, Office of the Regional Counsel, Federal Aviation Administration, Southwest Region, Room 158, Building 3B, 4400 Blue Mound Road, Fort Worth, Texas.

FOR FURTHER INFORMATION CONTACT: Mr. John S. Ehret, Aerospace Engineer, Propulsion Section, ANM–174W, Western Aircraft Certification Office, Federal Aviation Administration, P.O. Box 92007, Worldway Postal Center, Los Angeles, California 90009–2007; telephone 213–297–1384.

SUPPLEMENTARY INFORMATION: This amendment amends Amendment 39–5700 (52 FR 33228; September 2, 1987), AD 87–18–12, which currently requires repetitive inspection of the main rotor transmission output shaft assembly ring gear carriers and removal from service of all defective units on MDHC Model 369D, E, F, and FF helicopters. Further investigation by McDonnell Douglas Helicopter Company and the FAA has revealed that Part Number (P/N) 369D25132–BSC or –5 main transmission output shaft assemblies installed in P/N 369D25100–BSC, –501 or –503 main transmission assemblies also require the repetitive inspection mandated in the original AD. When P/N 369D25132–BSC or –5 main transmission output shaft assemblies are replaced by P/N 369D25132–3, and the main transmission assembly is reidentified as 369D25100–505, the periodic visual inspections will no longer be required. Therefore, the FAA is amending Amendment 39–5700 by extending the applicability to include all of the above noted assemblies and to require the inspection described in revised MDHC Mandatory Service Information Notice DN–148.1/EN–36.1/FN–25.1, dated October 30, 1987, on MDHC Model 369D, E, F, and FF helicopters.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

The FAA has determined that this regulation is an emergency regulation that is not considered to be major under Executive Order 12291. It is impracticable for the agency to follow the procedures of Executive Order 12291 with respect to this rule since the rule must be issued immediately to correct an unsafe condition in aircraft. It has been further determined that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). If this action is subsequently determined to involve a significant/major regulation, a final regulatory evaluation or analysis, as appropriate, will be prepared and placed in the regulatory docket (otherwise, an evaluation or analysis is not required). A copy of it, when filed, may be obtained from the Regional Rules Docket.

List of Subjects 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety, Incorporation by reference.

Adoption of The Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends Section 39.13 of Part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By amending Amendment 39–5700 (52 FR 33228; September 2, 1987), AD 87–18–12, by revising the applicability paragraph; by revising paragraph (d); by redesignating paragraphs (e) and (f) as (f) and (g), respectively; and by adding a new paragraph (e), to read as follows:

McDonnell Douglas Helicopter Company (MDHC) (Hughes Helicopters, Inc.): Applies to all Model 369D, 369E, 369F, and 369FF helicopters, certificated in any category, incorporating main rotor transmission output shaft assembly ring gear carriers (P/N 369D25132–BSC or –5) in main transmission assemblies P/N 369D25100–BSC, –501 or –503.

* * * * *

(d) Perform a dye penetrant and visual inspection on the affected ring gear carriers in accordance with the procedures detailed in paragraphs a through g of the "Periodic Visual Inspection" section of McDonnell Douglas Helicopter Company Mandatory Service Information Notice (SIN) DN–148.1/EN–36.1/FN–25.1, dated October 30, 1987. Remove from service prior to further flight:

(1) Output shafts with any bulging or raised surface in the area being inspected on the upper disc surface (see Figure 2 in referenced SIN).

(2) Output shafts with any crack indication in the area being inspected on the lower and upper disc surfaces (see Figure 3 in referenced SIN).

(e) When the main rotor transmission output shaft assembly ring gear carrier P/N 369D25132–3 is installed and the main transmission assembly is reidentified as P/N 369D25100–505, repetitive inspections are no longer required.

* * * * *

The procedure shall be done in accordance with MDHC Mandatory Service Information Notice DN–148.1/EN–36.1/FN–25.1, dated October 30, 1987. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 522(a) and 1 CFR Part 51. Copies may be obtained from McDonnell Douglas Helicopter Company, 500 E. McDowell Road, Mesa, Arizona 85205. Copies may be inspected at the Office of the Regional Counsel, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas, or at the Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC.

This amendment becomes effective January 15, 1988.

This amendment amends Amendment 39–5700 (52 FR 33228; September 2, 1987), AD 87–18–12.

Issued in Fort Worth, Texas, on November 30, 1987.

Don P. Watson,

Acting Director, Southwest Region.

[FR Doc. 87–29648 Filed 12–24–87; 8:45 am]

BILLING CODE 4910–13–M

14 CFR PART 71

[Airspace Docket Number 87–ACE–12]

Alteration of Transition Area; Charles City, IA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this Federal action is to alter the 700-foot transition area at Charles City, Iowa, to provide additional controlled airspace for aircraft executing a new instrument approach procedure to the Charles City, Iowa, Municipal Airport, utilizing the Charles City NDB as a navigational aid. The intended effect of this action is to ensure segregation of aircraft using the new approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR).

EFFECTIVE DATE: 0901 Ut.c., May 5, 1988.

FOR FURTHER INFORMATION CONTACT: Lewis G. Earp, Airspace Specialist, Traffic Management and Airspace Branch, Air Traffic Division, ACE–540, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, Telephone (816) 374–3408.

SUPPLEMENTARY INFORMATION: To enhance airport usage, an additional approach procedure is being developed for the Charles City, Iowa, Municipal Airport, utilizing the Charles City NDB as a navigational aid. The establishment of an instrument approach procedure based on this approach aid entails alteration of the transition area at Charles City, Iowa, at or above 700 feet above the ground, within which aircraft are provided air traffic control service. The intended effect of this action is to ensure segregation of aircraft using the new approach procedure under Instrument Flight Rules (IFR) and other aircraft operating under Visual Flight Rules (VFR). Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6C, dated January 2, 1987.

Discussion of Comments

On October 23, 1987, the FAA published a Notice of Proposed Rulemaking which would amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the transition area at Charles City, Iowa (52 FR 39659). Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments were received as a result of the Notice of Proposed Rulemaking.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It is therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 71 of the FAR (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. By amending § 71.181 as follows:

Charles City, IA [Revised]

That airspace extending upward from 700 ft. above the surface within a 5-mile radius of Charles City Municipal Airport (Lat. 43°04'15"N., Long. 92°36'15"W.); and within 2.75 miles each side of the 316 bearing from Charles City NDB (Lat. 43°04'18"N., Long. 92°36'35"W.), extending from the 5-mile radius area to 8.0 miles northwest of the airport; and within 2.75 miles each side of the 104° bearing from Charles City NDB

BEST COPY AVAILABLE

extending from 5-mile radius area to 8.0 miles southeast of the airport.

This amendment becomes effective at 0901 Ut.c. May 5, 1988.

Issued in Kansas City, Missouri, on December 11, 1987.

Clarence E. Newbern,

Assistant Manager, Air Traffic Division.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Parts 372, 387, 388, and 399

[Docket No. 71085-7285]

Electronic Submission of Validated License Applications

AGENCY: Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: In order to reduce the paperwork burden on exporters, Export Administration is establishing a new procedure whereby exporters may apply electronically, rather than in writing, to the Office of Export Licensing for a validated export license. Initially, license applications submitted electronically will be processed only for exports and reexports to Country Groups T and V, (except the People's Republic of China) of commodities other than supercomputers. Exporters will be advised of any future expansion of this procedure. This rule sets forth the requirements for eligibility, records maintenance, and other features of the electronic submission program.

In addition, this rule removes a paragraph on legal liability from Part 372 because such liability is covered in Part 387, "Enforcement."

EFFECTIVE DATE: This rule is effective January 2, 1988.

FOR FURTHER INFORMATION CONTACT: Thomas deButts, Office of Export Licensing, Export Administration, Telephone: (202) 377-8540.

SUPPLEMENTARY INFORMATION: 1. Because this rule concerns a foreign and military affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. This rule involves a collection of information subject to the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). This collection has been approved by the Office of Management and Budget under control number 0625-0001.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553), or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. app. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign and military affairs function of the United States. Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Comments should be submitted to Vincent Greenwald, Office of Technology and Policy Analysis, Export Administration, U.S. Department of Commerce, P.O. Box 273, Washington, DC 20044.

List of Subjects in 15 CFR Parts 372, 387, 388, and 399

Administrative practice and procedure, Boycotts, Exports, Law enforcement, Penalties, Reporting and recordkeeping requirements.

Accordingly, the Export Administration Regulations (15 CFR Parts 368-399) are amended as follows:

1. The authority citation for Parts 372, 387, and 399 continues to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 95-223 of December 28, 1977 (50 U.S.C. 1701 *et seq.*); E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985) as affected by notice of September 4, 1986 (51 FR 31925, September 8, 1986); Pub. L. 99-440 of October 2, 1986 (22 U.S.C. 5001 *et seq.*); and E.O. 12571 of October 27, 1986 (51 FR 39505, October 29, 1986).

2. The authority citation for Part 388 continues to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503 (50 U.S.C. app. 2401 *et seq.*), as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985).

PART 372—[AMENDED]

3. In § 372.1, the first sentence of paragraph (a) is revised; paragraph (c) is revised; paragraph (d) is removed; and paragraphs (e) through (h) are redesignated (d) through (g) respectively, as follows:

§ 372.1 General provisions.

(a) *Scope.* The Export Administration Regulations shall apply to individual export license applications and to individual validated licenses issued by the Office of Export Licensing (OEL), *whether submitted in writing or electronically.* * * *

* * * * *

(c) *Responsibility of licensee.* Any applicant to whom an export license is issued becomes the licensee. The licensee will be held accountable for the use of the license, whether as a principal (exporting for his own account) or as an agent (including an agent acting for the account of a foreign principal who is not subject to the jurisdiction of the United States). The licensee assumes responsibility for effecting the export, for proper use of the license, and for performance of all its terms and conditions. The obligations arising under the provisions of the Export Administration Act of 1979, as amended, and the Export Administration Regulations are the same whether the license application is submitted and issued in writing or electronically.

* * * * *

§ 372.4 [Amended]

4. In § 372.4, the title of paragraph (a) is revised to read "Applying in writing for a validated license"; the title of paragraph (a)(1) is revised to read "Form and manner of filing a written application"; paragraph (a)(1)(i) is redesignated (a)(1)(i), paragraph (a)(2) is redesignated (c), and paragraphs (a) (3) and (4) are redesignated (a)(1) (ii) and (iii).

5. In §372.4, paragraph (b) is redesignated (a)(2) and paragraphs (b) (1), (2), and (3) are redesignated (a)(2) (i), (ii) and (iii); paragraphs (c) through (h) are redesignated (d) through (i); and new paragraph (b) is added, reading as follows:

§ 372.4 [Amended]

* * * * *

(b) *Applying electronically for a validated license.* An individual validated license may be applied for electronically by an applicant that has been authorized to do so in accordance with this Part. An authorization to submit license applications electronically may be limited or withdrawn by the Department of Commerce at any time.

(1) *Requesting application instructions and approval to submit electronic applications.* To apply for validated licenses through electronic submission, the applicant company should request application instructions from the Department of Commerce by submitting to the Office of Export Licensing (OEL) a letter containing the name of the applicant company and the address, phone number, and name of the principal contact person of the applicant company. The letter should be mailed to the Office of Export Licensing, Department of Commerce, P.O. Box 273, Washington, DC 20044. For hand delivery, letters should be delivered to Office of Export Licensing, Room 2705, Department of Commerce, 14th Street and Pennsylvania Avenue NW., Washington, DC 20230. All correspondence should include "ATTN: Electronic Submission" on the envelope. Following the receipt of the license application instructions from the OEL, the applicant company may request approval to submit license applications electronically as set forth in those instructions.

(2) *Assignment and use of company and personal identification numbers.* (i) Each applicant company granted permission to submit validated license applications electronically will be assigned a company identification number. Each individual approved by OEL to submit license applications electronically for the applicant company will be assigned a personal identification number ("PIN"). A PIN will be assigned only to an individual the applicant company has certified to OEL to be authorized by the applicant company to act for it with respect to electronic submissions under these regulations.

(ii) An applicant company submitting license applications electronically shall reveal the assigned company identification number only to the PIN holders, their supervisors, employees, or agents of the applicant company with a commercial justification for knowing the company identification number.

(iii) An individual PIN holder shall not:

(A) Disclose the PIN to anyone;

(B) Record the PIN either in writing or electronically;

(C) Authorize another person to use such PIN; or

(D) Use the PIN following termination by the Department of Commerce or by the applicant company of his authorization or approval for PIN use.

(iv) To prevent misuse of the PIN—

(A) If a PIN is lost, stolen or otherwise compromised, the applicant company and the PIN holder shall report the loss, theft or compromise of the PIN immediately by calling the OEL at (202) 377-8536 and shall confirm the report in writing within two business days to OEL at the address provided in paragraph (b)(1) of this section.

(B) An applicant company shall be responsible for immediately notifying OEL whenever a PIN holder leaves the employ of the applicant company or otherwise ceases to be authorized by the applicant company to submit license applications electronically on its behalf.

(3) *Electronic submission of a validated license application.* (i) Upon approval of the applicant company's request to use electronic submission, OEL will provide instructions on the method to transmit the license application electronically. These instructions may be modified by the Department of Commerce from time to time. In addition, OEL may direct that any electronic license application be resubmitted in writing, in whole or in part for any reason, including the desire of OEL in a particular case to receive documentation in support of the license application that does not lend itself to electronic submission.

(ii) The electronic submission of a validated license application shall constitute an export control document. Such submissions shall provide the same information as written applications, except the applicant company need not submit the supporting documentation required by Part 375. However, the applicant company must retain these documents in its possession consistent with the provisions of § 387.13. The applicant company and PIN holder submitting the application shall be deemed to make all representations and certifications as if the submission were made in writing by the applicant company and signed by the submitting PIN holder. Electronic submission of a license application will be considered complete upon the transmittal of the application to the Department of Commerce or to an entity under contract to receive such applications for the Department of Commerce.

(4) *Maintenance of records.* An applicant company shall maintain a log, either manually or electronically, specifying the date and time of each electronic submission, the ECCNs of commodities on each electronic submission, and the name of the employee or agent submitting the license application. This log may not be altered. Written corrections must be made in a manner that does not erase or cover original entries. If the log is maintained electronically, corrections may only be made as notations.

(5) *Updating.* An applicant company shall promptly notify OEL of any change in its name or address. An applicant company that wishes to have an individual added as a PIN holder shall so advise OEL and proceed in accordance with the instructions OEL will provide. Applicant companies should make periodic reviews to ensure that PINs are held only by individuals whose current responsibilities make it necessary and appropriate that they act for the applicant company in this capacity.

* * * * *

§ 372.8 [Amended]

6. In § 372.8, paragraph (c)(3) is amended by revising the reference to "§ 372.1(f)" to read "372.1(e)".

§ 372.10 [Amended]

7. In § 372.10, the introductory paragraph is amended by revising the reference to "§ 372.1(f)" to read "§ 372.1(e)".

§ 372.12 [Amended]

8. In § 372.12, the introductory paragraph is amended by revising the reference to "§ 372.4(b)" to read "372.4(i)".

§ 372.13 [Amended]

9. In § 372.13, paragraph (a) is amended by revising the reference to "§ 372.1(f)" to read "§ 372.1(e)".

PART 387—[AMENDED]

§ 387.13 [Amended]

10. In § 387.13, Paragraph (c) is amended by inserting "372.4," between "372.1," and "372.5,".

PART 388—[AMENDED]

§ 388.3 [Amended]

11. In § 388.3, footnote 2 to paragraph (a)(1) is amended by revising the reference to "§ 372.1(h)" to read "§ 372.1(g)".

§ 388.19 [Amended]

12. In § 388.19, paragraph (a)(1) is amended by revising the reference to "372.1(e)" to read "372.1(d)".

PART 399—[AMENDED]

§ 399.1 [Amended]

13. In § 399.1, paragraph (h) is amended by revising the reference to "§ 372.4(d)" to read "§ 372.4(e)".

Dated: December 22, 1987.

Vincent F. DeCain,

Deputy Assistant Secretary for Export Administration.

[FR Doc. 87-29640 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DT-M

CONSUMER PRODUCT SAFETY COMMISSION

16 CFR Part 1608

Rules and Regulations Under the Flammable Fabrics Act; Continuing Guaranties

AGENCY: Consumer Product Safety Commission.

ACTION: Final rule.

SUMMARY: The Commission is amending administration and enforcement rules implementing the Flammable Fabrics Act (FFA) to provide that persons and firms may file continuing guaranties in accordance with section 8 of the FFA with the Office of the Secretary of the Consumer Product Safety Commission, and obtain forms for such guaranties from the Office of the Secretary. The Commission is issuing this amendment because it recently revised its rules of organization and functions to provide that the Office of the Secretary shall maintain records of continuing guaranties filed with the Commission under provisions of the FFA.

EFFECTIVE DATE: December 28, 1987.

FOR FURTHER INFORMATION CONTACT: Mary Toro, Division of Regulatory Management, Directorate for Compliance and Administrative Litigation, Consumer Product Safety Commission, Washington, DC 20207; telephone: (301) 492-6400.

SUPPLEMENTARY INFORMATION: The Flammable Fabrics Act (FFA) (15 U.S.C. 1191 *et seq.*) Prohibits the manufacture for sale, importation into the United States, or introduction in commerce of any product of wearing apparel or interior furnishing made of fabric or related material, or of any fabric or related material used or intended for use in such products, which fails to comply with an applicable standard of flammability issued under that act. Provisions of the FFA authorize the Commission to obtain administrative orders to cease and desist and injunctions to prohibit violations of the act, and to seize items which fail to comply with an applicable standard of flammability. Additionally, provisions of section 7 of the FFA (15 U.S.C. 1196) authorize the Commission to seek criminal penalties against any person who "willfully" violates the FFA.

Section 8(a) of the FFA (15 U.S.C. 1197(a)) provides that no person shall be subject to criminal prosecution under section 7 of the FFA if that person establishes a guaranty received in good faith which meets all requirements set forth in section 8 of the FFA. A guaranty does not provide the holder any defense to an administrative action for an order to cease and desist from further violation of an application flammability standard, nor to any civil action for injunction or seizure brought under the FFA.

A guaranty under the FFA is a statement to the effect that reasonable and representative tests made in accordance with the applicable standard or standards issued under the FFA show that the products, fabrics, or related materials covered by the guaranty conform with applicable flammability standards. Section 8(a) of the FFA provides that a guaranty may be in the form of a guaranty from the seller to the buyer of the items covered by the guaranty or a continuing guaranty filed with the Commission.

Regulations containing suggested forms of guaranties are codified at 16 CFR Part 1608. Provisions of § 1608.3(a) set forth procedures for filing a continuing guaranty with the Commission, and state that persons and firms should file such guaranties with the Bureau of Compliance of the Commission. Recently the Commission revised its rules of organization and functions (16 CFR Part 1000) to provide, among other things, that the Office of the Secretary shall maintain records of continuing guaranties filed with the Commission under provisions of section 8(a) of the FFA.

For this reason, the Commission is amending 16 CFR 1608.3(a) to provide that persons and firms may file continuing guaranties under section 8 of the FFA with the Office of the Secretary of the Consumer Product Safety Commission, and obtain forms for such guaranties from the Office of the Secretary.

Generally, the Administrative Procedure Act (APA) (5 U.S.C. 553) requires that agencies must give notice of proposed rulemaking and provide opportunity for interested parties to submit written comments on the proposal before a rule can be issued or amended. However, 5 U.S.C. 553(b)(B) provides that notice of proposed rulemaking and public participation are not required when the agency makes a finding for good cause that such notice and opportunity for comment are "impracticable, unnecessary, or contrary to the public interest."

The Commission finds for good cause that notice of proposed rulemaking and opportunity for comment are not necessary for issuance of the amendment published below because the only purpose of the amendment is to specify the office within the Commission to receive continuing guaranties filed with the Commission in accordance with provisions of section 8(a) of the FFA. In this instance, providing notice of proposed rulemaking and opportunity for submission of comments would be a meaningless gesture.

Similarly, the APA requires at 5 U.S.C. 553 that a "substantive rule" must be published at least 30 days before its effective date, unless the agency finds otherwise for good cause and publishes that findings with the final rule.

The amendment published below does not alter or affect any substantive provisions of the rules implementing the Flammable Fabrics Act; it changes only the name of the office within the Commission to receive continuing guaranties filed with the Commission and to provide forms for preparing such guaranties. For this reason, the requirement of 5 U.S.C. 553 for publication of a final substantive rule at least 30 days before its effective date is not applicable, and the amendment published below shall become effective immediately.

Accordingly, pursuant to section 30(b) of the Consumer Product Safety Act (15 U.S.C. 2079(b)) and section 5(c) of the FFA (15 U.S.C. 1194(c)), the Commission amends Title 16, Chapter II, Subchapter D, Part 1608, as follows:

PART 1608—GENERAL RULES AND REGULATIONS UNDER THE FLAMMABLE FABRICS ACT

1. The authority citation for Part 1608 continues to read as follows:

Authority: Sec. 5, 67 Stat. 112, as amended 81 Stat. 570 (15 U.S.C. 1194).

§ 1608.3 [Amended]

2. In § 1608.3(a), all references to "the Bureau of Compliance" are changed to "the Office of the Secretary."

Dated: December 21, 1987.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

[FR Doc. 87-29597 Filed 12-24-87; 8:45 am]

BILLING CODE 6355-01-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 30

Foreign Futures and Options Transactions

AGENCY: Commodity Futures Trading Commission.

ACTION: Postponement of effective date of rules.

SUMMARY: On August 5, 1987, the Commission published in the Federal Register final rules governing foreign futures and options transactions in the United States. 52 FR 28980. The Federal Register release specified that the rules would become effective on January 4, 1988.

Recent events in the markets, however, have resulted in delays in the implementation of this new regulatory system. In order to ensure that all affected parties have sufficient time to implement the new regulatory system, the Commission has determined to postpone the effective date of the rules to February 1, 1988.

DATES: Accordingly, notice is hereby given that the effective date of the Commission's final rules governing foreign futures and options transactions in the United States (52 FR 28980, August 5, 1987) is postponed to February 1, 1988.

FOR FURTHER INFORMATION CONTACT: Jane C. Kang, Attorney, Division of Trading and Markets, Commodity Futures Trading Commision, 2033 K Street, NW., Washington, DC 20581. Telephone: (202) 254-8955.

Issued in Washington, DC, on December 21, 1987, by the Commission.

Joan A. Webb,

Secretary to the Commission.

[FR Doc. 87-29568 Filed 12-24-87; 8:45 am]

BILLING CODE 6351-01-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[CCGD7 87-27]

Regulated Navigation Area; Brunswick, GA

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is establishing a Regulated Navigation Area in the Port of Brunswick, GA. All vessels over 500 Gross Tons departing the Port of Brunswick, GA, at any time other than during flood current, will be required to approach the Sidney Lanier Bridge (U.S. Route 17) in such a manner as to be shaped up for bridge transit before passing a point of no return and being committed to the transit. These regulations are necessary because of a history of allisions with the bridge.

EFFECTIVE DATE: January 27, 1988.

FOR FURTHER INFORMATION CONTACT: Chief Warrant Officer Danny R. Buck, project officer, (912) 944-4371 at Marine Safety Office, Savannah, GA.

SUPPLEMENTARY INFORMATION: On September 3, 1987, the Coast Guard published a notice of proposed rulemaking in the Federal Register for these regulations (52 FR 33435). Interested persons were requested to submit comments. Two comments were received. Both were in favor of establishing the regulated navigation area as proposed, and the rule is being implemented without change.

Drafting Information

The drafters of this notice are Chief Warrant Officer Danny R. Buck, U.S. Coast Guard, project officer, and Lieutenant Commander S.T. Fuger, Jr., U.S. Coast Guard, project attorney, Seventh Coast Guard District Legal Office.

Discussion of Comments

The Georgia Department of Transportation commented as follows: "The Georgia Department of Transportation as operator of the Sidney Lanier Bridge highly endorses the proposed new rules.

The minimum inconvenience to shipping interest necessitated by the proposed new rule is far outweighed by the decreased changes of another allision (sic) with the bridge. We highly encourage the permanent adoption of the proposed rule."

In its comments, the Brunswick Bar Pilots Association likewise favorably endorsed the proposed rulemaking and further stated: "Under your order #13-87, this procedure has been employed and accepted with very little adverse comment by the Masters of the vessels involved * * *. At this time I do not believe that this required procedure would be detrimental to development or increased use of the East River Terminals."

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Exeuctive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary.

The rule permits two different maneuvers for affected outbound vessels approaching the bridge. Compliance is projected to add approximately 15 minutes to one hour to a vessel's outbound harbor transit time, depending on which maneuver is selected.

Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Final Regulations

In consideration of the foregoing, Part 165 of Title 33, Code of Federal Regulations is hereby amended as follows:

PART 165—[AMENDED]

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05-1(g), 6.04-6, and 160.5.

2. Section 165.735 is added to read as follows:

§ 165.735 Brunswick, Georgia, Turtle River, Vicinity of Sydney Lanier Bridge.

Except during the flood tide, every vessel over 500 GRT departing the Port of Brunswick for sea shall do so only from the Turtle River, so as to be shaped up for bridge transit:

(a) Before reaching Turtle River Buoy "1" (Light List Number 6050); or,

(b) Before reaching the intersection of Brunswick Harbor Range and Turtle River Lower Range, provided that the vessel:

(1) Be equipped with an operable bow thruster or have tug assistance; and

(2) Be stopped and maneuvered with no appreciable way on until aligned with the centerline axis of the Turtle River Channel.

Dated: December 11, 1987.

H.B. Thorsen,

Rear Admiral, U.S. Coast Guard, Commander, Seventh Coast Guard District.

BILLING CODE 4910-14-M

POSTAL SERVICE

39 CFR Part 777

Implementation of the Uniform Relocation Act Amendments of 1987; Clarification

AGENCY: Postal Service.

ACTION: Final rule; clarification.

SUMMARY: The purpose of this document is to clarify the Postal Service's amended relocation regulations which appeared in the **Federal Register** on December 17, 1987 (52 FR 48029). Those regulations showed an effective date of January 19, 1988. Inadvertently omitted from the **EFFECTIVE DATE** line was the following sentence, which the Postal Service hereby adds: This regulation will apply to any projects which have been publicly advertised on or after this date.

FOR FURTHER INFORMATION CONTACT: Mr. Philip E. Wilson, (202) 268–3111.

Fred Eggleston,

Assistant General Counsel, Legislative Division.

BILLING CODE 7710–12–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL–3301–8; AL–019]

Approval and Promulgation of Implementation Plans, Alabama; PSD Modeling Procedures

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving Alabama's submittal dated March 24, 1987, which commits the State to use EPA's revised modeling guideline in their Prevention of Significant (PSD) permitting process. EPA promulgated amendments to 40 CFR 51.166 and 52.21 on September 9, 1986 (51 FR 32176) to substitute in these regulations by reference the "Guideline on Air Quality Models (Revised)." Alabama's modeling procedures pursuant to the PSD regulations comply with EPA modeling guidelines, and the committal letter clarifies this fact.

DATES: This action will be effective February 26, 1988, unless notice is received within 30 days that adverse or critical comments will be submitted. If the effective date is delayed, timely notice will be published in the **Federal Register.**

ADDRESSES: Written comments on this action may be submitted to Beverly T. Hudson at the EPA Regional Office address listed below.

Copies of the documents relevant to this action are available for public inspection at the following locations:

Environmental Protection Agency, Region IV, Air Programs Branch, 345 Courtland Street NE., Atlanta, Georgia 30365

Air Division, Alabama Department of Environmental Management, 1751 Federal Drive, Montgomery, Alabama 36109

Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

FOR FURTHER INFORMATION CONTACT: Beverly T. Hudson of the EPA Region IV, Air Programs Branch, at the above address and telephone (404) 347–2864 or FTS 257–2864.

SUPPLEMENTARY INFORMATION: Section 165(e)(3)(D) of the Clean Air Act (Act) requires the Administrator to adopt regulations specifying with reasonable particularity models to be used to comply with the Act's PSD requirements. To carry out these requirements, the 1978 "Guideline on Air Quality Models" was incorporated by reference in 40 CFR 51.24 (now renumbered 51.166) and 40 CFR 52.21. Many States have adopted this guideline in their PSD regulations.

On September 9, 1986 (51 FR 32176), EPA promulgated amendments to 40 CFR 51.24 (now renumbered 51.166) and 52.21 to substitute by reference the "Guideline on Air Quality Models (Revised)," EPA 450/2–78–027R, in these regulations. This change became effective October 9, 1986. This means that all modeling done pursuant to EPA's PSD regulations must either comply with the 1986 version of the modeling Guideline or be specifically approved by EPA; modeling done pursuant to the 1978 guidance may no longer be accepted. It also means that State's PSD regulations must require the use of the revised Guideline. Section 16.4.11 of Alabama's air regulations requires that all PSD permit applicants use the "Guideline on Air Quality Models," without specifying any particular version. On March 15, 1987, Alabama submitted a letter which commits the State to using the revised version of the Guideline.

Final Action

Since Alabama's PSD modeling procedures explicitly include EPA's revised modeling guideline, EPA is approving them as part of the SIP.

EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial issue and anticipates no adverse comments. This action will be effective 60 days from the date of this **Federal Register** notice unless, within 30 days of its publication, notice is received that adverse or critical comments will be submitted. If such notice is received, this action will be withdrawn before the effective date by publishing two subsequent notices. One notice will withdraw the final action and another will begin a new rulemaking by announcing a proposal of the action and establishing a comment period. If no such comments are received, the public is advised that this action will be effective February 26, 1988.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by February 26, 1988. This action may not be challenged later in proceeding to enforce its requirements. (See 307(b)(2).)

Under 5 U.S.C. section 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709.)

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Approval and Promulgation of Air Quality Implementation Plans; Delaware; Miscellaneous Revisions to the State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This Notice approves a revision to Delaware's State Implementation Plan (SIP). The revision consist of amending the State of Delaware's air pollution Regulation II—Permits. EPA has reviewed this revision and has concluded that it meets all the requirements of the Clean Air Act and 40 CFR Part 51. Therefore, EPA is approving this amendment as a revision to the Delaware SIP.

DATES: This action is a Direct Final Rule and is effective February 26, 1988, unless notice is received by January 27, 1988, that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register.**

ADDRESSES: Written comments on this action should be addressed to David L. Arnold, (3AM13), Chief, Delmarva/DC Section at the EPA Regional Office address listed below. Copies of the SIP revision and the accompanying support documents are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Air Management Division, 841 Chestnut Building, Philadelphia, PA 19107, Attn: Esther Steinberg (3AM11).

Department of Natural Resources and Environmental Control, Division of Air and Waste Management, Air Resources Section, 89 Kings Highway, P.O. Box 1401, Dover, Delaware 19901, Attn: Mr. Robert R. French.

Public Information Reference Unit, U.S. Environmental Protection Agency, EPA Library, Room 2922, 401 M Street SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: Mr. Kevin A. Magerr (3AM13), at the EPA Region III address listed above or call (215) 597–6863.

SUPPLEMENTARY INFORMATION:

Background

On March 6, 1987, the State of Delaware submitted to EPA Region III a Secretarial Order announcing the adoption of several amendments to its State Regulations. The State requested that these amendments be approved as revisions of the Delaware SIP. The State provided documentation that a public hearing was held as required by 40 CFR 51.4. The hearing was held on November 17, 1986, in the New Castle Office, after adequate public notice was given.

In addition to the amended provision mentioned in the Summary of this notice, the State submitted revisions to the State's GEP Stack Height and Opacity Regulations. EPA's proposed action on these regulations will be discussed in separate Notices. Also, the State submitted changes to its section 10.1 of Regulation XXI, Emission Standards for Hazardous Air Pollutants. This chang was initiated to reflect typographical corrections made to the Federal National Emission Standards for Hazardous Air Pollutants (NESHAP)—Asbestos regulation (51 FR 8199). The State has a delegated NESHAP program; therefore, the change does not affect its SIP.

Regulation Description

Section 2.7 of Regulation II, Permits, has been amended to read as follows: An operating permit may be valid for an indefinite period unless the equipment or operation for which a permit is written has controlled emissions of 100 tons or more per year of any air contaminant, in which case the permit shall be valid for not more than a five-year period and shall be evaluated prior to re-issuance to determine if permitted emission limits are appropriate. This regulation change will limit operating permits to five years for sources that emit 100 tons or more per year of any air contaminant. This would require these sources to undergo permit re-evaluation every five years. Prior to this amendment, operating permits were valid for an indefinite period.

EPA Action

EPA has reviewed this amendment and believes there will be no adverse affects on air quality if approved. Furthermore, the revisions meet the requirements under 40 CFR Part 51, and section 110 of the Clean Air Act. Therefore, EPA is approving this regulatory revision to the Delaware SIP. By taking this action EPA is approving as part of the SIP the mechanism by which Delaware issues operating permits. This action does *not* constitute EPA pre-approval of the provisions of any such permit. To the extent that any such permit is issued to approve any operation which is contrary to the requirements of the existing Delaware SIP, the relevant terms of the existing SIP would remain the federally-enforcable obligation of the permitted source unless and until the permit terms are submitted to and finally approved by EPA as a SIP provision.

Under 5 U.S.C. 605(b), I certify that this SIP revision will not have a significant economic impact on a substantial number of small entities (See 46 FR 8709). The Office of Management and Budget has exempted this rule from the requirement of section 3 of the Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from the date of publication). This action may not be challenged later in proceedings to enforce its requirements (see 307(b)(2)).

Office of the Secretary

42 CFR Part 455

Medicaid Program; Withholding of Medicaid Payments for Fraud or Willful Misrepresentation

AGENCY: Office of the Secretary, HHS, Office of Inspector General (OIG).

ACTION: Final rule.

SUMMARY: This final rule specifically encourages State Medicaid agencies to withhold program payments to providers without first granting administrative review where the State agency has reliable evidence of fraudulent activity by the provider. These changes serve both to reinforce and strengthen existing State Medicaid agency responsibilities in the withholding of program funds, and to bring Medicaid program regulations in line with existing Medicare policy in this area.

EFFECTIVE DATE: December 28, 1987.

FOR FURTHER INFORMATION CONTACT: James Patton, Office of Investigations, (301) 594–3957.

SUPPLEMENTARY INFORMATION:

I. Background

On December 10, 1986, the Office of Inspector General published a notice of proposed rulemaking in the **Federal Register** (51 FR 44490) that was specifically designed to encourage Medicaid State agencies to withhold all Medicaid payments to any provider where the State agency had reliable evidence that the provider had committed fraud against the program, or where the provider was under criminal investigation. The proposed rulemaking was prepared in response to specific problems brought to the OIG's attention over the inability of some States to withhold Medicaid program payments to providers where overpayments were made as a result of potential fraud. In each instance, the requirements for administrative review prior to withholding appeared to have caused these States significant problems where criminal investigations were being conducted by either OIG's Office of Investigations or by the State's Medicaid Fraud Control Unit.

As indicated in the preamble to the proposed regulations, where such administrative review requirements are in place, there appears to be a major problem in the State agency's ability to withhold Medicaid payments to providers under criminal investigation. In many instances, criminal investigators have been reluctant to allow any withholding action against providers since their case could be jeopardized if a hearing was held. The OIG believes that this inability to stop the flow of money has, in turn, resulted in additional overpayments and has hampered efforts already undertaken by the State Medicaid agency to recover overpayments.

Medicare withholding policy

For years, it has been Departmental policy to withhold payments to Medicare providers without the initiation of administrative review procedures at the point when reliable evidence of fraud or misrepresentation has been gathered. Current Medicare regulations at 42 CFR 405.371(b) state that prior administrative review should *not* be provided where there is reliable evidence that the circumstances giving rise to the need for suspension of payments involve fraud or willful misrepresentation. All withholding action taken under Medicare's regulatory authority is for a temporary period, pending resolution of the issues raised, and is only taken with the approval of the investigative or prosecuting authority that may be involved.

II. Provisions of the Proposed Regulations

The proposed regulations were designed to provide Federal encouragement and acquiescence for States to withhold Medicaid reimbursements if the State agency had reliable evidence that: (i) The provider had committed fraud against the program, or (ii) the provider was presently under criminal investigation.

Under the proposed provisions—

- State Medicaid agencies would not be required to institute administrative hearings prior to the withholding of payments since such review may adversely affect or compromise a criminal or civil fraud proceeding already initiated. A provider would still be granted an administrative review prior to withholding payments in those instances where such rights are so established and required by State law.
- Withholding of Medicaid payments would remain in effect until such time as (i) the State agency or prosecuting authorities conclude that fraud has not been committed by the provider, or (ii) all legal proceedings are concluded against the provider.
- The provider would continue to be credited for services furnished, even though payments would be temporarily withheld.
- Providers would receive concurrent rather than advance notice of withholding since such withholding is not a final action.

III. Response to Public Comments

In response to the proposed rule, we received a total of eighteen timely comments from various health care organizations and associations, State agencies and private individuals. Set forth below is a summary of these comments and our response to the concerns raised.

A. Nature of Withholding Action

Comment: Several commenters believed that the proposed regulations give the State Medicaid agency inherent and excessive discretion to withhold program payments. They indicated that such authority could result in arbitrary or unjustified withholding of payments by the State agency. Because of the potential for abuse, a number of commenters also felt that criminal charges should first be brought against the provider before any program funds are withheld.

Response: Prior to any withholding action, the State Medicaid agency is expected and encouraged to fully consider: (1) All reliable evidence, (2) the impact on program beneficiaries, and (3) the length of time anticipated between the imposition of the withholding action and the bringing of formal charges. As indicated in the preamble to the proposed regulations, the overlying purpose of this rule is to protect the integrity of Medicaid program funds and to assure that program beneficiaries receive services for which reimbursement is made.

The specific authority to withhold program payments where there is reliable evidence of fraud or willful misrepresentation has been firmly established in case law. In *Peterson* v. *Weinberger*, 508 F. 2d 45 (5th Cir. 1975), *cert den.* 423 U.S. 830, for example, the U.S. Court of Appeals determined that a Medicare provider has no due process right to a hearing where funds are suspended during the course of a fraud investigation in accordance with 42 CFR 405.371(b). Following suit in a recent case, the District Court for the Southern District of Florida upheld the withholding of Medicare payments and held that plaintiffs are not entitled to a hearing while funds are being temporarily withheld in accordance with 42 CFR 405.371(b). (*Neurological Associates—H. Hooshmand, M.D.* v. *Bowen*, Civ. Action No. 86–8374 (S.D. Fla., March 17, 1987.)

In addition, in *Kresbach* v. *Heckler*, 617 F. Supp. 548 (D. Neb. 1985), the Court drew a clear distinction between a prospective exclusion under 42 U.S.C. 1395(d)(1) where a party would be entitled to a prior hearing, and a suspension of reimbursement in accordance with program regulations at 42 CFR 405.371(b) which does not require a prior hearing.

We indicated in the preamble to the proposed regulations that we fully expect the State agency to confer with, and receive the concurrence of, the investigative or prosecuting authorities conducting the investigation *prior to* imposing any withholding action under the Medicaid program. We believe that this approach should effectively prevent the abuses envisioned in the public comments. Medicare withholding cases are handled in a similar fashion, with the investigative agency initiating the specific request to the Medicare contractor to suspend program payments, and we believe that this process has worked efficiently.

As an additional protection, our regulations continue to state that if an administrative review prior to any withholding action is required by State law, such a hearing is to be held. No withholding action should be taken that contradicts specific State law.

Finally, we believe that requiring the bringing of criminal charges against a provider before the State can suspend payments would defeat the purpose of these regulations. By specifically encouraging States to withhold program payments on a timely basis where there is reliable evidence of fraud or willful misrepresentation, we are attempting to stop the payment of Medicaid funds at an early point so that more costly efforts of recouping monies already paid will not be necessary.

Comment: Several of the comments received stated that the standard for "reliable evidence of fraud" was not clear, and that term, along with the terms "willful misrepresentation" and "criminal investigation," were ambiguous and open to varying interpretation. A number of commenters also noted that criminal investigations may begin for the most spurious of reasons, are often quite protracted and unsuccessful, and that a withholding action merely because a provider is under criminal investigation would impose a severe financial penalty without benefit of proper review by a court.

Response: We have intentionally omitted specific definitions for the terms cited above so as not to limit State agency actions unnecessarily and due to the fact that what constitutes "reliable evidence" is not easily and readily definable. While the existence of an ongoing criminal or civil investigation against a provider may be a factor in determining whether there is reliable evidence, reliable evidence should be determined on a case-by-case basis with the State agency looking at all the factors, circumstances and issues at hand. It is expected that State agencies will review all such evidence carefully and will act judiciously on a case-by-case basis when contemplating any withholding action. We are aware of the impact that withholding funds may have on providers, and expect and encourage States to exercise this authority with care.

We have, however, revised § 455.23(a) to eliminate the proposal that a criminal investigation undertaken against the provider would, in itself, be deemed as reliable evidence for a withholding action. Under this final regulation, the undertaking of a criminal investigation against a provider who may have improperly obtained program funds would be considered a part of the larger circumstances under which payments would be withheld under the Medicaid program.

The Medicare experience in the withholding of program payments has been that such action is not generally taken until an investigation is fairly well developed and there is an expectation of a successful prosecution. We foresee similar implementation of Medicaid withholding actions with the withholding of payments as one of the final actions taken before a case is presented to the State Attorney General's office or whoever is empowered by the State for prosecutions of State Medicaid criminal cases.

B. Amount of Withholding

Comment: Two commenters indicated an inconsistency in the proposed regulations between § 455.23(a)—which stated that the Medicaid agency may withhold payments "in whole or in part"—and § 455.23(b)(3)—which stated that withholding is effective for *all* Medicaid claims. The commenters stated that the withholding of all Medicaid payments overreaches the intent of the regulations, and that a provider's "clean claims" should be processed without delay. One commenter also believed that withholding should be targeted to only the type of Medicaid claims under investigation, and that the amounts withheld should bear some relationship to the amounts believed to be improperly obtained.

Response: It is usually quite difficult to determine which claims are "clean claims" until after the investigation is completed. However, where an investigation is solely and definitively centered on a specific type of claim, a State could choose to withhold payments only on that type claim, e.g., nursing home claims, office visits, hospital care. Accordingly, we have revised section 455.23(b)(3) to indicate that notice to the provider is to specify, where appropriate, which type or types of the provider's Medicaid claims are affected by a withholding action.

As to the withholding of program payments only up to the amount of a potential overpayment, we had originally contemplated the inclusion of such a provision in the proposed regulations. However, we ultimately rejected this approach due to the difficulty in determining the final overpayment amount at the point at which withholding occurs. Any withholding in excess of the actual determined overpayment will be returned to the provider promptly upon final resolution of the case.

Comment: One commenter indicated that the standards in § 455.23(a) should be further clarified to state that any alleged fraud or willful misrepresentation be related to improperly obtained Medicaid payments only; unrelated matters, such as deceptive advertising, should not be the basis for withholding payments without due process protection.

Response: We agree with this comment, and have revised this section accordingly to indicate that any fraud or willful misrepresentation that serves as the basis for the withholding of payments must be related specifically to monies obtained under the Medicaid program.

Comment: Two commenters felt that before any withholding action is taken evidence should clearly indicate that only those individuals at the highest level of facility management or those having ownership interest, and not merely lower level employees, were involved in the fraud or willful misrepresentation at issue. Both commenters felt that program funds should not be withheld from a corporation if a corporate employee is defrauding both the corporation and the Government. In addition, one commenter stated that there should exist a substantial risk that funds could not otherwise be recovered before undertaking any withholding action.

Response: We are sensitive to the point raised by the commenters with respect to employer/employee

VOL 52 ISS 248 DEC 28 1987 UMI

involvement in any alleged fraud or willful misrepresentation, however, it must be recognized that employers and principals are generally responsible for the acts of agents and employees acting within the scope of their authority or employment. Where an employee is defrauding *both* the employer and the program, it is anticipated that owners or managers will cooperate fully with investigative officials in such instances to make known the facts and to determine where culpability lies.

As to substantial risk that funds could not be otherwise recovered before withholding payment, we have clearly stated that the overlying purpose of this withholding action is to protect the Government's interest by forestalling the time and expense of attempting to collect program overpayments at a later date through court proceedings or other means. While there may be little or no risk in recovering payments against a provider who is financially sound, such recoupments, after the fact, prove to be protracted and quite costly to the program. A withholding action is designed to eliminate the unnecessary time and cost of recouping past improper payments.

C. Timing of a Withholding Action

Comment: Several commenters raised the issue of the need to set specific time frames for conducting investigations, taking withholding actions and notifying providers. The proposed regulations stated that any withholding action is "temporary." Several of those individuals or organizations responding to this provision indicated that any indefinite withholding of payments serves to punish the provider unnecessarily. They recommended that any withholding action without an administrative hearing be limited to a specified period, e.g., 30 or 90 days, and that the judicial process be invoked if a longer period of time is required.

In addition, some commenters felt that the State Medicaid agency should also be required to complete its investigation against the provider within a specified period, after which Medicaid reimbursement would be reinstated until such time as the State obtains "reliable evidence" of a violation. Still other commenters added that the proposed rule should be amended to require the State agency to give providers prompt written notice as soon as the investigation is completed, and a determination made as to whether there is sufficient evidence to file charges.

Response: In response to these concerns, we will be advising all State Medicaid and investigative agencies of our expectation that they act expeditiously both in addressing any case in which a withholding action has be undertaken and in notifying the provider when the investigation has been terminated. Under normal circumstances, it is anticipated that a withholding action will not exceed one year and will be periodically reviewed so as to determine whether the circumstances that gave rise to the withholding action still exist. We do not believe, however, that we can mandate a specific time limit in which a criminal investigation can be conducted, as suggested, without disadvantaging such investigation.

We have recently provided similar instructions to all Regional Office investigators advising them to take prompt criminal, civil money penalty and sanction action on all Medicare cases where withholding has been invoked by the carrier and to notify the provider expeditiously when the investigation has been terminated.

Comment: Several organizations believe that where it is determined that the provider is entitled to all Medicaid payments withheld, payment should be made within a specified time period of the determination and that interest be paid on the balance due for the duration of the withholding.

Response: While we are not setting forth in regulations a set period by which repayment should be made under a favorable determination to a provider, we are instructing State Medicaid agencies to make prompt payment in such situations. We have not specifically addressed the issue of interest in these regulations, and we will defer to State procedures in this matter.

Comment: Two professional organizations commented that the proposed regulations should be amended to authorize the withholding of Medicaid payments for only those claims filed on or after the withholding action is initiated. These commenters indicated that unless this restriction was added, withholding could effect past due amounts not yet reimbursed which should be properly payable to the provider.

Response: The withholding of any related claim that can go towards making the Government whole should be taken into consideration for purposes of recoupment of program funds. We clearly do not want to make payment on *any* claims, be they past due or in the future, that are deemed questionable. Part of the intent of withholding program payments is to build up a type of escrow account out of which any overpayments can be deducted when the criminal investigation is ultimately concluded. As indicated in our above response, however, § 455.23(b)(3) is being revised to indicate that, *where appropriate*, monies not involving a questionable area, i.e., an area not under criminal investigation, may be exempt from any withholding action.

D. Notice as to Withholding Actions

Comment: The notice requirements contained in proposed § 455.23(b) exempt the State Medicaid agency from specifically identifying the nature of allegations that precipitated the withholding. One commenter stated that this requirement appeared to be in direct opposition to the requirement in § 455.23(b)(4) that a provider be accorded the right to submit written evidence to contest the withholding action. The commenter believed that specific identification of the nature of the allegations should be required of the State agency.

Response: We have accepted this comment in part and have, accordingly, revised § 455.23(b) to indicate that the notice must disclose the general nature of any withholding action. This notice need not discuss, however, any of the specific allegations in the ongoing investigation since such disclosure may jeopardize the case being developed by the State against the provider.

E. Scope of Withholding Actions

Comment: A number of commenters stated that many nursing homes and other facilities maintain a large percentage of patients for whom payment is being made under the Medicaid program. It was stated that to withhold all Medicaid payments to providers of this type could essentially put these facilities out of business, causing hardship to the Medicaid beneficiaries as well.

Response: We recognize the hardship that can be placed on a number of program beneficiaries and on certain types of providers that service a large percentage of these individuals as a result of any withholding action. While these providers will still be free to treat and receive reimbursements from private-pay patients, we, of course, are mindful of the potential impact of any withholding action against these types of providers and expect States to proceed cautiously to assure that providers of this type are not subject to payment suspension until such action is clearly necessary. In addition, because of the potential adverse effect on program beneficiaries, we believe that cases of these types should be given priority handling to expedite their resolution.

As indicated above, the primary purpose in any withholding action is to safeguard Medicaid dollars and to protect Medicaid program beneficiaries.

Comment: While the proposed regulations stated that a provider may be granted prior administrative review where such rights are so established and required by State law, two State agencies responding to this rulemaking indicated that their State laws requiring such mandatory review will defeat the purpose of the proposed rule and will serve to avoid the stoppage of payments.

Response: Our intent in these regulations is to provide Federal encouragement and acquiescence to those States that are authorized to take a withholding action against providers without first going through a protracted administrative hearing process. While States are free to seek State legislative changes where an administrative review process is currently required prior to any withholding action, these regulations are not intended to circumvent any existing State requirements in this area.

Comment: One commenter was concerned that these regulations might be construed as somehow limiting the authority of the State to take withholding action not specifically authorized by the rule. The State agency commenting indicated that it is currently authorized to withhold Medicaid provider payments for circumstances less than fraud, misrepresentation or criminal investigation, and, as such, is a stronger authority than our proposed regulations.

Response: These regulations are designed as minimum requirements for imposing withholding actions against providers. States may exercise broader power in this regard where State law or regulations so provide.

IV. Regulatory Impact Analysis

A. Executive Order 12291

Executive Order 12291 requires that a regulatory impact analysis be performed for any "major rule." A major rule is one that:

- Has an annual effect on the national economy of $100 million or more;
- Results in a major increase in costs or prices for consumers, any industries, any governmental agencies, or any geographic regions; or,
- Has a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign based enterprises in domestic or import markets.

We have determined that this final rule does not meet the criteria for a major rule as defined by section 1(b) of Executive Order 12291 and that a complete regulatory impact analysis is not required. As indicated, the intent of this rule is to encourage State agencies to withhold payments to Medicaid providers where there is reliable evidence of fraudulent activity by the provider under the Medicaid program, and to make clear that State agencies will not offer administrative review if such review would adversely effect investigations or proceedings already initiated. As further indicated above, it is expected that the withholding of provider payments by State Medicaid agencies will be reserved for only the most flagrant of violations and where all other appropriate avenues short of suspending payments is exhausted. The amount of program payments withheld to providers in all instances is not expected to exceed the $100 million threshold in any one fiscal year.

B. Regulatory Flexibility Analysis

Consistent with the Regulatory Flexibility Act of 1980 (Pub. L. 93–354), we are to prepare a regulatory flexibility analysis for each rulemaking, unless the Secretary certifies that the regulation does not have a "significant impact on a substantial number of small entities." The analysis is intended to explain the potential effect the rulemaking action has on small businesses and other small entities, and to develop lower cost or burden alternatives. While these final regulations could have an adverse impact on some small providers, we believe that the criminal investigation or nature of the suspected fraud, rather than the size of the provider, is the determining factor in withholding payments. Because of this reason, we believe a regulatory flexibility analysis is not required.

List of Subjects in 42 CFR Part 455

Fraud, Grant programs—health, Health facilities, Health professions, Investigations, Medicaid, Reporting and recordkeeping requirements.

TITLE 42—PUBLIC HEALTH

42 CFR Part 455, Subpart A is amended as follows:

PART 455—PROGRAM INTEGRITY: MEDICAID

1. The authority citation for Part 455 continues to read as follows:

Authority: Sec. 1102 of the Social Security Act (42 U.S.C. 1302).

2. The table of contents for Subpart A is amended by adding a new § 455.23 as follows:

Subpart A—Medicaid Agency Fraud Detection and Investigation Program

* * * * *

455.23 Withholding of payments in cases of fraud or willful misrepresentation.

3. In Subpart A, § 455.12 is revised to read as follows:

§ 455.12 State plan requirement.

A State plan must meet the requirements of §§ 455.13 through 455.23.

4. In Subpart A, a new § 455.23 is added to read as follows:

§ 455.23 Withholding of payments in cases of fraud or willful misrepresentation.

(a) *Basis for withholding.* The State Medicaid agency may withhold Medicaid payments, in whole or in part, to a provider upon receipt of reliable evidence that the circumstances giving rise to the need for a withholding of payments involve fraud or willful misrepresentation under the Medicaid program. The State Medicaid agency may withhold payments without first notifying the provider of its intention to withhold such payments. A provider may request, and must be granted, administrative review where State law so requires.

(b) *Notice of withholding.* The State agency must send notice of its withholding of program payments within 5 days of taking such action. The notice must set forth the general allegations as to the nature of the withholding action, but need not disclose any specific information concerning its ongoing investigation. The notice must:

(1) State that payments are being withheld in accordance with this provision;

(2) State that the withholding is for a temporary period, as stated in paragraph (c) of this section, and cite the circumstances under which withholding will be terminated;

(3) Specify, when appropriate, to which type or types of Medicaid claims withholding is effective; and

(4) Inform the provider of the right to submit written evidence for consideration by the agency.

(c) *Duration of withholding.* All withholding of payment actions under this section will be temporary and will not continue after:

(1) The agency or the prosecuting authorities determine that there is insufficient evidence of fraud or willful misrepresentation by the provider; or

(2) Legal proceedings related to the provider's alleged fraud or willful misrepresentation are completed.

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program)

Dated: July 29, 1987.

R.P. Kusserow,

Inspector General, Department of Health and Human Services.

Approved: November 5, 1987.

BILLING CODE 4150-04-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 64

[Docket No. FEMA 6770]

List of Communities Eligible for the Sale of Flood Insurance

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: This rule lists communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

EFFECTIVE DATES: The dates listed in the fourth column of the table.

ADDRESS: Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the National Flood Insurance Program (NFIP) at: P.O. Box 457, Lanham, Maryland 20706, Phone: (800) 638-7418.

FOR FURTHER INFORMATION CONTACT: Frank H. Thomas, Assistant Administrator, Office of Loss Reduction, Federal Insurance Administration, (202) 646-2717, Federal Center Plaza, Room 416, 500 C Street SW., Washington, DC 20472.

SUPPLEMENTARY INFORMATION: The National Flood Insurance Program (NFIP), enables property owners to purchase flood insurance at rates made reasonable through a Federal subsidy. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community:

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map. The date of the flood map, if one has been published, is indicated in the sixth column of the table. In the communities listed where a flood map has been published, section 102 of the Flood Disaster Protection Act of 1973, as amended, requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or construction of buildings in the special flood hazard area shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

The Catalog of Domestic Assistance Number for this program is 83.100 "Flood Insurance."

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, Federal Insurance Administration, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies that this rule, if promulgated will not have a significant economic impact on a substantial number of small entities. This rule provides routine legal notice stating the community's status in the NFIP and imposes no new requirements or regulations on participating communities.

List of Subjects in 44 CFR Part 64

Flood insurance, Floodplains.

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 *et. seq.*, Reorganization Plan No. 3 of 1978, E.O. 12127.

2. Section 64.6 is amended by adding in alphabetical sequence new entries to the table.

In each entry, a complete chronology of effective dates appears for each listed community. The entry reads as follows:

§ 64.6 List of eligible communities.

State	Location	Community number	Effective dates of authorization/cancellation of sale of Flood Insurance in community	Current effective map date
Georgia	White County, Unincorporated Areas	130191	November 9, 1987, Emerg.	6-11-76

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-492; RM-5390]

Radio Broadcasting Services; Siloam Springs, AR

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes FM Channel *266A for noncommercial educational Channel *212A at Siloam Springs, Arkansas, and modifies the license of Station KLRC(FM), in response to a petition filed by John Brown University. With this action, the proceeding is terminated.

EFFECTIVE DATE: February 4, 1988.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 86-492, adopted December 1, 1987, and released December 21, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW. Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 23

Changes in List of Species in Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (Convention) regulates international trade in certain animals and plants. Species for which trade is controlled are listed in Appendices I, II, and III to the Convention. The nations participating in the Convention, including the United States, recently adopted amendments to Appendices I and II. The United States did not enter a reservation on any of the species amendments made at the Sixth Meeting of the Conference of the Parties to the Convention. This document incorporates these amendments into the Fish and Wildlife Service's regulations implementing the Convention.

DATE: The amendments set forth in this notice entered into effect on October 22, 1987, under the terms of the Convention. Therefore, this rule is effective December 28, 1987.

ADDRESS: Please send correspondence concerning this document to the Office of Scientific Authority; Mail Stop: Room 527, Matomic Building; U.S. Fish and Wildlife Service; Department of the Interior; Washington, DC 20240. Materials received will be available for public inspection from 8:00 a.m. to 4:00 p.m., Monday through Friday, in room 537, 1717 H Street NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Dr. Charles W. Dane, Office of Scientific Authority, U.S. Fish and Wildlife Service, Washington, DC 20240, telephone (202) 653–5948.

SUPPLEMENTARY INFORMATION:

Background

The Convention regulates import, export, reexport, and introduction from the sea of certain animal and plant species. Species for which trade is controlled are included in three appendices. Appendix I includes species threatened with extinction that are or may be affected by trade. Appendix II includes species that although not necessarily now threatened with extinction may become so unless trade in them is strictly controlled. It also lists species that must be subject to regulation in order that trade in other currently or potentially threatened species may be brought under effective control (e.g., because of difficulty in distinguishing specimens of currently or potentially threatened species from those of other species). Appendix III includes native species that any Party nation identifies as being subject to regulation within its jurisdiction for purposes of preventing or restricting exploitation, and for which it needs the cooperation of other Parties in controlling trade.

Any Party nation may propose amendments to Appendices I and II for consideration at meetings of the Conference of the Parties. The text of any proposal must be communicated to the Convention's Secretariat at least 150 days before the meeting. The Secretariat must then consult the other Parties and appropriate intergovernmental agencies, and communicate their responses to all Parties no later than 30 days before the meeting. Amendments are adopted by a two-thirds majority of the Parties present and voting.

Action of the Parties

The Sixth Meeting of the Conference of the Parties to the Convention was held on July 12–24, 1987, in Ottawa, Canada. At the meeting, the Parties considered 116 proposals to amend the Appendices. These were listed in the **Federal Register** on July 10, 1987, for U.S. proposals (52 FR 26049) and for proposals by the other Parties (52 FR 26043). The proposals that were adopted by the Conference of the Parties were announced in the **Federal Register** (52 FR 35743; September 23, 1987), together with a request for comments from the public on whether the U.S. Fish and Wildlife Service (Service) should recommend that the United States enter a reservation on any of the amendments. The effect of a reservation would be to exempt this country from implementing the Convention for a particular species. More complete discussions of any practical effect of entering reservations and reasons for or against entering reservations are contained in 50 FR 48212 (November 22, 1985) and 52 FR 35743.

Several proposals were withdrawn by the proponent or rejected by vote of the Parties as announced in 52 FR 35743. The proposed amendments that were accepted by the Parties were also announced in 52 FR 35743, and the consequent changes that will be incorporated into the Code of Federal Regulations are printed at the end of this notice.

In addition to accepting the various species amendments to Appendix I and II, the Parties agreed to continue an export quota for leopards, accepted amendments with export quotas for populations of crocodiles and endorsed a clarification to the listing of chinchillas in the appendices.

The Parties agreed to continue the export quota system for leopards (*Panthera pardus*) as initiated in resolution Conf. 4.13 and restated in Conf. 5.13. Annual export quotas (shown in parentheses) were accepted for specimens from the following countries: Botswana (80): Central African Republic (40), Ethiopia (500), Kenya (80), Malawi (20), Mozambique (60), Tanzania (250), Zambia (300) and Zimbabwe (500). Changes in recommendations from previous quotas include: an increase of 150 for Zimbabwe, the establishment of quotas for Central African Republic and Ethiopia, and a clarification that the export quotas include specimens exported as hunting trophies.

The Parties accepted amendments for populations of four species of crocodiles in 11 countries. As adopted, these amendments established export quotas (shown in parentheses for the years 1987 through 1989) for populations of Nile crocodiles (*Crocodylus niloticus*) in the following countries: Botswana (2,000 in each year), Cameroon (100 in each year), Congo (150 in each year), Kenya (5,000 of which only 1,000 are to be taken directly from the wild in each year), Malawi (900, 1,000, and 1,300 of which only 700 are to be taken directly from the wild in each year), Mozambique (1,000, 1,000 and 4,000 with the increase in 1989 to accommodate specimens from ranching operations), Madagascar (1,000 in each year), Tanzania (2,000 in each year), Sudan (5,000 in each year), Zambia (3,350, 5,600, 8,200 of which only 2,000 are to be taken from the wild). In terms of specimens taken directly from the wild, these quotas represent an increase for Cameroon, Kenya, Malawi and Tanzania and prescribe a decrease in the quota for the Congo.

In addition, the export quota of 4,000 for the saltwater crocodile population in Indonesia was accepted, an increase of 2,000 specimens. Furthermore, the amendments to transfer the populations of *Crocodylus cataphractus* and *Osteolaemus tetraspis* in the Congo from Appendix I to Appendix II were accepted by the Parties with annual export quotas of 600 and 500, respectively.

Upon the recommendations of the Government of Canada and the Convention's Secretariat, the Parties in committee endorsed the clarification that the notation "population of South America" as originally applied to the listing of *Chinchilla* spp. in the Appendices as meaning that chinchillas bred in countries outside South America are not included in the Appendices. This does not result in any change in the way that the United States has been regulating chinchillas raised in the United States. Inasmuch as the original listing of *Chinchilla* spp. also included *Chinchilla brevicaudata boliviana*, the clarification also applies to that taxon which retains its earlier listing date.

Comments Received and Recent Decisions

The only comment received with regard to the announced actions of the Parties was from TRAFFIC (U.S.A.). This organization strongly urged the Service not to enter reservations on any of the accepted amendments to the Appendices. TRAFFIC felt that the United States "should continue to serve as a model country upholding the full spirit of the Convention."

This rule simply implements changes in the list of species in the Convention's Appendices that already have been approved by the Conference of the Parties, and that the United States is bound to accept unless it enters any reservations. The Service does not believe that implementation of any of the accepted amendments would be contrary to the interests or law of the United States. The period of time during which the United States could have entered a reservation on any of these amendments ended on October 22, 1987. The Service did not recommend the entry of any reservations, and none were entered by the United States. Earlier **Federal Register** notices informed the public about these amendments and allowed an opportunity for comment on them. Therefore, the Department of the Interior has determined that good cause exists for making this rule effective upon publication (5 U.S.C. 553(d)). Accordingly, paragraph (f) Section 23.23 of 50 CFR has been amended at the conclusion of this rulemaking.

Note—The Department has determined that amendments to the Convention's Appendices, which result from actions of the Parties to the Convention, do not require the preparation of Environmental Assessments as defined under authority of the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) The Department also has determined that such amendments are not rules for purposes of Executive Order 12291 and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) This document does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

List of Subjects in 50 CFR Part 23

Endangered and threatened plants, Endangered and threatened wildlife, Exports, Fish, Imports, Marine mammals, Plants (agriculture), Treaties.

Regulation Promulgation

For reasons set out in the preamble of this document, Part 23 of Title 50, Code of Federal Regulations is amended as follows:

PART 23—ENDANGERED SPECIES CONVENTION

1. The authority citation for Part 23 should be revised to read as follows:

Authority: Convention on International Trade in Endangered Species of Wild Fauna and Flora, TIAS 8249; and Endangered Species Act of 1973, 87 Stat. 884, 16 U.S.C. 1531 *et seq.*

§ 23.23 [Amended]

1. Amend paragraph (f) of § 23.23 by revising the existing entries for particular species on the list to read as follows:

Species	Common name	Appendix	Date listed (month/day/year)
ANIMAL KINGDOM:	ANIMALS:		
CLASS MAMMALIA:	MAMMALS:		
Order Rodentia:	Rodents:		
Chinchilla spp. (except those chinchillas bred in countries outside of South America).	Chinchilla	I	2/4/77
C. brevicaudata boliviana (except those chinchillas bred in countries outside of South America).	Chinchilla	I	7/1/75
Order Carnivora:	Carnivores: Cats, Bears, etc.:		
Panthera tigris	Tiger	I	7/1/75
Order Artiodactyla:	Even-toed Ungulates:		
Vicugna vicugna (except populations listed below)	Vicuna	I	7/1/75
CLASS AVES:	BIRDS:		
Order Psittaciformes:	Parrots, Parakeets, Macaws, Lories:		
Probosciger aterrimus	Great black cockatoo, Palm cockatoo	I	7/1/75
Order Passeriformes:	Perching Birds:		
Gubernatrix cristata	Yellow cardinal	II	7/14/76
CLASS REPTILIA:	REPTILES:		
Order Crocodylia:	Crocodiles, Alligators, Caimans, Gavials:		
Crocodylus cataphractus (except Congo population)	African slender-snouted crocodile	I	7/1/75
Osteolaemus tetraspis (except subspecies and populations listed below)	Dwarf crocodile	I	2/4/77
PHYLUM ARTHROPODA:	ARTHROPODS:		
Class Insecta	Insects:		
Ornithoptera alexandrae	Queen Alexandra's birdwing butterfly	I	2/4/77
PLANT KINGDOM:	PLANTS:		
Family Cupressaceae:	Cypresses:		
Fitz-Roya cupressoides	Fitzroya, Alerce	I	7/1/75

2. Amend paragraph (f) of § 23.23 by adding to the list the following species or other groups of animals and plants in alphabetical order under the appropriate taxonomic categories:

Species	Common name	Appendix	Date listed (month/day/year)
CLASS MAMMALIA:	MAMMALS:		
Order Chiroptera:	Bats:		
Pteropus insularis	Truk flying fox	II	10/22/87
P. macrotis	Big-eared flying fox	II	10/22/87
P. mariannus	Mariana flying fox	II	10/22/87
P. molossinus	Ponape flying fox	II	10/22/87
P. phaeocephalus	Mortlock Inum bat	II	10/22/87
P. pilosus	Palau flying fox	II	10/22/87
P. samoensis	Samoa flying fox	II	10/22/87
P. tokudae	Tokuda's flying fox	II	10/22/87
P. tonganus	Insular flying fox	II	10/22/87
Order Carnivora:	Carnivores: Cats, Bears, etc:		
Dusicyon gymnocercus	Pampas fox	II	10/22/87
Felis yagouaroundi	Jaguarundi	I	7/1/75
Order Artiodactyla:	Even-toed Ungulates:		
Catagonus wagneri	Chacoan or giant peccary	I	10/22/87
Tayassu spp. (except populations in the United States)	Collared and White-lipped peccaries	II	10/22/87
Vicugna vicugna (Populations in Paranicota Province, la. Region of Tarapaca in Chile, and populations of Pampa Galeras Natl. Reserve and Nuclear Zone, Pedregal, Canconta and Sawacocha (Province of Lucanas), Sais Pictoni (Province of Azangaro), Sais Tupac Amaru (Province of Junin), and of Salinas Aguada Blanco Natl. Reserve (Provinces of Arequipa and Caillomal in Peru (under specific conditions including export of cloth only).	Vicuna	II	10/22/87
CLASS AVES:	BIRDS:		
Order Ciconiiformes:	Herons, Storks, Ibises, Flamingos:		
Balaeniceps rex	Whale-headed stork	II	10/22/87
Eudocimus ruber	Scarlet Ibis	II	10/22/87
Mycteria cinerea	Milky wood stork	I	10/22/87
Order Galliformes:	Pheasants, Curassows, Megapodes Hoatzins:		
Rheinardia ocellata	Crested argus pheasant	I	10/22/87
Order Gruiformes:	Cranes, Rails, Bustards:		
Otididae spp. (All species except those in App. I or with earlier date in App. II).	Bustards	II	10/22/87
Order Psittaciformes:	Parrots, Parakeets, Macaws, Lories:		
Anodorhynchus hyacinthinus	Hyacinth macaw	I	6/6/81
Ara militaris	Military macaw	I	6/6/81
Order Apodiformes:	Swifts, Hummingbirds:		
Trochilidae spp.	Hummingbirds	II	10/22/87
Order Passeriformes:	Perching Birds:		
Paroaria capitata	Yellow-billed cardinal	II	10/22/87
Paroaria coronata	Red-crested cardinal	II	10/22/87
CLASS REPTILIA:	REPTILES:		
Order Crocodylia:	Crocodiles, Alligators, Caimans, Gavials:		
Crocodylus cataphractus (Congo population only)	African slender-snouted crocodile	II	7/1/75
Osteolaemus tetraspis (Population of the Congo)	Dwarf crocodile	II	2/4/77
Order Squamata:	Lizards, Snakes:		
Boa constrictor occidentalis	Argentine boa constrictor	I	2/4/77
Gallotia aff. *simonyi*	Hierro giant lizard	I	10/22/87
Podarcis lilfordi	Lilford's wall lizard	II	10/22/87
Podarcis pityusensis	Ibiza wall lizard	II	10/22/87
Vipera ursinii (except populations in the U.S.S.R.	Orsini's viper	I	10/22/87
CLASS AMPHIBIA:	AMPHIBIANS:		
Order Anura:	Frogs, Toads:		
Dendrobates spp.	Poison-dart frogs	II	10/22/87
Dyscophus antongili	Tomato frog	I	10/22/87
Phyllobates spp.	Poison-arrow frogs	II	10/22/87
PHYLUM MOLLUSCA:	MOLLUSCS:		
Class Gastropoda:	Snails:		
Achatinella spp.	Oahu tree snails	I	10/22/87
PHYLUM ARTHROPODA:	ARTHROPODS:		
Class Insecta:	Insects:		
Bhutanitis spp.	Bhutan Glory swallowtails	II	10/22/87
Papilio chikae	Luzon peacock swallowtail	I	10/22/87
Papilio homerus	Homerus swallowtail	I	10/22/87
Papilio hospiton	Corsican swallowtail	I	10/22/87
Teinopalpus spp.	Kaiser-I-Hind butterflies	II	10/22/87
PHYLUM ANNELIDA:	ANNELID WORMS:		
Class Hirudinea:	Leeches:		
Order Arhynchobdelliformes:	Rhynchobdellids:		
Hirundo medicinalis	Medicinal leech	II	10/22/87
PLANT KINGDOM:	PLANTS:		
Family Cactaceae:	Cacti:		
Aeriophyllum (= *Echinocactus*) *asterias*	Sea urchin cactus, star cactus	I	7/1/75
Family Cycadaceae:	Cycads:		
Cycas beddomei	Beddome cycad	I	2/4/77
Family Nepenthaceae:	Old World pitcher plants:		
Nepenthes khasiana	Indian tropical pitcher plant	I	10/22/87
Nepenthes spp. (all species except those in app. I).	Tropical pitcher plants	II	10/22/87
Family Orchidaceae:	Orchids:		
Paphiopedilum spp.	Drury tropical lady's slipper	I	7/1/75
Family Sarraceniaceae:	New World pitcher plants:		
Sarracenia spp. and natural hybrids (all species and natural hybrids except species in app. I).	Trumpet pitcher plants	II	10/22/87

3. Amend paragraph (f) of § 23.23 by removing the following existing entries for particular species and animal orders; if all species and genera listed under the order are deleted, also remove the order heading, as follows:

Species	Common name	Appendix	Date listed (month/day/year)
CLASS MAMMALIA:	MAMMALS:		
Order Insectivora:	Insectivores:		
Erinaceus frontalis	African hedgehog	II	7/1/75
Order Lagomorpha:	Rabbits, Hares:		
Nesolagus netscheri	Sumatran short-eared rabbit	I	7/1/75
Order Rodentia:	Rodents:		
Dipodomys phillipsi phillipsi	Phillips' kangaroo rat	II	7/1/75
Lariscus hosei	Four-striped or Bornean black-striped ground squirrel	II	7/1/75
Notomys spp	Australian hopping mice	II	6/26/78
Notomys aquilo	Austra'ian nothern hopping mouse	II	7/1/75

Proposed Rules

Federal Register
Vol. 52, No. 248
Monday, December 28, 1987

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Parts 330 and 332

Recruitment, Selection, and Placement (General) and Recruitment and Selection Through Competitive Examination

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) proposes to revise the regulations governing placement programs for employees who are subject to involuntary separation, or who have been involuntarily separated, through no fault of their own. The existing regulations do not include the Interagency Placement Assistance Program (IPAP) which was implemented in 1981. The proposed regulations incorporate the IPAP and include minor changes that are needed to update and clarify OPM's current policies and procedures with regard to displaced employees. OPM is seeking one new change in policy in the proposed regulations: to exclude employees who have a rating of unacceptable from coverage under the IPAP and the Displaced Employee Program (DEP).

DATE: Comments must be received on or before February 26, 1988.

ADDRESS: Send or deliver written comments to Curtis J. Smith, Associate Director for Career Entry, Office of Personnel Management, Room 6F08, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Sylvia Cole, (202) 632–6817.

SUPPLEMENTARY INFORMATION: OPM operates two placement programs for employees who are scheduled to be displaced or have been displaced from their positions—the Interagency Placement Assistance Program (IPAP) and the Displaced Employee Program (DEP). In addition, agencies are required to operate positive placement programs which include establishment of a Reemployment Priority List (RPL) for their own employees who have received a notice of separation by reduction in force (RIF). While the RPL assures employment consideration in the *former* agency, the IPAP and DEP provide reemployment consideration in *other* agencies.

The Personnel Director's Productivity Task Force recommended changes in these placement programs to eliminate duplication. As a result of this recommendation, we reviewed the placement programs OPM operates as well as the ones agencies are required to operate. We concluded that each program provides a specific type of placement assistance and in total, these programs strike an acceptable balance between the commitment of the Government to assist employees who are involuntarily separated from their jobs, and the needs of an agency for flexibility in filling positions. We need to retain the programs we have. However, we plan to make some adjustments so the programs operate more efficiently. These proposed regulations only address the IPAP and DEP.

The IPAP, formerly known as the Voluntary Interagency Placement Program, was created by OPM in 1981 to provide placement assistance as far in advance of an impending work force reduction as possible. Since the Displaced Employee Program (DEP) requires a specific notice of separation which sometimes is not given to the employee until 10 days prior to a reduction in force, there may be insufficient time allowed for placement assistance before separation. The IPAP permits enrollment as soon as an individual employee is identified as surplus and provides assistance in 120-day increments, renewable by the agency. In addition, it provides assistance to employees who are not eligible for placement assistance through the DEP, such as employees serving under Schedule A and B appointments and term appointments. The proposed regulations would incorporate the IPAP into Subpart C of Part 330.

The proposed regulations would also restrict placement assistance under Part 330, Subpart C, to employees who have a performance rating of record above "unacceptable." It is inconsistent with merit principles to require an agency to hire an unacceptable performer when the agency might hire a high quality candidate from outside the Civil Service. This requirement was proposed in a memorandum to agency personnel directors distributed through the Interagency Advisory Group in June, 1986, and it won overwhelming support.

Another change that is included in the proposed regulations would clarify that individuals who retire under the involuntary early retirement provisions of section 8336(d)(1) of title 5, United States Code, are eligible for the DEP. In the past, some confusion has existed about whether or not discontinued service retirees are permitted to register for placement assistance because they are receiving annuities. Since each early retirement costs the retirement system additional funds, it is in the interest of the Federal Government to reemploy these annuitants, if possible.

These regulations would also update the referral procedures for program participants to reflect OPM's current policy of referring DEP and IPAP registrants only to positions that have no higher promotion potential than the position from which the employee was or will be separated.

These regulations would also delete the provision in Part 330, § 330.305, that requires agencies to separate Tenure Group III employees when there are no suitable vacancies for DEP registrants. This provision has not been used since the 1950's and OPM believes that implementing it would be unduly disruptive to agency operations. Consequently, it has been omitted in the proposed regulations.

Subpart G of Part 330 would be updated to reflect current OPM policy on the reemployment of disability retirees who are 60 years of age or over. Eligibility for placement assistance under Subpart C is no longer restricted to disability retirees under age 60, and no prior OPM determination of recovery is required.

Subpart D of Part 330 would be revised to reflect the incorporation of the IPAP in Subpart C; and Part 332, Subpart B, § 332.314, would be revised to clarify that the placement assistance described therein is for DEP eligibles only.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation affects only the procedures used to provide placement assistance to certain Federal employees.

List of Subjects in 5 CFR Parts 330 and 332

Government employees.

U.S. Office of Personnel Management.
Constance Horner,
Director.

Accordingly, OPM proposes to amend 5 CFR Parts 330 and 332 as follows:

PART 330—RECRUITMENT, SELECTION, AND PLACEMENT (GENERAL)

1. The authority citation for Part 330 continues to read as follows:

Authority: 5 U.S.C. 1302, 3301, 3302; E.O. 10577, 3 CFR, 1954–1958 Comp., p. 218; Section 330.102 issued under 5 U.S.C. 3327; Section 330.201 issued under 5 U.S.C. 3315; Section 330.202 issued under 5 U.S.C. 7701, et seq.; Section 330.401 issued under 5 U.S.C. 3310; Subpart H issued under 5 U.S.C. 3301, 3302, 8337(h), and 8457(b).

2. Subpart C and its heading are revised to read as follows:

Subpart C—Placement Assistance Programs for Displaced Employees

Sec.
330.301 General.
330.302 Eligibility.
330.303 Period of eligibility.
330.304 Nature of assistance.
330.305 Termination of eligibility.
330.306 Agency responsibilities.

Subpart C—Placement Assistance Programs for Displaced Employees

§ 330.301 General.

This subpart covers placement programs for employees who are facing possible separation or have been displaced as a result of agency work force reductions, and employees who are retired on disability or who have incurred compensable on-the-job injury. OPM operates two placement programs that supplement agency positive placement efforts—the Interagency Placement Assistance Program (IPAP) and the Displaced Employee Program (DEP). In general, the IPAP provides placement assistance in advance of an impending work force reduction for employees who have been identified by their agencies as surplus. The DEP provides assistance for career-conditional and career employees who have received a specific notice of separation or who have been separated. The IPAP is also used to refer certain National Guard and Military Reserve Technicians for placement consideration as set forth in Subpart H of this part.

§ 330.302 Eligibility.

(a) For the *IPAP*, the registrant must:

(1) Have a rating above "unacceptable" on his or her most recent performance rating of record as described in § 351.203 of this chapter;

(2) Be serving under a career, career-conditional, term, TAPER, or Schedule A or B appointment in an agency that is not excepted from the competitive service;

(3) Be occupying a position that has been identified as surplus under one of the following conditions:

(i) The position is scheduled to be abolished;

(ii) The agency is scheduled to be abolished;

(iii) The activity in which the position is located is undergoing a management study under the provisions of OMB Circular A–76 and solicitation of bids has begun; or

(iv) The employee has been otherwise targeted for separation.

(b) For the *DEP*, the registrant must:

(1) Have a rating above "unacceptable" on his or her most recent performance rating of record as described in § 351.203 of this chapter (except for individuals qualifying under paragraph (b)(3)(v) of this section);

(2) Be a present or former career or career-conditional employee, or career status employee holding an excepted service appointment, in tenure group I or II as defined in Part 351 of this chapter, in an agency that is not excepted from the competitive service (except that an employee occupying a Schedule C position as defined in Part 213 of this chapter is not entitled to placement assistance); and

(3) Must be subject to one of the following:

(i) Has received a specific notice of separation through reduction in force;

(ii) Has declined a transfer of function to another commuting area or has declined reassignment to another commuting area (as defined in Part 351 of this chapter);

(iii) Has been separated or furloughed because of a compensable injury sustained under the provisions of subchapter I of chapter 81 of title 5, United States Code;

(iv) Has applied for an annuity or has retired under the discontinued service retirement provision in section 8336(d)(1) of title 5, United States Code; or

(v) Has retired for disability under section 8337, 8451 or 8457 of title 5, United States Code.

§ 330.303 Period of eligibility.

IPAP registrants receive placement assistance in 120-day increments renewable by the registering agencies. Career-conditional employees eligible for the DEP receive 1 year of placement assistance and career employees receive 2 years of assistance.

§ 330.304 Nature of assistance.

(a) IPAP and DEP registrants are referred ahead of other candidates when they are qualified and available for vacancies that are expected to last more than 1 year and are filled through competitive registers held by OPM or by an agency with delegated examining authority. No individual may be selected for such a vacancy from an OPM or agency competitive register as long as a qualified DEP registrant is available. Referrals are based on the qualifications of registrants and on the duties of the positions. Placement assistance under both programs is nationwide except for registrants who decline transfer or reassignment outside the commuting area. Eligible employees who decline to relocate may register for placement assistance only within the commuting area of the position from which they will be or were separated; however, these registrants may transfer their eligibility to another commuting area if they later relocate. A registrant will be referred to vacancies that are at or below the grade level of and have no more promotion potential than the position from which the registrant was separated. Eligible registrants separated from positions above GS-15 will receive assistance at the GS-15 level and below.

(b) When an agency selects an IPAP or DEP registrant, it employs him or her by reinstatement, transfer, position change, or excepted appointment as appropriate.

§ 330.305 Termination of eligibility.

(a) Eligibility for assistance under the *IPAP* will be terminated if one of the following occurs:

(1) The registrant's 120-day period of eligibility expires and is not renewed by the agency;

(2) The registrant requests, in writing, that placement assistance be terminated;

(3) The agency notifies OPM that the employee is no longer surplus;

(4) The registrant is placed in a nontemporary position in the competitive or excepted service;

(5) The registrant is enrolled in the DEP; or

(6) The registrant declines an offer of continuing employment in the competitive or excepted service under conditions (i.e., grade, salary, geographic location, or work schedule) the registrant previously indicated were acceptable, unless OPM determines that an exception is warranted.

(b) Eligibility for assistance under the *DEP* will be terminated if one of the following occurs:

(1) A tenure group I registrant's 2-year period of eligibility expires (except for preference eligibles covered under § 330.407 of this part who are eligible for up to 1 year of additional assistance as specified in that section);

(2) A tenure group II registrant's 1-year period of eligibility expires (except for preference eligibles covered under § 330.407 of this part who are eligible for up to 1 year of additional assistance as specified in that section);

(3) The registrant requests, in writing, that placement assistance be terminated;

(4) The registrant is placed in a nontemporary position in either the competitive or excepted service; or

(5) The registrant declines an offer of continuing employment in the competitive or excepted service under conditions (i.e., grade, salary, geographic location, or work schedule) the registrant previously indicated were acceptable, unless OPM determines that an exception is warranted.

§ 330.306 Agency responsibilities.

(a) *Registration of eligible employees.* Agencies are encouraged to participate in the IPAP and inform their employees about this program as soon as they are reasonably sure that separations will be necessary. In accordance with § 351.804 of this chapter, agencies must inform affected employees about the Displaced Employee Program at the same time that specific notices are distributed. Agencies are responsible for assisting employees with their registration forms, for completing the information requested on the registration forms, and for sending the forms to appropriate offices as instructed by OPM.

(b) *Consideration of individuals referred.* Agencies will give full consideration to individuals referred through OPM's placement programs. Full consideration is a careful and open review of the qualifications of the registrant as described in the individual's application forms followed by an interview, if possible, to further assess the registrant's ability to perform the duties of the position within a reasonable period of time. An appointing officer may not pass over a DEP eligible to select a non-DEP eligible unless an objection to the DEP eligible is sustained by OPM or an agency with delegated examining authority. This objection procedure does not apply to IPAP registrants.

(c) *Agency programs.* (1) Each agency has a primary obligation to assist, to the maximum extent practical and in keeping with the requirements set forth in paragraph (c)(2) of this section, in the placement of its surplus and displaced employees. OPM's placement programs only supplement these efforts and are not intended to replace an agency's program or to relieve an agency of its responsibility to provide the maximum placement assistance possible.

(2) Each agency is required to operate a positive placement program for its own surplus and displaced employees. The program must, at a minimum, provided for the establishment and maintenance of a reemployment priority list for the commuting area, as provided for in Subpart B of this Part and Subpart J of Part 351 of this chapter. Additionally, each agency is expected to supplement this basis requirement with other forms of appropriate assistance. An agency's positive placement program should include, at a minimum, the following elements:

(i) Criteria of eligibility for assistance;

(ii) The duration of eligibility;

(iii) The types of assistance provided, including counseling, job referral, and training;

(iv) Consideration of the appropriateness of imposing hiring restrictions on filling vacancies, such as blocking transfers, reinstatements, and outside hires, as long as qualified surplus or displaced employees are available in the agency's positive placement program.

§ 330.404 [Amended]

3. In § 330.404, (c), the words "as specified in OPM issuances" are deleted and the word "are" is substituted for "is".

4. In § 330.701, paragraph (b) is revised to read as follows:

§ 330.701 Coverage

* * * * *

(b) Has been retired under section 8337 or 8451 of title 5, United States Code.

PART 332—RECRUITMENT AND SELECTION THROUGH COMPETITIVE EXAMINATION

5. The authority citation following § 332.406 is removed. The authority citation for Part 332 continues to read as follows:

Authority: 5 U.S.C. 1302, 3301, 3302; E.O. 10577, 3 CFR, 1954–1958 Comp., p. 218.

6. Section 332.314 is revised to read as follows:

§ 332.314 Displaced employees eligible for placement assistance.

Subject to the time limits and other conditions published by OPM in the Federal Personnel Manual, a person who is eligible for placement assistance through the Displaced Employee Program described in Subpart C of Part 330 of this chapter is entitled to file applications for competitive examinations after the closing date for receipt of applications when there is an existing register or a register is about to be established. Applications may be filed at any grade or level above the position from which the person is about to be or was displaced, for which such person is qualified.

BILLING CODE 6325–01–M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 959

Onions Grown in South Texas; Proposed Amendment to Rules and Regulations to Authorize Collection of Planting Data

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would require handlers to provide information to the South Texas Onion Committee on onion plantings periodically during the planting season. Planting times for onions are staggered so that the entire crop will not mature at the same time. By knowing when the onions were planted and the number of acres planted, the industry will be better able to judge the volume of available supplies during the shipping period and plan the activities of the marketing development program to coincide with the heaviest volume.

DATES: Comments must be received by January 27, 1988.

ADDRESSES: Comments should be sent to: Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2085–S, Washington, DC 20090–6456. Three copies of all written material should be submitted, and they will be made available for public inspection in the office of the Docket Clerk during regular business hours. Comments should reference the date and page number of this issue of the Federal Register.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, D.C. 20090–6456; telephone 202–447–2431.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Order No. 959 [7 CFR Part 959], regulating the handling of onions grown in South Texas. This order is authorized by the Agricultural Marketing Agreement Act of 19337, as amended [7 U.S.C. 601–674], hereinafter referred to as the Act.

In accordance with the Paperwork Reduction Act of 1980 [44 U.S.C. 3507], the information collection requirements included in this rule will be submitted for approval to the Office of Management and Budget (OMB).

This proposed rule has been reviewed under Executive Order 12291 and Department Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposal on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 40 handlers of onions subject to regulation under the South Texas Onion Marketing Order and approximately 160 onion producers in the production area. Small agricultural producers have been defined by the Small Business Administration [13 CFR 121.2] as those having annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of South Texas onions may be classified as small entities.

This proposed rule would require handlers to report to the committee the acreage and planting dates of all onions that they anticipate handling during the shipping season. Growers typically contract with handlers prior to the beginning of the season to arrange for sorting, grading, packing and, in some case harvesting. During this period, handlers and the growers they service usually decide jointly on planting schedules so that acreage that matures during a specific interval does not exceed the capacity of the handler's facilities. Hence, handlers are well aware of the size and timing of plantings since they were actually engaged in the planting phase.

For the past five seasons the South Texas Onion Committee has undertaken a market development program aimed at finding ways to increase the movement of production area onions. The program has expanded each year, its budget increasing from $25,000 the first season to $141,351 for the upcoming season. The program has centered around promoting South Texas onions within the trade, with emphasis on receivers, retailers, and food page editors.

Experience during the past five seasons has indicated a need for information concerning the anticipated volume of marketings on a weekly or bi-weekly basis during the shipping season. With this information available, plans can be developed before the season begins to allocate program resources to produce the best results. The committee feels the best method for obtaining the necessary information is to require handlers to report actual plantings to the committee every two weeks during the planting season. Additionally, the information developed from these reports will be made available to the industry, on a composite basis to avoid divulging individual handlers' operations. This should further aid growers and handlers in making marketing decisions during the season. Inasmuch as the information desired by the committee is already available, having been developed by the handlers themselves, the additional reporting burden will be minimal.

Based on the above, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

A 30-day comment period is allowed to receive written comments either supporting or opposing this proposal. All written comments timely received in response to this request for comments will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 959

Marketing agreements and orders, onions, Texas.

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 959 be amended as follows:

PART 959—ONIONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR Part 959 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Part 958, Subpart—Rules and Regulations is hereby amended by adding a new § 959.115 as follows:

§ 959.115 Planting reports.

Each handler shall furnish every two weeks during the planting season to the committee, on a form provided by the committee, the number of acres of onions planted by the handler or growers for whom the handler packs onions during such period and the location of such plantings.

Dated: December 21, 1987.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 87–29560 Filed 12–24–87; 8:45 am]

BILLING CODE 3410–02–M

7 CFR Part 979

Melons Grown in South Texas; Proposed Amendment No. 7 to Continuing Handling Regulation to Remove Exemption for Black Surface Discoloration

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would eliminate the exemption for black surface discoloration from the grade requirements for melons produced in South Texas. The South Texas Melon Committee believes that this action will improve the quality of Texas melons and make them competitive with melons from other producing areas. The proposal is intended to provide a more appealing melon for consumers and thus improve returns to growers.

DATES: Comments must be received by January 27, 1988.

ADDRESSES: Comments should be sent to: Docket Clerk, Fruit and Vegetable

BEST COPY AVAILABLE

VOL 52 ISS 248 DEC 28 1987 UMI

Division, AMS, USDA, P.O. Box 96456, Room 2085–S, Washington, DC 20090–6456. Three copies of all written material should be submitted, and they will be made available for public inspection in the office of the Docket Clerk during regular business hours. Comments should reference the date and page number of this issue of the Federal Register.

FOR FURTHER INFORMATION CONTACT: Robert F. Matthews, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2525–S, Washington, DC 20090–6456; telephone 202–447–2431.

SUPPLEMENTARY INFORMATION: This rule is proposed under Marketing Order No. 979 (7 CFR Part 979), regulating the handling of melons grown in South Texas. This order is authorized by the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This proposed rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512–1 and has been determined to be a "non-major" rule under criteria contained therein.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposal on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 35 handlers of melons subject to regulation under the South Texas Melon Marketing Order and approximately 72 melon producers in the production area. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.2) as those having annual gross revenues for the last three years of less than $100,000, and small agricultural service firms are defined as those whose gross annual receipts are less than $3,500,000. The majority of handlers and producers of South Texas melons may be classified as small entities.

This proposed rule would eliminate the exemption for black surface discoloration allowed under the current regulation. Grade requirements specify that cantaloups must meet U.S. Commercial grade and that at least half of the honeydew melons in any lot must meet U.S. Commercial grade and, in addition, contain at least eight percent sugar. Currently, black surface discoloration is not scored as a grade defect, although it is listed under U.S. Commercial grade in the U.S. Standards for cantaloups and honeydew melons.

At the inception of the order in 1979, it was the committee's belief that emphasis should be placed on the elimination of bulk shipments and the container regulations necessary to accomplish this. Grade requirements from the beginning have tended to be less stringent than those of other producing areas. The industry consensus at that time was that the cost of sorting, grading, and packing would tend to remove the poorer quality melons from marketing channels, and that tighter quality standards were therefore unnecessary. Because of this, the committee believed that scoring black surface discoloration, or black mold, as a grade defect would cause an unnecessary hardship among handlers and recommended an exemption for this defect.

Black surface discoloration from mold is much more prevalent on production area melons during wet growing seasons, although it can be found following a heavy rain in any season. The incidence of this defect during dry or normal years may not be high enough to attract much unfavorable attention in terminal markets, but is often present in some degree. However, during unusually wet seasons, it is not uncommon to find a significant number of melons in each lot affected with black mold to a greater or lesser extent.

The spring marketing season for South Texas melons is short, usually lasting only from May through June. During the latter part of the season, shipments from South Texas compete in the marketplace with melons produced in California and Arizona, both of which have gained reputations for shipping very high quality melons. Faced with increasing competition of high quality supplies from other producing areas, the committee has decided that upgrading the quality of South Texas melons is the most practical method of meeting the competition. Since black surface mold is unsightly and significantly reduces the sales appeal of the melon, removing the exemption for it and requiring it to be scored as a defect should noticeably improve the quality of melons shipped from the area. While this proposal would remove the exemption for black surface discoloration, a tolerance would be provided for this type of damage. For cantaloups, there currently is a 12 percent tolerance for condition defects, including an eight percent tolerance for serious damage. In the case of honeydew mellons, the total tolerance for damage is 50 percent, which includes a 20 percent tolerance for serious damage. Given the provision of these tolerances and the fact that certain procedures can be followed by handlers in preparing the melons for market to reduce the presence of black surface mold, it is not believed that this action would substantially affect the volume of Texas melons that could be shipped to the fresh market. In addition, any costs involved in complying with the proposed action would be offset by the improved returns expected to be received for the higher quality melons.

Exceptions are provided to certain of these handling requirements to recognize special situations in which such requirements are inappropriate or unreasonable. Up to 120 pounds of melons may be handled each day except for resale, without regard to the requirements of this regulation. Also, shipments of melons for charity or relief are exempt, since no useful purpose would be served by regulating such shipments. Melons for canning or freezing are exempt from regulation.

Based on the above, the Administrator of AMS has determined that this action would not have a significant economic impact on a substantial number of small entities.

A 30-day comment period is allowed to receive written comments either supporting or opposing this proposal. All written comments timely received in response to this request for comments will be considered before a final determination is made on this matter.

List of Subjects in 7 CFR Part 979

Marketing agreements and orders, Melons, Texas,

For the reasons set forth in the preamble, it is proposed that 7 CFR Part 979 be amended as follows:

PART 979—MELONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR Part 979 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 979.304 [Amended]

2. Section 979.304 (47 FR 13119, March 29, 1982; 47 FR 24110, June 3, 1982; 48 FR 21881, May 16, 1983; 49 FR 15542, April 19, 1984; 50 FR 10207, March 14, 1985; 51 FR 16004, April 30, 1986; 52 FR 17390, May 8, 1987) is hereby amended by removing paragraph (a)(3) and redesignating paragraph (a)(4) as (a)(3).

Dated: December 21, 1987.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 87–29591 Filed 12–24–87; 8:45 am]

BILLING CODE 3410–02–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 87–NM–141–AD]

Airworthiness Directives; Lockheed-Georgia Model 382 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking (NPRM).

SUMMARY: This notice proposes a new airworthiness directive (AD), applicable to Lockheed Model 382 series airplanes, which would require inspection of the control column base for cracks, and replacement, if necessary. This proposal is prompted by reports of operators using an elevator block that has caused cracking to occur in the First Officer's control column. This condition, if not corrected, could result in failure of the control column and lost of control of the airplane.

DATE: Comments must be received no later than February 24, 1988.

ADDRESSES: Send comments on the proposal in duplicate to Federal Aviation Administration, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–141–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168. Applicable service information may be obtained from Lockheed-Georgia Company, 86 South Cobb Drive, Marietta, Georgia 30063. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or FAA, Central Region, Atlanta Aircraft Certification Office, 1669 Phoenix Parkway, Suite 210, Atlanta, Georgia.

FOR FURTHER INFORMATION CONTACT: Mr. Jack Bentley, Aerospace Engineer, Airframe Branch (ACE–120A), FAA, Central Region, Atlanta Aircraft Certification Office, 1669 Phoenix Parkway, Suite 210, Atlanta, Georgia 30349; telephone (404) 991–2910.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this Notice may be changed in light of the comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the FAA, Northwest Mountain Region, Office of the Regional Counsel (Attn: ANM–103), Attention: Airworthiness Rules Docket No. 87–NM–141–AD, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

Discussion

The FAA has received reports of cracks found in the control column base on Lockheed Model 382 series airplanes, which have been caused by the use of elevator control blocks to prevent damage to the elevator during loading and unloading operations. Typically, control blocks are used on many models of aircraft to prevent damage caused by the inadvertent slamming of controls against the control stops during flight in gusty or high wind conditions. However, Lockheed Model 382 airplanes have built-in control system snubbers to prevent this condition, and the use of elevator control blocks is not authorized for these airplanes. Due to the inherent design of the Model 382 control system, the use of additional elevator control blocks can induce excessive loads in certain control system elements and lead to cracks, such as the ones which have been reported. Such cracks, if not detected and repaired, could lead to the failure of the control column and loss of control of the airplane.

Since this condition is likely to exist or develop on other airplanes of this same type design, an AD is proposed which would require inspection of the control column bases on the forward side of the control column, in accordance with procedures that have been developed for non-destructive inspection (using eddy current and fluorescent penetrant methods), and replacement, if necessary.

It is estimated that 22 airplanes of U.S. registry would be affected by this AD, that it would take approximately 10 manhours per airplane to accomplish the required actions, and that the average labor cost would be $40 per manhour. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $8,800.

For these reasons, the FAA has determined that this document (1) involves a proposed regulation which is not major under Executive Order 12291 and (2) is not a significant rule pursuant to the Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this proposed rule, if promulgated, will not have a significant economic impact on a substantial number of small entities because of the minimal cost of compliance per airplane ($400). A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend § 3913 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) as follows:

PART 39—[AMENDED]

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Lockheed-Georgia: Applies to Model 382 series airplanes, certificated in any category. Compliance required as indicated, unless previously accomplished.

To prevent failure of the control column and loss of control of the airplane, accomplish the following:

A. Within the next 250 hours time-in-service after the effective date of this AD, perform an eddy current (non-destructive) inspection of the left and right control column bases on the forward side of each control

column at approximately floor level, as follows:

Note

The control column base is shown in the Lockheed Hercules Component Overhaul Manual, SMP 850, Item 27–26, Figure 1, page 4, as Figure Item No. 235 (see Figure 1, below). The inspection area is around the 1.25-inch diameter hole located on the forward side of the base approximately at the lower end of the control column tube support (Figure Item No. 185).

The control column bases are fabricated from either magnesium or aluminum. Earlier airplanes were delivered with AZ91B–T6 magnesium alloy sand casting per MIL–M–4204. The magnesium castings are finished with an anodic treatment, a wash primer per MIL–C–8514, and two coats of epoxy primer per LAC 37–722, Type I, followed by an epoxy enamel per LAC 37–722 of appropriate color. The aluminum bases are A356–T6 aluminum castings per MIL–Ap–21180, Class 10, with an initial sulfuric acid anodize, and finished with two coats of zinc chromate primer, followed by two coats of Camouflage lacquer per TT–L–181.

Fatigue cracking may initiate at the sharp edge formed by thickness transition approximately mid-way up from the bottom of the 1.25-inch diameter hole on the forward side of the base. Cracks will propagate aft around the perimeter of the base along the thickness transition.

1. Prior to performing the eddy current inspection, assemble the following equipment:

a. Crack Detector, Magnaflux P/N ED–520, or equivalent.

b. Probe, surface, shielded, ⅛-inch diameter, 8 inches long, VM products P/N VM200–8, or equivalent.

c. Probe, surface, shielded, right angle, ⅛-inch diameter, ½-inch drop, 8 inches long, VM Products P/N VH202BA–1/2–8 or equivalent.

d. Cable, 6 foot, Microdot/BAC, Mastercraft Enterprises P/N NMT 7–41–BNL, or equivalent.

e. Standard, aluminum, as furnished with the Magnaflux instrument, or Lockheed-Georgia Company P/N PDL 457A.

2. Prior to performing the eddy current inspection, prepare the airplane in the following manner:

Warning

Ensure that power is isolated from all systems in the inspection area prior to approaching the inspection area. Failure to comply may result in serious injury to personnel.

a. Isolate power from all systems in the inspection area in accordance with applicable maintenance manuals.

b. Remove screws retaining Dust Seal Boot (Figure Item No. 20, Item 27–28 of SMP 850) to the cockpit floor. Loosen clamp retaining the Dust Seal Boot to the Support Tube, and push the Dust Seal Boot up approximately 6–8 inches and secure to Support Tube temporarily. Repeat for opposite control column installation.

3. Gain access for the inspection inside of the airplane in the cockpit, using normal ingress provisions.

4. Prepare the area to be inspected as follows:

a. Remove oil, grease, residual, sealant, and other materials by wiping the control column base around the 1.25-inch diameter hole on the forward side of the base with Federal Specification O–T–620, Type I, Trichloroethane, or commercial equivalent, and dry with clean cotton cloth.

Warning

Federal Specification O–T–620, Type I, Trichloroethane is toxic to skin, eyes, and respiratory tract. Skin and eye protection is required. Avoid repeated or prolonged contact. Good general ventilation is normally adequate. Failure to comply could result in injury to personnel.

b. Visually inspect area to be inspected, looking for rough surface conditions which could adversely affect the eddy current inspection. If surface appears rough, smooth surface using 320 grit sandpaper until a reliable eddy current inspection can be achieved.

5. Set up and calibrate the eddy current instrument as specified in Lockheed Service Manual SMP–515–A or SMP–515–C, Work Card SP–78, Appendix A, for surface scanning on aluminum. The eddy current instrument must be recalibrated when probes are changed. Calibrate on aluminum for inspection of the magnesium casting.

6. Perform the eddy current inspection in the following manner:

a. With the control column in the full aft position, surface scan around the entire circumference of the 1.25-inch diameter hole at the front of the control column base casting, using both eddy current probes. Scan in both clockwise and counterclockwise directions.

b. Repeat this inspection on the opposite control column base.

7. If any suspected defects in the control column base casting are found during the eddy current inspection, indicated by a sharp meter deflection noted during calibration, mark the suspected defect.

a. To confirm suspected defects, proceed to paragraph B., below.

b. If no defects are suspected, proceed to paragraph C., below (System Securing).

B. To confirm suspected defects, perform a fluorescent penetrant inspection as follows:

1. Prior to performing the fluorescent penetrant inspection, assemble the following equipment:

Note

All chemicals shall use the "family concept"—they shall all be from the same manufacturer for Type I, Group VI, Method C, per MIL–I–25135.

a. Penetrant, fluorescent, Magnaflux P/N ZL–22A, or equivalent.

b. Remover, penetrant, Magnaflux P/N SKC/NF/ZC–7B, or equivalent.

c. Developer, penetrant, Magnaflux P/N ZP–9b, or equivalent.

d. Black light, portable, Magnaflux P/N ZB–26, or equivalent.

2. Prior to performing the fluorescent penetrant inspection, prepare the airplane by removing the control column assembly from the airplane in accordance with the applicable maintenance document.

3. Gain access for the inspection inside of the airplane in the cockpit, using normal ingress provisions.

4. Prepare the area to be inspected, in accordance with Lockheed Service Manual SMP 515–A or SMP 515–C, Work Card SP–78, Appendix A, for stripping finish around the 1.25-inch diameter hole in the suspect area.

Warning

Paint strippers are dangerous chemicals to humans and aircraft. Every effort must be made to prevent inadvertent contact with any portion of the person or aircraft. Should accidental contact be made, immediately flood the contacted area with water, and, in the case of personal contact, seek immediate medical attention.

5. Perform the fluorescent penetrant inspection in the following manner:

Note

If the tempeature of the part or inspection materials to be used is below 60 °F (16 °C), preheat and maintain the temperature at or above 60 °F (16 °C) during application of penetrant materials. The surface may be heated with a hot air heater.

a. Pre-clean the area to be inspected with the solvent cleaner (Remover, SKC/NF/ZC–7B) and wipe with a clean, dry, lint free cotton cloth.

b. Apply warm air to the inspection area to remove all moisture.

c. Apply penetrant to the control column base with penetrant sprayed onto a cotton swab and brushed onto the part. Do not spray the part from the penetrant spray can. Allow a minimum dwell time of 10 minutes before proceeding to the next step.

d. Wipe inspection area with a clean, dry, lint free cotton cloth. Wipe remaining penetrant from part with a clean, lint free cotton cloth dampened with the penetrant remover. Check the area to be inspected with the black light to ensure that excess penetrant has been removed prior to applying the developer.

e. Spray a light film of developer over the area to be inspected. Allow a minimum dwell time of 5 minutes.

f. Using the black light, inspect the suspect area for defects.

6. If defects are confirmed, prior to further flight replace the control column base with a serviceable unit free of cracks. After replacement of the control column base, or if no defects are found, proceed to paragraph C., below (System Securing).

C. System Securing: Restore finishes and sealants, reinstall removed components, remove equipment and supplies from the inspection area; rig control system in accordance with applicable maintenance manual; and perform operation checkouts as required in accordance with applicable maintenance instructions.

D. An alternate means of compliance or adjustment of the compliance time, which provides an acceptable level of safety and which has the concurrence of an FAA Principal Maintenance Inspector, may be used when approved by the Manager, Atlanta Aircraft Certification Office, FAA, Central Region.

E. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

All persons affected by this directive who have not already received the appropriate service documents from the manufacturer may obtain copies upon request to Lockheed-Georgia Company, 86 South Cobb Drive, Marietta, Georgia 30063. These documents may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or FAA, Central Region, Atlanta Aircraft Certification Office, 1669 Phoenix Parkway, Suite 210, Atlanta, Georgia.

Issued in Seattle, Washington, on December 17, 1987.

Frederick M. Isaac,

Acting Director, Northwest Mountain Region.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Parts 6 and 113

Amendments Concerning Access to Customs Security Areas at Airports

AGENCY: Customs Service, Treasury.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Customs Regulations to provide that employer of persons requiring access to Customs security areas at airports would be required to post a bond in which they specifically agree that both they and their covered employees will comply with the regulations applicable to those areas and to pay liquidated damages for the failure to do so. The provisions are being proposed because Customs experience in the year since the airport security area program was introduced has revealed that there have been frequent violations. Employees ordered out of security areas because of lack of clearance have later returned without having obtained clearance. Further, statements made by employers concerning background checks of their employees have proven to be inaccurate. The proposed provisions would permit the approved identification card, strip or seal to be removed from employees because of bond insufficiency and would permit the district director to waive the bond surety requirement for the period of the temporary identification card. The document also clarifies that law enforcement and governmental officials that are exempt from the Customs security area identification application requirements are not required to submit an Airport Customs Security Area Bond.

DATES: Comments must be received on or before February 26, 1988.

ADDRESS: Written comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, Customs Service Headquarters, Room 2324, 1301 Constitution Avenue, NW., Washington, DC 20229. Comments relating to the information collection aspects of the proposed rule may be addressed to Customs, as noted above, and also the Office of Information and Regulatory Affairs, Attention: Desk Officer for U.S Customs Service, Office of Management and Budget, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Operational Aspects: John O'Malley, Office of Inspection Enforcement Liaison (202-566-2140). Bond Aspects: William Rosoff, Drawback and Bonds Branch (202-566-5856).

SUPPLEMENTARY INFORMATION:

Background

Interim regulations, published as T.D. 86-12 in the Federal Register on February 3, 1986 (51 FR 4161), provided for the establishment of an identification system for all employees whose duties required access to Customs security areas at airports handling international air commerce. Federal, and uniformed state and local law enforcement personnel were exempted. These regulations, which are set forth in § 6.12a, Customs Regulations (19 CFR 6.12a), provided for the establishment of a "Customs security area". They also required that affected employees apply for a Customs approved identification card, or a strip or seal to be affixed to existing identification cards once an authorized official of the employer attested that background checks of employment history of their employees had been conducted or that one was not required because the employee had been hired before November 1, 1984.

After analysis of public comments received in response to publication of the interim regulations, several changes were made. These included changing the employment commencement date from which a background investigation would be required of an employee to November 1, 1985, so that it would coincide with the date which the Federal Aviation Administration uses in administering related requirements. Further, the requirement for law enforcement personnel to apply for an exemption was eliminated. They need only request the issuance of an approved identification card with strip or seal affixed thereto. Some comments, including one urging severe penalties for violations of the new security requirements, were considered but not adopted. A final rule, incorporating the adopted changes, was published as T.D. 86-174 in the Federal Register of September 12, 1986 (51 FR 32448).

Customs experience since then has revealed that there are still frequent violations of the security area provisions. We have noted that some people ordered out of the security areas because they do not have clearance, returned later without having obtained that clearance. Further, statements made by employers regarding background checks of persons requiring access to the security areas have proven to be inaccurate. A national audit of the employee files of approximately 1000 persons subject to these provisions has revealed that the references of almost 50 percent of new employees were not verified. In some instances, the management of ground service companies and others have shown an indifference to these matters. We have concluded that there is currently no effective enforcement mechanism for the security area regulations and that an appropriate bond which provided for the assessment of liquidated damages for violations is necessary to encourage compliance. We have also found that employers are not timely advising Customs of employees who not longer require access to security areas.

To correct these problems, it is proposed to amend Parts 6 and 113, Customs Regulations (19 CFR Parts 6 and 113), regarding the airport security area program. Under the proposal, employers will be required to periodically file a summary report of these employee changes. Employers will also be required to advise their employees of the regulations relative to Customs airport security areas, to require that their employees familiarize themselves with those provisions and insure that all their employees comply therewith. The failure to comply with the regulations would be considered as a default of the conditions of the employer's bond and would make the employer liable for liquidated damages.

If the applicant's employer has on file with Customs a Customs Form 301 containing the bond conditions set forth in §§ 113.62, 113.63, or 113.64, Customs Regulations (19 CFR 113.62, 113.63, or 113.64, Customs Regulations (19 CFR 113.62, 113.64), relating to importers, brokers, custodians of bonded merchandise, or international carriers, the application for an approved identification card, strip or seal would not need to be accompanied by any new bond. If there is no such bond, the application would have to be supported by an Airport Customs Security Area Bond, as set forth in new Appendix A of Part 113, Customs Regulations (19 CFR Part 113).

The document clarifies that law enforcement and governmental officials that are exempt from the identification application requirements need not submit an Airport Customs Security Area Bond. It also corrects the form number of the fingerprint card cited in § 6.12a(c) from Standard Form 87 to form FD-258.

Comments

Before adopting this proposal, Customs will give consideration to any written comments (preferably in triplicate) timely submitted to Customs. Comments submitted will be available

for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4) and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Customs Service Headquarters, Room 2324, 1301 Constitution Avenue, NW., Washington, DC 20229.

E.O. 12291 and Regulatory Flexibility Act

This document does not meet the criteria for a "major rule" within the meaning of E.O. 12291. Accordingly, Customs has not prepared a regulatory impact analysis. Since the proposal merely provides for a method of enforcing previously existing procedures, it is certified, pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), that the proposed amendments, if adopted, will not have a significant economic impact on a substantial number of small entities. Accordingly, they are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Paperwork Reduction Act

This document proposes to modify the information collection requirements of the regulations concerning access to Customs security areas at airports. Those regulations were submitted to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1930 (44 U.S.C. 3501) and approved under control number 1515-0152. This document has been submitted to OMB for review and comment under that Act pursuant to 44 U.S.C. 3504(h). Public comments relating to the information collection aspects of the proposal should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer for U.S. Customs Service, Office of Management and Budget, Washington, DC 20503. A copy of the comments to OMB should also be sent to Customs at the address set forth in the ADDRESS portion of this document.

Drafting Information

The principal author of this document was Arnold L. Sarasky, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects

19 CFR Part 6

Air carriers, Aircraft, Airports, Cuba, Customs duties and inspection, Freight, Imports.

19 CFR Part 113

Air carriers, Customs duties and inspection, Exports, Freight, Imports, Surety bonds. Surety bonds.

Proposed Amendments

It is proposed to amend Parts 6 and 113, Customs Regulations (19 CFR Parts 6 and 113), as set forth below:

PART 6—AIR COMMERCE REGULATIONS

1. The authority citation for Part 6 would continue to read as follows:

AUTHORITY: 5 U.S.C. 301, 19 U.S.C. 66, 1202 (Gen. Hdnot. 11), 1624, 1644, 49 U.S.C. App. 1474, 1509.

2. It is proposed to amend § 6.12a by redesignating paragraph (b) as (b)(1) and adding a new paragraph (b)(2), by revising paragraph (c), by adding a new paragraph (b)(2), by revising paragraph (c), by adding a sentence at the end of paragraph (d), by redesignating paragraph (j)(1)(vi) as paragraph (j)(1)(vii), by adding a new paragraph (j)(1)(vi), by revising redesignated paragraph (j)(1)(vii), and by adding a sentence at the end of the introductory text of paragraph (k), to read as follows:

§ 6.12a Access to Customs security areas.

* * * * *

(b) * * *

(2) Employers operating in Customs airport security areas shall advise all their employees of the provisions of the Customs regulations relative to those areas, require that their employees familiarize themselves with those provisions and insure that all their employees comply therewith. The failure to comply with these regulations shall be considered as a default of the conditions of the employer's bond, as hereafter specified, and shall make the employer liable for liquidated damages as specified in its bond.

(c) An application for an approved identification card, strip or seal as required by this section shall be filed by the applicant with the district director on Customs Form 3078 and shall be supported by the bond of the applicant's employer on Customs Form 301 containing the bond conditions set forth in §§ 113.62, 113.63, or 113.64 of this chapter, relating to importers, brokers, custodians of bonded merchandise, or international carriers. If the applicant's employer is not the principal on a Customs bonds on Customs Form 301 for one or more of the activities stated above, the application shall be accompanied by an Airport Customs Security Area Bond, as set forth in Appendix A of Part 113 of this chapter. The application and bond requirement applies to all employees, regardless of the length of their employment. For employees hired on or after November 1, 1985, an authorized official of the employer shall attest in writing that a background check has been conducted on the applicant, to the extent allowable by law. The background check shall include, at a minimum, references and employment history, to the extent necessary to verify representations made by the applicant relating to employment in the preceding 5 years. For any employee hired before November 1, 1985, the authorized official of the employer need only attest to the fact that the employee was hired before that date. The authorized official of the employer shall attest that to the best of his knowledge, the applicant meets the conditions necessary to perform functions associated with employment in the Customs security area. The fingerprints of the applicant may be required on fingerprint card form FD-258 at the time of the filing of the application. Proof of citizenship or authorized residency, and a photograph may also be required. In addition, the application may be investigated by Customs and a report prepared concerning the character of the applicant. Records of background investigations conducted by employers must be retained and made available upon request by the district director for a period of 1 year following cessation of employment by affected employees.

(d) * * * An Airport Customs Security Area Bond is not required.

* * * * *

(j)(1) * * *

(vi) The bond required by paragraph (c) of this section is determined to be insufficient in amount or lacking sufficient sureties, and a satisfactory new bond with good and sufficient sureties is not furnished within a reasonable time.

(vii) The employee no longer requires access to the Customs security area for an extended period of time at the airport of issuance because of a change in duties, termination of employment, or other reason. In this instance the employer shall notify the district director in writing, at the time of such change, and shall return the strip or seal to Customs. The notification shall include information regarding the disposition of the approved identification card of the employee who no longer requires access. A summary of such information shall be filed quarterly or at such shorter interval established by the district director. If the employee returns to duties in the Customs security area at the airport for the same employer within 1 year, a Customs Form 3078, as required in paragraph (d) of this section, need not be submitted.

* * * * *

(k) * * * Surety on the bond required by paragraph (c) of this section may be waived in the discretion of the district director, but only for the period of the temporary identification card and authorized renewals of the temporary identification card.

* * * * *

PART 113—CUSTOMS BONDS

1. The authority citation for Part 113 would continue to read as follows:

Authority: 19 U.S.C. 66, 1623, 1624. Subpart E also issued under 19 U.S.C. 1484, 1551, 1565.

2. It is proposed to amend § 113.62 by redesignating paragraph (i) as paragraph (j) and by adding a new paragraph (i) to read as follows:

§ 113.62 Basic importation and entry bond conditions.

* * * * *

(i) *Agreement to comply with Customs Regulations applicable to Customs security areas at airports.* If access to the Customs security areas at airports is desired, the principal (including its employees, agents, and contractors) agrees to comply with Customs Regulations in this chapter applicable to Customs security areas at airports. If the principal defaults, the obligors (principal and surety, jointly and severally) agree to pay liquidated damages of $1000 for each default or such other amount as may be authorized by law or regulation.

* * * * *

3. It is proposed to amend the first sentence of § 113.63(j)(1), as redesignated, by removing "(a) or (g)" and inserting, in its place, "(a), (g) or (i)".

4. It is proposed to amend § 113.63 by redesignating paragraphs (f) and (g) as paragraphs (g) and (h), respectively, and by adding a new paragraph (f) to read as follows:

§ 113.63 Basic Custodial bond Conditions.

* * * * *

(f) *Agreement to comply with Customs regulations applicable to Customs security areas at airports.* If access to Customs security areas at airports is desired, the principal (including its employees, agents, and contractors) agrees to comply with the Customs Regulations in this chapter applicable to Customs security areas at airports. If the principal defaults, the obligors (principal and surety, jointly and severally) agree to pay liquidated damages of $1000 for each default or such other amount as may be authorized by law or regulation.

* * * * *

5. It is proposed to amend § 113.64 by redesignating paragraph (d) as paragraph (e) and by adding a new paragraph (d) to read as follows:

§ 113.64 International carrier bond conditions.

* * * * *

(d) *Agreement to comply with Customs Regulations applicable to Customs security areas at airports.* If access to Customs security areas at airports is desired, the principal (including its employees, agents, and contractors) agrees to comply with the Customs Regulations in this chapter applicable to Customs security areas at airports. If the principal defaults, the obligors (principal and surety, jointly and severally) agree to pay liquidated damages of $1000 for each default or such other amount as may be authorized by law or regulation.

* * * * *

6. It is proposed to further amend Part 113 by adding, as Appendix A, the bond format hereafter noted for the Airport Customs Security Area Bond prescribed in §6.12a(c) of this chapter.

Appendix A—Airport Customs Security Area Bond

Airport Customs Security Area Bond

_____ (name of principal) of _____ and _____ (name of Surety) of _____ are held and firmly bound unto the United States of America in the sum of _____ dollars (_____), for the payment of which we bind ourselves, our heirs, executors, administrators, successors, and assigns, jointly and severally, firmly by the presents.

Witness our hands and seals this _____ day of _____, 19 _____.

Whereas, the principal (including the principal's employees, agents, and contractors) desires access to Customs airport security areas located at _____ Airport during the period of one year beginning on the _____ day of _____, 19 _____, and ending on the _____ day of _____, 19 _____ both dates inclusive;

Now, therefore, the condition of this obligation is such that—The principal agrees to comply with the Customs Regulations applicable to Customs security areas at airports.

If the principal and defaults on the condition of this obligation, the principal and surety, jointly and severally, agree to pay liquidated damages of $1000 for each default or such other amount as may be authorized by law or regulation.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 934

Surface Coal Mining and Reclamation Operations Under the Federal Lands Program; State-Federal Cooperative Agreements; ND

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Proposed rule.

SUMMARY: The State of North Dakota is proposing to amend the cooperative agreement between the Department of the Interior and the State of North Dakota for the regulation of surface coal mining and reclamation operations on Federal lands in North Dakota under the permanent regulatory programs. The proposed amendment would add the Archaeological Resources Protection Act of 1979 to the list of other applicable laws for permit coordination in Appendix A of the agreement. Cooperative agreements are provided for under section 523(c) of the Surface

VOL
52
ISS
248
DE

1987
UMI

Mining Control and Reclamation Act of 1977 (SMCRA). This notice of proposed rulemaking provides information on the proposed change to the cooperative agreement.

DATES: *Written comments:* OSMRE will accept written comments on the proposed rule until 4:00 p.m. on January 27, 1988. Comments received after the close of the comment period will not necessarily be considered.

Public hearing: If requested, a public hearing on the proposed modification will be held on January 22, 1988, beginning at 10:00 a.m. at the location shown below under **"ADDRESSES."**

ADDRESSES: *Written comments*: Mail or hand deliver to: Office of Surface Mining Reclamation and Enforcement, Casper Field Office, Federal Building, 100 East "B" Street, Room 2128, Casper, Wyoming 82601–1918.

Public hearings: The North Dakota Capitol Building, Bismarck, North Dakota 58505–0165.

Request for public hearings: Submit orally or in writing to the person and address specified under **"FOR FURTHER INFORMATION CONTACT."**

See **"SUPPLEMENTARY INFORMATION"** for addresses where copies of the proposed North Dakota amendment to the cooperative agreement and administrative record on the North Dakota program are available. Each requester may receive, free of charge, one single copy of the proposed amendment by contacting the OSMRE Casper Field Office listed above.

FOR FURTHER INFORMATION CONTACT: Mr. Jerry R. Ennis, Director, Casper Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building, 100 East "B" Street, Room 2128, Casper, Wyoming 82601–1918; Telephone: (307) 261–5776.

SUPPLEMENTARY INFORMATION:

I. Availability of Copies
II. Public Comment Procedures
III. Background
IV. Proposed Amendment
V. Procedural Matters

I. Availability of Copies

Copies of the proposed North Dakota amendment to the cooperative agreement, the North Dakota program and the administrative record on the North Dakota program are available for public review and copying at the OSMRE offices and the office of the State regulatory authority listed below, Monday through Friday, 9:00 a.m. to 4:00 p.m., excluding holidays:

Casper Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building, 100 East "B" Street, Room 2128, Casper, Wyoming 82601–1918; Telephone: (307) 276–5776.

Office of Surface Mining Reclamation and Enforcement, 1100 L Street NW., Room 5131, Washington, DC 20240; Telephone: (202) 343–5447.

North Dakota Public Service Commission, Reclamation Division, Capitol Building, Bismarck, North Dakota 58505–0165; Telephone: (701) 224–4096.

II. Public Comment Procedures

Written Comments

Written comments should be specific, pertain only to that issue proposed in this rulemaking, and include explanations in support of the commenter's recommendations. Comments received after the time indicated under **"DATES"** or at locations other than Casper, Wyoming, will not necessarily be considered and included in the Administrative Record for this final rulemaking. Where practicable, commenters should submit three copies of their comments (See **"ADDRESSES"**).

Public Hearings

Persons wishing to comment at a public hearing should contact the person listed under **"FOR FURTHER INFORMATION CONTACT"** by the close of business January 12, 1988. If no one requests to comment at a public hearing, the hearing will not be held.

If only one person requests to comment, a public meeting, rather than a public hearing, may be held and the results of the meeting included in the Administrative Record.

Individuals wishing to attend, but not testify at the hearing should contact the person identified under **"FOR FURTHER INFORMATION CONTACT"** beforehand to verify that the hearing will be held.

Filing of a written statement at the time of the hearing is requested and will greatly assist the transcriber. Submission of written statements in advance of the hearing will also allow OSMRE officials to prepare appropriate questions.

The public hearing will continue on the specified date until all persons scheduled to comment have been heard. Persons in the audience who have not been scheduled to comment and wish to do so will be heard following those scheduled. The hearing will end after all persons scheduled to comment and persons present in the audience who wish to comment, have been heard.

Public Meeting

Persons wishing to meet with OSMRE representatives to discuss the proposed amendment may request a meeting at the OSMRE office listed in "Addresses" by contacting the person listed under **"FOR FURTHER INFORMATION CONTACT."**

All such meetings are open to the public and, if possible, notices of meeting will be posted in advance in the Administrative Record. A written summary of each public meeting will be made a part of the Administrative Record.

III. Background

On November 14, 1980, the State of North Dakota requested a cooperative agreement between the Department of the Interior and the State of North Dakota to give the State primacy in the administration of its approved regulatory program of Federal lands in North Dakota. The Secretary approved the cooperative agreement on September 15, 1983 (48 FR 41387). The text of the existing cooperative agreement can be found at 30 CFR 934.30.

On February 10, 1987, OSMRE promulgated revised regulations concerning the consideration which must be accorded historic properties during the permitting of surface coal mining operations (52 FR 4244–4263). Specific to this proposed amendment, OSMRE has revised 30 CFR 773.12 to require that where Federal and Indian lands are involved, each regulatory program shall provide for the coordination of review and issuance of permits for surface coal mining and reclamation operation with applicable requirements of the Archaeological Resources Protection Act of 1979.

On June 9, 1987, OSMRE notified North Dakota of the change to 30 CFR 773.12 and the need for a corresponding amendment pursuant to 30 CFR 732.17(d). The State responded on July 28, 1987, and indicated its intent to modify the existing cooperative agreement to satisfy OSMRE's requirement to amend the State program.

IV. Proposed Amendment

On September 16, 1987, the State of North Dakota submitted to OSMRE a proposed amendment to its approved cooperative agreement under the permanent regulatory program. The proposed amendment consists of the addition of the Archaeological Resources Protection Act of 1979 to the list of other applicable laws for permit coordination in Appendix A of the agreement. There are no other changes proposed to the document.

V. Procedural Matters

Executive Order No. 12291 and the Regulatory Flexibility Act

On October 21, 1982, the Department of the Interior received from the Office of Management and Budget an exemption for State-Federal cooperative agreements from the requirements of sections 3 and 7 of Executive Order 12291.

The Department has reviewed this proposed agreement in light of the Regulatory Flexibility Act (Pub. L. 96–354). Having conducted this review, the Department has determined that this document will not have a signficant economic effect on a substantial number of small entities because no significant departure from either the State or Federal requirements already in effect will occur and no new or additional information will be required by the proposed agreement.

Paperwork Reduction Act

This proposed amendment to the North Dakota Cooperative Agreement does not contain information collection requirements which require clearance from the Office of Management and Budget under 44 U.S.C 3507.

National Environmental Policy Act

Proceedings relating to adoption or amendment of a State-Federal cooperative agreement are part of the Secretary's implementation of the Federal lands program pursuant to section 523 of the Act. Such proceedings are exempt under section 702(d) of the Act from the requirements to prepare a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

Author

The author of this regulation is Mr. Jerry R. Ennis, Director, Casper Field Office, Office of Surface Mining Reclamation and Enforcement, Federal Building, 100 East "B" Street, Room 2128, Casper, Wyoming 82601–1918, Telephone: (307) 261–5776.

List of Subjects in 30 CFR Part 934

Coal mining, Intergovernmental relations, Surface mining, Underground mining.

Accordingly, it is proposed to amend 30 CFR Part 934 as set forth below:

Dated: December 17, 1987.

James E. Cason,

Deputy Assistant Secretary—Land and Minerals Management.

PART 934—[AMENDED]

1. The Authority citation for Part 934 is revised to read as follows:

Authority: 30 U.S.C. 1201 *et seq.*, as amended; 16 U.S.C. 470 *et seq.*, and Pub. L. 100–34.

2. In § 934.30, State-Federal Cooperative Agreement, Appendix A is amended by redesignating items 14 and 15 as items 15 and 16, respectively, and adding new item 14 to read as follows:

§ 934.30 State-Federal cooperative agreement.

BILLING CODE 4310–05–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL–3306–5]

Approval and Promulgation of Implementation Plans; Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: By this Notice, EPA invites public comment on its proposed approval of revisions to the State of Alaska Department of Environmental Conservation (ADEC) rules regulating the height of stacks and the use of dispersion techniques, submitted on June 26, 1987, as a revision to the Alaska State implementation plan (SIP). These revisions were submitted to satisfy the requirements of section 123 (Stack Heights) of the Clean Air Act (hereinafter referred to as the Act).

DATE: Comments must be postmarked on or before January 27, 1988.

ADDRESSES: Comments should be addressed to: Laurie M. Kral, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue AT–092, Seattle, Washington, 98101.

Copies of the materials submitted to EPA may be examined during normal business hours at:

Air Programs Branch (10A–87–12), Environmental Protection Agency, 1200 Sixth Avenue AT–092, Seattle, Washington 98101

State of Alaska, Department of Environmental Conservation, 3220 Hospital Drive, Juneau, AK 99811.

FOR FURTHER INFORMATION CONTACT: David C. Bray, Air Programs Branch, Environmental Protection Agency, 1200 Sixth Avenue AT–092, Seattle, Washington 98101, Telephone: (206) 442–4253, FTS: 399–4253.

SUPPLEMENTARY INFORMATION:

I. Discussion

On July 5, 1983 (48 FR 30623), EPA approved Alaska Department of Environmental Conservation (ADEC) rules which restrict the use of stack heights and dispersion techniques in accordance with section 123 of the Act. EPA determined that these rules satisfied the requirements of its stack height regulations as promulgated on February 8, 1982 (47 FR 5864). On July 8, 1985 (50 FR 27892) EPA promulgated revisions to its 1982 stack heights regulations.

In response to the revised regulations, on June 26, 1987, ADEC submitted revised rules regulating the use of stack heighs and dispersion techniques as a revision to the State of Alaska implementation plan (SIP). The specific rule revisions are:

1. A revision to 18 AAC 50.400 Application Review and Issuance of Permit to Operate, Section (a), to add a provision regarding public review and comment on the use of field studies or fluid modeling in stack height determinations;

2. A revision to 18 AAC 50.530 Circumvention, Section (c), to delete old provisions regarding plume impaction on elevated terrain;

3. Revisions to the definitions of several terms in 18 AAC 50.900 Definitions, specifically, "dispersion technique" (18 AAC 50.900(16)), "excessive concentration" (18 AAC 50.900(20)), "good engineering practice" (18 AAC 50.900(23)), and "nearby" (18 AAC 50.900(29)) in order to make them consistent with current EPA requirements; and

4. The deletion of the definition of the term "elevated terrain" in 18 AAC 50.900(17) since it was no longer used in the ADEC regulations.

These rules apply to all new sources and modifications in Alaska as required in 40 CFR 51.164, as well as as to existing sources as required in 40 CFR 51.118. These rules apply to all sources that were or are constructed, reconstructed,

VOL 52 ISS 248 DEC 28 1987 UMI

or modified subsequent to December 31, 1970. EPA has reviewed the revisions to these rules and has determined that the revised rules are consistent with the revisions to EPA's requirements for stack heights and dispersion techniques regulations as promulgated by EPA on July 8, 1985. EPA is therefore proposing to approve these ADEC rule changes as a revision to the Alaska SIP.

II. Summary of Action

EPA is today soliciting public comment on its proposed approval of certain revisions to 18 AAC 50 as a revision to the Alaska SIP to satisfy the requirements of section 123 of the Act.

Interested parties are invited to comment on all aspects of this proposed approval of revisions to 18 AAC 50. Comments should be submitted in triplicate, to the address listed in the front of this Notice. Public comments postmarked by January 27, 1988 will be considered in the final rulemaking action taken by EPA.

III. Administrative Review

Under Executive Order 12291, today's action is not "major." It has been submitted to the Office of Management and Budget (OMB) for review.

Under 5 U.S.C. 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities (46 FR 8709). The proposed disapproval involves only administrative procedures and will not have a significant economic impact on a substantial number of small entities.

Authority: 42 U.S.C. 7401–7642.

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons, Intergovernmental relations, Reporting and Recordkeeping requirements.

Dated: September 22, 1987.

Ronald A. Kreizenbeck,

Acting Regional Administrator.

40 CFR Part 228

[FRL-3306-6]

Ocean Dumping; Proposed Designation of Sites

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA today proposes to designate three existing dredged material disposal sites ("the Calcasieu River and Pass sites") located in the Gulf of Mexico off the mouth of the Calcasieu River and adjacent to the Calcasieu Bar Channel for the continued disposal of dredged material removed from the Calcasieu River and Pass Project. This proposed site designation is for an indefinite period of time. This action is necessary to provide acceptable ocean dumping sites for the current and future disposal of this material.

DATE: Comments must be received on or before February 11, 1988.

ADDRESSES: Send comments to: Norm Thomas, Chief, Federal Activities Branch (6E–F), U.S. EPA, 1445 Ross Avenue, Dallas, Texas 75202–2733.

Information supporting this proposed designation is available for public inspection at the following locations: EPA, Region VI (E–FF), 1445 Ross Avenue, 10th Floor, Dallas, Texas 75202; Corps of Engineers, New Orleans District, Foot of Prytania Street, Room 296, New Orleans, Louisiana 70160.

FOR FURTHER INFORMATION CONTACT: Norm Thomas 214/655–2260.

SUPPLEMENTARY INFORMATION:

A. Background

Section 102(c) of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, 33 U.S.C. 1401 *et seq.* ("the Act"), gives the Administrator of EPA the authority to designate sites where ocean dumping may be permitted. On December 23, 1986, the Administrator delegated the authority to designate ocean dumping sites to the Regional Administrator of the Region in which the site is located. This proposed site designation is being made pursuant to that authority.

The EPA Ocean Dumping Regulations (40 CFR Chapter I, Subchapter H, Section 228.4) state that ocean dumping sites will be designated by publication in Part 228. A list of "Approved Interim and Final Ocean Dumping Sites" was published on January 11, 1977 (42 FR 2461 *et seq.*). That list established seven sites for the disposal of dredged material from the Calcasieu Bar and Entrance Channel. Because some of the seven sites either shared a common boundary with another site or overlapped another site, they were subsequently combined to form three sites of similar total area. In January 1980, the interim status of the Calcasieu sites was extended indefinitely. Interested persons may participate in this proposed rulemaking by submitting written comments within 45 days of the date of this publication to the EPA Region VI address given above.

B. EIS Development

Section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, ("NEPA"), requires that Federal agencies prepare an Environmental Impact Statement (EIS) on proposals for major Federal actions significantly affecting the quality of the human environment. While NEPA does not apply to EPA activities of this type, EPA has voluntarily committed to prepare EISs in connection with ocean dumping site designations such as this (39 FR 16186, May 7, 1974).

EPA has prepared a Draft and Final Environmental Impact Statement entitled "Environmental Impact Statement (EIS) for the Calcasieu River and Pass Ocean Dredged Material Site Designation." On September 7, 1984, a notice of availability of the EIS for public review and comment was published in the **Federal Register** (49 FR 35413). The public comment period on this Draft EIS closed on October 22, 1984. The Agency received nine comment letters on the Draft EIS and has responded to them in the Final EIS. Editorial or factual corrections required by the comments have been incorporated in the text and noted in the Agency's response. Comments which could not be appropriately treated as text changes have been addressed point by point in the Final EIS. On December 4, 1987, a notice of availability of the Final EIS for review and comment was published in the **Federal Register**. The public comment period on the Final EIS will close on January 4, 1988. The EIS is available for review at the address given above.

The proposed action discussed in the EIS is designation for continuing use of ocean disposal sites for dredged material. The purpose of the designation is to provide environmentally acceptable locations for ocean disposal. The appropriateness of ocean disposal is determined on a case-by-case basis. Prior to each use the Corps will comply with 40 CFR Part 227 by providing EPA a letter containing all the necessary information.

The EIS discussed the need for the action and examined ocean disposal sites and alternatives to the proposed action. Land based disposal alternatives were examined in a previously published EIS and the analysis was updated in EPA's Final EIS based on information from the Corps of Engineers. Inland disposal sites are currently used for the inland reaches of the Calcasieu River and Pass project. In 1983, approximately 590,000 cubic yards of dredged material were pumped into inland shallow water disposal areas creating 80 acres of marsh. In 1985, 650,000 cubic yards were pumped into two additional inland shallow water areas to create 125 acres of marsh. These inland sites, however, cannot accommodate the dredged material from the bar and entrance channels. Use of these inland sites for material which has traditionally been dumped at sea would quickly decrease the lifetime of the sites. Additionally, the only available inland sites are miles upstream from the bar channel making the use of these sites economically impractical.

Three ocean disposal alternatives—a shallow water area (including the proposed sites), a mid-shelf area and a deepwater area—were evaluated. Use of the mid-shelf and deepwater sites would involve: (1) Increased transportation costs without any corresponding environmental benefits; (2) the removal of sediments from the northshore environment making them unavailable for movement and deposition by longshore currents; and (3) possible mounding of dredged material in the deeper waters due to slow erosion and transport. Because of these reasons, the mid-shelf area and the deepwater area were eliminated from further consideration.

The EIS evaluates the suitability of ocean disposal areas for final designation and is based on a disposal site environmental study. The study and final designation process are being conducted in accordance with the Act, the Ocean Dumping Regulations, and othe applicable Federal environmental legislation.

In accordance with the requirements of the Endangered Species Act, EPA has completed its biological assessment and is currently coordinating its no adverse effect determination with the National Marine Fisheries Service. EPA is also coordinating with the State of Louisiana under requirements of the Coastal Zone Management Act.

C. Proposed Site Designation

Site 1 is located on the east side of the Calcasieu River Entrance Channel while sites 2 and 3 are located on the west side of the channel. Site 1 and the upper portion of site 2 are only used during jetty maintenance. The remainder of site 2 and site 3 receive dredged material from the channel.

Site 1 is located approximately 0.5 nautical miles (nmi) from shore and extends out approximately 3 nmi. Water depths within the site range from 2 to 8 meters. The boundary coordinates are as follows:

29d 45' 39" N, 93d 19' 36" W;
29d 42' 42" N, 93d 19' 06" W;
29d 42' 36" N, 93d 19' 48" W;
29d 44' 42" N, 93d 20' 12" W;
29d 44' 42" N, 93d 20' 24" W;
29d 45' 27" N, 93d 20' 33" W.

Site 2 is located approximately 0.5 nmi from shore and extends out approximately 6 nmi. Water depths within the site range from 2 to 11 meters. The boundary coordinates are as follows:

29d 44' 31" N, 93d 20' 43" W;
29d 39' 45" N, 93d 19' 56" W;
29d 39' 34" N, 93d 20' 46" W;
29d 44' 25" N, 93d 21' 33" W.

Site 3 is located approximately 8 nmi from shore and extends out approximately 17.5 nmi. Water depths within the site range from 11 to 14 meters. The boundary coordinates are as follows:

29d 37' 50" N, 93d 19' 37" W;
29d 37' 25" N, 93d 19' 33" W;
29d 33' 55" N, 93d 16' 23" W;
29d 33' 49" N, 93d 16' 25" W;
29d 30' 59" N, 93d 13' 51" W;
29d 29' 10" N, 93d 13' 49" W;
29d 29' 05" N, 93d 14' 23" W;
29d 30' 49" N, 93d 14' 25" W;
29d 37' 28" N, 93d 20' 24" W;
29d 37' 44" N, 93d 20' 27" W.

D. Regulatory Requirements

Five general criteria are used in the selection and approval of ocean disposal sites for continuing use. Sites are selected so as to minimize interference with other marine activities, to keep any temporary perturbations from the dumping from causing impacts outside the disposal site, and to permit effective monitoring to detect any adverse impacts at an early stage. Where feasible, locations off the Continental Shelf are chosen. If at any time disposal operations at a site cause unacceptable adverse impacts, further use of the site may be terminated or limitations placed on the use of the site to reduce the impacts to acceptable levels. The general criteria are given in § 228.5 of the EPA Ocean Dumping Regulations; § 228.6 lists eleven specific factors used in evaluating a proposed disposal site to assure that the general criteria are met.

EPA has determined, based on information presented in the Final EIS, that the three existing sites are acceptable under the five general criteria. The Continental Shelf location is not feasible and no environmental benefit would be obtained by selecting such a site. Historical use of the existing three sites has not resulted in substantial adverse effects to living resources of the ocean or to other uses of the marine environment.

The characteristics of the proposed sites are reviewed below in terms of the eleven factors.

1. *Geographical position, depth of water, bottom topography and distance from coast. [40 CFR 228.6(a)(1).]*

Geographical positions, average water depths, and distance from the coast for each existing site are given above. Bottom topography within each existing site is essentially flat with little relief. Each site varies in size, in distance from shore and depth.

2. *Location in relation to breeding, spawning, nursery, feeding, or passage areas of living resources in adult or juvenile phases. [40 CFR 228.6(a)(2).]*

The northwestern Gulf of Mexico is a breeding, spawning, nursery and feeding area of shrimp, menhaden and other bottomfish. Seasonal migration between the estuaries and the Gulf is most intensive in the spring and fall. The Calcasieu disposal sites represent a small area of the total range of the fisheries resource.

3. *Location in relation to beaches and other amenity areas. [40 CFR 228.6(a)(3).]*

Beaches are located between Calcasieu Pass and Holly Beach (4.5 nmi west). Activities in the vicinity of the sites include fishing and boating. There will be some interferences with recreational activities during and in the immediate vicinity of the dredged material disposal operation. This interference will be restricted to the area of the sites being utilized for disposal. Previous dredging and disposal operations have not significantly affected these activities.

4. *Types and quantities of wastes proposed to be disposed of, and proposed methods of release, including methods of packing the wastes, if any. [40 CFR 228.6(a)(4).]*

Dredged material released at approved dredged material disposal sites must conform to the EPA criteria in the Ocean Dumping regulations (40 CFR Part 227). The dredged material to be disposed of consists of varying amounts of sand, silt and clay. Surficial sediments within the existing disposal sites consist of silt and clay sands and silty clays. Higher percentages of fines are present in the nearshore areas off Calcasieu; whereas sediments in areas further offshore (depths greater than 10m) consist primarily of sand.

The annual volume of material dredged from the Calcasieu Channel averages about 14 million cubic yards. Material discharged at sites 1, 2, and 3 is accomplished by agitation dredging, bottom dumping and side casting.

Agitation dredging involves filling a hopper dredge to capacity and allowing it to overflow. With bottom dumping sediments transported to the site are discharged through subsurface doors in the bottom of the hopper dredge. Side casting is accomplished by pumping dredged material through a boom-supported pipeline extending laterally from the dredge.

5. *Feasibility of surveillance and monitoring. [40 CFR 228.6(a)(5).]*

Surveillance and monitoring at the existing sites appears feasible considering transportation costs to and from the sites as well as costs associated with acquiring samples from the shallow water-depths. Operational observations of site 1 and portions of site 2 can be made using shore-based radar while surveillance of site 3 can be accomplished by aircraft, ship riders and day use boats.

6. *Dispersal, horizontal transport and vertical mixing characteristics of the area, including prevailing current direction and velocity, if any. [40 CFR 228.6(a)(6).]*

Current patterns in the vicinity of the existing sites are predominately influenced by winds, particularly in late autumn through early spring. The water column is generally well mixed in the winter with stratification occurring in late spring and summer.

Surface current speeds average 0.8 to 1.0 knots and flow primarily to the west. Bottom currents are generally less than 0.8 knots and also flow predominantly to the west.

The agitation method utilized involves the release of fine sediments into surface waters which are swept away by riverine and littoral currents. The sediments settle out slowly as they are carried off. The distance over which the sediments are transported depends upon the existing current velocity at the time of dredging and the settling rate of sediments. Although no studies have been conducted to determine the extent to which the material is transported, it is felt that most material settles within site 2.

In the absence of strong currents, the bulk of the dredged material released by bottom dumping or side casting settles to the bottom almost immediately after dumping and only a small portion is lost from the main surge. This small portion dispenses as individual particles. Bottom currents resuspend the disposed dredged material. This resuspension will result in the disappearance of the mound through dispersal and horizontal transport.

7. *Existence and effects of current and previous discharges and dumping in the area (including cumulative effects). [40 CFR 228.6(a)(7).]*

Over 30 years of dredged material disposal at the sites have caused no major adverse impacts. No major changes in the benthic community of the existing sites and areas outside the sites have occurred based on 1980 and 1981 field surveys. The accumulation of contaminants in the sediments of the Calcasieu sites were also investigated during the surveys. Trace metal concentrations in the Calcasieu sediments were generally comparable to values reported for sediments in an area located five miles to the west. Relatively low levels of chlorinated hydrocarbons were observed in surficial sediments during the surveys.

8. *Interference with shipping, fishing, recreation, mineral extraction, desalination, fish and shellfish culture, areas of special scientific importance and other legitimate uses of the ocean. [40 CFR 228.6(a)(8).]*

All the sites extend into the navigational safety fairway; however, any temporary interferences with shipping can be mitigated through close coordination between the dredging operators and the shipping interests.

Recreational and commercial fishing and recreational boating occurs throughout the year in the area of the existing sites. Although there will be some interference with fishing and boating activities during the disposal operations, it should be of short duration.

There is active oil and gas development in the area of the existing sites. However, past use of the disposal sites has not interfered with the oil and gas exploratory or production operations. Other types of mineral extraction do not occur within the sites.

No desalination facilities occur within the sites. The nearest aquaculture activities take place in Calcasieu Lake where oyster seed beds are located. Disposal activities pose no threat to this activity. Naturally occurring fish and shellfish within the site, particularly bottom dwelling types, will be affected by the dredged material disposal. Some of these may be trapped and destroyed. Dispersion and transport of the dredged material outside the site should not significantly affect the fish and shellfish. The material dispersed from the site will settle in very thin layers and be mixed with the naturally occurring sediments of the region.

The sites do not contain or overlap any areas of special scientific interest. Periodically, scientific studies are carried out in the offshore region and the bays of the area. Use of the sites should not interfere with these studies. It is not expected that use of the sites for disposal of dredged material will interfere with any other legitimate use of the ocean.

9. *The existing water quality and ecology of the site as determined by available data or by trend assessment or baseline surveys. [40 CFR 228.6(a)(9).]*

The water quality and ecology of the existing disposal sites are generally reflective of that of the nearshore region off the Louisiana coast affected by discharges from the Atchafalaya River. There are variations in the water quality depending on the mixture of fresh water runoff occurring at the time. Data developed during the 1980 and 1981 surveys were generally comparable to historic data for the area.

10. *Potentiality for the development of recruitment of nuisance species in the disposal site. [40 CFR 228.6(a)(10).]*

Past disposal of dredged material at the existing sites has not resulted in the development of recruitment or nuisance species. Considering the similarity of the dredged material with the existing sediments, it is not expected that continued disposal of dredged material will result in the development of such species.

11. *Existence at or in close proximity to the site of any significant natural or cultural features of historical importance. [40 CFR 228.6(a)(11).]*

Based on coordination with the Louisiana State Historic Preservation Officer, there are no known features of historical importance that occur within the existing sites.

E. Proposed Action

Based on the information contained in the Draft and Final EIS's and available data, EPA proposes to designate the three Calcasieu sites for continuing use for the ocean disposal of dredged material. The existing sites are compatible with the general criteria and specific factors used for site evaluation.

While the Corps does not administratively issue itself a permit, the requirements that must be met before dredged material derived from Federal projects can be discharged into ocean waters are the same as where a permit would be required. EPA has the authority to approve or to disapprove or to propose conditions upon dredged material permits for ocean dumping.

F. Regulatory Assessments

Under the Regulatory Flexibility Act, EPA is required to perform a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. EPA has determined that this action will not have a significant impact on small entities since the site designation will only have the effect of providing a disposal option for dredged material. Consequently, this rules does not necessitate preparation of a Regulatory Flexibility Analysis.

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action will not result in an annual effect on the economy of $100 million or more or cause any of the other effects which would result in its being classified by the Executive Order as a "major" rule. Consequently, this rule does not necessitate preparation of a Regulatory Impact Analysis.

This Proposed Rule does not contain any information collection requirements subject to the Office of Management and Budget review under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

List of Subjects in 40 CFR Part 228

Water pollution control.

Dated: December 18, 1987.

Robert E. Layton, Jr.,

Regional Administrator of Region VI.

In consideration of the foregoing, Subchapter H of Chapter I of Title 40 is proposed to be amended as set forth below.

Part 228—[Amended]

1. The authority citation for Part 228 continues to read as follows:

Authority: 33 U.S.C. Sections 1412 and 1418.

2. Section 228.12 is amended by adding paragraphs (48), (49), and (50) to read as follows:

§ 228.12 Delegation of management authority for interim ocean dumping sites.

* * * * *

(b) * * *

(48) Calcasieu Dredged Site 1—Region IV.
Location: 29° 45' 39" N., 93° 19' 36" W.; 29° 42' 42" N., 93° 19' 06" W.; 29° 42' 42" N., 93° 19' 48" W.; 29° 44' 42" N., 93° 20' 12" W.; 29° 44' 42" N., 93° 20' 24" W.; 29° 45' 27" N., 93° 20' 33" W.
Size: 1.78 square nautical miles.
Depth: Ranges from 2–8 meters.
Primary Use: Dredged material.
Period of Use: Continuing use.
Restriction: Disposal shall be limited to dredged material from the vicinity of the Calcasieu Channel and Pass.

(49) Calcasieu Dredged Material Site 2-Region VI.
Location: 29° 44' 31" N., 93° 20' 43" W.; 29° 39' 45" N., 93° 19' 56" W.; 29° 39' 34" N., 93° 20' 46" W.; 29° 44' 25" N., 93° 21' 33" W.
Size: 3.53 square nautical miles.
Depth: Ranges from 2–11 meters.
Primary Use: Dredged material.
Period of Use: Continuing use.
Restriction: Disposal shall be limited to dredged material from the vicinity of the Calcasieu Channel and Pass.

(50) Calcasieu Dredged Material Site 3-Region VI.
Location: 29° 37' 50" N., 93° 19' 37" W.; 29° 37' 25" N., 93° 19' 33" W.; 29° 33' 55" N., 93° 16' 23" W.; 29° 33' 49" N., 93° 16' 25" W.; 29° 30' 59" N., 93° 13' 51" W.; 29° 29' 10" N., 93° 13' 49" W.; 29° 29' 05" N., 93° 14' 23" W.; 29° 30' 49" N.; 93° 14' 25" W.; 29° 37' 26" N., 93° 20' 24" W.; 29° 37' 44" N., 93° 20' 27" W.
Size: 5.88 square nautical miles.
Depth: Ranges from 11–14 meters.
Primary Use: Dredged material.
Period of Use: Continuing use.
Restriction: Disposal shall be limited to dredged material from the vicinity of the Calcasieu Channel and Pass.

[FR Doc. 87-29618 Filed 12-24-87; 8:45 am]

BILLING CODE 6560-50-M

40 CFR Part 228

[FRL-3306-7]

Ocean Dumping; Proposed Designation of Sites

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA today proposes to designate a dredged material disposal site located in the Gulf of Mexico offshore of Port Aransas, Texas, for the disposal of dredged material removed from teh U.S. Navy Homeport project at Corpus Christi/Ingleside, Texas. The purpose of this action is to designate the most environmentally acceptable and economically feasible area for placement of construction and future maintenance material from the proposed Homeport project.

DATES: Comments must be received on or before February 11, 1988.

ADDRESSES: Send comments to: Norm Thomas, Chief, Federal Activities Branch (6E–F), U.S. EPA, 1445 Ross Avenue, Dallas, Texas 72502–2733.

A project file and additional information on this proposed site designation is available for public review at the following locations:

EPA, Region VI (E–FF),
1445 Ross Avenue, 10th Floor,
Dallas, Texas 75202–2733
Corps of Engineers, Galveston District,
444 Barracuda Avenue,
Galveston, Texas 77550.

FOR FURTHER INFORMATION CONTACT: Norm Thomas 214/655–2260.

SUPPLEMENTARY INFORMATION:

A. Background

Section 10(c) of the Marine Protection, Research, and Sanctuaries Act of 1972, as amended, 33 U.S.C. 1401 *et seq.* ("the Act"), gives the Administrator of EPA the authority to designate sites where ocean dumping may be permitted. On December 23, 1986, the Administrator delegated the authority to designate ocean dumping sites to the Regional Administrator of the Region in which the site is located. This proposed site designation is being made pursuant to that authority.

The EPA Ocean Dumping Regulations (40 CFR Chapter I, Subchapter H, § 228.4) state that ocean dumping sites will be designated by publication in Part 228. This site designation is being published as proposed rulemaking in accordance with § 228.4(e) of the Ocean Dumping Regulations which permits the designation of an ocean dredged material disposal site (ODMDS). Interested persons may participate in this proposed rulemaking by submitting written comments within 45 days of the date of this publication to the EPA Region VI address given above.

B. EIS Development

Section 102(2)(c) of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.*, ("NEPA") requires that Federal agencies prepare an Environmental Impact Statement (EIS) on proposals for major Federal actions significantly affecting the quality of the human environment. While NEPA does not apply to EPA's Ocean Dumping Program, EPA has voluntarily committed to prepare EIS's in connection with ocean dumping site designations (39 FR 16186; May 7, 1974.

EPA has prepared a Draft Environmental Impact Statement entitled "Environmental Impact Statement (EIS) Ocean Dredged Material Disposal Site Designation U.S. Navy Gulf Coast Strategic Homeporting Corpus Christi/Ingleside, Texas." On December 4, 1987, a notice of availability of the Draft EIS for agency and public review was published in the **Federal Register**. Limited copies of the Draft EIS are available from the EPA address given above. The review and comment period on this Draft EIS closes January 18, 1988.

The proposed action discussed in the EIS is the designation of an ocean site for disposal of dredged material. The purpose of the designation is to provide an environmentally acceptable location for ocean disposal. The appropriateness of ocean disposal is determined on a case-by-case basis, as part of the process of issuing permits for ocean disposal, in accordance with the Act, the Ocean Dumping Regulations, and other applicable Federal laws.

The EIS discusses the need for and alternatives to the proposed action. These include the eleven alternatives considered by the U.S. Navy in a previously published EIS (i.e., United States Navy Gulf Coast Strategic Homeporting Final Environmental Impact Statement, January 1987). Also five ocean disposal alternatives were evaluated. These included a mid-shelf site, a continental slope site and three

VOL 52 ISS 248 DE 28 1987 UMI

near-shore sites, including the Galveston District Corps of Engineers (COE) interim ODMDS. Both the mid-shelf and continental slope sites involve increased transportation costs at no environmental advantage. Because of the increased economic costs and lack of environmental benefit, the mid-shelf and continental slope sites were eliminated from consideration. In addition to ocean disposal, upland disposal, beach nourishment, as well as shallow, deep, and confined bay disposal were considered. The use of any single alternative for disposal of all material was not feasible and sufficient upland sites were not available to accommodate both: 1) the virgin and maintenance from the Homeport Project; and 2) the Corps routine maintenance material. The Navy's preferred alternative is a combination of upland disposal and ocean disposal for the 20.8 million cubic yards (mcy) of construction and future maintenance material. Of this total amount, 15.5 mcy would be disposed of inshore, and 5.3 mcy would be disposed of offshore.

EPA is coordinating with the National Marine Fisheries Service in accordance with the requirements of section 7 of the Endangered Species Act. EPA is also coordinating, as a part of the NEPA/EIS process, with the State of Texas regarding any requirements under the Coastal Zone Management Act.

C. Proposed Site Designation

The proposed site is located approximately four miles offshore of Port Aransas, Texas. Water depths within the area range from 45–55 feet. The coordinates of the site are as follows:

27°47'42" N., 97°00'12" W.; 27°47'15" N., 96°59'25" W.; 27°46'17" N., 97°01'12" W.; 27°45'49" N., 97°00'25" W.

D. Regulatory Requirements

Five general criteria are used in the selection and approval of ocean disposal sites for continuing use. Sites are selected so as to minimize interference with other marine activities, to keep any temporary perturbations from the dumping from causing impacts outside the disposal site, and to permit effective monitoring to detect any adverse impacts at an early stage. Where feasible, locations off the Continental Shelf are chosen. If at any time disposal operations at a site cause unacceptable adverse impacts, further use of the site may be terminated or limitations placed on the use of the site to reduce the impacts to acceptable levels. The general criteria are given in § 228.5 of the EPA Ocean Dumping Regulations; section 228.6 lists eleven specific factors used in evaluating a proposed disposal site to assure that the general criteria are met.

The characteristics of the proposed site are reviewed below in terms of the eleven factors.

1. *Geographical position, depth of water, bottom topography and distance from coast. [40 CFR 228.6(a)(1).]*

Geographical position, water depth, and distance from the coast for the disposal site are given above. Bottom topography is flat with no unique features or relief.

2. *Location in relation to breeding, spawning, nursery, feeding, or passage areas of living resources in adult or juvenile phases. [40 CFR 228.6(a)(2).]*

The Corpus Christi Ship Channel (CCSC) serves as a migratory route for white shrimp, brown shrimp, blue crab, drum, sheepshead and southern flounder. This area, including a 1.5 mile buffer zone, is excluded as a migratory passage. Also excluded are lighted platforms and non-submerged shipwrecks.

3. *Location in relation to beaches and other amenity areas. [40 CFR 228.6(a)(3).]*

The preferred site is approximately four miles offshore of Mustang and San Jose Islands. Other local amenities include Mustang Island State Park, Caldwell Pier, and the Padre Island Natural Seashore, approximately 20 miles away.

4. *Types and quantities of wastes proposed to be disposed of, and proposed methods of release, including methods of packing the wastes, if any. [40 CFR 228.6(a)(4).]*

Virgin construction material and maintenance material from the Homeport Project would be disposed of at the preferred ODMDS. Roughly 2.4 mcy of construction material is proposed for disposal in the two-year or less construction interval. Approximately 2.9 mcy of maintenance material is proposed for disposal through project year 50 (estimated at 290,000 cubic yards during every five-year maintenance cycle). Based on chemical analyses and biological toxicity studies of past maintenance material and virgin material from near the Homeport Project area, there are no pollution or toxicological problems associated with these sediments.

5. *Feasibility of surveillance and monitoring. [40 CFR 228.6(a)(5).]*

The preferred site is amenable to surveillance and monitoring. The proposed monitoring and surveillance program for virgin material, consists of ship-riding surveillance for disposal site location; bathmetric surveys; grain size analysis; sediment chemical characterizing; and benthic infaunal analysis at selected stations. For future maintenance material, the proposed program consists of water, sediment and elutriate chemistry; bioassays; bioaccumulation studies; and benthic infaunal analyses.

6. *Dispersal, horizontal transport and vertical mixing characteristics of the area, including prevailing current direction and velocity, if any. [40 CFR 228.6(a)(6).]*

Predominant longshore current, and thus predominant longshore transport, is to the southwest. Long-term mounding has not historically occurred with discharged maintenance material, although significant short-term mounding of construction material is expected. Steady longshore transport and occasional storms, including hurricanes, are expected, on a long-term basis, to remove the disposed material from the site.

7. *Existence and effects of current and previous discharges and dumping in the area (including cumulative effects). [40 CFR 228.6(a)(7).]*

The discussion of the results of chemical and bioassay testing of past maintenance material and material from and near the interim-designated ODMDS plus chemical analyses of water from the area concluded that there were no indications of water or sediment quality problems in the Zone of Siting Feasibility (ZSF). Testing of past maintenance material from the CCSC in Corpus Christi Bay and virgin sediment from the area indicates that it was, or would be, acceptable for ocean disposal under 40 CFR 227. Studies of the benthos at the interim-designated ODMDS and nearby areas, however, have indicated that the composition of the benthos at the interim-designated ODMDS is significantly different from that in nearby "natural bottom" areas, due primarily to the fact that the substrate at the ODMDS is almost pure sand versus the mixed grain size of the "natural bottom". Since the grain-size composition of the proposed material, both virgin and maintenance, indicates a high percentage of fines, the preferred site, was not selected near shore, in the sand province, but further offshore in the sand/silt/clay province.

8. *Interference with shipping, fishing, recreation, mineral extraction, desalination, fish and shellfish culture, areas of special scientific importance and other legitimate uses of the ocean. [40 CFR 228.6(a)(8).]*

Shipping, mineral extraction, commercial and recreational fishing, recreational areas and historic sites were considered in the siting feasibility process. As a result, the preferred site will not interfere with these or other legitimate uses of the ocean.

9. *The existing water quality and ecology of the site as determined by available data or by trend assessment or baseline surveys. [40 CFR 228.6(a)(9).]*

Chemical studies conducted for or by the COE have shown only short-term water-column perturbations of trubidity, and perhaps Chemical Oxygen Demand (COD) resulted from disposal operations. No short-term sediment quality perturbation, except gain size, could be directly related to disposal operations. In general, the water and sediment quality is good throughout the ZSF. This indicates that there have been no long-term adverse impacts on water and sediment quality from past maintenance material disposal. However, there does appear to be a long-term adverse impact on the gain size, and thus, on the benthos at the interim-designated ODMDS. This impact could be reduced with the proposed dredged material since the grain size is small.

10. *Potentiality for the development or recruitment or nuisance species in the disposal site. [40 CFR 228.6(a)(10).]*

With a disburbance to any benethic community, initial recolonization will be by apportunistic species. The benthos at the interim-designated site is different, because of grain size influences, from the surrounding "natural bottom" areas. Nevertheless, the disposal of dredged material in the past has not, and disposal of the proposed material should not, attract or promote the development or recruitment of nuisance species.

11. *Existence at or in close proximity to the site of any significant natural or cultural features of historical importance. [40 CFR 228.6(a)(11).]*

The location and types of areas and features of historical importance were considered and these areas are excluded. The nearest site of historical importance is located near the Port Aransas, Texas jetties, which are over two miles from the preferred site boundary. Therefore, use of the preferred site would not impact any known sites of historical importance. EPA is also coordinating, as a part of the NEPA/EIS process, with the Texas Historical Commission regarding cultural/historic resources.

E. Proposed Action

Based on the Draft EIS, EPA proposes to designate the U.S. Navy's preferred alternative site for disposal or dredged material from the Homeport Project. The proposed site is compatible with the general criteria and specific factors used for site evaluation.

Before ocean dumping or dredged material at the site may occur, the Corps of Engineers must evaluate a permit application according to EPA's ocean dumping criteria. EPA has the authority to approve or to disapprove or to propose conditions upon dredged material permits for ocean dumping.

The designation of the dredged material site for the Homeport Project at Corpus Christi/Ingleside, Texas is being published as proposed rulemaking. Management of this site has been delegated to the Regional Administrator of EPA Region VI.

F. Regulatory Assessments

Under the Regulatory Flexibility Act, EPA is required to perform a Regulatory Flexibility Analysis for all rules which may have a significant impact on a substantial number of small entities. EPA has determined that this action will not have a significant impact on small entities since the site designation will only have the effect of providing a disposal option for dredged material. Consequently, this rule does not necessitate preparation of a Regulatory Flexibility Analysis.

Under Executive Order 12291, EPA must judge whether a regulations is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This action will not result in an annual effect on the economy of $100 million or more or cause any of the other effect which would result in its being classified by the Executive Order as a "major" rule. Consequently, this rule does not necessitate preparation of a Regulatory Impact Analysis.

This propose rule does not contain any information collection requirements subject to the Office of Management and Budget review under the paperwork Reduction act of 1980, 44 U.S.C. 3510 *et seq.*

List of Subjects in 40 CFR Part 228

Water pollution control.

Dated: December 18, 1987.

Robert E. Layton, Jr.,

Regional Administrator of Region VI.

In consideration of the foregoing, Subchapter H of Chapter I of Title 40 is proposed to be amended as set forth below.

PART 228—[AMENDED]

1. The authority citation for Part 228 continues to read as follows:

Authority: 33 U.S.C. 1412 and 1418.

2. Section 228.12 is amended by adding paragraph (b)(51) to read as follows:

§ 228.12 Delegation of management authority for interim ocean dumping sites.

* * * * *

(b) * * *

(51) Homeport Project Dredged Material Site—Region VI. Location: 27°47'42" N., 97°00'12" W.; 27°47'15" N., 96°59'25" W.; 27°46'17" N., 97°01'12" W.; 27°45'49" N., 97°00'25" W.

Size: 1.4 square miles.

Depth: Ranges from 45–55 feet.

Primary Use: Dredged material.

Period of Use: 50 years

Restriction: Disposal shall be limited to dredged material from the U.S. Navy Homeport Project, Corpus Christi/Ingelside, Texas.

Review of Technical Assignment Criteria for the AM Broadcast Service

AGENCY: Federal Communications Commission.

ACTION: Notice of inquiry; extension of time.

SUMMARY: This action grants a motion for extension of time for filing comments and reply comments in response to the *Notice of Inquiry* in MM Docket No. 87-267 (Review of Technical Assignment Criteria for the AM Broadcast Service) published August 24, 1987 (52 FR 31795). The National Association of Broadcasters ("NAB") requested that the filing deadlines be extended 180 days in order to allow for the completion and analysis of two technical studies that will be useful to the Commission in resolving the issues raised in this proceeding. NAB, however, requested an expedited resolution of that portion of the *Inquiry* addressing transmission standards based on the 1987 National Radio Systems Committee proposals. Since the studies being conducted by the NAB should enhance the substantive quality of the record in this rulemaking, the Commission has extended the dates for filing comments and reply comments on sections I and IV of the *Inquiry* to June 17, 1988 and August 17, 1988 respectively. On sections II and III, the Commission extended the deadlines to February 1, 1988 for comments and March 1, 1988 for reply comments.

Order Granting Motion for Extension of Time for Filing Comments and Reply Comments

Adopted: December 11, 1987.

Released: December 15, 1987.

By the Chief, Mass Media Bureau.

1. On August 17, 1987, the Commission released a *Notice of Inquiry* (*Inquiry*) in MM Docket 87-267 for the purpose of providing a comprehensive review of the technical principles pertaining to AM broadcast assignment criteria and related issues in order to identify needed changes that would permit AM stations to improve their service and enhance their ability to compete in the marketplace.[1] The deadlines for filing comments and reply comments in this proceeding are currently December 17, 1987 and February 17, 1988, respectively.[2]

2. On December 1, 1987, a motion for extension of these filing deadlines was filed by the National Association of Broadcasters ("NAB"). The motion requests that the deadline for comments be extended until June 17, 1988 and that the reply comment deadline be extended to August 17, 1988. In requesting a general extension of approximately 180 days, the NAB noted that the Commission may wish to extend by a lesser complement of time the comment and reply comment dates concerning less controversial or less complicated issues raised in the *Inquiry*.[3]

3. In support of its motion for extension of the filing deadlines, the NAB explains that it has undertaken two major technical studies which will provide a meaningful contribution to the record in this proceeding. The completion of these two studies will take several months and their analysis will require additional months of study in order to prepare the comments. The NAB also points to the importance of its Annual Engineering Conference in April of 1988 and the completion of additional work by NRSC in March of 1988 in the development of useful comments in this proceeding. Finally, NAB characterizes the process of improving the AM broadcasting service as "highly detailed and complex" and therefore urges the Commission to extend the deadlines so that the record will be complete and comprehensive.

4. On December 9, 1987, GSM Media Corporation ("GSM") filed comments on NAB's motion for an extension of time. GSM agrees with NAB that certain issues addressed in the *Inquiry* do not require extensive research and therefore can be resolved more quickly. GSM contends that there is a need for immediate improvement of the AM service if it is to remain competitive and therefore argues that proposals concerning interference received and new skywave propagation curves should be reviewed and implemented as expeditiously as possible.

5. We agree with NAB's assessment of the complexities of the issues under study in the *Inquiry*. We have been working with the public and the private sector through our Advisory Committee on Radio Broadcasting and we believe that the NAB studies will add to our knowledge and inform our decisionmaking. Furthermore, we agree with both NAB and GSM that certain issues in the *Inquiry* do not require an extended comment period and can be fully addressed without the results of the types of technical studies which the NAB is undertaking. The *Inquiry* is divided into four sections: We feel that Section II—Additional Assignment Considerations and Section III—Related Technical Issues can be addressed by interested commenters within a shortened timeframe.

6. Accordingly, it is ordered that the Motion for Extension of Comment and Reply Comment Dates filed by the National Association of Broadcasters is granted. The dates for filing comments and reply comments on Sections II (Additional Assignment Criteria) and III (Related Technical Issues) of the *Inquiry* are extended to February 1, 1988 and March 1, 1988, respectively. The dates for filing comments and reply comments on all other sections of the *Inquiry* are extended as requested to June 17, 1988 and August 17, 1988, respectively.

7. This action is taken pursuant to authority found in sections 4(i) and 303(r) of the Communications Act of 1934, as amended and §§ 0.204(b), 0.283, 1.46 and 1.45 of the Commission's Rules.

Federal Communications Commission.

Alex D. Felker,

Chief, Mass Media Bureau.

BILLING CODE 6712-01-M

[1] FCC 87-245, adopted July 16, 1987, 2 FCC Rcd. 5014 (1987).

[2] 52 FR 31795 (August 24, 1987). The current deadlines were established by *Erratum*, released September 3, 1987, which was not published in the **Federal Register**.

[3] The NAB filed a petition with the Commission on November 6, 1987 requesting the adoption of the 1987 NRSC standard AM preemphasis curve and the standard 10 kHz audio bandwidth. On December 9, 1987, the NAB's *Petition for Rulemaking*, RM 6174, went out on public notice and comments are due January 25, 1988. In its public notice releasing the NAB's *Petition* for comment, the Commission took note of the relationship between the issues in the petition and one of the issues raised in the *Inquiry*. The NAB urges in its instant motion for extension of time that this particular matter be expedited.

[MM Docket No. 87-565, RM-5820]

Radio Broadcasting Services; Yellville, AR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document requests comments on a petition by Scott Miller, licensee of Station KCTT-FM (Channel 249A), Yellville, Arkansas, proposing the substitution of FM Channel 249C2 for Channel 249A and modification of his license accordingly, to provide that community with its first expanded coverage FM service.

DATES: Comments must be filed on or before February 11, 1988, and reply comments on or before February 26, 1988.

ADDRESS: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: Dennis F. Begley, Esq., Reddy, Begley & Martin, 2033 M St., NW., Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 87-565, adopted December 2, 1987, and released December 21, 1987. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Office of the Director

National Volunteer Advisory Council; Committee Renewal

In accordance with provisions of the Federal Advisory Committee Act, and after consultation with the General Services Administration (GSA), I have determined that renewal of the National Volunteer Advisory Council is in the public interest in connection with the performance of the duties and mission of the ACTION Agency.

The Council will advise and make recommendations to the Director of ACTION with respect to policy matters arising in the administration of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113), and as to the effectiveness of ACTION programs. The Council will also make final recommendations for the President's Volunteer ACTION Awards.

Advisory Council membership is chosen from all areas of the country and from a broad cross section of industry, labor, local, state and Federal government and non-profit organizations. The Council will consist of 25 members, including the Chairperson. The members are selected for their expertise and serve in their individual capacities, not as representatives of their organizations. The Council will function solely as an advisory body and in compliance with the provisions of the Federal Advisory Committee Act. The Charter will be filed with GSA and the appropriate Congressional Committees.

Further information may be obtained from: Loni Hagerup, Special Assistant to the Director, 806 Connecticut Avenue NW., Suite 500, Washington, DC 20525, (202) 634–9380.

Signed at Washington, DC this 18th day of December, 1987.

Donna M. Alvarado,

Director, ACTION.

COMMISSION ON CIVIL RIGHTS

Indian Civil Rights Issues; Hearing

Notice is hereby given pursuant to the provisions of the United States Commission on Civil Rights Act of 1983, Pub. L. 98–183, 97 Stat. 1304, that a public hearing before a Subcommittee of the U.S. Commission on Civil Rights will be held on January 28, 1988, beginning at 10:00 a.m. and continuing on such succeeding days as may be deemed appropriate at the discretion of the Chairman, at the U.S. Commission on Civil Rights, Room 512, 1121 Vermont Avenue NW., Washington, DC.

The purpose of the hearing is to receive evidence about enforcement of the Indian Civil Rights Act and about the Department of the Interior's responsibilities concerning enforcement of the Indian Civil Rights Act.

The Commission is an independent, bipartisan factfinding agency authorized to study, collect, and disseminate information and to appraise the laws and policies of the Federal Government, and to study and collect information concerning legal developments, with respect to discrimination or denials of equal protection of the laws under the Constitution because of race, color, religion, sex, handicap, or national origin, or in the administration of justice.

Dated at Washington, DC, December 22, 1987.

Clarence M. Pendleton, Jr.,

Chairman.

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Export Administration.

Title: Distribution License Procedure.

Form Number: Agency—EAR 373.3; OMB—0625–0052.

Type of Request: Extension of the expiration date of a currently approved collection.

Burden: 550 respondents; 73,154 reporting/recordkeeping hours.

Needs and Uses: A Distribution License is a bulk license authorizing the holder to make multiple exports of authorized commodities to foreign consignees approved in advance by Export Administration. The information gathered is used by Export Administration to evaluate whether or not the applicant is eligible for this special license.

Affected Public: Businesses or other for-profit institutions; small businesses or organizations.

Frequency: On occasion/recordkeeping.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: John Griffen 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to John Griffen, OMB Desk Officer, Room 3228, New Executive Office Building, Washington, DC 20503.

Dated: December 21, 1987.

J. Randall Blumenschein,

Chief, Management Support Division, Office of Management and Organization.

[C–301–003]

Roses and Other Cut Flowers From Colombia; Final Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice of final results of countervailing duty administrative review.

SUMMARY: On March 2, 1987, the Department of Commerce published the preliminary results of its administrative review of the agreement suspending the countervailing duty investigation on roses and other cut flowers from Colombia. We determine that the signatories to the suspension agreement have complied with the terms of the suspension agreement during the period July 1, 1983 through December 31, 1985.

EFFECTIVE DATE: December 28, 1987.

FOR FURTHER INFORMATION CONTACT: Stephanie Moore or Bernard Carreau, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On March 2, 1987, the Department of Commerce ("the Department") published in the **Federal Register** (52 FR 6280) the preliminary results of its administrative review of the agreement suspending the countervailing duty investigation on roses and other cut flowers from Colombia (48 FR 2158, January 18, 1983). The Department has now completed this administrative review in accordance with section 751 of the Tariff Act of 1930 ("the Tariff Act").

Scope of Review

The United States has developed a system of tariff classification based on the international harmonized system of Customs nomenclature. Congress is considering legislation to covert the United States to this Harmonized System ("HS") by January 1, 1988. In view of this, we will be providing both the appropriate *Tariff Schedule of the United States Annotated* ("TSUSA") item numbers and the appropriate HS item numbers with our product descriptions on a test basis, pending Congressional approval. As with the TSUSA, the HS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

We are requesting petitioners to include the appropriate HS item number(s) as well as the TSUSA item number(s) in all new petitions filed with the Department. A reference copy of the proposed Harmonized System schedule is available for consultation at the Central Records Unit, Room B–099, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230. Additionally, all Customs offices have reference copies, and petitioners may contact the Import Specialist at their local Customs office to consult the schedule.

Imports covered by the review are shipments of roses and other cut flowers from Colombia, currently classifiable under items 192.1810 through 192.2192 of the TSUSA. These products are currently classifiable under HS item numbers 06031060—0 and 06031090—0. The review covers the period July 1, 1983 through December 31, 1985 and 14 programs: (1) CAT/CERT; (2) air freight reductions; (3) Resolutions 59 and 22; (4) Decree 2366; (5) duty and tax exemptions under the Plan Vallejo; (6) Research and Development Fund; (7) FFA; (8) FFI; (9) FCE; (10) FONADE; (11) Resolution 42; (12) benefits to Free Industrial Zones; (13) preferential export insurance; and (14) countertrade.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. At the request of the domestic parties, we held a public hearing on April 3, 1987.

Comment 1: The domestic parties contend that the Colombian flower exporters have violated the suspension agreement. Section 704(b) of the Tariff Act requires that a suspension agreement completely eliminate the net subsidy, and section B.1.b. of the suspension agreement requires that the exporters not apply for or receive any benefits under any other program subsequently determined by the Department to constitute a bounty or grant. Despite the Department's finding in March 1985 that PROEXPO financing under Resolution 59 and Decree 2366 is countervailable, the Colombian exporters continued to receive preferential loans under both programs throughout the review period. Section B.1.d. of the suspension agreement requires the exporters to notify the Department, at least sixty days prior to taking any action, of any benefits they intend to apply for or receive from the Colombian government. The Colombian exporters did not notify the Department of their PROEXPO loans until April 1985, and they have received preferential PROEXPO financing throughout the review period. The domestic parties have argued since the inception of the suspension agreement that PROEXPO loans are countervailable. The Colombian exporters were aware that the PROEXPO program was potentially countervailable and should have renounced the program pending the completion of the Department's review.

Department's Position: We found PROEXPO financing under Resolution 59 and Decree 2366 to be countervailable in the suspension of countervailing duty investigation on certain textile mill products and apparel from Colombia (50 FR 9863, March 12, 1985). The textile suspension agreement required the signatories not to apply for or receive any such financing other than that "offered at nonpreferential terms and at or above the most recent short-term benchmark interest rate determined by the Department." On April 1, 1985, we published our preliminary affirmative countervailing duty determination on live swine and fresh, chilled and frozen pork products from Canada (50 FR 13264), in which we used an agricultural benchmark to measure the benefit from preferential financing programs. From that point on, the Colombian exporters contended that PROEXPO financing was not countervailable because alternative financing from various nontargeted agricultural funds was available at rates similar to those offered by PROEXPO. The need for renunciation or refinancing of outstanding PROEXPO loans was not known by cut flower exporters until the Department determined the appropriate interest rate benchmark. We did not make that determination until December 15, 1986, the date of publication of the final results of our last administrative review of this case.

Comment 2: The domestic parties contend that the Colombian exporters are circumventing the suspension agreement by receiving high Tax Rebate Certificate (CERT) rebates on exports to third countries. The CERT program is designed to produce equal or greater benefits than the program renounced in the suspension agreement, the Tax Reimbursement Certificate (CAT). The CERT rebates of zero for exports to the United States and 20 percent for exports to all other countries clearly indicate that the exporters are circumventing the agreement. The only distinction between the CERT and CAT programs is the dual rates applicable under the CERT program. The dual rates ensure that the Colombian exporters receive approximately the same amount in total rebates as they had received with the single, lower rate established under the CAT program. When a foreign government replaces one subsidy program with another of equal magnitude, the purpose of the suspension agreement is not served, and monitoring by the Department is futile.

Further, despite the Department's statement in the final results of its last administrative review (51 FR 44930, December 15, 1986) that the dual rates encourage exports to countries other than the United States, in fact, imports

BEST COPY AVAILABLE

of Colombian roses and other cut flowers to the United States have continued to rise since the inception of the suspension agreement.

Department's Position: We have found that, as required by the terms of the suspension agreement, the exporters received no CAT or CERT payments on exports to the United States during the period of review. The Banco de la Republica, Colombia's central bank, certified to the Department in February 1986 that it has been withholding CAT/CERT payments from signatories to the agreement on shipments to the United States and Puerto Rico since January 13, 1983.

As stated on many occasions, whenever possible we calculate the benefit from export subsidies based on shipments only to the United States. Where export subsidies are not shipment-specific, or cannot otherwise be segregated according to country of destination, we calculate the benefit based on shipments to all markets. See, *e.g.*, preliminary results of countervailing duty administrative review on cotton sheeting and sateen from Peru (51 FR 35540, October 6, 1986) (the CERTEX program); preliminary results of countervailing duty administrative review on ceramic tile from Mexico (52 FR 25285, July 6, 1987) (FOMEX and article 15 loans); and final affirmative countervailing duty determination on porcelain-on-steel cooking ware from Mexico (51 FR 364451; October 10, 1986) (petitioners' comment 1).

CAT/CERT payments can be segregated according to country of destination. Since Colombian exporters have received CAT/CERT payments based only on exports to countries other than the United States, we determine that the signatories have not received any benefits from this program on U.S. shipments and, therefore, have not violated the suspension agreement.

Finally, the increase or decrease in the level of imports does not determine whether a program is countervailable or whether a suspension agreement has been violated. In fact, there is no necessary connection between these events. The level of imports may be affected by many factors, and the domestic parties have not demonstrated a connection between the dual rates available under the CERT program and the increase in imports.

Comment 3: The domestic parties contend that the Colombian exporters violated the suspension agreement by benefitting from import duty exemptions under the Plan Vallejo throughout the review period.

Department's Position: We preliminarily found that imports of capital equipment under the Plan Vallejo were countervailable in the preliminary affirmative countervailing determination on miniature carnations from Colombia (51 FR 37936, October 27, 1986). However, the notice of suspension of investigation in the miniature carnations case was not published until January 1987, one month after our revised suspension agreement in the cut flowers case. Therefore, the Colombian cut flower exporters were under no obligation to renounce the Plan Vallejo for capital equipment before signing the revised suspension agreement. Cut flower exporters have agreed to renounce the Plan Vallejo for capital equipment in the revised suspension agreement.

Comment 4: The domestic parties contend that export subsidies to third countries, such as the CERT rebates, benefit the production of all flowers, including those that are exported to the United States. An early Supreme Court ruling indicates the proper approach the Department should use in treating CERT payments on exports to countries other than the United States. In *Downs v. United States* (187 US 496, 47 L.Ed. 275, 23 S.Ct. 222. 1902), the Supreme Court held that bounties or grants conferred upon exportation necessarily benefit production as well. In an analogus situation, the Department made clear in the final affirmative countervailing duty determination on certain carbon steel products from Brazil (49 FR 17996, April 26, 1984) that it would treat benefits generated by domestic sales as benefits to all production. Regarding IPI rebates for capital investment, the Department stated: "That the rebates are generated by domestic sales only does not alter the fact that they benefit all production, including exports." Similarly, that the CERT rebates in Colombia are generated by export sales to third countries does not alter the fact that they benefit the production of all flowers, including those that are exported to the United States.

Department's Position: As stated in our response to comment 2, we generally do not find export subsidies to countries other than the United States countervailable. The facts in the cases cited by the domestic parties are distinguishable from the facts presented in this case. In the *Downs* case, the Supreme Court considered whether the exemption for excise taxes for Russian sugar exporters was a bounty upon production. Although the Court acknowledged that "every bounty upon exportation must, to a certain extent, operate as a bounty upon production, * * * it did not find the tax exemption for exporters to be a production bounty or grant. Rather, the Court held that "When a tax is imposed upon all sugar produced, but is remitted upon all sugar exported, then, by whatever process, or in whatever manner, or under whatever name, it is disguised, it is a bounty upon exportation." Contrary to the contention of the domestic parties, the *Downs* case does not show that the Supreme Court interpreted the countervailing duty law to say that all export subsidies should be considered production (or domestic) subsidies. Furthermore, the Trade Agreements Act of 1979 (amending the Tariff Act of 1930, which itself amended the Tariff Act of 1897) draws a clear statutory distinction between export and domestic subsidies. The Department does not have the authority to erase this distinction. Finally, to allocate export subsidies over total production would understate the benefit (by increasing the denominator).

The domestic parties' reliance on our treatment of the IPI "rebate" in Brazilian certain carbon steel products is misplaced. In that determination, we treated the "rebates" as infusions of equity through a government holding company. Equity benefits all production, including exporters. Although the IPI tax was collected on domestic sales, the rebates was simply a mechanism to raise equity capital for certain steel companies. The means by which funds were raised for this program were irrelevant to our determination. (*See* also, final affirmative countervailing duty determination, prestressed concrete steel wire strand from Brazil; 48 FR 4520, February 1, 1983).

In the final affirmative countervailing duty determination on porcelain-on-steel cooking ware from Mexico (51 FR 36449; October 10, 1986), we examined a domestic subsidy program more analogous to the CERT program. Through the FOMEX frontier program, the Mexican government makes below-market loans available to finance the production, inventory, purchase and sale of certain goods manufactured in Mexico and sold in a specific region of Mexico. We held that those loans were countervailing because they "* * * are specifically tied to domestic sales, and because they do not benefit production or exportation of the subject merchandise to the United States * * *" We have found that CERT rebates paid to flower exporters are directly tied to exports to third countries. Consistent with our prior practice, we determine that the rebates do not benefit the production or export of the subject merchandise to the United States.

Comment 5: The domestic parties contend that the Department violated the suspension agreement by failing to honor its obligation, under subparagraph C, to notify officially the Colombian exporters of any additional programs found to be countervailable in this or any subsequent proceeding. Also, the Department failed to enforce Section 704(i) of the Tariff Act, which states that when a suspension agreement has been violated, the agreement must be terminated.

Department's Position: On June 5, 1986, we officialy notified the Colombian exporters of the additional programs found countervailable. Furthermore, we included the additional programs in the revised suspension agreement. Because we have not found that the signatories have violated the suspension agreement, we are under no obligation to terminate it.

Comment 6: The domestic parties contend that the Department's failure to terminate the agreement is not in the interest of the domestic industry, as required by Congress. The Senate Finance Committee Report on the Trade Agreements Act of 1979 stated:

> Suspension is an unusual action which should not become the normal means of disposing of cases. The Committee intends that suspensions are to be considered only when the action serves the interest of the public and the domestic industry affected. Furthermore, the requirement that the petitioners be consulted will not be met by pro forma communications. Complete disclosure and discussion is required.

S. Rep. No. 249, 96th Cong., 54 (1979).

The House Ways and Means Committee showed equal concern over the use of suspension agreements. In the House Ways and Means Report, the Committee stated that:

> The authority to suspend investigations is discretionary and subject to the overriding requirement that suspension is in the public interest, and that effective monitoring of the agreement is practicable.

H. Rep. No. 317, 96th Cong., 55 (1979).

The Department's indifference to its responsibilities leads the domestic parties to believe that the determination to adhere to the suspension agreement was not made in accordance with the language and purpose of the statute but in accordance with foreign policy considerations.

Department's Position: We disagree. We have regularly consulted with the domestic parties and have provided complete disclosure of all information to them throughout this proceeding. During this review, we held a disclosure conference and a public hearing—both at the domestic parties' request. Furthermore, as required by section 704(d), we have determined that both the original suspension agreement and the revised suspension agreement are in the public interest.

We do not take foreign policy considerations into account in issuing countervailing duty orders or in signing suspension agreements. Rather, we follow the requirements of our trade laws. We entered into a suspension agreement in this case because it completely eliminates the net bounty or grant. We are satisfied that the agreement is in the public interest, and we believe that it can be monitored effectively.

Comment 7: The domestic parties contend that the Department has understated the benefit from PROEXPO loans by using an agricultural benchmark. In the appendix to the notice of final affirmative countervailing duty determination and countervailing duty order on certain cold-rolled carbon steel flat-rolled products from Argentina (49 FR 18006, April 26, 1984) ("Subsidies Appendix"), the Department stated that, to determine the amount of the subsidy, the preferential interest rate must be compared to a commercial rate. Since commercial funds are available in Colombia, there is no basis for the Department not to use a commercial interest rate benchmark.

Department's Position: We disagree. See the final results of our last administrative review of this case (51 FR 44931).

Comment 8: The domestic parties argue that the Department's test for determining whether Colombian air freight rates are countervailable is wrong. That the Colombian government mandates minimum and maximum air freight rates for cut flowers is in and of itself evidence of suppression of those rates. Furthermore, the mandated range of rates set by the government for cut flowers is below the level set for other commodities, indicating that, even if rates for all products are suppressed, there is still a special benefit for cut flower exporters.

Department's Position: We disagree. We have found that the Colombian Civil Aeronatics Board (DAAC) mandates minimum and maximum air freight rates for all commodities. We have no evidence, and the domestic parties have provided no evidence, that the rates set for cut flowers are inappropriately or unreasonably lower than those set for other products. Therefore, we believe that our test is appropriate.

Comment 9: The domestic parties argue that air freight rates are lower than rates for other products because flowers from Colombia are being subsidized by the use of shipments of flowers to transport cocaine into the United States. It is the Department's responsibility to inquire directly from the Drug Enforcement Agency and the Customs Service about the frequency of the interception of cocaine in shipments of flowers imported from Colombia. The Department should then examine the effect of these illegal funds on flower exports.

Department's Position: The use of shipments of flowers to transport cocaine as described by the domestic parties involves Customs fraud and smuggling. The Department of Commerce does not have the authority to administer the Customs fraud and smuggling statutes. Furthermore, the domestic parties have not demonstrated how the alleged smuggling constitutes a subsidy to the flower growers.

Comment 10: The domestic parties contend that PROEXPO opened a special account for diversification and development of flowers specifically targeted for external markets, and the program is countervailable.

Department's Position: Resolution No. 10, which was established on July 23, 1986, established a special account for the diversification and development of the cultivation of flowers and vegetables for external markets. This program was not in effect during the period of reveiw. We will examine it in the next administrative review.

Comment 11: The domestic parties contend that the signatories to the suspension agreement did not account for at least 85 percent of total exports of roses and other cut flowers to the United States in 1984, as required by section 704(b) of the Tariff Act.

Department's Position: The domestic parties have based their argument on the summary of export 1 licenses issued to exporters during the period July 1, 1983 through December 31, 1985, as provided by the Colombian government in its questionnaire response. The list includes shipments of miniature carnations, which are not subject to this suspension agreement. During 1984, shipments of miniature carnations represented five percent of the exports listed in the summary of export licenses. The signatories to the agreement accounted for 85.4 percent of the volume of the subject merchandise imported into the United States in 1984. Therefore, the signatories have complied with section 704(b) of the Tariff Act.

Final Results of Review

After considering all of the comments received, we determine that the signatories have complied with the terms of the suspension agreement for the period July 1, 1983 through December 31, 1985. The agreement can remain in force only as long as shipments covered by it account for at least 85 percent of exports of such merchandise to the United States. Our information indicates that the signatories comprised over 85 percent of exports of the merchandise to the United States during the period of review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.10.

Gilbert B. Kaplan,

Acting Assistant Secretary, Import Administration.

Date: December 17, 1987.

BILLING CODE 3510-DS-M

Department of Energy; Decision on Application for Duty-Free entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC.

Docket Number: 87-194. **Applicant:** U.S. Department of Energy, Argonne National Laboratory, 9700 South Cass Avenue, Argonne, IL 60439.

Instrument: Scanning Electron Microscope, Model JSM-8401 with Accessories.

Manufacturer: JEOL, Ltd., Japan.

Intended Use: See notice at 52 FR 27037, July 17, 1986.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign instrument, for such purposes as this instrument is intended to be used, was being manufactured in the United States at the time the foreign instrument was ordered December 19, 1986.

Reasons: The foreign instrument provides for in situ microhardness measurement of ceramic and metallic samples.

The capability of the foreign instrument described above is pertinent to the applicant's intended purpose. We know of no instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use which was being manufactured in the United States at the time fhe foreign instrument was ordered.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 87-29668 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DS-M

Loma Linda University Medical Center; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 87-213.

Applicant: Loma Linda University Medical Center, 11234 Anderson Street, Loma Linda, CA 92354.

Instrument: Extra Corporeal Shock Wave Lithotripter.

Manufacturer: Dornier Medizintechnik, GmbH, West Germany.

Intended Use: See notice at 52 FR 30942, August 18, 1987.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: There is no domestic manufacturer of lithotripers or of comparable devices capable of noninvasively pulverizing kidney stones. Our consultants in the National Institutes of Health have advised us with respect to this application that there are no known domestic instruments now available which are equivalent to the Dornier ESWL.

We know of no comparable instrument that is being manufactured in the United States which is of equivalent scientific value to the foreign instrument for the purposes for which the instrument is intended to be used.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

University of California, Livermore; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 87-299. *Applicant:* University of California, Lawrence Livermore National Laboratory, P.O. Box 5012, Livermore, CA 94550.

Instrument: Thermal Image Single Crystal Growth Furnace. *Manufacturer:* NEC Corporation, Japan. *Intended Use:* See notice at 52 FR 42028, November 2, 1987.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a contamination free heating environment at temperatures to 2150° C.

The National Bureau of Standards has advised that (1) this capability is pertinent to the applicant's intended purposes and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 87-29667 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DS-M

University of Michigan; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket number: 87-272. Applicant: University of Michigan, 503 Thompson Street, Ann Arbor, MI 48109. Instruments: Rotating Anode Horizontal X-Ray Diffractometer, D/max-RBX (12kW) and Theta-Theta X-Ray Powder Diffractometer, D/max-11TBX (2.0kW). Manufacturer: Rigaku Corporation, Japan. Intended Use: See notice at 52 FR 32825, August 31, 1987.

Comments: None received. Decision: Approved for the Rotating Anode Horizontal X-Ray Diffractometer only. A separate application for the Theta-Theta X-Ray Powder Diffractometer is required pursuant to § 301.3(e) of the regulations.

In the case of the approved instrument, no instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a combination of high power (12kW) and high brilliance (focal spot size/maximum of 2.4kW/mm²). The capability of the foreign instrument described above is pertinent to the applicant's intended purpose. We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Institutes of Health et al; Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 88-042. *Applicant:* National Institutes of Health, Building 1, Room 118, Bethesda, MD 20892.

Instrument: Nuclear Magnetic Resonance Spectrometer, Model AM-500. *Manufacturer:* Bruker Instruments, West Germany. *Intended Use:* The instrument will be used to study the internal dynamics of the component proteins of HIV (e.g., the regulatory proteins, enzymes and envelope proteins of the virus) in solution and in the solid state. The solid state studies will be conducted using a magic angle spinning probe (Doty Scientific) and high power amplifiers (ENI and Henry Radio).

Application Received by Commissioner of Customs: November 23, 1987.

Docket Number: 88-043. *Applicant:* Pennsylvania Muscle Institute, School of Medicine, University of Pennsylvania, B42 Anatomy-Chemistry Building, 37th and Hamilton Walk, Philadelphia, PA 19104-6083. *Instrument:* High Intensity Flash Photolysis Device. *Manufacturer:* Gert Rapp, West Germany. *Intended Use:* The instrument will be used for rapid initiation of contractions in smooth and striated muscles. A high intensity flash is delivered to a small bundle of smooth muscle or single skeletal muscle fiber, in order to release biologically active agents from inert, photolabile precursors. This permits initiation of biological reactions on a very rapid time scale, not limited by the rate of diffusion of chemical substances into muscle. *Application Received by Commissioner of Customs:* November 23, 1987.

Docket Number: 88-044. *Applicant:* National Institutes of Health, Building 1, Room 118, Bethesda, MD 20892. *Instrument:* Nuclear Magnetic Resonance Spectrometer, Model AM 600. *Manufacturer:* Bruker Instruments, West Germany. *Intended Use:* The instrument will be used for the study of proteins by use of NMR methods coupled with theoretical treatments, such as restrained molecular dynamics. The project will involve isolation of the genes of the various HIV proteins and expressions of the genes in suitable medium for generating milligram quantities of protein. The proteins to be studied are tat-3, which has been isolated and expressed and the protease for which the gene has been isolated. The projects also involves the study of inhibitors binding to the HIV enzymes. *Application Received by Commissioner of Customs:* November 25, 1987.

Docket Number: 88-045 *Applicant:* University of Virginia, Department of Anatomy and Cell Biology, Box 439, Medical Center, Charlottesville, VA 22908. *Instrument:* Electron Microscope, Model JEM100CX. *Manufacturer:* JEOL, Ltd., Japan. *Intended Use:* The instrument will be used to conduct the following research:

1. Studies of the effects of vasectomy and vasovasostomy.
2. Studies of a sperm membrane immunogen.
3. Identification and localization of antigens from human seminal fluid.
4. Pathways and mechanisms of exocrine secretion.

In addition, the instrument will be used in graduate training and courses in Anatomy, Cell Biology, Reproductive Biology, and Developmental Biology. *Application Received by Commissioner of Customs:* November 25, 1987.

Docket Number: 88-046 *Applicant:* University of Iowa, Iowa City, IA 52242. *Instrument:* Stopped-Flow Module, Model SFM-3. *Manufacturer:* BioLogic, France. *Intended Use:* The instrument will be used for the study of proteins. The experiments will involve observation of the kinetics of the changes in absorbance, fluorescence and circular dichroism accompanying the folding and unfolding of the selected proteins under a wide range of experimental solution conditions. *Application Received by Commissioner of Customs:* November 30, 1987.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The North Pacific Fishery Management Council's Plan Amendment Advisory Group (PAAG) has scheduled a public meeting, January 4-5, 1988, at 1:30 p.m., at the National Marine Fisheries Service, Northwest and Alaska Fisheries Center, 7600 Sand Point Way, NE., Room 2079, Building 4, Seattle, WA, to review groundfish amendment proposals for both the Gulf of Alaska and Bering Sea/Aleutian Islands Groundfish Fishery Management Plans. Following the meeting the group's recommendations, and those of the groundfish plan teams, will be forwarded to the Council for their review and initial action at their January 20-22, 1988, meeting in Anchorage. Part of the PAAG review of plan amendment proposals will be on the proposal to raise the upper limit of the optimum yield (OY) for groundfish in the Bering Sea/Aleutian Islands. The participants will scope out the extent and type of analysis required to amend the OY range and consider whether an environmental assessment or a more substantial environmental impact statement will be required.

Interested persons are invited to appear at the meeting and/or to provide written comments on alternative levels to which the OY range may be increased; associated impacts that may be triggered by raising the OY range, and direct, indirect and cumulative impacts of various alternatives. Written

comments are invited January 27, 1988. Comments may be addressed to Robert W. McVey, Director, National Marine Fisheries Service, Alaska Region, P.O. Box 1668, Juneau, AK 99802. For more information contact the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; Telephone: (907) 274–4563.

Date: December 21, 1987.

Richard H. Schaefer,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Pacific Fishery Management Council and its advisory entities will convene separate public meetings, January 11–14, 1988, at the Red Lion Inn-Columbia River, 1401 North Hayden Island Drive, Portland, OR, as follows:

Council—On January 13, the Council will convene at 8 a.m., with a closed session (not open to the public) to discuss litigation, personnel, and other appropriate matters. At 8:30 a.m., the Council will commence its open session to consider administrative matters and salmon management issues. After receiving comments from its advisory entities and the public, the Council will adopt a salmon management process/schedule and methodologies and models for 1988. It will review the role of its Indian Affairs Committee; consider adopting a revised framework for allocating salmon between ocean commercial and recreational fisheries north of Cape Falcon, OR, and will address other salmon matters. There will be a public comment period on January 13 at approximately 4 p.m., to hear comments on issues not on the agenda. Public comments on agenda items will be heard during the Council's discussion on each issue. On January 14 the council will reconvene at 9 a.m. to complete administrative matters and to address Pacific halibut allocation and groundfish management. The Council will take final action on a halibut catch sharing plan for 1988. On groundfish, the Council will act on foreign and joint venture fishing applications for 1988; consider adopting whiting codend restrictions to limit the magnitude of deliveries of whiting at sea; consider a delayed season opening for the non-trawl sablefish fishery, and address other groundfish issues.

Scientific and Statistical Committee—On January 11 will convene at 1 p.m. to consider matters on the Council's agenda, and will reconvene January 12 at 8 a.m.

Groundfish Fishery Management Plan (FMP) Rewrite Oversight Group—On January 11 will convene at 1 p.m. to provide guidance to the drafting team designated to rewrite the Groundfish FMP, and will reconvene January 12 at 8 a.m.

Salmon Advisory Subpanel—On January 12 will convene at 1 p.m. to address salmon matters on the Council's agenda.

Salmon Plan Development Team—On January 12 will convene at 1 p.m. to address salmon items on the Council's agenda.

Indian Affairs Committee—On January 12 will convene at 7 p.m. to review its role in the salmon management process.

Foreign Fishing Committee—On January 13 will convene at 7 p.m. to address foreign fishing applications and whiting codend restrictions.

Detailed agendas for all of the above meetings will be available to the public after December 31, 1987. For further information contact Lawrence D. Six, Executive Director, Pacific Fishery Management Council, Metro Center, 2000 SW First Avenue, Suite 420, Portland, OR 97201; telephone: (502) 221–6352.

Date: December 21, 1987.

Richard H. Schaefer,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Announcing an Import Restraint Limit for Certain Cotton, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in Burma Effective on January 1, 1988

December 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Anne Novak, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 337–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry of cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Category 340/341/640/641/840, produced or manufactured in Burma and exported during the period January 1, 1988 through December 31, 1988, in excess of the designated limit.

Background

The Bilateral Textile Agreement, effected by exchange of notes dated August 25, 1987 and September 11, 1987, between the Governments of the United States and the Socialist Republic of the Union of Burma, establishes a specific limit for cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Category 340/341/640/641/840, produced or manufactured in Burma and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,

Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Textile Agreement, effected by exchange of notes August 25, 1987 and September 11, 1987, between the Governments of the United States and the Socialist Republic of the Union of Burma; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton, man-made fiber, silk blend and other vegetable fiber textiles and textile products in Category 340/341/640/641/840, produced or manufacturd in Burma and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the following level of restraint:

Category	12-mo. limit
340/341/640/641/840	265,00 dozen of which not more than 212,000 dozen shall be in Category 340/640/840.

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balance, shall, be charged against the level of restraint established for such goods during that period. In the event the limit established for that period has been exhausted by previous entries, such goods shall be subject to the level set forth in this directive.

The limit is subject to adjustment in the future pursuant to the provisions of the bilateral textile agreement, which provide, in part, that: (1) growth of 6 percent shall be available in each future year through 1990. Carryover of 11 percent and carryforward of 6 percent shall be available, with the combination of carryover and carryforward not to exceed 11 percent; (2) no carryforward shall be available in the last agreement year.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87–29825 Filed 12–24–87; 8:45 am]

BILLING CODE 3510-DR-M

Announcement of an Import Limit for Certain Cotton Textile Products for El Salvador Effective on January 1, 1988

December 21, 1987.

The Chairman of the Committee of the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Custom sport. For information on embargoes and quota re-openings, please call (202) 377–3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton textiles and textile products in Categories 300/301, produced or manufactured in El Salvador and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the designated level.

Background

The Bilateral Cotton Textile Agreement, effected by exchange of notes dated March 2, 1987 and April 30, 1987, between the Governments of the United States and the Republic of El Salvador, as translated to the new category system, establishes a designated consultation level for certain cotton textile products in Categories 300/301 (carded and combed cotton yarn), produced or manufactured in El Salvador and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customer and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,

Department of the Treasury, Washington, DC 20229.

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton Textile Agreement, effected by exchange of notes dated March 2, 1987 and April 30, 1987, between the Governments of the United States and the Republic of El Salvador; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 300/301, produced or manufactured in the Republic of El Salvador and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of 8,500,000 pounds.

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the level of restraint established for such goods during that period. In the event the limit established for the period has been exhausted by previous entries, such goods shall be subject to the limit set forth in this directive.

The limit set forth above is subject to adjustment in the future according to the provisions of the bilateral agreement, effected by exchange of notes dated March 2, and April 30, 1987, between the Governments of the United States and the Republic of El Salvador, which provide, in part, that administrative arrangements or adjustments may be made to resolve problems arising in the implementation of the agreement.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Announcement of Import Restraint Levels and Guaranteed Access Levels for Certain Cotton and Man-Made Fiber Textile Products From Haiti Effective on January 1, 1988

December 21, 1987.

The Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, and the President's February 20, 1986 announcement of a Special Access Program for textile products assembled in participating Caribbean Basin beneficiary countries from fabric formed and cut in the United States, and pursuant to the requirements set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information, contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry for consumption, or withdrawal from warehouse for consumption, of certain cotton and man-made textile products, produced or manufactured in Haiti and exported during 1988, in excess of the designated twelve-month levels.

In addition, the Commissioner is also directed to establish guaranteed access levels for certain properly certified cotton and man-made fiber textile products which are assembled in Haiti from fabric formed and cut in the United States and exported during the same twelve-month period.

Background

The Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement, effected by exchange of letters dated September 26, and 30, 1986, as amended, between the Governments of the United States and Haiti, and as translated to the new category system, establishes designated consultation levels for Categories 331, 337/637, 340/640, 341/641, 347/348 and 350, exported during the agreement year which begins on January 1, 1988 and extends through December 31, 1988.

In addition to the designated consultation levels, the bilateral agreement also establishes guaranteed access levels for properly certified textile products assembled in Haiti from fabric formed and cut in the United States within Categories 331, 337/637, 340/640, 341/641, 347/348, 349/649 and 350, exported from Haiti during the agreement year which begins on January 1, 1988 and extends through December 31, 1988.

Textile products in Categories 331, 337/637, 341/641, 347/348, 340/640, 349/649 and 350 which are exported from Haiti on or after January 1, 1988, qualifying for the Special Access Program for entry under TSUSA 807.0010, must be accompanied by a properly completed CBI Export Declaration (Form ITA-370P).

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27066) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury
Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of September 26 and 30, 1986, as amended, between the Governments of the United States and Haiti; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption or withdrawal from warehouse for consumption of cotton and man-made fiber textile products in the following categories, produced or manufactured in Haiti and exported during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988, in excess of the following designated levels:

Category	12-Mo. restraint level
331	310,000 dozen pairs.
337/637	180,000 dozen.
340/640	340,000 dozen.
341/641	320,000 dozen.
347/348	350,000 dozen.
350	32,000 dozen.

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

In accordance with the provisions of the Special Access Program, as set forth in 51 FR 21208 (June 11, 1986) and 52 FR 26057 (July 10, 1987), you are directed to establish guaranteed access levels for properly certified cotton and man-made fiber textile products in the following categories which are assembled in Haiti from fabric formed and cut in the United States and exported to the United States from Haiti during the twelve-month period which begins on January 1, 1988 and extends through December 31, 1988.

Category	Guaranteed access level
331	500,000 dozen pairs.
337/637	700,000 dozen.
340/640	480,000 dozen.
341/641	400,000 dozen.
347/348	900,000 dozen.
349/649	2,500,000 dozen.
350	120,000 dozen.

Any shipment for entry under TSUSA 807.0010 which is not accompanied by a valid and correct certification and CBI Export Declaration in accordance with the provisions of the certification requirements established in the directive of February 19, 1987 shall be denied entry unless the Government of Haiti authorizes the entry and any charges to the appropriate designated consultation levels. Any shipment which is declared as TSUSA 807.0010 but found not to qualify for the Special Access Program may be denied entry into the United States.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29631 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DR-M

Announcing Import Restraint Limits for Certain Cotton Textile Products Produced or Manufactured in Nepal Effective on January 1, 1988

December 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Jennifer Tallarico, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry into the United States for consumption, or withdrawal from warehouse for consumption, of cotton textile products in Categories 337, 340, 341 and 342, produced or manufactured in Nepal and exported during 1983, in excess of the designated levels.

Background

The Bilateral Cotton Textile Agreement of May 30 and June 1, 1986 establishes specific import limits for cotton textile products in Categories 337 (playsuits and sunsuits), 340 (non-knit shirts), 341 (non-knit shirts and blouses) and 342 (skirts), produced or manufactured in Nepal and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988. The United States has decided to control these categories at the designated levels.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton Textile Agreement of May 30 and June 1, 1986, between the Governments of the United States and Nepal; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textile products in Categories 337, 340, 341 and 342, produced or manufactured in Nepal and exported during the twelve-month period beginning on January 1, 1988 and extending through December 31, 1988, in excess of the following restraint limits:

Category	12-Mo. restraint limit
337	84,270 dozen.
340	202,248 dozen.
341	674,160 dozen.
342	112,360 dozen.

To the extent that trade which now falls in the foregoing categories is within a category limit for the period January 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this directive.

The limits set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of May 30 and June 1, 1986 between the Governments of the United States and Nepal which provide, in part, that: (1) restraint limits may be exceeded by designated percentages; (2) restraint limits may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement. Any appropriate future adjustments under the foregoing provisions of the bilateral agreement will be made to you by letter.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29626 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DR-M

Announcing Import Restraint Limits for Certain Cotton and Wool Apparel Products Produced or Manufactured in Uruguay Effective on January 1, 1988

December 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 1, 1988. For further information contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of these limits, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit entry for consumption and withdrawal from warehouse for consumption of cotton and wool apparel products in Categories 335, 433, 434, 435 and 442, produced or manufactured in Uruguay and exported during the six-month period which begins on January 1, 1988 and extends through June 30, 1988, in excess of the designated restraint limits.

Background

The Bilateral Cotton and Wool Textile Agreement of December 30, 1983 and January 23, 1984, as amended, between the Governments of the United States and Uruguay, and as translated to the

new category system, establishes specific limits for cotton and wool apparel in Categories 335, 433, 434, 435 and 442, produced or manufactured in Uruguay and exported during the period which begins on January 1, 1988 and extends through June 30, 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

December 21, 1987

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854); pursuant to the Bilateral Cotton and Wool Textile Agreement of December 30, 1983 and January 23, 1984, as amended, between the Governments of the United States and Uruguay; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 1, 1988, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and wool apparel products in the following categories, produced or manufactured in Uruguay and exported during the six-month period which begins on January 1, 1988 and extends through June 30, 1988, in excess of the following restraint limits:

Category	Restraint limit
335	21,500 dozen.
433	1,778 dozen.
434	11,509 dozen.
435	29,225 dozen.
442	15,497 dozen.

To the extent that trade which now falls in the foregoing categories is within a category limit for the period July 1, 1987 through December 31, 1987, such trade, to the extent of any unfilled balances, shall be charged against the levels of restraint established for such goods during that period. In the event the limits established for that period have been exhausted by previous entries, such goods shall be subject to the limits set forth in this directive.

These limits are subject to adjustment in the future according to the provisions of the bilateral agreement, as amended, which provide, in part, that: (1) the specific limits may be adjusted for carryover and carryforward, and (2) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29622 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DR-M

Amendment of an Import Level for Certain Cotton Textile Products Produced or Manufactured in the Dominican Republic

December 21, 1987.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on December 28, 1987. For further information contact Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, please refer to the Quota Status Reports which are posted on the bulletin boards of each Customs port. For information on embargoes and quota re-openings, please call (202) 377-3715.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to increase the import restraint limit for cotton textile products in Category 340, produced or manufactured in the Dominican Republic and exported during the period which began on June 1, 1987 and extends through May 31, 1988, as the designated level.

Background

A CITA directive dated May 18, 1987 (52 FR 19190) established import limits for certain cotton and man-made fiber textile products, including Category 340, produced or manufactured in the Dominican Republic and exported during the twelve-month period which began June 1, 1987 and extends through May 31, 1988.

During consultations held September 21-22, 1987 between the Governments of the United States and the Dominican Republic, agreement was reached to amend their Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 18, 1986, to increase the designated consultation level for Category 340, produced or manufactured in the Dominican Republic and exported during the twelve-month period which began on June 1, 1987 and extends through May 31, 1988.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15173), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Adoption by the United States of the Harmonized Commodity Code (HCC) may result in some changes in the categorization of textile products covered by this notice. Notice of any necessary adjustments to the limits affected by adoption of the HCC will be published in the **Federal Register.**

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 21, 1987.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of May 18, 1987, which directed you to prohibit entry of certain cotton and man-made fiber textile products, produced or manufactured in the Dominican Republic and exported during the twelve-month period which began on June 1, 1987 and extends through May 31, 1988.

Effective on December 28, 1987, the directive of May 18, 1987 is hereby amended to increase the level for cotton textile products in Category 340 to a level of 210,000 dozen.[1]

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29629 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DR-M

Adjustment of Import Restraint Limits for Certain Cotton, Wool and Man-Made Fiber Textile Products Produced or Manufactured in Taiwan; Correction

December 21, 1987.

In the table of the letter to the Commissioner of Customs published in the **Federal Register** on October 27, 1987 (52 FR 41317), the unit of measure for Category 659-I should be corrected to read "pounds", instead of "dozen."

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87-29628 Filed 12-24-87; 8:45 am]

BILLING CODE 3510-DR-M

New Export Visa Arrangement for Certain Textiles and Textile Articles Produced or Manufactured in the Arab Republic of Egypt

December 21, 1987

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on January 15, 1988. For further information contact Pamela Smith, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Summary

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioners of Customs to prohibit entry into the United States (i.e., the 50 States, the District of Columbia and the Commonwealth of Puerto Rico) for consumption, and withdrawal from warehouse for consumption, of certain textiles and textile articles, as specified, for which the Government of the Arab Republic of Egypt has not issued an appropriate export visa.

[1] The limit has not been adjusted to reflect any imports exported after May 31, 1987.

Background

The Governments of the United States and the Arab Republic of Egypt have exchanged letters dated July 14 and November 2, 1987 establishing a new export visa arrangement concerning cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in Egypt.

Effective on January 15, 1988, commercial shipments of textiles and textile articles of cotton, wool and man-made fibers, other vegetable fibers, blends of any of the foregoing fibers and blends containing silk but not including garments which contain 70 percent or more silk by weight, or products other than garments which contain 85 percent of more silk by weight, regardless of value, in Categories 300-369, 400-469, 600-670 and 800-899, exported on or after January 15, 1988 must be accompanied by a valid visa that includes the correct category(s), part category(s), merged category(s), quantity(s) and unit(s) of quantity as described in the letter published below to the Commissioner of Customs.

Merchandise imported for the personal use of the importer and not for resale, regardless of value, and properly marked commercial sample shipments under $250 in total value do not require a visa for entry and shall not be charged to the agreement levels.

A facsimile of the visa stamp has been furnished to the Commissioner of Customs. A copy of the facsimile may be obtained from the Office of Textiles and Apparel, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Room H3100. U.S. Department of Commerce.

Interested persons are advised to take all necessary steps to ensure that textiles and textile articles, as described above, produed or manufactured in Egypt and exported on and after January 15, 1988, which are to be entered or withdrawn from warehouse for consumption into the United States will meet the requirements set forth in this notice.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 21, 1987.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: Under the terms of Section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as further extended on July 31, 1986; pursuant to the export visa arrangement concerning cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, effected by exchange of letters dated July 14 and November 2, 1987, between the Governments of the United States and the Arab Republic of Egypt; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on January 15, 1988, entry into the Customs territory of the United States (i.e., the 50 States, the District of Columbia and the Commonwealth of Puerto Rico) for consumption, and withdrawal from warehouse for consumption, textiles and textile articles of cotton, wool, man-made fiber, other vegetable fibers; blends of any of the foregoing fibers and blends containing silk but not including garments which contain 70 percent or more silk by weight, or products other than garments which contain 85 percent or more silk by weight, regardless of value, in Categories 300-369, 400-469, 600-670 and 800-899, including merged Categories 300/301, produced or manufactured in Egypt and exported on or after January 15, 1988 from Egypt for which the Government of Egypt has not issued an appropriate visa.

A valid export visa must accompany each commercial shipment of the aforementioned textiles and textile articles.

However, should additional categories, merged categories or part categories be added to the bilateral agreement or become subject to import quotas, the entire category or categories shall be automatically included in coverage of the visa arrangement. Merchandise exported on or after the date the category(s) is added to the agreement or becomes subject to import quotas shall require a visa subject to a grace period to establish the required administrative procedures. Notification will be provided when additions or changes are made.

Textiles and textile articles of cotton, wool man-made fibers, other vegetable fibers, blends of any of the foregoing fibers and silk blends exported from Egypt on or after January 15, 1988 shall be visaed by the stamping of the original circular visa in blue ink on the front of the original commercial invoice. The original visa shall not be stamped on duplicate copies of the invoice. The original of the invoice with the original visa stamp will be required to enter the shipment into the United States. Duplicates of the invoice and/or visa may not be used for this purpose.

Each visa stamp shall include the following information:

1. The visa number. The visa number shall be in a standard nine digit letter format, beginning with one numeric digit for the last digit of the year of export, the two character alpha country code specified by the International Organization for Standardization (ISO), (the code for Egypt is "EG") and a six digit numeric serial number identifying the shipment; e.g., 7EG123456.

2. The date of issuance. The date of issuance shall be the day, month and year on which the visa was issued.

3. The signature of the issuing official.

4. The correct category(s), merged category(s), part category(s), quantity(s), and unit(s) of quantity in the shipment in the unit(s) of quantity provided for the U.S. Department of Commerce Correlation and in the U.S. Tariff Schedules of the United States Annotated (TSUSA) (e.g., "Cat. 340–510DZ"). Merged category quota merchandise may be accompanied by either the appropriate merged category visa or the correct category visa corresponding to the actual shipment (e.g., quota Category 300/301 may be visaed as "Cat. 300/301 or, if the shipment consists solely of Category 300 merchandise, the shipment may be visaed as "Cat. 300," but not as "Cat. 301).

A facsimile of the visa stamp is enclosed.

U.S. Customs shall not accept a visa and entry will not by permitted if the shipment does not have a visa, or if the visa number, date of issuance, signature, category, quantity or units of quantity are missing, incorrect or illegible, or have been crossed out or altered in any way. If the quantity indicated on the visa is less than that of the shipment, entry shall not be permitted. If the quantity indicated on the visa is more than that of the shipment, entry shall be permitted and only the amount entered shall be charged.

If the visa is not acceptable to the U.S. Customs, a new visa must be obtained from the Egyptian Government or a visa waiver issued by the Government and presented to the U.S. Customs Service Service before any portion of the shipment will be released. The waiver, if used, only waives the requirement to present a visa with the shipment. It does not waive the quota requirment.

If the visaed invoice is deficient, the U.S. Customs Service will not return the original document after entry, but will provide a certified copy of that visaed invoice for use in obtaining a new correct original visaed invoice, or a visa waiver.

If the quotas are in force, U.S. Customs shall charge only the actual quantity in the shipment and the correct category will be charged to the restraint level. If the shipment from Egypt has been allowed entry into the commerce of the United States with either an incorrect visa or no visa and redelivery is requested but cannot be made, U.S. Customs shall charge the shipment to the correct category limit whether or not a replacement visa or visa waiver is provided.

Any shipment which requires a visa but which is not accompanied by a valid and correct visa in accordance with the foregoing provisions shall be denied entry by U.S. Customs Service unless the Government of Egypt authorizes the entry and any charges to the agreement levels through the visa waiver process.

Merchandise imported for the personal use of the importer and not for resale, regardless of value, and properly marked commercial sample shipments under $250 in total value do not require a visa for entry and shall not be charged to the agreement levels.

The actions taken with respect to the Government of Egypt and with respect to imports of textiles and textile articles of cotton, wool, man-made fiber, other vegetable fiber, blends of any of the foregoing fibers and silk blends from Egypt have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1). This letter will be published in the **Federal Register**.

Sincerely,

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 87–29623 Filed 12–24–87; 8:45 am]

BILLING CODE 3510–DR–M

Request for Public Comment on Bilateral Consultations With the Government of the Dominican Republic

December 21, 1987.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on categories on which consultations have been requested call (202) 377–3740.

On November 30, 1987, the United States Government, in accordance with section 204 of the Agricultural Act of 1956, requested the Government of the Dominican Republic to enter into consultations concerning exports to the United States of cotton knit shirts in Categories 338/339, cotton and man-made fiber skirts in Categories 342/642 and man-made fiber trousers, slacks and shorts in Categories 647/648, produced or manufactured in the Dominican Republic.

The purpose of this notice is to advise that, if no solution is agreed upon in consultations with the Dominican Republic, the Committee for the Implementation of Textile Agreements may later establish limits for the entry and withdrawal from warehouse for consumption of cotton and man-made fiber products in Categories 338/339, 342/642 and 647/648, produced or manufactured in the Dominican Republic and exported to the United States during the twelve-month period which began on November 30, 1987 and extends through November 29, 1988, at levels of 486,916 dozen for Categories 338/339; 322,465 dozen for Categories 342/642 and 682,777 dozen for Categories 647/648.

Summary market statements for these categories follow this notice.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 26, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), July 14, 1986 (51 FR 25386), July 29, 1986 (51 FR 27068) and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1987).

Anyone wishing to comment or provide data or information regarding the treatment of Categories 338/339, 342/642 and 647/648 or to comment on domestic production or availability of textile products included in the categories, is invited to submit such comments or information in ten copies to Mr. James H. Babb, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230.

Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room H 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

The United States remains committed to finding a solution concerning these categories. Should such a solution be reached in consultations with the Government of the Dominican Republic, further notice will be published in the **Federal Register**.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

Dominican Republic—Market Statement

Category 338/339—Cotton Knit Shirts and Blouses

November 1987.

Summary and Conclusions

U.S. imports of Category 338/339 from the Dominican Republic were 486,916 dozen during the year ending August 1987, double the 246,361 dozen imported a year earlier. During the first eight months of 1987, imports of Category 338/339 from the Dominican Republic reached 359,848 dozen, two times the 165,599 dozen imported during the same period of 1986 and 23 percent above the total imported in calendar year 1986.

The market for Category 338/339 has been disrupted by imports. The sharp and substantial increase in imports from the Dominican Republic has contributed to this disruption.

U.S. Production and Market Share

U.S. production of cotton knit shirts and blouses has been on the decline, dropping from 24.6 million dozen in 1982 to a depressed 19 million dozen in 1985, a decline of 23 percent. Production in 1986 partially recovered from 1985, reaching 20.4 million dozen, but remained 12 percent below the 1984 level and 16 percent below the 1983 level. The domestic manufacturers' share of the market dropped 19 percentage points in four years, falling from 63 percent in 1982 to 44 percent in 1986.

U.S. Imports and Import Penetration

U.S. imports of Category 338/339 grew from 14.6 million dozen in 1982 to 25.5 million dozen in 1986, a 74 percent increase. During the first eight months of 1987 imports of Category 338/339 reached 22 million dozen, 28 percent above the level imported during the same period in 1986. The ratio of imports to domestic production more than doubled, increasing from 60 percent in 1982 to 125 percent in 1986.

Duty-Paid Value and U.S. Producers' Price

Approximately 66 percent of Category 338/339 imports from the Dominican Republic during the first eight months of 1987 entered under TSUSA numbers 361.0240—men's and boys' cotton knit shirts, excluding T-shirts and tank tops, ornamented; 361.4130—men's and boys' cotton knit shirts, excluding T-shirts, sweatshirts, and tank tops, not ornamented; 384.2815—women's cotton knit blouses, excluding tank tops, not ornamented; and 384.2980—infants' (excluding infant boys' over 24 months of age) cotton knit shirts, excluding T-shirts and sweatshirts, not ornamented. These garments entered the U.S. at duty-paid landed values below U.S. producers' prices for comparable garments.

Dominican Republic—Market Statement

Category 342/642—Cotton Knit and Man-made Fiber Skirts

November 1987.

Summary and Conclusions

U.S. imports of Category 342/642 from the Dominican Republic were 322,465 dozen during the year ending August 1987, more than two times the 134,817 dozen imported a year earlier. During the first eight months of 1987, imports of Category 342/642 from the Dominican Republic reached 227,758 dozen, double the 109,682 dozen imported during the same period of 1986, 11 percent above the total imported in calendar year 1986, and nearly three times the 80,265 dozen shipped in calendar year 1985.

The market for Category 342/642 has been disrupted by imports. The sharp and substantial increase in imports from the Dominican Republic has contributed to this disruption.

U.S. Production and Market Share

U.S. production of cotton and man-made fiber skirts has been on the decline, dropping from 9,101 thousand dozen in 1982 to a depressed 7,940 thousand dozen average during 1984 and 1985, a decline of 13 percent. Production in 1986 partially recovered reaching 8,128 thousand dozen, but remained below the 1983 level and was 11 percent below the 1982 level. The domestic manufacturers' share of the market dropped 25 percentage points in just four years, falling from 83 percent in 1982 to 58 percent in 1986.

U.S. Imports and Import Penetration

U.S. imports of Category 342/642 at 5.995 thousand dozen in 1986 was more than three times the amount imported in 1982. Category 342/642 imports increased 33 percent during the first eight months of 1987 over January-August 1986. The ratio of imports to domestic production nearly quadrupled increasing from 20 percent in 1982 to 74 percent in 1986.

Duty-Paid Value and U.S. Producer's Price

Approximately 80 percent of Category 342/642 imports from the Dominican Republic during the first eight months of 1987 entered under TSUSA numbers 384.5251—women's cotton woven skirts, not of corduroy, denim or velveteen, not ornamented and 384.9445 women's man-made fiber woven skirts, not ornamented. These skirts entered the U.S. at landed duty-paid values below U.S. producers' prices for comparable skirts.

Dominican Republic—Market Statement

Category 647/648 Man-made Fiber Trousers, Slacks and Shorts

November 1987.

Summary and Conclusions

U.S. imports of Category 647/648 from the Dominican Republic were 682,777 dozen during the year ending August 1987, 33 percent above the 514,053 dozen imported a year earlier. During the first eight months of 1987, imports of Category 647/648 from the Dominican Republic reached 464,896 dozen, 29 percent above the level imported during the same period of 1986. In 1986 Category 647/648 man-made fiber trouser, slack and short imports from the Dominican Republic were 579,676 dozen; in 1985 imports totaled 412,634 dozen.

The market for Category 647/648 has been disrupted by imports. The sharp and substantial increase in imports from the Dominican Republic has contributed to this disruption.

U.S. Production and Market Share

U.S. Production of man-made fiber trousers, slacks, and shorts had been relatively flat during the 1982 through 1985 period, averaging approximately 40,959 thousand dozen. In 1986, U.S. production dropped to 39,890 thousand dozen, 2.6 percent below the 1982–85 average level. The domestic manufacturers' share of the market declined 6 percentage points between 1982 and 1985, falling from 76 percent in 1982 to 70 percent in 1985. In 1986, the domestic manufacturers' share dropped another 5 percentage points, plunging to 65 percent.

U.S. Imports and Import Penetration

U.S. imports of Category 647/648 grew from 13.2 million dozen in 1982 to 21.7 million dozen in 1986, a 65 percent increase. During the first eight months of 1987 imports of Category 647/648 reached 15.8 million dozen, 5 percent above the level imported during the same period in 1986. The ratio of imports to domestic production increased from 32 percent in 1982 to 55 percent in 1986.

Duty-Paid Value and U.S. Producer's Price

Approximately 71 percent of Category 647/648 imports from the Dominican Republic during the first eight months of 1987 entered under TSUSA numbers 361.9575—men's man-made fiber woven trousers and slacks, not ornamented and 384.9000—women's man-made fiber woven trousers and slacks, excluding those non-woven disposable trousers and slacks designed for use in hospitals, clinics, laboratories, or contaminated areas, not ornamented. These garments entered the U.S. at duty paid landed values below U.S. producers' prices for comparable garments.

BILLING CODE 3510–DR–M

Implementation of 1988 Import Controls and Visa Arrangements Based on the Harmonized System

December 21, 1987.

For Further Inforamtion Contact: Martin J. Walsh International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212.

Pending the implementation of the Harmonized Commodity Code (HCC), the 1988 import restraint limits for textile and apparel products are being published in the **Federal Register** in current category units. However, upon adoption of the HS, the Commissioner of Customs will be directed to convert the units of measure to metric units as indicated below. These directives will not be published in the **Federal Register**.

1. All limits in square yards (syd) or square yards equivalent (sye) shall be converted to square meters (sm) or square meters equivalent (sme), respectively, at the rate of 0.8312736 sm (or sme) per syd (or sye). More simply, multiply the sye times 0.83612736 to obtain the square meters equivalent.

2. All limits in pounds (lbs) shall be converted to kilograms (kg) at the rate of 0.45359237 kg per lb. More simply, multiply the pounds times 0.45359237 to obtain the kilograms.

3. All 7-digit tariff schedule numbers (based on the Tariff Schedules of the United States Annotated-TSUSA) referred to in the 1988 import control directives shall be replaced by the appropriate 10-digit Harmonized

Commodity Code tariff schedule number.

Similarly, visa systems, and any changes to visa systems for 1988 already published, will be modified when the HCC goes into effect.

1. Correct units will be sm, sme and kg. instead of syd, sye and lbs, respectively.

2. Seven-digit TSUSA numbers will be replaced by 10-digit HCC tariff schedule number.

James H. Babb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1988; Establishment; Notice Correction

In FR Doc. 87-28208 appearing at page 46925 in the issue for Thursday, December 10, 1987, make the following corrections:

1. On page 46926, second column, under CLASS 1680, Wire Bundle Assemblies, in the fourth line the two-digit number reading "-00" should read "-01".

2. On page 46927, third column, under CLASS 5440, the five-digit number reading "54400-" should read "5440" in all lines under Ladder, Extension (Wood) and under Ladder, Straight (Wood) and the first nine lines under Stepladder. The four-digit number reading "5540-" in the last line under Stepladder should read "5440-".

3. On page 46927, third column, under CLASS 5510, Stake, Wood the first line should read "5510-00-NSH-0001 BLM at 5 Oregon".

4. On page 46929, second column, under CLASS 7210, Boxspring, fifth and sixth lines, the two-digit number reading "-01" should read "-00".

5. On page 46929, second column, the last line in the column, the two-digit number reading "-01" should read "-00".

6. On page 46932, first column, near the botton of the column under Paper, Looseleaf, Ruled, in the seventh line, the three-digit number reading "-286" should read "-196".

7. On page 46934, second column, under CLASS 8340, Line, Tent, in the seventh line, the four-digit number reading "-9789" should read "-9689".

8. On page 46935, first column, third line, the three-digit number reading "-835" should read "-825".

9. On page 46935, first column, fifty-third line, the four-digit number reading "-0552" should read "-0542".

10. On page 46935, third column, under CLASS 8430, Footwear Cover, after the fourth line insert the following as the next line: "8430-01-162-4453".

BILLING CODE 6820-33-M

Procurement List 1988 Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to Procurement List 1988 a commodity to be produced by and service to be provided by workshops for the blind and other severely handicapped.

EFFECTIVE DATE: January 28, 1988.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On October 9, and October 23, 1987, the Committee for Purchase from the Blind and Other Severely Handicapped published notice (52 FR 37819 and 39878) of additions to Procurement List 1988, December 10, 1987 (52 FR 46926).

Additions

After consideration of the relevant matter presented, the Committee has determined that the commodity and service listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77 and 41 CFR 51-2.6. I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the services listed.

c. The action will result in authorizing small entities to provide the commodity and service procured by the Government.

Accordingly, the following commodity and service are hereby added to Procurement List 1988.

Commodity

Cover, Cushion Assembly, 2540-01-245-2524, 2540-01-245-2525, 2540-01-245-2526, 2540-01-246-6212.

Service

Grounds Maintenance, Veterans Administration Medical Center, Palo Alto, California.

C.W. Fletcher,

Executive Director.

[FR Doc. 87-29636 Filed 12-24-87; 8:45 am]

BILLING CODE 6820-33-M

Procurement List 1988 Proposed Additions and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped

ACTION: Proposed additions and deletions to procurement list.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1988 a commodity and services produced or provided by workshops for the blind or other severely handicapped.

DATES: Comments must be received on or before: January 28, 1988.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3509.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following services to Procurement List 1988, December 10, 1987 (52 FR 46926).

Services

Janitorial/Custodial, Federal Supply Service Depot, 4100 W. 76th Street, Chicago, Illinois.

Janitorial Service, U.S. Courthouse, 312 N. Spring Street, Los Angeles, California.

Deletions

It is proposed to delete the following commodity and service from Procurement List 1988, December 10, 1987 (52 FR 46926):

Commodity

Tube, Mailing and Filing, 8110-00-412-4410.

Service

Pallet Repair, Navy Supply Center, Cheatham Annex, Williamsburg, Virginia.

C.W. Fletcher,

Executive Director.

BILLING CODE 6820-33-M

COMMODITY FUTURES TRADING COMMISSION

Chicago Board of Trade Proposed Option Contract

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of availability of the terms and conditions of proposed commodity option contract.

SUMMARY: The Chicago Board of Trade ("CBT" or "Exchange") has applied for designation as a contract market in options on Mortgage-Backed futures. The application also contains a petition for an exemption for the volume requirement for the underlying futures contract specified in the Commission's rules. The Director of the Division of Economic Analysis ("Division") of the Commission, acting pursuant to the authority delegated by Commission Regulation § 140.96, has determined that publication of the proposal for comment is in the public interest, will assist the Commission in considering the views of interested persons, and is consistent with the purposes of the Commodity Exchange Act.

DATE: Comments must be received on or before January 27, 1988.

ADDRESS: Interested persons should submit their views and comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Reference should be made to the CBT Mortgage-Backed futures option contract.

FOR FURTHER INFORMATION CONTACT: Naomi Jaffe, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, (202) 254-7227.

SUPPLEMENTARY INFORMATION: In addition to requesting comment on the terms and conditions of the proposed Mortgage-Backed futures option contract, the Division also is requesting comment on the merits of a petition filed by the CBT pursuant to § 33.11 of the Commission's rules. That petition requests exemptive relief from the trading volume tests set forth in the Commission's rules. In that regard, § 33.4(a)(5)(iii) of the Commission's rules requires, as a condition of designation for proposed options on futures contracts, that the exchange demonstrate that:

> • • • the volume of trading in all contract months for futures delivery of the commodity for which the option designation is sought has averaged at least 3,000 contracts per week on such board of trade for the 12 months preceding the date of application for option contract market designation, or alternatively, that such futures contract market, based on its trading history, substantially meets this total volume requirement in less that the 12 months preceding the date of application: • • •

The Division notes that the CBT's Mortgage-Backed futures contract which will underlie the proposed option contract currently is not listed for trading and is dormant under Commission Regulations § 5.2. No trades have occurred in the contract since September 1986. Pursuant to the requirements in Regulations § 5.2 governing the reactivation of dormant contracts, the Exchange has submitted a proposal to list additional months in that futures contract.[1]

As discussed in more detail in previous **Federal Register** notices (see, for example, 52 FR 41755, October 30, 1987), the Commission has stated that it believes that, at the minimum, a petition may be granted only if the underlying cash market for the commodity exhibits a high level of liquidity. Cash market liquidity would be evidenced by extensive and frequent trading activity, a large number of participants in the market, and tight bid/ask spreads. Further, the terms of the futures contract should ensure the opportunity for arbitrage and close alignment between the cash and futures markets. In combination, the liquidity of the underlying cash market and the opportunities for arbitrage are major factors in determining the extent to which a less liquid futures contract could be disrupted by the exercise of options and the alternatives available to those exercising the options. In addition, to enable position holders to evaluate accurately the value of their option positions in the absence of active trading in the underlying futures contract, the Commission stated its belief that there should exist an accurate and widely available price series which would be representative of values of the commodity underlying the future.[2]

In requesting comment on the CBT's proposed option on Mortgage-Backed futures, the Division is seeking specific comment on whether it should grant the CBT's request for an exemption from the requirements of § 33.4(a)(5)(iii) for the proposed contract. Commenters are requested to consider the issues noted above. Also, commenters are requested to address whether, if the petition were granted, additional surveillance activities and expiration reviews, particularly at the outset of trading, should be implemented by the CBT for the proposed contract.

Copies of the terms and conditions of the proposed contract will be available for inspection at the Office of the Secretariat, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581. Copies of the terms and conditions can be obtained through the Office of the Secretariat by mail at the above address of by phone at (202) 254-6314.

Other materials submitted by the CBT in support of the application for contract market designation may be available upon request pursuant to the Freedom of Information Act (5 U.S.C. 552) and the Commission's regulations thereunder (17 CFR Part 145 (1987)), except to the extent they are entitled to confidential treatment as set forth in 17 CFR 145.5 and 145.9. Requests for copies of such materials should be made to the FOI, Privacy and Sunshine Acts Compliance

[1] The Mortgage-Backed futures contract of the CBT which will underlie the proposed option contract currently is called the GNMA futures contract. In conjunction with its proposal to reactivate this futures contract, the CBT has submitted for Commission consideration a proposal to amend several terms and conditions of the GNMA futures contract, including changes to the cash settlement procedures and the procedures for listing contract months as well as a change in the name to "Mortgage-Backed" futures. Those proposals currently are under review at the Commission. The Division also notes that another mortgage-related futures contract, the GNMA (CDR) futures contract, is currently listed for trading at the CBT.

[2] The Division notes that in those cases where the underlying futures contract fails to develop a sufficient level of trading volume, the option on the futures contract would become subject to the delisting criteria set forth in § 5.4 of the Commission's rules. Specifically, if the volume in the underlying futures contract market falls below an average weekly volume of 1,000 contracts for all months listed for the six-month period following designation of the option contract, no new option contract month may be listed until the volume in the underlying futures contract rises above an average of 2,000 contracts per week for all trading months listed for a period of three consecutive months.

Staff of the Office of the Secretariat at the Commission's headquarters in accordance with 17 CFR 145.7 and 145.8.

Any person interested in submitting written data, views or arguments on the terms and conditions of the proposed futures option contract or the petition, or with respect to other materials submitted by the CBT in support of the application, should send such comments to Jean A. Webb, Secretary, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, by the specified date.

Issued in Washington, DC. on December 22, 1987.

Paula A. Tosini,

Director, Division of Economic Analysis.

BILLING CODE 6351-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Intelligence Agency Scientific Advisory Committee; Closed Meetings

AGENCY: Defense Intelligence Agency Scientific Advisory Committee, DOD.

ACTION: Notice of closed meetings.

SUMMARY: Pursuant to the provisions of subsection (d) of section 10 of Pub. L. 92-463, as amended by section 5 of Pub. L. 94-409, notice is hereby given that closed meetings of a panel of the DIA Scientific Advisory Committee have been scheduled as follows:

DATE: 25 January, 24 February and 23 March 1988 (9:00 a.m. to 5:00 p.m. each day).

ADDRESS: The DIAC, Bolling AFB, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Lieutenant Colonel John E. Hatlelid, USAF, Executive Secretary, DIA Scientific Advisory Committee, Washington, DC 20340-1328 (202/373-4930).

SUPPLEMENTARY INFORMATION: The entire meetings will be devoted to the discussion of classified information as defined in section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. Subject matter will be used in a special study on tactical intelligence information handling systems.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 22, 1987.

[FR Doc. 87-29673 Filed 12-24-87; 8:45 am]

BILLING CODE 3810-01-M

Defense Science Board Task Force on Strategic Arms Reduction Treaty (START) Verification Procedures; Meetings

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board Task Force on Strategic Arms Reduction Treaty (START) Verification procedures will meet in closed session on January 21, 1988 at the Pentagon, Washington, DC.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will review verification aspects with regard to U.S. Programs, facilities, technologies and defense contractors and determine which START verification approaches are most appropriate from the acquisition viewpoint.

In accordance with section 10(d) of the Federal Advisory Committee Act, Pub. L. No. 92-463, as amended (5 U.S.C. App. II, (1982)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1982), and that accordingly this meeting will be closed to the public.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 22, 1987.

BILLING CODE 3810-01-M

Department of the Army

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Public Information Collection Requirement Submitted to the Office of Management and Budget for Review

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of submission; (2) Title of information; Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; and (8) The point of contact for whom a copy of the information proposal may be obtained.

Existing Collection in Use Without an OMB Control Number

Application for US Army ROTC 2 and 3 Year Scholarship; ROTC Cadet Command Form 166-R

The application forms the basis to award 2 and 3 year scholarships. Through the ROTC scholarship program the Army acquires quality young men and women as commissioned officers.

Individuals or Households

Reponses: 5,500.

Burden Hours: 2,750.

OMB Desk Officer: Mr. Edward Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Edward Springer at Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

DoD Clearance Officer: Mrs. Pearl Rascoe-Harrison.

A copy of the information collection proposal may be obtained from Mrs. Pearl Rascoe-Harrison at WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202-4302, telephone 202/746-0933.

Linda Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

December 22, 1987.

BILLING CODE 3810-01-M

DEPARTMENT OF ENERGY

Assistant Secretary for International Affairs and Energy Emergencies

Proposed Subsequent Arrangement

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" pursuant to the Taiwan Relations Act of 1979 (Pub. L. 96-8).

The subsequent arrangement to be carried out under the above-mentioned authority involves approval of the following sale:

Contract Number S-CI-22, for the supply of 21.194 grams of uranium-238 for use as standard reference material.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that this subsequent arrangement will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: December 22, 1987.

George J. Bradley, Jr.,

Principal Deputy Assistant Secretary for International Affairs and Energy Emergencies.

[FR Doc. 87-29571 Filed 12-24-87; 8:45 am]

BILLING CODE 6450-01-M

Economic Regulatory Administration

Proposed Consent Order; Vessels Gas Processing Co. et al

AGENCY: Economic Regulatory Administration. DOE.

ACTION: Notice of proposed consent order and opportunity for comments.

SUMMARY: The Economic Regulatory Administration ("ERA") of the Department of Energy ("DOE") announces a proposed Consent Order with Vessels Gas Processing Company ("VGPC"), Vessels Gas Processing, Ltd ("VGPL") (sometimes collectively referred to as "Vessels") and Halliburton Company ("Halliburton") (all three companies are collectively referred to as the "Firms") for $1,500,000.

DATE: Comments by January 27, 1988.

ADDRESS: Send comments to Vessels Comments, Office of the Solicitor, Economic Regulatory Administration, Department of Energy, 1000 Independence Avenue, SW.,Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT: Jeffrey R. Whieldon, Office of Solicitor (RG-43), Economic Regulatory Administration, 1000 Independence Avenue, SW., Washington, DC 20585. Copies of the proposed Consent Order may be obtained free of charge by writing or calling this office at (202) 586-4235.

SUPPLEMENTARY INFORMATION: On November 3, 1987, the ERA executed a proposed Consent Order with the Firms. Under 10 CFR 205 through 199J(b), a proposed Consent Order which involves the sum of $500,000.00 or more, excluding interest and penalties, becomes effective no sooner than thirty (30) days after publication of a notice in the **Federal Register** requesting comments concerning the proposed Consent Order. Although ERA has signed and tenatively accepted the proposed Consent Order, the ERA may, after consideration of the comments it receives, withdraw its acceptance and, if appropriate, attempt to negotiate a modification of the Consent Order, or issue the Consent Order as signed. DOE's final decision will be published in the **Federal Register**, along with an analysis of and response to the significant comments, as well as any other considerations that were relevant to the decision.

I. Background

The stipulated facts upon which the Consent Order is based are as follows:

During the period covered by this Consent Order VGPC, VGPL, and or Halliburton owned and operated gas plants for the processing of natural gas. Natural gas liquids ("NGLs") and natural gas liquid products ("NGLPs") were produced at and sold from those plants during the period covered by this Consent Order. These sales were subject to the federal petroleum price and allocation regulations, as codified in 10 CFR Parts 205, 210, 211, 212 and prior provisions.

The DOE audited Vessels' and Halliburton's compliance with the federal petroleum rice and allocation regulations. The audit encompassed a review of Vessels' policies and procedures pertaining to, and Vessels' compliance with, the applicable federal petroleum price and allocation regulations, including the reporting requirements incidental to those regulations as they pertain to NGLs and NGLPs processed and sold at the Bennett, Brighton and Irondale plants owned and operated by Halliburton Resource management, a division of Halliburton. In addition, at DOE's request, Vessels prepared and submitted to DOE a substantial number of specific responses to audit inquiries not necessarily limited to, or readily available from, individual books and records.

As a result of this audit the DOE issued a Remedial Order on October 7, 1986, which found that the Firms had overcharged in their sales of propane and NGLs during the period from September 1, 1973 through December 31, 1977, in the amount of $1,571,671.40, plus interest of $2,983,858.55 through September 30, 1986. (15 DOE ¶ 83,002).

The Firms maintain that they calculated costs, determined prices, sold propane and NGLs and operated in all other respects in accordance with the federal petroleum price and allocation regulations. The Firms deny the findings set forth in the Remedial Order and are presently appealing it before the Federal Energy Regulatory Commission.

During negotiations which led to the settlement noticed herein, the Firms proffered arguments on several issues which, if successful, could substantially reduce or eliminate certain of the alleged overcharges. Those areas include prenotification, the allowability of processing fees at the Irondale plant, the definition of "NGL" with respect to the B/G mix, natural gas base price adjustment, and non-product costs adjustment. Additionally, Halliburton continues to contend that it is not liable for any of the overcharges since it neither owned nor sold NGLs or NGLPs.

Based upon an anlaysis of the litigation risks associated with all such arguments, particularly the issue of Halliburton's liability, and a review of the financial condition of VGPL and VGPC, ERA has concluded that a total joint payment of $1,500,000 ($750,000 from the Vessels entities and $750,000 from Halliburton) is a satisfactory compromise of the issues raised in the audit.

II. Consent Order

The proposed Consent Order has been entered into by DOE and the Firms in order to resovle all civil and administrative disputes, claims, and causes of action by DOE against the Firms relating to their compliance with the Federal petroleum price and allocation regulations during the period January 1, 1973 through January 27, 1981. Although the Firms contend that in all respects they correctly construed and applied the applicable regulations, they have entered into this proposed Consent Order to avoid possible further expenses and disruption of business. DOE believes the proposed Consent Order is in the public interest and provides a satisfactory resolution of the issues raised by the audit.

III. Refunds

Under the terms of the Consent Order Halliburton is required to pay the sum of $750,000.00 within thirty (30) days of the effective date of the Consent Order.

VGPL is required to pay the sum of $250,000.00 plus interest at the rate of 7.5% on any unpaid principal amount as follows: $25,000 on or before thirty (30) days after the effective date of the Consent Order; $10,000 per month for a period of twenty-four months, the first monthly payment due sixty (60) days after the effective date of the Consent Order; and a final payment in the twenty-fifth month of $3,243.62.

VGPC is required to pay the sum of $500,000.00 plus interest at 7.5% on any unpaid principal amount as follows: $5,000 on or before thirty (30) days after the effective date of the Consent Order; $10,000 per month for a period of fifty-

nine months, the first monthly payment due sixty (60) days after the effective date of the Consent Order; and a final payment in the sixtieth month of $4,109.58.

DOE will petiton the Office of Hearings and Appeals for distribution of the settlement amount pursuant to the special refund procedures of 10 CFR Part 205, Subpart V.

IV. Submission of Written Comments

Interested persons are invited to submit written comments concerning the terms and conditions of this proposed Consent Order to the address given above. The ERA will consider all comments it receives by 4:30 p.m., local time, on the 30 day after the date of publication of this notice. Any information or date considered confidential by the person submitting it must be identified as such in accordance with the procedures in 10 CFR 205.9(f).

Issued in Washington, DC, on this 17th day of December, 1987.

Marshall A. Staunton,

Administrator, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ST88-1-000 et al.

Arkansas Western Gas Co. et. al.; Self-Implementing Transactions

December 22, 1987

Take notice that the following transactions have been reported to the Commission as being implemented pursuant to Part 284 of the Commission's Regulations, and sections 311 and 312 of the Natural Gas Policy Act of 1978 (NGPA). [1]

The "Recipient" column in the following table indicates the entity receiving or purchasing the natural gas in each transaction.

The "Part 284 Subpart" column in the following table indicates the type of transaction. A "B" indicates transportation by an interstate pipeline on behalf of an intrastate pipeline or a local distribution company pursuant to § 284.102 of the Commission's Regulations and section 311(a)(1) of the NGPA.

A "C" indicates transportation by an intrastate pipeline on behalf of an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.122 of the Commission's Regulations and section 311(a)(2) of the NGPA. In those cases where Commission approval of a transportation rate is sought pursuant to § 284.123(b)(2), the table lists the proposed rate and the expiration date of the 150-day period for staff action. Any person seeking to participate in the proceeding to approve a rate listed in the table should file a petition to intervene with the Secretary of the Commission.

A "D" indicates a sale by an intrastate pipeline to an interstate pipeline or a local distribution company served by an interstate pipeline pursuant to § 284.142 of the Commission's Regulations and section 311(b) of the NGPA. Any interested person may file a complaint concerning such sales pursuant to § 284.147(d) of the Commission's Regulations.

An "E" indicates an assignment by an intrastate pipeline to any interstate pipeline or local distribution company pursuant to § 284.163 of the Commission's Regulations and section 312 of the NGPA.

A "G" indicates transportation by an interstate pipeline on behalf of another interstate pipeline pursuant to § 384.222 and a blanket certificate issued under § 284.221 of the Commission's Regulations.

A "G" indicates transportation by an interstate pipeline company on behalf of any shipper pursuant to § 284.223 and a blanket certificate issued under § 284.221 of the Commission's Regulations or pursuant to blanket certificate authority granted under § 284.225 of 284.226 of the Commission's Regulations.

A "G(LT)" or "G(LS)" indicates transportation, sales or assignments by a local distribution company on behalf of or to an interstate pipeline or local distribution company pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

A "G(HT)" or "G(HS)" indicates transportation, sales or assignments by a Hinshaw Pipeline pursuant to a blanket certificate issued under § 284.222 of the Commission's Regulations.

Any person desiring to be heard or to make any protest with reference to a transaction reflected in this notice should on or before January 8, 1988, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NW., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211). All protests filed with the Commision will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants party to a proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Lois D. Cashell,

Acting Secretary.

[1] Notice of transactions does not constitute a determination that comply with commission regulations in accordance with order No. 436 (final rule and notice requesting supplemental comments, 50 FR 42,372, 10/18/85).

[2] The intrastate Pipeline has sought commission approval of its transportation rate pursuant to section 284.125(B)(2) of the commission's regulations (18 CFR 284.125(B)(2)). Such rates are deemed fair and equitable if the commission does not take action by the date indicated.

[Docket No. ER88-144-000]

Boston Edison Co.; Filing

December 21, 1987

Take notice that on December 17, 1987, Boston Edison Company (Edison) tendered for filing supplemental Exhibits A to a Service Agreement for Braintree Electric Light Department (Braintree), Hingham Municipal Light Department (Hingham), Hull Municipal Light Department (Hull) and Reading Municipal Light Department (Reading) under its FERC Electric Tariff, Original Volume No. III, Non-Firm Transmission Service (Tariff). The Exhibits A specify the amount and duration of transmission service required by Braintree, Hingham. Hull and Reading under the Tariff.

Edison requests waiver of the Commission's notice requirements to permit the Exhibits A to become effective as of the commencement date of the transaction to which they relate, November 1, 1987.

Edison states that it has served the filing on Braintree, Hingham, Hull, Reading and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 4, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

Richard D. Hill; Filing

December 21, 1987.

Take notice that on December 17, 1987, Richard D. Hill filed an application pursuant to section 305(b) of the Federal Power Act for Commission authorization to hold concurrently the following positions:

Position	Name of corporation	Classification
Director	Boston Edison Company.	Public Utility
Director	John Hancock Mutual Life Insurance Company.	Mutual Life Insurance Company

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 4, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. ER88-142-000]

Michigan Power Co.; Filing

December 21, 1987.

Take notice that on December 17, 1987, Michigan Power Company (Michigan Power) tendered for filing proposed changes in its electric resale rate schedules presently on file with the Commission which are applicable to the City of Dowagiac, Michigan and the Village of Paw Paw, Michigan. The proposed change in resale rates will decrease Michigan Power's annual revenues from the City of Dowagiac by $24,998 and from the Village of Paw Paw by $27,723 based on the twelve month period ended December 31, 1986. These reductions are in addition to the Tax Reform Act of 1986-related rate reductions accepted for filing by the Commission in docket No. ER86-66-000. The purpose of the present rate change filing is to pass through to the City of Dowagiac and the Village of Paw Paw a reduction, proposed by Indiana Michigan Power Company in Docket No. ER88-30-000, in the wholesale electric rates paid by Michigan Power to Indiana Michigan Power Company.

Michigan Power requests that this rate change be made effective as of December 22, 1987.

Copies of the filing were served upon the City of Dowagiac, the Village of Paw Paw and the Michigan Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before January 4, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. RP88-15-000]

Mid Louisiana Gas Co.; Compliance Filing

December 21, 1987.

Take notice that Mid Louisiana Gas Company (Mid Louisiana) on Dec. 17, 1987, tendered for filing as a part of First Revised Volume No. 1 of its FERC Gas Tariff the following Tariff Sheet to become effective November 1, 1987:

First Revised Sheet No. 26j

Mid Louisiana states that the purpose of this filing is to state Mid Louisiana's intent not to recover any annual charges recorded in FERC Account No. 928 in a section 4 Rate Case.

Copies of this filing have been mailed to Mid Louisiana's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before December 29, 1987. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Acting Secretary.

[FR Doc. 87-29579 Filed 12-24-87; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP88-102-000 et al.]

Williams Natural Gas Co. et al.; Natural Gas Certificate Filings

December 22, 1987.

Take notice that the following filigs have been made with the Commission:

1. Williams Natural Gas Company

[Docket No. CP88-102-000]

Take notice that on December 2, 1987, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74102, filed in Docket No. CP88-102-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon by reclaim, sale, and in place the Chase Central, Braman and Peckham compressor stations in Kay County, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Specifically, WNG states that it seeks to abandon by reclaim the 250 horsepower Chase Central compressor station and appurtenant facilities, to abandon by sale to Chase Gathering Systems, Inc. (Chase Gathering) the underground piping and appurtenant facilities at the Braman compressor station, and to abandon in place the underground piping and appurtenant facilities at the Peckman compressor station. WNG explains that the 600 horsepower units at Braman and Peckham are rental units and will be returned Halliburton Resources, Inc. WNG also states that the total reclaim costs are estimated to be $34,270 with an estimated salvage value of $37,810 and a sales price of $75,000.

WNG has notified Chase Gathering that it is no longer economic for WNG to continue to compress the gas, and therefore Chase Gathering has agreed to compress the gas for deliver hereunder, contingent upon WNG receiving abandonment approval from the Commission, it is asserted.

WNG concludes that this abandonment would cause no change in flow of or decrease in gas deliveries.

Comment Date: January 12, 1988, in accordance with Standard Paragraph F at the end of this notice.

2. Tennessee Gas Pipeline Company; a Division of Tenneco Inc.

[Docket No. CP88-121-000]

Take notice that on December 9, 1987, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP88-121-000 pursuant to § 284.223 of the Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) for authorization to provide a transportation service for Tenngasco Corporation (TGC) for King Oil & Gas Company, under the blanket certificate issued in Docket No. CP87-115-000, pursuant to section 7 of the NGA, all as more fully set forth in the request on file with the Commission and open to public inspection.

Tennessee states that pursuant to a transportation agreement dated October 18, 1987, it proposes to transport natural gas for TGC, as agent for King Oil & Gas Company, from various points of receipt located offshore Texas, offshore Louisiana, and the states of Texas, Louisiana, Mississippi, Ohio, New Jersey, New York, Massachusetts, Pennsylvania, Alabama, West Virginia, Connecticut, Kentucky and Arkansas. The delivery point is located at Tennessee Meter No. 16247, Markham, Matagorda County, Texas, located at an interconnection between Tennessee and National Fuel Gas Distribution Corporation (NFGD), the downstream transporter. The ultimate consumers of the gas are various endusers off of NFGD's system, it is stated.

Tennessee further states that the peak day quantities would be 200,000 dekatherms (dt), the average daily quantities would be 1,830 dt, and that the annual quantities would be 667,950 dt. Service under § 284.223(a) commenced November 2, 1987, as reported in Docket No. ST88-925 (filed November 25, 1987).

Comment Date: February 5, 1988, in accordance with Standard Paragraph G at the end of this notice.

3. Mississippi River Transmission Corporation

[Docket No. CP88-124-000]

Take notice that on December 9, 1987, Mississippi River Transportation Corporation (MRT), 9900 Clayton Road, St. Louis, Missouri 63124, filed in Docket No. CP88-124-000 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon the purchase of gas from United Gas Pipe Line Company (United), all as more fully set forth in the application, which is on file and open to public inspection.

MRT states that it and United are parties to a service agreement that expires by its own terms on November 1, 1988. It is further stated that such agreement was executed on February 18, 1986 as the result of a settlement and Commission order approving the settlement in Docket No. RP84-87-000. The settlement order, it is indicated, authorized United to provide sales serve to MRT with a maximum daily quantity (MDQ) of 524,000 Mcf per day. MRT notes that the 1986 service agreement expires on November 1, 1988, and contains no provision for an extension beyond that date.

MRT asserts that the combination of declining demand for its gas along with the relatively high price of United's gas as compared to other available sources of supply represent compelling arguments for authorizing the proposed abandonment of service. MRT further asserts that any continuation of the service obligations of the 1986 agreement beyond the term of the agreement would only inhibit MRT's ability to service its market requirements competitively and subject MRT and its customers to excessive demand charges based on volumes that far exceed MRT's market requirements.

Comment Date: January 12, 1988, in accordance with Standard Paragraph F at the end of this notice.

4. Transcontinental Gas Pipe Line Corporation

[Docket No. CP88-106-000]

Take notice that on December 4, 1987, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77251, filed in Docket No. CP88-106-000 an application pursuant to section 7(b) of the Natural Gas Act for an order permitting and approving partial abandonment of certain sales services to Philadelphia Electric Company (PECo), all as more fully set forth in the application which is on file and open to public inspection.

Transco states that it entered into a service agreement with PECo dated November 13, 1970, which provided for the sale for resale of a maximum daily quantity of 149,061 Mcf of natural gas per day under Transco's Rate Schedule CD-3. It is indicated that the Commission authorized such service to PECo by various orders issued over a period of many years, the most recent of which was issued July 20, 1970, in Docket No. CP70-193.

Transco asserts that on August 11, 1986, PECo notified Transco of its desire to convert, pursuant to § 284.10 of the Commission's Regulations, 15 percent of its firm sales service to firm transportation under Transco's Rate Schedule FT. It is explained that by order issued February 20, 1987, in Docket No. CP87-37-000, the Commission required Transco to allow such conversion effective November 7, 1986. Transco states that it commenced such firm transportation service for PECo pursuant to such order on August 4, 1987. In the subject application Transco requests authority effective retroactive to November 7, 1986, to partially abandon PECo's current Rate Schedule CD-3 entitlement of 149,061 Mcf per day by a quantity of 22,359 Mcf per day, resulting in a revised Rate Schedule CD-3 contract demand quantity of 126,702 Mcf per day for PECo. The proposed contract demand reduction, it is noted, is consistent with the Commission's February 20, 1987, order mandating the conversion requested by PECo.

Comment Date: January 12, 1988, in accordance with Standard Paragraph F at the end of this notice.

5. Williams Natural Gas Company

[Docket No. CP88-107-000]

Take notice that on December 4, 1987, Williams Natural Gas Company (WNG), P.O. Box 3288, Tulsa, Oklahoma 74101, filed in Docket No. CP88-107-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate an additional delivery point in Newton County, Missouri, for the sale and delivery of gas to the Kansas Power and Light Company (KPL Gas Service) under the authorization issued in Docket No. CP82-479-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

WNG states that KPL Gas Service has requested this additional delivery point as an additional town border meter site to serve new residential and small commercial customers around the Missouri Highway 43 and Interstate 44 interchange southwest of Joplin, Missouri. The projected volume of delivery through these facilities is 2,822 Mcf per year with a maximum peak load of 135 Mcf per day (Mcfd) for the first year increasing to 21,500 Mcf per year with a maximum peak load of 310 Mcfd by the fifth year, it is stated. Total quantities to be delivered to KPL Gas Service under its F, C, and I Rate Schedules would not exceed the total quantities authorized prior to the request, it is stated. It is further stated that the estimated cost of construction is $16,070 to be paid from treasury cash.

WNG states that this change is not prohibited by an existing tariff and that it has sufficient capacity to accomplish the deliveries specified without determent or disadvantage to its other customers.

Comment Date: February 5, 1988, in accordance with Standard Paragraph G at the end of this notice.

6. Williston Basin Interstate Pipeline Company

[Docket No. CP88-114-000]

Take notice that on December 8, 1987, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismark, North Dakota 58501, filed in Docket No. CP88-114-000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (NGA) (18 CFR 157.205) for the authority to construct and operate a new delivery tap, meter and regulator facilities for the delivery of gas to Montana-Dakota Utilities Co. (Montana-Dakota), an existing distributor customer of Williston Basin, under Williston Basin's blanket certificate issued in Docket No. CP82-487-000, *et al.*, (30 FERC ¶61,143 (1985)), pursuant to section 7(c) of the NGA, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Williston Basin proposes to construct and operate a new pipeline tap, meter station and related facilities for the delivery of up to 3,300 Mcf of gas per day, for the account of Cenex Agri-Fuels Co. (Cenex), to Montana-Dakota. Williston Basin states that it transports the gas, which is purchased by Cenex for the manufacture of fertilizer in its Pembina County, North Dakota, plant, under its Rate Schedules S-2 and T-3, pursuant to Commission order issued May 25, 1984, in Docket No. CP83-254-000, *et al.* It is stated that the cost constructing the facilities, estimated at $84,000, will be reimbursed by Montana-Dakota.

Comment Date: February 5, 1988, in accordance with Standard Paragraph G at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Acting Secretary.

BILLING CODE 6717-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3306-8]

Agency Information Collection Activities Under the Office of Management and Budget Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICR is available for review and comment.

FOR FURTHER INFORMATION CONTACT: Carla Levesque at EPA, (202) 382-2740 (FTS 382-2740).

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: 1987 Hazardous Waste Biennial Reporting System: Pilot. (EPA ICR #0976).

Abstract: EPA is requesting OMB clearance to pilot proposed changes to the reporting forms in 15 to 20 volunteering states during the 1987 reporting cycle. Public comment on proposed data items targetted for reporting, as well as on the reporting forms themselves, will be accepted throughout the reporting period, and will be evaluated in preparing formal regulatory proposals during the coming year. Approval for full implementation of the revised reporting system during the 1989 reporting cycle will be requested before the expiration of today's requested pilot cycle approval.

Respondents: States and owners and operators of hazardous waste generators (for full implementation).

Estimated Burden: 155,000 hours on annual basis (for full implementation).

Frequency of Collection: Biennial (for full implementation).

Comments on the abstracts on this notice may be sent to:

Carla Levesque, U.S. Environmental Protection Agency, Office of Standard and Regulation (PM-223), Information and Regulatory Systems Division, 401 M Street., SW., Washington, DC 20460

and

Marcus Peacock, Office of Management and Budget, Office of Information and Regulatory Affairs, New Executive Office Building, (Room 3010), 726 Jackson Place NW., Washington, DC 20503.

Date: December 18, 1987.

Daniel Fiorino,

Director, Information Regulatory Systems Division.

Agency Information Collection Activities Under the Office of Management and Budget Review

AGENCY: Environmental Protection Agency (EPA)

ACTION: Notice.

SUMMARY: Section 3507(a)(2)(B) of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) requires the Agency to publish in the **Federal Register** a notice of proposed information collection requests (ICRs) that have been forwarded to the Office of Management and Budget (OMB) for review. The ICR describes the nature of the solicitation and the expected impact, and where appropriate includes the actual data collection instrument. The following ICRs are available for review and comment.

FOR FURTHER INFORMATION CONTACT: Carla Levesque at EPA, (202) 382-2740 (FTS 382-2740).

SUPPLEMENTARY INFORMATION:

Office of Water

Title: Census of Pesticide Manufacturers. (EPA ICR #1028).

Abstract: EPA is surveying pesticide manufacturers on production, wastewater generation and treatment, and financial data. The information will be used to develop effluent limitation and pretreatment regulations.

Respondents: Manufacturers of pesticide active ingredients.

Estimated Burden: 19,200 hours.

Frequency of Collection: One time.

Title: Pretreatment Program Information Requirements. (EPA ICR #0002).

EPA is requesting renewal of existing requirements; no changes are proposed in this ICR.

Abstract: Industrial users of publicly owned treatment works (POTWS) must monitor their discharges, maintain records, and report to the POTW, State agency or EPA on compliance with applicable standards. POTWS may apply to State/EPA for pretreatment enforcement and removal credit authority. Approved POTWs must retain monitoring records.

Respondents: Businesses and other facilities discharging wastewater to POTWs; State and local governments.

Estimated Annual Burden: 1,046,548 hours

Frequency of Collection: Semi-annually; annually; and on occasion (varies according to the specific requirements).

Comments on the abstracts on this notice may be sent to:

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

December 16, 1987.

The Federal Communications Commission has submitted the following information collection requirements to the Office of Management and Budget for review and clearance under the Paperwork Reduction Act (44 U.S.C. 3501 et seq.).

Copies of the submissions may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on these submissions contact Terry Johnson, Federal Communications Commission, (202) 634-1535. Persons wishing to comment on these information collections should contact J. Timothy Sprehe, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0316.

Title: Section 76.305, Records to be maintained locally by cable system operators for public inspection.

Action: Extension.

Respondents: Businesses (including small businesses).

Frequency of Response: Recordkeeping requirement.

Estimated Annual Burden: 3,816 Recordkeepers; 49,608 Hours.

Needs and Uses: Cable television systems having 1,000 or more subscribers are required to maintain a public inspection file containing certain records. The information is used by Commission staff in field investigations or inspections and by the public to assess a cable system's performance and to ensure compliance with Commission rules and regulations.

OMB Number: 3060-0161.

Title: Section 73.1615, Operation during modification of facilities.

Action: Revision.

Respondents: Businesses (including small businesses).

Frequency of Response: On occasion.

Estimated Annual Burden: 200 Responses; 100 Hours.

Needs and Uses: Licensees of AM, FM, or TV stations are required to notify the Commission or request authority when discontinuing operation or operating with temporary facilities. The information is used by Commission staff to maintain technical records and to ensure that interference is not caused to other stations.

Federal Communications Commission.

William J. Tricarico,

Secretary.

[FR Doc. 87-29604 Filed 12-24-87; 8:45 am]

BILLING CODE 6712-01-M

Public Information Collection Requirements Submitted to the Office of Management and Budget for Review

December 17, 1987.

The Federal Communications Commission has submitted the following information collection requirements to the OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of the submissions may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on these submissions contact Terry Johnson, Federal Communications Commission, (202) 634-7535. Persons wishing to comment on these information collections should contact J. Timothy Sprehe, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0016.

Title: Application for Authority to Construct or Make Changes in a Low Power TV, TV Translator or TV Booster Station.

Form Number: FCC 346.

Action: Revision.

Respondents: Individuals or households, state or local governments and businesses (including small businesses).

Frequency of Response: On occasion.

Estimated Annual Burden: 2,110 Responses; 59,080 Hours.

Needs and Uses: FCC Form 346 is used by licensees/permittees/applicants when applying for authority to construct or make changes in a low power television, TV translator or TV booster broadcast station. The data will be used by FCC staff to determine whether applicants meet the basic statutory requirements and if proposal will cause interference to other authorized broadcast stations.

OMB Number: 3060-0017.

Title: Application for a Low Power TV, TV Translator or TV Booster Station License.

Form Number: FCC 347.

Action: Revision.

Respondents: Individuals or households, state or local governments and businesses (including small businesses).

Frequency of Response: On occasion.

Estimated Annual Burden: 252 Responses; 567 Hours.

Needs and Uses: FCC Form 347 is used by permittees of low power television, TV translator or TV booster stations to apply for a station license. The data is used by FCC staff to confirm that station is built to terms specified in outstanding construction permit. Data is then extracted from FCC 347 for inclusion in the subsequent license to operate the station.

Public Information Collection Requirement Submitted to the Office of Management and Budget for Review

December 18, 1987.

The Federal Communications Commission has submitted the following information collection requirment to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of this submission may be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037. For further information on this submission contact Terry Johnson, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on this information collection should contact J. Timothy Sprehe, Office of Management and Budget, Room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0057.

Title: Application for Equipment Authorization.

Form Number: FCC 731.

Action: Extension.

Respondents: Businesses (including small businesses).

Frequency of Response: On occasion.

Estimated Annual Burden: 9,700 Responses; 232800 Hours.

Needs and Uses: A completed FCC 731 application form, combined with descriptive information, test data, and occasionally a test sample, provides information to determine compliance of the subject equipment to the FCC Rules, thereby controlling interference to radio communications. The data may also be used to aid in enforcement of the FCC Rules.

Federal Commuications Commission.

BILLING CODE 6712-01-M

Common Carrier Public Mobile Services Information; Some Questions and Answers Regarding Dates and Filing Requirements Announced for Acceptance of Applications for Frequency Block B in Cumberland, MD-WV (Mkt. #269) and Hagerstown, MD (Mkt. #257) Cellular Markets

December 18, 1987.

Report No. CL-88-45

By Public Notice, Report No. CL-88-39 (released December 8, 1987) (52 FR 47050; December 11, 1987), we announced the filing dates and requirements for the captioned cellular markets. Several questions have been addressed to us regarding that Public Notice. In order to clear up any problems which may have arisen, the following is provided for further guidance.

Microfiche Envelope Size

It has come to our attention that 5" x 7" is not an "off-the-shelf" envelope size. In order to spare applicants any undue additional expenses, any references to a 5" x 7" envelope should be changed to 5" x 7.5". The five inch by seven and one-half inch envelope should be readily available from any stationery supplier or office supply store.

Full Size Map

The full-size map need not be included in the microfiche copy of the application, but must be present in the original (hard copy) from which the microfiche is made. For microfiching purposes, the reduced map is sufficient.

FAA Notification

Form 401, Schedule B, requires that the applicant's name and the date of FAA notification be entered. In accordance with Public Notice (Report No. CL-88-33, Mimeo No. 726, released November 27, 1987), FAA notification is no longer required at the time of filing. Applicants must still enter their name in the space provided on Schedule B, but should place N/A in the space provided for the date of FAA notification. (Or leave it blank).

Transmittal Sheet on Microfiche

Applicants need not include a copy of the completed transmittal sheet on the microfiche copies of the application. As its name indicates, the transmittal sheet provides information necessary to accept, sort and enter the data from the accompanying application.

Archival Quality

Archival quality microfiche for the purposes of cellular filings means the silver halide camera master or a copy made on silver halide film (such as Kodak Direct Duplicating Film). This requirement only applies to the microfiche labeled "Original".

Microfiche Color

The requirement that the microfiche be "black on white" is modified to read "black-appearing on clear transparent". Blue/black film which appears black to the naked eye is acceptable.

Any further questions should be addressed to Andrew Nachby at (202) 632-6450 or 653-5560.

Kevin J. Kelley,

Chief, Mobile Services Division.

BILLING CODE 6712-01-M

Advisory Committee Charter on Advanced Television Service, Formation of Steering Committee for the Advisory Committee, and Announcement of First Meeting of Steering Committee

The Federal Communications Commission has amended the charter for the Advisory Committee on Advanced Television to provide for the establishment of a steering committee to facilitate the management of the Advisory Committee on Advanced Television Service and its subcommittees. The charter (which was printed at 52 FR 38523, October 16, 1987), is amended by revising Paragraph A as follows:

A. *The Committee's Official Designation.*

The Advisory Committee on Advanced Television Service will have no more than twenty-five members and will function as a Parent Committee. These members will be chosen by the Commission so as to obtain diverse and representative viewpoints. The Advisory Committee Chairman will direct the activities of the Committee and Subcommittees and will receive guidance, advice and instructions from the Chairman of the Federal Communications Commission.

The Chairman may establish a Steering Committee composec of the Subcommittee Chairmen and their Vice Chairmen. The purpose of the Steering Committee will be to help the Chairman manage the inter-related activities of the Subcommittees and to oversee various administrative functions of the Advisory Committee.

* * * * *

Pursuant to the newly-amended charter, the Chairman of the Advisory Committee has announced the formation of a managerial Steering Committee.

consisting of himself, the Subcommittee Chairs and Vice-Chairs.

In addition, the Subcommittee Chairs have been added to the list of ex officio members of the Advisory Committee.

The first meeting of the steering committee will be held on January 5, 1988, and will start at 9:00 A.M. in the Commission Meeting Room (Room 856) at 1919 M Street NW., Washington, DC. All interested parties are invited to attend. Because of the critical purpose the Steering Committee will serve in superintending the inter-related activities of the various subcommittees and the critical need for this committee to assume this responsibility as promptly as possible to ensure efficient and timely coordination of the various subcommittees' work, it is necessary to schedule the first meeting in less than 15 days notice.

The agenda for the first meeting will consist of:

1. Chairman's Remarks
2. Organizational and Personnel Matters
3. Voting Procedures
4. Funding
6. Subcommittee reports
7. Other Business
8. Concluding Remarks.

Any questions regarding this meeting should be directed to Mr. William Hassinger at (202) 632-6460 or Mr. Steve Bailey at (202) 632-7793.

Federal Communications Commission.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA-805-DR]

Major Disaster and Related Determinations; Arkansas

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This is a notice of the Presidential declaration of a major disaster for the State of Arkansas (FEMA-806-DR), dated December 17, 1987, and related determinations.

DATED: December 17, 1987.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

Notice: Notice is hereby given that, in a letter dated December 17, 1987, the President declared a major disaster under the authority of the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93-288), as follows:

I have determined that the damage in certain areas of the State of Arkansas from tornadoes on December 14, 1987, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I, therefore, declare that such a major disaster exists in the State of Arkansas.

In order to provide Federal assistance, you are hereby authorized to allocate from funds available for these purposes, such amounts as you find necessary for Federal disaster assistance and administrative expenses.

You are authorized to provide Individual Assistance in the affected areas. You are also authorized to provide Public Assistance in the affected areas, if requested and necessary, and an acceptable State commitment for these purposes is provided. Consistent with the requirement that Federal assistance be supplemental, any Federal funds provided under PL 93-288 for Public Assistance will be limited to 75 percent of total eligible costs in the designated areas.

The time period prescribed for the implementation of section 313(a), priority to certain applications for public facility and public housing assistance, shall be for a period not to exceed six months after the date of this declaration.

Notice is hereby given that pursuant to the authority vested in the Director of the Federal Emergency Management Agency under Executive Order 12148, I hereby appoint Robert D. Broussard of the Federal Emergency Management Agency to act as the Federal Coordinating Officer for this declared disaster.

I do hereby determine the following areas of the State of Arkansas to have been affected adversely by this declared major disaster:

Crittenden County for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

BILLING CODE 6718-02-M

[FEMA-805-DR]

Amendment To Notice of a Major Disaster Declaration, Puerto Rico

AGENCY: Federal Emergency Management Agency.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster for the Commonwealth of Puerto Rico (FEMA-805-DR), dated December 17, 1987, and related determinations.

DATED: December 18, 1987.

FOR FURTHER INFORMATION CONTACT: Neva K. Elliott, Disaster Assistance Programs, Federal Emergency Management Agency, Washington, DC 20472 (202) 646-3614.

Notice: The Notice of a major disaster for the Commonwealth of Puerto Rico, dated December 17, 1987, is hereby amended to included the following area among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of December 17, 1987:

The Municipality of Lajas for Individual Assistance.

(Catalog of Federal Domestic Assistance No. 83.516, Disaster Assistance.)

Julius W. Becton, Jr.,

Director, Federal Emergency Management Agency.

FEDERAL MARITIME COMMISSION

[Fact Finding Investigation No. 17]

Rates, Charges and Services Provided at Marine Terminal Facilities

As indicated in various discussions with the parties to the proceeding, regional hearings and port visits will take place as follows:

January 11, 1988—Visit to Seattle, Washington
January 12—Visit to Tacoma, Washington
January 13—Visit to Portland Oregon
January 15—Hearings commencing at 9:00 a.m. in the "Gold Room", 450 Golden Gate Avenue, San Francisco, California
January 25—Hearings commencing at 9:00 a.m. in Hearing Room #1, 1100 L Street, NW., Washington, DC
January 27—Visit to Charleston, South Carolina
January 28—Visit to Savannah, Georgia
February 4—Visit to Tampa, Florida
February 9—Hearing in Houston, Texas commencing at 9:00 a.m. (Location to be announced)
February 10-11—Visit to New Orleans, Louisiana

The procedure that will be followed at the regional hearings will be a roundtable discussion, on the record, with participants designated by the Investigating Officer. Following the roundtable discussion, testimony will be heard from anyone else wishing to comment or provide evidence relating to the issue in this proceeding. All participants and commentators are urged to prepare written statements in advance that will be entered into the record.

The following issues are to be addressed:

1. Should the Commission continue to regulate marine terminal operators by requiring the filing of tariffs and agreements?
2. If so, should a combined terminal operator/stevedore be regulated in the same manner?
3. Should the Commission seek to regulate stevedoring services that are performed independently from terminal services?
4. Who would benefit, and how, were the Commission to assert jurisdiction over stevedoring services?
5. Who benefits, and how, from the Commission's regulation of terminal services?
6. Is there a meaningful distinction between stevedoring and terminal services? Does the answer to this question depend upon the port, the type of cargo or the method of handling that cargo?
7. Should the Commission attempt to distinguish between terminal services performed for (or billed to) shippers/consignees and those performed for (or billed to) ocean carriers with a view toward regulating one and not the other, or regulating one differently than the other?
8. Should terminal service *agreements* with shippers be regulated in the same manner as terminal service agreements with ocean carriers?
9. Should off-pier terminal operators be regulated in the same manner as those operating terminals adjacent to vessel berths?
10. Does the answer to the previous question depend on the type of services offered at the off-pier facility, or on the identity of the operator?
11. Is antitrust immunity an important factor to consider in determining whether, and how, terminal and/or stevedoring services should be regulated?
12. Should the Commission distinguish among the various types of entities that typically provide terminal/stevedoring services (e.g. public port authorities; private terminal operators; and ocean carriers) in determining whether and how such services should be regulated?
13. Is there a need to change the Commission's definition of terminal services set forth in 46 § 515.6(d)?

The primary purpose of this investigation is to develop facts which will help to answer these questions. All participants and commentators are therefore asked to support their comments and opinions with relevant facts.

Any person who wishes to participate on these regional hearings or to discuss any other matter pertaining to this notice should contact the undersigned or Charles Haslup, Esq. at (202) 523-5723.

Thomas F. Moakley,

Commissioner.

BILLING CODE 6730-01-M

Crowley Maritime Corp.; Filing of Application for Section 16 Exemption

Notice is hereby given that Crowley Maritime Corporation ("Crowley") has applied for an exemption pursuant to section 16, Shipping Act of 1984, 46 U.S.C. app 1715 and the Commission's implementing regulations, 46 CFR 572.301.

Specifically, Crowley, on its own behalf and on behalf of it present and future wholly-owned subsidiaries, seeks an exemption from the filing requirements of section 5, of the Act, 46 U.S.C. app 1704; from the prohibitions of section 10(a) (2) and (3) of the Act, 46 U.S.C. app 1709 (a) (2) and (3), to the extent applicable to agreements between or among Crowley or its subsidiaries; and from the prohibitions of section 10(c) of the Act, 46 U.S.C. app 1709(c) insofar as such prohibitions would apply to activity by, between or among Crowley or its subsidiaries, and insofar as joint action by common carriers is an essential element of the prohibited activity.

As grounds for the requested exemption, Crowley argues that "no regulatory interest is furthered by subjecting Crowley and its wholly-owned subsidiaries to statutory requirements intended to impose regulatory oversight on concerted activities engaged in by separate, competing entities, or intended to prevent separate entities from unfairly using their aggregate economic power." While acknowledging that in most aspects of their operations the various Crowley subsidiaries act through separate entities, it is also argued that they are all parts of a single, common business enterprise acting for the ultimate commercial benefit of Crowley. It is contended that the subsidiaries are not natural competitors, are in fact managed to avoid competition, and are legally incapable of combining or conspiring together in restaint of trade or commerce within the meaning of the antitrust laws.

In order for the Commission to make a thorough evaluation of the application for exemption, interested persons are requested to submit views or arguments on the application no later than February 12, 1988. Responses shall be directed to the Secretary, Federal Maritime Commission, Washington, DC 20573-0001 in an original and 15 copies. Responses shall also be served on counsel for Crowley: William H. Fort, Esq., Kominers, Fort & Schlefer, 1401 New York Avenue, NW., Suite 1200, Washington, DC 20005.

Copies of the application are available for examination at the Washington, DC office of the Commission, 1100 L Street, NW., Room 11101.

Joseph C. Polking,

Secretary.

GENERAL SERVICES ADMINISTRATION

[Wildlife Order 167; 4-D-PA-645A]

Federal Property Resources Service; Portion, Letterkenny Army Depot, Franklin County, PA; Conveyance of Property

Pursuant to section 2 of Pub. L. 537, 80th Congress, approved May 19, 1948 (16 U.S.C. 667c), notice is hereby given that:

1. By deed from the General Services Administration dated September 4, 1987, the property, consisting of 214.12 acres of unimproved land, known as a portion of the Letterkenny Army Depot, Franklin County, Pennsylvania (4-D-PA-645A), has been transferred to the Commonwealth of Pennsylvania Game Commission.

2. The above described property was conveyed for wildlife conservation in accordance with the provisions of section 1 of said Pub. L. 80-537 (16 U.S.C. 667b), as amended by Pub. L. 92-432.

Dated: December 16, 1987.

Earl E. Jones,

Commissioner, Federal Property Resources Service.

BILLING CODE 4160-15-M

Public Health Service

Privacy Act of 1974; Addition of Routine Use to an Existing System of Records

AGENCY: Public Health Service, HHS.

ACTION: Notice of addition of new routine use to an existing system of records.

SUMMARY: The Public Health Service (PHS) is publishing notice of our intent to add a new routine use for the disclosure of information from the following Privacy Act system of records: 09-15-0045, "Health Resources and Services Administration Loan Repayment/Debt Management Records System, HHS/HRSA/OA.

DATE: PHS invites public comments on the new routine use on or before January 27, 1988. This routine use will become effective without further notice on January 27, 1988, unless we receive comments which would result in a contrary determination.

ADDRESS: Please address comments to the HRSA Privacy Act Coordinator, Department of Health and Human Services, Parklawn Building, Room 14A-20, 5600 Fishers Lane, Rockville, Maryland 20857, telephone (301) 443-3780. This is not a toll-free number.

FOR FURTHER INFORMATION CONTACT: James C. Hargrave, Chief, Debt Management Branch, Health Resources and Services Administration, Department of Health and Human Services, Room 16A-09, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, telephone (301) 443-6344. This is not toll-free number.

SUPPLEMENTARY INFORMATION: HRSA maintains system of records 09-15-0045 to reduce the amount of outstanding debts owed to the Federal Government. The system of records covers individuals who have received student loans, scholarships, traineeships, or grant funds under Titles III, VII, and VIII of the Public Health Service Act as amended, and who are delinquent in repaying either loans or funds owed in lieu of a service obligation under such programs.

The Defense Manpower Data Center (DMDC), Defense Logistics Agency, Department of Defense (DOD), has established and maintained a system of records (S322.11DLA-LZ, Federal Creditor Agency Debt Collection Data Base, 52 FR 37492, October 7, 1987) devoted exclusively to Federal debt collection efforts. At the onset, the system contained a data bank record DOD active and retired military members, including the Reserve, National Guard, and Office of Personnel Management governmentwide Federal civilian and retired civilian records for computer matching purposes with any Federal creditor agency that may wish to avail itself of the opportunity to utilize this resource.

The proposed statement of routine use will allow HRSA to disclose delinquent debtors records to DMDC in order to obtain the current home or work address of individuals who receive Federal salaries or certain benefit payments resulting from Federal employment. HRSA follows the provisions of the Debt Collection Act of 1982 (Pub. L. 97-365) in seeking voluntary repayment, and does not utilize a computer matching program until it is clear that voluntary repayment will not be forthcoming.

This routine use is compatible with the purpose for which the records were collected.

Dated: December 18, 1987.

Wilford J. Forbush,

Deputy Assistant Secretary for Health Operations and Director, Office of Management.

09-15-0045

SYSTEM NAME:

Health Resources and Services Administration Loan Repayment/Debt Management Records Systems, HHS/HRSA/OA.

A new routine use, number 14, is added as follows:

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

* * * * *

14. HRSA may disclose records of delinquent debtors to the Defense Manpower Data Center, Department of Defense, to conduct matching programs for the purpose of identifying and locating individuals who are receiving Federal salaries or certain benefit payments resulting from Federal employment and are delinquent in their repayment of debts owed to the U.S. Government. These debts arose under programs administered by the Public Health Service. HRSA will disclose this information in an effort to collect the debts by administrative or salary offset, under the provisions of the Debt Collection Act of 1982, (Pub. L. 97-365).

BILLING CODE 4160-15-

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[CO-920-08-4121-02]

Proposed Decision to Lease by Application in the Green River-Hams Fork Federal Coal Production Region, Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: In accordance with the Green River-Hams Fork Regional Coal Team (RCT) recommendation of October 9, 1987, the BLM is proposing a coal leasing by application process within the current Green River-Hams Fork Region.

DATE: Public comments on this process are requested for a 30-day period from the date of publication of this notice. A final decision on the use of the leasing by applications process is anticipated from the Director of BLM by May 1, 1988.

ADDRESSES: Comments should be sent to State Director (CO-921), Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado 80215.

FOR FURTHER INFORMATION CONTACT: Betsy Daniel, Green River-Hams Fork Project Manager, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado 80215, telephone (303) 236-1778 or (FTS) 776-1778.

SUPPLEMENTARY INFORMATION: On October 9, 1987, the Green River-Hams Fork RCT recommended to the Secretary of the Interior through the Director of BLM for approval the following motion:

First, that BLM staff prepare a decision document supporting the lease by application decision which would be published in the **Federal Register** no later than February 1, 1988. The Colorado State Director should be allowed to extend this date for good cause shown.

Second, public comment through the **Federal Register** be solicited for no less than 30 days.

Third, the BLM consider and repond to any comments received on the **Federal Register** notice and this RCT recommendation before a final decision is made on the lease by application mode request.

Fourth, a final decision on the lease by application mode be made by the BLM Director no later that May 1, 1988.

Fifth, by June 15, 1988, BLM staff should prepare operating procedures to use under the lease by application mode which will insure that consultation occurs in an early, thorough, and effective manner. The procedures should also include guidelines which would provide the RCT with early indicators that the group should consider operating under the regional activity planning and sale mode.

This **Federal Register** notice is the decision document and the request for public comment pursuant to the first two parts of the above motion. The Director's decision, in accordance with the third part of the motion, will be based on any public comments received during this 30-day period, as well as this RCT recommendation to pursue leasing on application in the Green River-Hams Fork region.

BLM requests that public comments address not only the lease by application mode but also provide suggestions for the operating procedures anticipated by the fifth part of the above motion.

Leasing by application will necessitate decertification of the Green River-Hams Fork coal production region in order to conform with the leasing by application regulations in 43 CFR 3425.1-5. However, the Green River-Hams Fork RCT wil continue to provide oversight to the lease by application process within the original regional boundaries. Specifically, during leasing by application, the RCT will:

(1) Serve as the forum for consultation and Federal-State cooperation in all major coal management decisions in the region, including leasing by application, preference right leasing, and exchanges;

(a) Review all leasing applications, PRLA actions and exchange proposals, and call RCT meetings, as necessary, to fully and openly discuss and make recommendations on any that appear to have significant regional implication.

(b) On activities that appear to have significant regional implications, solicit and consider, to the maximum extent possible, the views of the public at each decision point.

(2) Provide, on an annual basis, advice to the Federal-State Coal Advisory Board on regional coal planning, schedules and possible environmental, social, and economic consequences and serve as the State Director's major forum for Federal-State regional conflict resolution so that both Federal and State concerns are given the proper consideration.

(3) Guide the preparation of EISs on coal leasing actions that appear to have significant regional implications.

(4) Consider, from a regional perspective, comprehensive land use plans to be used for coal activities to determine data strengths and weaknesses and to identify additional data requirements and unresolved issues to be addressed during subsequent coal actions.

(5) On an annual basis, review market assessments prepared by the Bureau and requested by the RCT and recommend whether the region should return to a regional activity planning mode.

Tom Walker,

Associate State Director.

Dated: December 31, 1987.

BILLING CODE 4310-08-M

[CO-920-08-4121-2]

Availability of the Draft Environmental Impact Statement for the James Creek Coal Preference Right Lease Application

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of an additional public comment period on the Draft Environmental Impact Statement (EIS) and Draft Amendment to the White River Management Framework Plan (MEP) for the James Creek Coal Preference Right Lease Application (C-0126998).

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969 and the regulations at 43 CFR 1600, notice is hereby given that the Bureau of Land Management is reopening the public comment period on the Draft EIS and MFP Amendment on the James Creek Preference Right Lease Application (PRLA) of Rio Blanco County, Colorado, for an additional 30-day public comment period. The public comment on this Draft EIS and MFP Amendment is being reopened in order to give the public an opportunity to comment on the analysis in light of regulations, concerning the processing of coal preference right lease applications (43 CFR 3430), published in the **Federal Register**, Vol. 52, No. 130, pages 25793 through 25800, July 8, 1987. The White River MFP Amendment documents land use planning decisions for the PRLA and several adjacent federal coal leases. All comments previously received will be considered and do not need to be resubmitted.

DATES: Written comments on the Draft EIS must be postmarked or delivered in person to the Craig District Office (at the address given below) not later than February 5, 1988, to be considered in the final EIS and MFP Amendment.

ADDRESS: Written comments on the document should be addressed to: Greg Goodenow, Project Manager, Bureau of Land Management, Craig District Office, 455 Emerson, Craig, Colorado 81625-1129; telephone (303) 824-8261.

Availability: Single copies of the Draft EIS are available from the craig District BLM Office (address and phone above).

FOR FURTHER INFORMATION CONTACT: Greg Goodenow, Bureau of Land Management, Craig District Office, 455 Emerson, Craig, Colorado 81625-1129; telephone (303) 824-8261.

SUPPLEMENTARY INFORMATION: This Draft EIS describes and analyzes the environmental impacts of the proposed leasing of Preference Right Lease Application (PRLA) C-0126998 located about 9 miles northeast of Meeker, Colorado, in Rio Blanco County, and in the Craig District, Bureau of Land Management. It also serves as the analysis for amending the White River Resource Area Management Framework Plan, by applying the unsuitability criteria (43 CFR Part 3460) and making multiple use decisions for the PRLA area and several adjacent federal coal leases.

This Draft EIS was previously made available for public review on November 22, 1985. The previous public comment period was from November 22, 1985, through February 24, 1986. Subsequently, the BLM published revised regulations at 43 CFR 3430 (52 FR, Wednesday, July 8, 1987) that changed the procedures for processing PRLAs. The public comment period is being reopened for an additional 30 days to allow the public an opportunity to judge the adequacy of the DEIS relative to the new processing procedures.

All public comments received in writing or at the public meetings during the November 22, 1985, to February 24, 1986, public comment period will be considered and do not need to be resubmitted. All additional comments

must be in writing and postmarked or delivered in person to the Craig District Office not later than February 5, 1988, to be considered in the final EIS.

Tom Walker,

Associate State Director.

Dated: December 21, 1987.

BILLING CODE 4310-JB-M

Nevada; Las Vegas District Advisory Council; Meeting

ACTION: Las Vegas District Advisory Council meeting.

Notice is hereby given in accordance with Pub. L. 92-463, that a meeting of the Bureau of Land Management, Las Vegas District Advisory Council will be held January 19 and 20, 1987, in Mesquite, Nevada.

The January 19th meeting will begin at 7:00 p.m. in the conference room, Pepperill's Western Village Hotel. This is an "open house" meeting, and is designed to allow members of the public the opportunity to discuss public lands issues with members of the Advisory Council and BLM representatives in an informal manner.

The meeting on January 20, 1987 will begin at 8:30 a.m. and will also be held in the conference room of the Peppermill's Western Village Hotel and Casino, Mesquite, Nevada. The meeting agenda will include the following:

1. Agenda Approval and Review of Previous Meeting Minutes
2. Project Land Needs for Growth and Development of City of Mesquite, Nevada—Presentation by Paul Henderson, City Manager Mesquite, Nevada
3. Update Report on Aerojet Exchange
4. Discussion of Nevada Land Exchange (Forest Enhancement Act)
5. Wilderness Briefing
6. Update on Monitoring of Grazing Allotments
7. Unfinished Business
8. Additional Items
9. Public Comments.

Both meetings are open to the public. Persons wishing to make oral statements to the Council, during the January 20th meeting, should notify the District Manager, Bureau of Land Management, Las Vegas District Office, P.O. Box 26569, Las Vegas, NV 89126, by January 15, 1987. Depending on the number of persons wishing to make oral statements, a per-person time limit may be established by the Council Chairman. Summary minutes of the meeting will be maintained in the BLM Las Vegas District Office.

Ben F. Collins,

District Manager.

BILLING CODE 4310-HC-M

[CA-050-4212-13; CA 20077]

Realty Action; Exchange; Public Lands and Private Lands in Butte County, Lake County, Mendocino County, Siskiyou County, Sonoma County, and Tehama County, CA

SUMMARY: The following described public lands have been determined to be suitable for disposal under section 206 of the Federal Land Policy and Management Act of October 21, 1976 (90 Stat. 2756).

Mount Diablo Meridian

Tract 1 T. 14 N., R. 13 W.
Sec. 34, NE¼NW¼;
Tract 2 T. 15 N., R. 14 W.
Sec. 13, S½NE¼;
Tract 3 T. 15 N., R. 14 W.
Sec. 13, S½NW¼;
Tract 4 T. 22 N., R. 2 E.
Sec. 10, SE¼NE¼;
Tract 5 T. 24 W., R. 2 E.
Sec. 32, NE¼NE¼;
Tract 9 T. 42 W., R. 5 W.
Sec. 16, SW¼NE¼;
Tract 10 T. 42 N., R. 5 W.
Sec. 16, W½SW¼NE¼NE¼SE¼, W½NE¼SE¼, W½SE¼NE¼SE¼;
Tract 11 T. 9 N., R. 11 W.
Sec. 26, S½NW¼.

Mr. T. J. Nelson, P.O. Box 2678, Santa Rosa, California 95405, acting for Carolyn Henderson and Katherine Petterson, has applied to acquire the above described public lands in exchange for the following described privately owned lands:

Mount Diablo Meridian

Tract 13 N., R. 6 W.
Sec. 16, S½S½.
Containing 160 acres more or less.

SUPPLEMENTARY INFORMATION: A mineral evaluation has been completed on the public lands. Tracts 2 through 5 were found to be prospectively valuable for oil and gas. Tracts 2, 9 and 11 were found to be prospectively valuable for geothermal. Due to their low mineral potential, the minerals on all the tracts will be transferred when patent is issued. The mineral estate on the privately owned lands will be conveyed to the United States.

There will be reserved to the United States in the applied for lands, a right-of-way for ditches and canals constructed by the authority of the United States under the Act of August 30, 1890 (43 U.S.C. 945). There will also be reserved to the United States on Tract 4, a 100 foot wide road Right-of-Way, S-3712, along side of Highway 32.

On Tract 4 there will be reserved to Pacific Bell a 20-foot wide telephone tine under right-of-way SAC 063433. There will also be a 200-foot wide right-of-way under SAC 066448 for State Highway 32, reserved to the State of California under the authority of the Federal Aid to Highway Act.

On Tract 4 the N½N½SE¼NE¼ will be subject to conditions, restrictions and limitations under a covenant that will run with the property. The grantee, his heirs, successors and assigns agree that in the event the land is sold or otherwise disposed of, this covenant will continue with the property and be inserted into the conveyance documents.

On Tract 4 Recreation and Public Purpose application, CA 20422, has been filed by the City of Chico for a bicycle park rest area.

On Tract 10 a 280-foot wide right-of-way under SAC 080196 for Interstate 5 Highway will be reserved to the State of California under the authority of the Federal Aid to Highway Act.

The purpose of this exchange is to acquire lands along Cache Creek in Lake County, California for Bald Eagle habitat and Tule Elk habitat. The Bald Eagle is a Federal and state listed Endangered Species while the Tule Elk is a state protected species.

Publication of this notice in the **Federal Register** shall segregate the applied for public lands from all other forms of appropriation and the public land laws, including the mining laws, for a period of two years. This exchange is expected to be consummated before the end of that period.

FOR FURTHER INFORMATION CONTACT: Bruce Dawson, Acting Clear Lake Area Manager, Bureau of Land Management, 555 Leslie Street, Ukiah, California 95482; Phone: (707) 462-3873. Detailed information concerning the exchange, including the environmental assessment, is available for review.

DATES: For a period of 45 days from the publication of this notice in the **Federal Register**, interested parties may submit comments to the Ukiah District Manager, Bureau of Land Management, 555 Leslie Street, Ukiah, California 95482. Any adverse comments will be evaluated by the California State Director, Bureau of Land Management, who may vacate or modify this realty action and issue a final determination. In the absence of a vacation or modification this realty action will become the final determination of the Bureau.

Date: December 17, 1987.

Alfred W. Wright,

District Manager.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 398]

Cost Recovery Percentage

AGENCY: Interstate Commerce Commission.

ACTION: Publication of 1987 cost recovery percentage.

SUMMARY: Section 202 of the Staggers Rail Act of 1980 requires the Commission to calculate an annual Cost Recovery Percentage (CRP) for all railroad traffic. The CRP is a revenue to variable cost percentage calculated using railroad unit costs and a statistical sample of railroad traffic. If the CRP falls between 170 percent and 180 percent it becomes the jurisdictional threshold for rate regulation of market dominant traffic.

The Commission found that a CRP cannot be calculated using 1985 data because the total fixed plus variable costs of the railroad industry exceeded the industry's total freight revenue. 49 U.S.C. 10709(d)(5)(B). This finding is based on its analysis of expenses and revenues of the U.S. railroad industry. Therefore, in accordance with the Statute it has prescribed a CRP of 342.5 percent which is equal to the CRP last determined by the Commission. Thus, the threshold for rate regulation of market dominant traffic will remain at 180 percent for the period October 1, 1987 to September 30, 1988.

DATES: Comments must be filed January 27, 1988.

FOR FURTHER INFORMATION CONTACT: William T. Bono (202) 275-7354 Robert C. Hasek (202) 275-0938 [TDD for hearing impaired: (202) 275-1721

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call (202) 289-4357/4359 (DC Metropolitan area), (assistance for the hearing impaired is available through TDD services (202) 275-1721, or by pickup from Dynamic Concepts, Inc., Room 2229 at Commission Headquarters).

This action will not significantly affect either the quality of the human environment or energy conservation. It will not have a significant impact on a substantial number of small entities.

Dated: December 14, 1987.

By the Commission, Chairman Gradison, Vice Chairman Lamboley, Commissioners Sterrett, Andre, and Simmons. Commissioner Simmons concurred.

Noreta R. McGee,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Repatriation Review of Mariel Cubans

AGENCY: Department of Justice.

ACTION: Notice.

SUMMARY: Notice is hereby given that the Attorney General has, pursuant to his prosecutorial discretionary authority, established a Repatriation Review Program for Cubans who arrived in the United States during the 1980 Mariel Cuban boatlift to determine which of those found to be excludable from the United States are to be repatriated to Cuba. This Notice is being published in order to give the public information on the Department's activities respecting the deportation of excludable Cuban boatlift participants.

EFFECTIVE DATE: December 11, 1987, the date of public announcement by the Deputy Attorney General.

FOR FURTHER INFORMATION CONTACT: Donald A. Couvillon, Attorney, Office of Immigration Litigation, Civil Division, Telephone (202) 272-4397.

SUPPLEMENTARY INFORMATION: Negotiations between the United States and Cuba conducted pursuant to the President's foreign affairs powers culminated in November 1987 with the announcement of the immediate reimplementation of the migration agreement entered into by the United States and Cuba on December 14, 1984. Implementation of the migration agreement had been suspended since the Government of Cuba unilaterally announced on May 20, 1985, that it would no longer comply with it. The Cuban Government's suspension of implementation was unrelated to any matter covered by the agreement, and was officially explained by the Cuban Government as being in response to the commencement of Radio Marti programming on the Voice of America. This was one of a number of times that the Government of Cuba has unilaterally suspended or cancelled implementation of a valid international agreement for reasons extraneous to the agreement itself.

One of the essential elements of the reinstated agreement is the commitment of the Government of Cuba to accept the return of those persons identified by the INS as excludable when the agreement was reached in December 1984. These Cuban nationals may be returned at only a limited rate, however, averaging about 100 a month. To minimize the additional time that the excludable Cubans who are to be returned to Cuba remain in the United States, it is important to begin returning them under the agreement as soon as possible consistent with fair and orderly review procedures.

The commitments on the part of the United States include resuming the issuance of immigrant visas to Cuban nationals and conducting a small refugee program in Cuba. The United States has taken immediate steps to begin operating an immigrant visa and refugee program consistent with the migration agreement. Until excludable Cubans are actually returned to Cuba, however, it will be unclear whether the Government of Cuba will in turn also perform its part of the agreement.

In light of the agreement of the Governments of Cuba and the United States to reimplement the migration agreement immediately; the limited rate at which the Cuban Government will accept returns of the excludable Cubans; the Cuban Government's previous suspension of this and other international agreements it has entered; and the need for the United States to have some assurance of the Cuban Government's compliance with the agreement as the United States begins performance of its own obligations thereunder, it is imperative that the United States begin returning the excludable Cubans as soon as possible. The prompt implementation of a plan to determine who shall be returned is therefore important to the protection and advancement of United States foreign policy interests.

In addition to serving the important interests described above, review by a repatriation panel will provide each detainee an additional opportunity, with adequate advance notice and with the opportunity for advice and assistance of counsel, at no expense to the government, to explain why he believes he should not be repatriated at this time. Furthermore, because there is urgent need to restore confidence in the procedures culminating in the deportation of an excludable Cuban, the review procedures established by this general statement of policy are effective immediately.

I have therefore concluded that a Mariel Cuban Repatriation Review Program should be effective immediately and that it is not subject to notice and comment rulemaking under the Administrative Procedure Act because the program: (1) Is exempt as a "foreign affairs function of the United States," 5 U.S.C. 553(a)(1); (2) reflects a "general statement of policy," 5 U.S.C. 553(b)(A); (3) constitutes "rules of agency organization, procedure, or practice," 5 U.S.C. 553(b)(A); and (4) there is "good cause" why notice and comment would be "impracticable, unnecessary, or contrary to the public interest," 5 U.S.C. 553(b)(B).

The special review will be conducted to determine whether excludable Mariel Cubans shall be repatriated to Cuba. This process, created pursuant to the prosecutorial discretionary authority of the Attorney General, is in addition to all of the normal administrative and judicial remedies afforded these individuals. Those remedies include a formal determination of excludability and opportunities for relief within the statutory framework of the Immigration and Nationality Act. The normal process includes review before an Immigration Judge, and, if appropriate appeals are pursued, review before the Board of Immigration Appeals, United States District Courts, United States Courts of Appeals, and the Supreme Court.

The following is a procedural outline for the Mariel Cuban Repatriation Review Program.

1. Selection of Cases for Repatriation

A. Only those cases will be considered where the alien: (1) Has received an administratively final order of exclusion; or (2) volunteers to return to Cuba.

B. The Enforcement Branch of the Immigration and Naturalization Service will select cases from among those on the repatriation list based principally on criminal activity. The focus at the outset will be on those cases where the alien is ineligible for relief or where the alien is volunteering to return to Cuba.

2. Review of Case Selection

A. The alien will be sent notification by the Service that the Government intends to repatriate him to Cuba. This notification will also include a questionnaire for the alien to return to the Service within 30 days, and to set forth any reasons why he believes he should not be repatriated. Notification to the alien will also include a statement that he may seek the assistance of counsel, at no expense to the Government, in the preparation of his response.

B. Upon receipt of the alien's submission, or his failure to return the questionnaire within 30 days, attorneys with the Service and the Civil Division will review the case and determine whether to proceed with repatriation efforts.

C. The alien will be notified if it should be decided that repatriation efforts will not be pursued at this time.

D. If it should be decided that repatriation efforts will proceed, attorneys for the Service and the Civil Division will prepare a memorandum summarizing the facts of the case. The alien will then receive from the Government (1) a notice of intent to deport the alien, (2) a translated copy of the Government's memorandum summarizing the facts of the case, and (3) a form provided for the alien to respond to the Government's memorandum, included in which will be notification to the alien that he may seek the assistance of counsel, at no expense to the Government, in the preparation of his response. The alien will be instructed in the materials that any response must be forwarded directly to a Repatriation Review Panel within the time prescribed by the Panel.

E. The memorandum prepared by the Service and the Civil Division attorneys will be forwarded to a Panel along with a copy of relevant file material.

3. Repatriation Review Panels for Excludable Mariel Cubans

A. The Associate Attorney General shall establish one or more Repatriation Review Panels and their procedures and shall supervise the review by the Panels of the cases of excludable Mariel Cubans selected for repatriation to Cuba. Each Panel shall be composed of three members, and shall consist of: (1) The Associate Attorney General, or his designee; (2) the Assistant Attorney General for Civil Rights, or his designee; and (3) the Director of the Community Relations Service, or his designee. A majority is required for decision in each case.

B. A Panel possesses the power to approve the repatriation of an excludable Mariel Cuban to Cuba. The function of a Panel is separate and distinct from the function of the parole review process. Any decision from a Panel will not be determinative as to the retention of the alien in custody or release on parole. The function of a Panel will be confined to the review of cases for repatriation.

C. Decisions will be rendered based on a record review. Oral presentations will not be permitted, unless requested by a Panel in its sole discretion.

D. A Panel will consider only those cases that are presented for repatriation by the Service.

E. The Panel may independently evaluate the detainee's case in making its decision on whether to approve repatriation.

F. If a Panel does not approve repatriation to Cuba, the decision will be issued with the understanding that the case may be presented by the Service at a later date for reconsideration. Should the Service submit the case for reconsideration, all of the procedural aspects listed above willbe repeated.

G. The decision to repatriate is final and subject to no further review.

Edwin Meese III,

Attorney General.

Dated: December 21, 1987.

BILLING CODE 4410-10-M

Lodging of Consent Decree Pursuant to the Clean Air Act; Robert Floyd et al.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on November 16, 1987, a proposed Consent Decree in *United States* v. *Robert Floyd, et al.*, Civil Action No. 86-1449-Civ-T-13, was lodged with the United States District Court for the Middle District of Florida. The Complainant sought penalties and injunctive relief against Robert Floyd under section 203 of the Clean Air Act, 42 U.S.C. 7522, for Mr. Floyd's acts of tampering with, and/or rendering inoperative, automotive emission control devices between January, 1984 and January, 1985.

The proposed Consent Decree imposes a permanent injunction against future violations of section 203 of the Clean Air Act by Mr. Floyd and assesses a civil penalty of $8,000.00. Should Mr. Floyd resume activity in the business of automobile or motor vehicle engine repair, the United States Environmental Protection Agency will have wide latitude to inspect Mr. Floyd's workplace to ensure his continued compliance with the Clean Air Act.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, P.O. Box 7611, Washington, DC 20044. Comments should refer to *United States* v. *Robert Floyd, et al.*, D.J. Ref. 90-5-2-1-991.

The proposed Consent Decree may be examined at the Office of the United States Attorney, Middle District of Florida, Robert Timberlake Building, Room 410, 500 Zack Street, Tampa, Florida 33602 and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1731(R), Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section,

VOL 52 ISS 248 DE 28 1987 UMI

Land and Natural Resources Division of the Department of Justice.

Roger J. Marzulla,

Acting Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

DEPARTMENT OF LABOR

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., Room S-3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the Federal Register are in parentheses following the decisions being modified.

Volume I

Virginia:
VA87-15 (Jan. 2, 1987)..... pp. 1160-1161

Volume II

None.....

Volume III

Arizona:
AZ87-2 (Jan. 2, 1987)..... p. 16

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the Country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 18th day of December 1987.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

Occupational Safety and Health Administration

Federal Advisory Council on Occupational Safety and Health; Meeting

Notice is hereby given that the Federal Advisory Council on Occupational Safety and Health, established under section 1-5 of Executive Order 12196 of February 26, 1980, published in the **Federal Register**, February 27, 1980 (45 FR 1279), will meet on January 13, 1988, starting at 10:00 a.m. in Room N3437 ABC, of the Frances Perkins Department of Labor Building, 200 Constitution Avenue NW., Washington, DC. The meeting will be open to the public.

The agenda provides for:

I. Call to Order
II. Approval of Minutes of July 8, 1987 Meeting
III. Appointment and Reappointments to FACOSH
IV. Election of Vice Chairman
V. President's 3% Goal
VI. Update on the Federal Hazard Communication Program
VII. Progress Report on the findings concerning the use of Lift Slab Construction—Bridgeport, Connecticut
VIII. Report on the Federal AIDS Issue
IX. New Business
X. Adjournment

The Council welcomes written data, views or comments concerning safety and health programs for Federal employees, including comments on the agenda items. All such submissions received by close of business January 6, 1988, will be provided to the members of the Council and included in the record of the meeting.

The Council will consider oral presentations relating to agenda items. Persons wishing to orally address the Council at the meeting should submit a written request to be heard by close of business January 6, 1988. The request must include the name and address of the person wishing to appear, the capacity in which appearance will be made, a short summary of the intended presentation and an estimate of the amount of time needed.

All communications regarding this Advisory Council should be addressed to John E. Plummer, Director, Office of Federal Agency Programs, Department of Labor, OSHA, Frances Perkins Building, 200 Constitution Avenue NW., Room N3112, Washington, DC 20210, telephone (202) 523-9329.

Signed at Washington, DC, this 22 day of December 1987.

John A. Pendergrass,

Assistant Secretary.

BILLING CODE 4510-26-M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-275 and 50-323]

Pacific Gas and Electric Co.; Diablo Canyon Nuclear Power Plant; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 20, Appendix A, footnote d-2(c), to Pacific Gas & Electric Company, who holds Facility Operating License Nos. DPR-80 and DPR-82, which authorize operation of Diablo Canyon Nuclear Power Plant, Unit Nos. 1 and 2. Units 1 and 2 (the facilities) are pressurized water reactors located in San Luis Obispo County, California.

Environmental Assessment

Identification of the Proposed Action: The exemption from 10 CFR Part 20 would allow the use of a radioiodine protection factor of 50 for MSA GMR-I canisters at Diablo Canyon, Units 1 and 2.

The Need for the Proposed Action: The exemption is needed to facilitate refueling operations at Diablo Canyon by reducing the time and person-rem exposure required to complete tasks that require respiratory protection.

Environmental Impacts of the Proposed Action: There are no significant environmental impacts of the proposed action. The proposed exemption involves a change in the installation or use of a facility component located within the restricted areas as defined in 10 CFR Part 20. The staff has determined that the proposed exemption involves no significant change in the types and no significant change in the amounts of any effluents that may be released offsite, and that there is no significant increase in individual or cumulative occupational radiation exposure.

With regard to potential nonradiological impacts, the proposed exemption involves systems located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect nonradiological plant effluents and has no other environmental impact. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action: We have concluded that there is no measurable environmental impact associated with the proposed exemption. The principal alternative would be to deny the requested exemption. This would not reduce environmental impacts of plant operation, and would not allow the licensee to reduce radiation exposures to plant workers as explained in the application.

Alternative Use Of Resources: This action does not involve the use of resources not previously considered in connection with the "Final Environmental Statement Related to the Nuclear Generating Station Diablo Canyon Units 1 and 2" dated May 1973, and the "Addendum to the Final Environmental Statement for the Operation of the Diablo Canyon Nuclear Plant, Units 1 and 2," dated May 1976.

Agencies and Persons Consulted: The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment. Therefore, the Commission has determined not to prepare an environmental impact statement for the proposed exemption.

For further details with respect to this action, see the application for exemption dated April 18, 1986 and supplemental information provided by letter dated July 15, 1986, which are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC, and at the California Polytechnic State University Library, Government Documents and Maps Department, San Luis Obispo, California 93407.

Dated at Bethesda, Maryland, this 17th day of December, 1987.

For the Nuclear Regulatory Commission.

Charles M. Trammell,

Project Manager, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 87-29560 Filed 12-24-87; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-368]

Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing: Arkansas Power and Light Co.

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-6, issued to Arkansas Power and Light Company (the licensee), for operation of the Arkansas Nuclear One, Unit 2 located in Russellville, Arkansas.

The amendment would revise the provisions in the Technical Specifications relating to a change in the required High Pressure Safety Injection Pump differential pressure required during surveillance testing, in accordance with the licensee's application for amendment dated October 28, 1987.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 25, 1988, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be

BEST COPY AVAILABLE

VOL 52 ISS 248 DEC 28 1987 UMI

affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceedings; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matter within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petiton for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Jose A. Calvo: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register**. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Nicholas S. Reynolds, Esq., Bishop, Liberman, Cook, Purcell & Reynolds, 1200 Seventeenth St. NW., Washington, DC 20036, attorney for the licensee.

Nonetimely filings of petitions for leave to intervene, amended petitions supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. that determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated October 28, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Tomlinson Library, Arkansas Technical University, Russellville, Arkansas 72801.

Dated at Bethesda, Maryland, this 16th day of December, 1987.

For the Nuclear Regulatory Commission.

Jose A. Calvo,

Director, Project Directorate—IV, Division of Reactor Projects—III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[Docket No. 50-457]

Commonwealth Edison Co.; Braidwood Station, Unit No. 2; Issuance of Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission or NRC), has issued Facility Operating License No. NPF-75 to Commonwalth Edison Company (the licensee) which authorizes operation of Braidwood Station, Unit No. 2 (the facility) at reactor core power levels not in excess of 3411 megawatts thermal (100 percent rated power). This license is restricted to power levels not in excess of five percent of rated power (170 megawatts thermal).

Braidwood Station, Unit No. 2 is a pressurized water reactor located in Will County, Illinois, about 20 miles south-southwest of Joliet, Illinois, in Reed Township. The license is effect as of the date of issuance.

The application for the license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Ch. 1 which are set forth in the license. Prior public notice of the overall action involving the proposed issuance of an operating license was published in the **Federal Register** in December 15, 1978 (43 FR 58659).

The Commission has determined that the issuance of this license will not result in any environmental impacts other than those evaluated in the Final Environmental Statement and the Assessment of the Effect of License Duration on Matters Discussed in the Final Environmental Statement for the Braidwood Station, Units 1 and 2 (dated June 1984) since the activity authorized by the license is encompassed by the overall action evaluated in the Final Environmental Statement.

For further details with respect to this action, see (1) Facility Operating License No. NPF-75, with Technical Specifications and the Environmental Protection Plan; (2) the report of the Advisory Committee on Reactor Safeguards, dated February 11, 1985; (3) the Commission's Safety Evaluation Report, dated November 1983, (NUREG-1002), and Supplements 1 through 5; (4) the Final Safety Analysis Report and Amendments thereto; (5) the Environmental Report and supplements thereto; and (6) the Final Environmental Statement, dated June 1984, (NUREG-1026).

These items are available for inspection at the Commission's Public Document Room located at 1717 H Street, N.W., Washington, DC 20555, and in the Wilmington Township Public Library, 201 S. Kanakee Street, Wilmington, Illinois 60481. A copy of Facility Operating License NPF-75 may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects III/IV/V. Copies of the Safety Evaluation Report and Supplements 1 through 5 (NUREG-1002) and the Final Environmental Statement (NUREG-1026) may be purchased at current rates from the National Technical Information Service, Department of Commerce, 5285 Port Royal Road, Springfield, Virginia 22161, and through the NRC GPO sales program by writing to the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013-7082.

Dated at Bethesda, Maryland, this 18th day of December 1987.

For the Nuclear Regulatory Commission.

Stephen P. Sands,

Project Manager, Project Directorate III-2 Division of Reactor Projects—III, IV, V and Special Projects.

BILLING CODE 7590-01-M

[Docket No. 50-312]

Sacramento Municipal Utility District; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-54 issued to Sacramento Municipal Utility District (the licensee), for operation of the Rancho Seco Nuclear Generating Station located in Sacramento County, California. The request for amendment was submitted by letter dated June 30, 1987 as supplemented October 3, 1987.

The proposed amendment consists of changes to the Rancho Seco Radiological Effluent Technical Specifications (RETS). The amendments was prompted by offsite environmental surveys and NRC inspections of the Rancho Seco liquid waste handling system. These actions indicated that the radioactivity in the offsite environment along the Rancho Seco liquid effluent pathway exceeded the design dose limits as specified by 10 CFR Part 50, Appendix I. An evaluation of this problem concluded that deficient technical specifications were responsible, in part, for the offsite contamination problem. In response to this finding, the Sacramento Municipal Utility District (SMUD) submitted proposed changes to the RETS.

The proposed changes involve specifications associated with the liquid, gaseous, and solid radwaste systems. The changes are predominately an upgrade of the existing specifications to current regulatory criteria. Where appropriate, site specific limits and restrictions were imposed. Site specific limits include more stringent or additional requirements, limitations, and surveillance to compensate for the fact that Rancho Seco is situated in arid surroundings without a large source of dilution for liquid effluents. An example of this type of change is the additional conservatism added to tables 4.21-1 and 4.21-2. This change increases the required sensitivity for analyzing samples of liquid effluents to ensure that the radiological impact on the environment is well defined and evaluated prior to discharge.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the request for amendment involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significantly reduction in a margin of safety.

The Commission has provided guidance for determining whether a proposed amendment involves a significant hazards consideration (51 FR 7751). Two examples of amendments that are not likely to involve a significant hazards consideration are as follows: (ii) A change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications for example, a more stringent surveillance requirement; and (vii) a change to make a license conform to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations. The RETS associated changes proposed by SMUD are encompassed by the two examples referenced above. The proposed site specific requirements will provide additional conservatism and the other proposed changes will incorporate more current generic regulatory criteria into the Rancho Seco RETS.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice.

By January 25, 1988 the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license, and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene must be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board Panel will rule on the request and/or petition, and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene must set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be

made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene,and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the request for amendment involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 2055, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., WAshington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be give Datagram Identification Number 3737 and the following message addressed to George W. Knighton: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel-Bethesda, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to David S. Kaplan, Sacramento Municipal Utility District, 6201 S Street, P.O. Box 15830, Sacramento, California 95813, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the Sacramento City-County Library, 828 I Street, Sacramento, California 95814.

Dated at Bethesda, Maryland, this 18th day of December, 1987.

For the Nuclear Regulatory Commission.

George Kalman,

Project Manager, Project Directorate V, Division of Reactor Projects—III, IV, V and Special Projects.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements Under Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Extension.

2. The title of the information collection: Caseload Planning Survey.

3. The form number if applicable: NRC Form 462.

4. How often the collection is required: The information is requested annually.

5. Who will be required or asked to report: The information is requested from approximately 100 current and potential licensees under 10 CFR Parts 40, 70, 71, and 72, primarily suppliers of fuel and associated services needed for the nuclear power industry.

6. An estimate of the number of responses: 70.

7. An estimate of the total number of hours needed to complete the requirement or request: Four hours per response, for a total of 280 hours.

8. An indication of whether section 3504(h), Pub. L. 96–511 applies: Not applicable.

9. Abstract: Information is requested each year from current and potential NRC licensees, primarily suppliers of fuel and associated services needed for the nuclear power industry, about their plans to submit license review requests to the NRC, to assist the Office of Nuclear Material Safety and Safeguards (NMSS) in preparing a caseload forecast prior to budget formulation. The information, after being reviewed and tabulated, serves as the agency source for caseload projections (number of cases by program area) for budget formulation.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Vartkes L. Broussalian, (202) 395–3084.

The NRC Clearance Officer is Brenda Jo. Shelton, (301) 492–8132.

Dated at Bethesda, Maryland, this 21st day of December 1987.

For the Nuclear Regulatory Commission.

William G. McDonald, Director,

Office of Administration and Resources Management.

Documents Containing Reporting or Recordkeeping Requirements Under Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Extension.

2. The title of the information collection: 10 CFR Part 10—Disposal of High-Level Radioactive Waste in Geologic Repositories

3. The form number if applicable: Not Applicable.

4. How often the collection is required: The information need only be submitted one time.

5. Who will be required or asked to report: States or Indian Tribes, or their representatives, requesting consultation with the NRC staff regarding review of a potential high-level waste repository site, or wishing to participate in a license review for a potential repository.

6. An estimate of the number of responses: 40.

7. An estimate of the total number of hours needed to complete the requirement or request: An average of 40 hours per response for consultation requests, 35 hours per response for license review participation proposals, and 5 hours per response for statements of representative authority. The total burden for all responses is estimated to be 460 hours.

8. An indication of whether section 3504(h), Pub. L. 96–511 applies: Not applicable.

9. Abstract: 10 CFR Part 60 requires States and Indian Tribes to submit certain information to the NRC if they request consultation with the NRC staff concerning review of a potential repository site or wish to participate in a license review for a potential repository. Representatives of States or Indian Tribes must submit a statement of their authority to act in such representative capacity. The information submitted by the States and Indian Tribes is used by the Director of the Office of Nuclear Material Safety and Safeguards as a basis for decisions about the commitment of NRC staff resources to the consultation and participation efforts.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street NW., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Vartkes L. Broussalian, (202) 395–3084.

Biweekly Notice, Applications and Amendment to Operating Licenses Involving No Significant Hazards Considerations; Correction

On November 18, 1987, the **Federal Register** published the Biweekly Notice of Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations. A correction needs to be made to that notice:

On page 44247, second column, under "Power Authority of the State of New York, Docket No. 50–333, James A. FitzPatrick Nuclear Power Plant, Oswego, New York," the first paragraph, the last date "May 20, 2014" should read "October 17, 2014."

Dated at Bethesda, Maryland this 21st day of December 1987.

For the Nuclear Regulatory Commission.

Robert A. Capra,

Director, Project Directorate I–1, Division of Reactor Projects, I/II.

[FR Doc. 87–29663 Filed 12–24–87; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards, Subcommittee on Thermal Hydraulic Phenomena; Meeting

The ACRS Subcommittee on Thermal Hydraulic Phenomena will hold a meeting on January 20 and 21, 1988, at the H. R. L. Auditorium (Building 1, Room 102), West Road (corner of Diamond and Trinity Streets), Los Alamos National Laboratory, Los Alamos, NM.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, January 20, 1988—8:30 a.m. until the conclusion of business

Thursday, January 21, 1988—8:30 a.m. until the conclusion of business

The Subcommittee will review the documentation developed by LANL to support the TRAC PF1 Thermal-Hydraulic Code pursuant to the NRC RES Code Scaling Assessment and Uncertainty (CSAU) requirements. The status of the CSAU effort vis-a-vis the proposed ECCS Rule revision will also be discussed.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and Staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC Staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff member, Mr. Paul Boehnert (telephone 202/634–3267) between 8:15 a.m. and 5:00 p.m. Persons planning to attend this meeting are

urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., which may have occurred.

Date: December 18, 1987.

Thomas G. McCreless,

Assistant Executive Director for Technical Activities.

Advisory Panel for the Decontamination of Three Miles Island, Unit 2, GPU Nuclear Corp.; Meeting

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Panel for the Decontamination of Three Mile Island Unit 2 (TMI-2) will be meeting on January 13, 1988, from 7:00 p.m. to 10:00 p.m. at the Holiday Inn, 23 S. Second Street, Harrisburg, PA. The meeting will be open to the public.

At this meeting, the Panel will receive a status report on the progress of defueling from the licensee, General Public Utilities Nuclear Corporation. Representatives of the U.S. Nuclear Regulatory Commission (NRC) will discuss the recent reorganization of the NRC TMI-2 Cleanup staff. A member of the U.S. Environmental Protection Agency will provide a status report on their radiological monitoring activities. Members of the public will be given the opportunity to address the Panel.

Further information on the meeting may be obtained from Dr. Michael T. Masnik, Three Mile Island Cleanup Project Directorate, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492-9445.

Dated: December 22, 1987.

[Docket No. 50-409]

Environmental Assessment and Finding of No Significant Impact; Dairyland Power Cooperative

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 50 Appendix R, Section III.H. to Dairyland Power Cooperative (the licensee) for the La Crosse Boiling Water Reactor (LACBWR).

Environmental Assessment

Identification of Proposed Action

The exemption will allow the size of the fire brigade at LACBWR to be reduced from five members to three members.

LACBWR was permanently shutdown on April 30, 1987 and reactor defueling completed on June 11, 1987. The LACBWR operating License No. DPR-45 was modified to possess-but-not-operate status on August 4, 1987.

Need for Proposed Action

The exemption is needed to eliminate unnecessary requirements that were appropriate for an operating plant but are not needed at the permanently shutdown LACBWR facility.

Environmental Impact of the Proposed Action

The proposed action is administrative only and will have no environmental impact.

Alternative Use of Resources

This action does not involve the use of resources.

Agencies and Persons Consulted

The licensee initiated this exemption action. The NRC staff is reviewing their request. No other agencies or persons were consulted.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based upon the environmental assessment, we conclude that the proposed action will not have a significant effect on the quality of the human environment.

For details with respect to this action, see the licensee's applications dated April 7, 1986, March 24, 1987, and August 18, 1987, which are available in the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555 and at the La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Dated at Bethesda, Maryland, this 21st day of December 1987.

For the Nuclear Regulatory Commission.

Lester S. Rubenstein,

Director, Standardization and Non-Power Reactor Project Directorate, Division of Reactor Projects III, IV, V and Special Projects, Office of Nuclear Reactor Regulation.

[FR Doc. 87-29664 Filed 12-24-87; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-334]

Duquesne Light Co. et al.; Consideration of Issuance of Amendment to Facility Operating License and Opportunity for Prior Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-66, issued to Duquesne Light Company, et al (the licensees), for operation of the Beaver Valley Power Station Unit 1 located in Shippingport, Beaver County, Pennsylvania.

The proposed amendment would revise the provisions in the Technical Specifications relating to pressure isolation valves to reflect the staff's concerns as stated in Generic Letter 87-06.

Prior to issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By January 27, 1988, the licensees may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

A request for a hearing or a petition for leave to intervene shall be filed with the Secretary of the Commission, United States Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner or representative for the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325-6000 (in Missouri (800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John F. Stolz: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Charnoff, Esq., J.E. Silberg, Esq., Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorneys for the licensees.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated November 12, 1987, which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC 20555, and at the Local Public Document Room, B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Dated at Bethesda, Maryland, this 22 day of December 1987.

For the Nuclear Regulatory Commission.

Peter S. Tam,

Project Manager, Project Directorate I-4, Division of Reactor Projects I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 87-29662 Filed 12-24-87; 8:45 am]

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-25215; File No. SR-DTC-87-17]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Depository Trust Company

The Depository Trust Company ("DTC"), on November 23, 1987, filed a proposed rule change with the Commission under section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"). The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

DTC has stated in the filing that the proposal consists of a clarification of DTC's existing procedures to the effect that DTC's mandatory book-entry receipt procedure applies to municipal note transactions effected in DTC's Same-Day Funds Settlement ("SDFS") System. Under this book-entry receipt procedure, DTC's facilities cannot be used to reclaim a book-entry delivery just because the delivery has been by book-entry, except where the parties to the trade had agreed to settle the trade by a physical delivery and the trade confirmation so specified.

DTC states that the proposal is consistent with the Act, particularly section 17A of the Act, in that it promotes the prompt and accurate clearance and settlement of securities transaction in securities that settle in same-day funds.

The rule change has become effective pursuant to section 19(b)(3)(A) of the Act and Securities Exchange Act Rule 19b-4. The Commission may summarily abrogate the rule change at any time within 60 days of the filing if it appears to the Commission that abrogation is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

You may submit written comments within 21 days after notice is published in the **Federal Register**. Please file six copies with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the filing, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street NW., Washington, DC. Copies of the filing also will be available for inspection and copying at the principal offices of DTC. All submissions should refer to File No. SR-DTC-87-17 and should be submitted by January 19, 1988.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

Date: December 18, 1987.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. 34-25211; File No. SR-DTC-87-16]

Self-Regulatory Organizations; Proposed Rule Change by The Depository Trust Company

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 17, 1987, the Depository Trust Company filed with

VOL 52 ISS 248 DEC 28 1987 UMI

the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change, relating to book-entry pledges to Federal Reserve Banks by Participants of The Depository Trust Company ("DTC"), consists of DTC Participant Operating Procedures for pledges to Federal Reserve Banks, agreements between the Federal Reserve Bank of New York ("FRBNY") and DTC and an optional form of agreement between any other Federal Reserve Bank and DTC.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Bank Participants of DTC in the regular course of their business pledge securities to Federal Reserve Banks as collateral for Treasury Tax and Loan account balances, deposits of public money, or advances by the Federal Reserve Bank to the Participant. Except for certain pledges to FRBNY, such pledges are now effected by physical delivery of securities certificates to the Federal Reserve Bank itself or to a third-party custodian other than DTC. The proposed rule change will enable Participants to effect such pledges through DTC's book entry system to those Federal Reserve Banks who choose to maintain DTC Pledgee accounts. This is consistent with and in furtherance of the nationwide commitment expressed in the Securities Exchange Act of 1934 (the "Act") to end physical movement of securities certificates and facilitate the prompt and accurate clearance and settlement of securities transactions, without any effect on DTC's safeguard for securities and funds. DTC does not know of any significant compliance problems for affected DTC Participants or any inconsistencies with the Act or rules or regulations thereunder applicable to DTC which could be attributed to the proposed rule change.

B. DTC perceives no impact on competition by reason of the proposed rule change.

C. The proposed rule change responds to requests from certain DTC Participants and several Federal Reserve Banks. No written comments have been solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 5th Street NW., Washington, DC. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 19, 1988.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

Date: December 18, 1987.

BILLING CODE 8010-01-M

[Release No. 34-25212; File No. SR-NSCC-87-14]

Self-Regulatory Organization; Proposed Rule Change by National Securities Clearing Corp.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on November 19, 1987, NSCC filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by NSCC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change is attached as Exhibit 1.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of this filing is to allow NSCC itself to designate transactions as "Special Trades." A "Special Trade" is a trade which settles directly between parties to the transaction on a trade-for-trade basis and is not netted with other transactions, either in the Balance Order or Continuous Net Settlement ("CNS") Systems. Under current NSCC rules and procedures, trades settle as a Special Trade only when so designated by both parties to a transaction. The proposed amendment would allow NSCC itself to designate a trade as a Special Trade to be settled directly between the two parties to the transaction.

NSCC's ability to designate trades as Special Trades will increase the ability of NSCC to offer comparison services with respect to transactions in securities which, for a variety of reasons, cannot be included in CNS or Balance Order processing. For example, currently, when a security is eligible for CNS processing at a regional clearing agency but not at NSCC (because the security is not Depository Trust Company eligible), NSCC includes transactions in such a security in its Balance Order system. As part of Balance Order processing, when a trade involves an NSCC participant and a regional clearing agency participant, NSCC stands in the middle of a Balance Order between its participant and the regional clearing agency, *e.g.*, the regional clearing agency delivers to NSCC (on behalf of its participant) and NSCC, in turn, delivers to its participant. If there is difficulty in settling the transaction, NSCC, as a party with receive and deliver obligations, may be subject to buy-in liability. Rather than ceasing to process transactions in securities in general when there are such settlement problems, the proposal will allow NSCC to designate transactions in such securities between its Members and participants of a regional clearing agency (or between participants in two regional clearing agencies) as Special Trades. In such instances, NSCC will be able to continue to offer comparison services in the security, with settlement to be conducted on a trade-for-trade basis between the two parties to that trade.

Because the proposed rule change will enhance the ability of NSCC to offer comparison services on a greater number of securities, the proposal will promote the prompt and accurate clearance and settlement of securities transactions and is consistent with the Securities Exchange Act of 1934, as amended ("Act").

B. Self-Regulatory Organization's Statement on Burden on Competition

NSCC does not believe that the proposed rule will have an impact or impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Memphis, Participants, or Others

No Comments on the proposed rule change have been solicited or received. NSCC will notify the Securities and Exchange Commission of any written comments received by NSCC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to section 19(b)(3) of the Act and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW. Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by January 19, 1988.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: December 18, 1987.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010-01-M

[Release No. IC-16182; 812-6754]

INA Investment Securities, Inc.; Application

December 21, 1987.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for exemption under the Investment Company Act of 1940 ("the 1940 Act").

Applicant: INA Investment Securities, Inc.

Relevant 1940 Act Sections: Exemption requested under Section 6(c) of the 1940 Act from sections 13(a)(2), 18(a) and 18(c) of the 1940 Act and an order requested under section 17(d) of the 1940 Act and Rule 17d-1 thereunder.

Summary of Application: Applicant seeks an order to permit it and all subsequent similar investment companies organized or sponsored by CIGNA Corporation ("CIGNA") or its affiliates (collectively the "CIGNA Funds") (i) to enter into deferred fee arrangements with their directors or trustees and (ii) to permit the CIGNA Funds and participating directors (or trustees) to effect transactions incident to such arrangements.

FILING DATE: The application was filed on June 9, 1987 and amended on November 25, 1987.

Hearing or Notification of Hearing: If no hearing is ordered, the application will be granted. Any interested person may request a hearing on this application, or ask to be notified if a hearing is ordered. Any requests must be received by the SEC by 5:30 p.m., on January 13, 1988. Request a hearing in writing, giving the nature of your interest, the reason for the request, and the issues you contest. Serve the Applicant with the request, either personally or by mail, and also send it to the Secretary of the SEC, along with proof of service by affidavit or, for lawyers, by certificate. Request notification of the date of a hearing by writing to the Secretary of the SEC.

ADDRESSES: Secretary, SEC, 450 5th Street, NW., Washington, DC 20549. INA Investment Securities, Inc., 1600 Arch Street, Philadelphia, PA 19103.

FOR FURTHER INFORMATION CONTACT: Fran Pollack-Matz, Staff Attorney (202) 272-3024 or Karen L. Skidmore, Special Counsel (202) 272-3023 (Division of Investment Management).

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from either the SEC's Public Reference Branch in person or the SEC's commercial copier, (800) 231-3282 (in Maryland (301) 258-4300).

Applicant's Representations:

1. INA Investment Securities, Inc. (the "Company") is a diversified, closed-end management investment company incorporated in Delaware. The Company

has a primary objective of generating income and a secondary objective of obtaining capital appreciation. CIGNA Investments, Inc. ("CII"), an indirect, wholly-owned subsidiary of CIGNA, serves as the investment adviser for the Company.

2. The Board of Directors of the Company consists of ten persons, seven of whom are not "interested persons" of the Company within the meaning of section 2(a)(19) of the 1940 Act. Following the Company's annual meeting on April 24, 1987, the directors who are not employed by CIGNA or an affiliate thereof receive on an ongoing basis for serving as directors of the Company and as trustees of CIGNA Funds Group and CIGNA Annuity Funds Group (collectively, the "Trusts"), an annual retainer of $12,000 ($15,000 for those who serve as Committee Chairmen) plus a fee of $1,000 for each Board meeting attended and $750 for each Committee meeting attended. Such annual retainers, Board meeting fees and Committee meeting fees are allocated among the Company and the Trusts so that the Company and each series of shares outstanding of the Trusts pay an amount based on its net assets as a percentage of the total of the net assets of the Company and of each series of shares outstanding of the Trusts.

3. Remuneration to directors on an annual basis (based on net assets of the Company and each series of shares of the Trusts at January 1, 1987) and assuming a typical meeting schedule is anticipated to be approximately $8,300. The Company pays no other remuneration to its directors. The amounts paid to the directors are, and are expected to continue to be, insignificant in comparison to the total net assets of the Company.

4. Pursuant to the vote of shareholders at that annual meeting, the membership of the Board of Directors of the Company is now idential to the membership of the Board of Trustees of both Trusts. In accordance with exemptive orders previously granted to the Trusts or their predecessors, the trustees of the Trusts are entitled to participate in certain deferred fee arrangements. The Company believes that it would be advantageous to offer to directors receiving remuneration from the Company a deferred compensation arrangement which is substantially identical to the deferred compensation arrangement available to such persons as trustees of the Trusts.

5. The purpose of the standard form of deferred fee agreement ("Agreement") implementing the proposed arrangement would be to permit individual directors to elect to defer receipt of their directors' fees, in order to avoid dimunition or loss of social security benefits to which they may otherwise be entitled, to enable them to defer payment of income taxes on such fees, or for other reasons. The Company believes that the availability of the proposed arrangement will enhance the Company's ability to attract and retain directors of the same high caliber as those who now serve on its Board. The proposed arrangement would be available to all persons who receive directors' fees from the Company.

6. The Agreement will allow each individual director to defer receipt of all directors' fees which otherwise would become payable by the Company to him for services performed after the date of such Agreement. The election made by execution of an Agreement will continue in effect for each subsequent calendar year unless, prior to January 1 of such year, the director delivers to the President of the Company a written revocation of such election.

7. Under the Agreement, the deferred director's fees will be credited to a book reserve account established by the Company (the "Deferred Fee Account"), as of the date such fees would have been paid to such director. Director's fees which become payable for attending Board meetings or meetings of Committees of the Board will be credited to the Deferred Fee Account on the following business day. Under the Agreement, deferred fees will accrue interest on a daily basis from and after the date of credit to the Deferred Fee Account in an amount equal to the amount that would have been earned had such deferred fees (plus all interest thereon on a daily basis) been invested and reinvested in shares of the CIGNA Cash Fund of CIGNA Funds Group.

8. The Agreement provides that the Company's obligation to make payments of the Deferred Fee Account will be a general obligation of the Company, and payments made pursuant to the Agreement will be made from the Company's general assets and property. With respect to the obligatons created under the Agreement, the relationship of the director to the Company will be only that of a general unsecured creditor. The Agreement also provides that the Company will be under no obligation to purchase, hold or dispose of any investments under the Agreement, but, if the Company chooses to purchase investments to cover its obligations under such Agreement, then any and all such investments will continue to be a part of the general assets and property of the Company.

9. Under the Agreement, deferred director's fees (including interest accrued thereon) will become payable in cash upon termination of the director's service in such capacity, in a lump sum or in such number of annual installments as shall be determined by the Company in its sole discretion. Each annual payment will be made as of January 31, beginning with the January 31st following the termination of the director's service as a director. In the event of the director's death, amounts payable to him under the Agreement will thereafter be payable to his designated beneficiary; in all other events, the director's right to receive payments will be nontransferable. The Agreement provides that the Company in its sole discretion has reserved the right to accelerate payment of amounts in the Deferred Fee Account at any time after the termination of the director's service as a director. In addition, in the event of the liquidation, dissolution or winding up of the Company or the distribution of all or substantially all of the Company's assets and property to its shareholders, all unpaid amounts in the Deferred Fee Account shall be paid in a lump sum on the effective date thereof.

Applicant's Legal Conclusions

1. The Agreement does not involve joint transactions between an Applicant and its directors within the meaning of section 17(d) of the 1940 Act and Rule 17d-1 thereunder as the interest to be accrued on the deferred amounts under the Agreement is to be based on the yield of the CIGNA Cash Fund, not that of the Company. The use of the CIGNA Cash Fund's yield to determine interest on deferred amounts does not inherently differ from the use of the prime rate or another assumed rate of interest. To the extent that the Agreement may be deemed to involve joint transactions, the participation in the Agreement by the Company will not be on a basis that is less advantageous than that of any other participant; as an affiliated person, the participating director would neither directly nor indirectly receive a benefit which would otherwise inure to the Company or any of its shareholders.

2. The Agreement possesses none of the characteristics of "senior securities" that led to the adoption of restrictions pertaining to such securities in sections 13(a)(2), 18(a), and 18(c) of the 1940 Act. All liabilities created by credits to the Deferred Fee Account under the Agreement would be offset by essentially equal amounts of assets of the Company which would not otherwise exist if the fees were paid on a current basis. In addition, the amounts eligible for deferral will be *de minimis* as compared with the Company's present net assets of over $92 million.

3. The deferral of director's fees in accordance with the Agreement will have a negligible effect on the Company's assets, liabilities, net assets and net income per share. Further, the Agreement will not obligate the Company to retain a director in such capacity, nor will it obligate the Company to pay any (or any particular level of) director's fees to any director. Rather, it will merely permit a director to elect to defer receipt of director's fees which he would otherwise receive on a current basis from the Company.

4. Although as a registered closed-end company, the company is not subject to section 22(g) of the 1940 Act, the Company would not be issuing securities for services or for property other than cash or securities. Although any director's fees which might become payable to a director would clearly be for services, any such fees would become payable independent of the Agreement. The Agreement would merely provide for deferral of payment of such fees and thus should be viewed as being "issued" not in return for services but in return for the Company's not being required to pay such fees on a current basis.

Applicant's Conditions

1. The return on the Deferred Fee Account will be based upon the return of the CIGNA Cash Fund or, if the CIGNA Cash Fund is no longer in existence, upon a recognized measure of prevailing market interest rates (e.g. the Treasury Bill rate).

2. The Company, in its discretion, may invest deferred fees in shares of the CIGNA Cash Fund; provided, however, that any such investment shall be in accordance with section 12(d)(1) of the 1940 Act.

3. Any shares of the CIGNA Cash Fund purchased by the Company to cover its obligations under the Agreement will be voted by the Company with respect to all matters in like proportion to the votes cast by the public shareholders of the CIGNA Cash Fund.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

STATE DEPARTMENT

[Public Notice CM-8/1149]

Shipping Coordinating Committee, Subcommittee on Safety of Navigation; Meeting

The Working Group on Sefety of Navigation of the Subcommittee on Safety of Life at Sea (SOLAS) will hold an open meeting at 9:30 am on Thursday, January 14, 1988, in room 4315 at Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC.

The purpose of the meeting is to prepare U.S. positions for the 34th Session of the Subcommittee on Safety of Navigation of the International Maritime Organization to be held in London, February 8-12, 1988. Items of principal interest on the agenda for this session are:

—Decisions of other IMO bodies
—Routing of Ships
—Problems related to deep-draft vessels
—Removal of disused offshore platforms
—Infringement of safety zones around offshore structures
—Amendment of (SOLAS) regulations V/12(f)
—World-wide navigation system
—Electronic chart display systems
—Navigational aids and related equipment
—Ship reporting systems and reporting requirements
—Work program
—Any other business

Members of the general public may attend up to the seating capacity of the room.

For further information contact Mr. Edward J. LaRue, Jr., U.S. Coast Guard (G-NSS), Washington, DC 20593-0001, Telephone: (202) 267-0416.

Dated: December 16, 1987.

Richard C. Scissors,

Chairman, Shipping Coordinating Committee.

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended December 18, 1987

The following applications for certificates of public convenience and necessity and foreign air carrier permits were filed under Subpart Q of the Department of Transportation's Procedural Regulations (see 14 CFR 302.1701 et. seq.). The due date for answers, conforming applications or motion to modify scope are set forth below for each application. Following the answer period DOT may process the application be expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further preceedings.

Docket No. 45363

Date Filed: December 17, 1987.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 14, 1988.

Description: Application of Challenge Air International, Inc. pursuant to section 401(d)(3) of the Act and Subpart Q of the Regulations, is seeking to resume services in interstate, overseas and foreign charter air transportation.

Docket No. 45367

Date Filed: December 18, 1987.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 15, 1988.

Description: Application of Air Ontario Inc., pursuant to section 402 of the Act and Subpart Q of the Regulations to engage in foreign scheduled air transportation of persons, property and mail between Detroit, Michigan and London, Ontario.

Docket No. 45364

Date Filed: December 17, 1987.

Due Date for Answers, Conforming Applications, or Motions to Modify Scope: January 14, 1988.

Description: Application of I.L.P.O. Aruba N.V., pursuant to section 402 of the Act and Subpart Q of the Regulations, requests a foreign air carrier permit to provide charter cargo services between any point or points in the United States and any point or points in Aruba, charter cargo services between any point or points in the United States and any points in a third country provided that such traffic is carried via Aruba and makes a stopover in Aruba of at least two consecutive nights: non-scheduled, individually waybilled cargo services between Miami and Ft. Lauderdale, Florida, San Juan, Puerto Rico or Houstion, Texas, on the one hand, and Arub, on the other hand.

BILLING CODE 4910-62-M

Federal Aviation Administration

Advisory Circular 29-2A, Certification of Transport Category Rotorcraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of issuance.

SUMMARY: Advisory Circular (AC) 29-2A consolidates FAA guidance on the certification of transport category rotorcraft. AC 29-2A includes all of the material in AC 29-2, Certification of Transport Category Rotorcraft, May 20, 1983, through Change 2, with minor editorial changes and some paragraph renumbering. In addition, it includes material for 52 new paragaphs and 12 revised paragraphs. As part of the FAA effort to achieve national standardization in rotorcraft certification, the AC serves as a ready reference for manufacturers, modifiers, FAA design evaluation engineers, flight test engineers, and engineering flight test pilots. This AC provides information on methods of compliance with Part 29 of the Federal Aviation Regulations which contains airworthiness standards for transport category rotorcraft. This material is not to be construed as having any legally binding status and must be treated as advisory only. However, to ensure standardization in the certification process, these procedures should be considered during all rotorcraft type certification and supplemental type certification activities.

DATE: AC 29-2A was issued by the Rotorcraft Certification Directorate in Fort Worth, Texas, on September 16, 1987.

How to Obtain Copies

A copy of this AC may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

BILLING CODE 4910-13-M

Change 1, Advisory Circular 27-1, Certification of Normal Category Rotorcraft

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of issuance.

SUMMARY: Change 1, Advisory Circular (AC) 27-1, Certification of Normal Category Rotorcraft, adds 59 new paragraphs and revises 6 paragraphs. AC 27-1 consolidates FAA guidance on the certification of normal category rotorcraft. As part of the FAA effort to achieve national standardization in rotorcraft certification, it serves as a ready reference for manufacturers, modifiers, FAA design evaluation engineers, flight test engineers, and engineering flight test pilots. AC 27-1 provides information on methods of compliance with Part 27 of the Federal Aviation Regulations which contains airworthiness standards for normal category rotorcraft. This material is not to be construed as having any legally binding status and must be treated as advisory only. However, to ensure standardization in the certification process, these procedures should be considered during all rotorcraft type certification and supplemental type certification activities.

DATE: Change 1, AC 27-1, was issued by the Rotorcraft Certification Directorate in Fort Worth, Texas, on September 16, 1987.

How to Obtain Copies

A copy of Change 1, AC 27-1, may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

BILLING CODE 4910-13-M

Air Traffic Procedures Advisory Committee; Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. App. 1), notice is hereby given of a meeting of the Federal Aviation Administration (FAA) Air Traffic Procedures Advisory Committee (ATPAC) to be held from January 26, at 9 a.m., through January 29, 1988, at 11:30 a.m., in the Broward Room at the Tampa Airport Marriott Hotel, Tampa International Airport, Tampa, FL.

The agenda for this meeting is as follows: a continuation of the Committee's review of present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures. It will also include:

1. Approval of minutes.
2. Discussion of agenda items.
3. Discussion of urgent priority items.
4. Report from Executive Director.

5. Old Business.
6. New Business.
7. Discussion and agreement of location and dates for subsequent meetings.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairperson, members of the public may present oral statements at the meeting. Persons desiring to attend and persons desiring to present oral statements should notify, not later than January 22, 1988, Mr. Walter H. Mitchell, Executive Director, ATPAC, Air Traffic Operations Service, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–3725. Information may be obtained from the same source.

The next quarterly meeting of the FAA ATPAC is planned to be held from April 18 through April 22, 1988, in Washington, DC.

Any member of the public may present a written statement to the Committee at any time.

Issued in Washington, DC, on December 17, 1987.

Walter H. Mitchell,

Executive Director, Air Traffic Procedures Advisory Committee.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Dept. Circ.—Public Debt Series—No. 35–87]

Treasury Notes of December 31, 1989, Series AG–1989

December 17, 1987.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $9,250,000,000 of United States securities, designated Treasury Notes of December 31, 1989, Series AG–1989 (CUSIP No. 912827 VR 0), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated December 31, 1987, and will accrue interest from that date, payable on a semiannual basis on June 30, 1988, and each subsequent 6 months on December 31 and June 30 through the date that the principal becomes payable. They will mature December 31, 1989, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR Part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in 51 FR 18260, *et seq.* (May 16, 1986), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239, prior to 1:00 p.m., Eastern Standard time, Tuesday, December 22, 1987. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Monday, December 21, 1987, and received no later than Thursday, December 31, 1987.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which

tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred , e.g., 99.923 and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentages allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in Section 3.5. must be made or completed on or before Thursday, December 31, 1987. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds naturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Tuesday, December 23, 1987. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Thursaday, December 31, 1987. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the pruchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular is such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

BILLING CODE 4810-40-M

[Dept. Circ.—Public Debt Series—No. 36–87]

Treasury Notes of December 31, 1991, Series Q–1991

December 17, 1987.

1. Invitation for Tenders

1.1. The Secretary of the Treasury, under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $7,000,000,000 of United States securities, designated Treasury Notes of December 31, 1991, Series Q–1991 (CUSIP No. 912827 VS 8), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities. Additional amounts of the Notes may also be issued at the average price to Federal Reserve Banks, as agents for foreign and international monetary authorities.

2. Description of Securities

2.1. The Notes will be dated December 31, 1987, and will accrue interest from that date, payable on a semiannual basis on June 30, 1988, and each subsequent 6 months on December 31 and June 30 through the date that the principal becomes payable. They will mature December 31, 1991, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public

monies. They will not be acceptable in payment of Federal taxes.

2.4. The Notes will be issued only in book-entry form in denominations of $1,000, $5,000, $10,000, $100,000, and $1,000,000, and in multiples of those amounts. They will not be issued in registered definitive or in bearer form.

2.5. The Department of the Treasury's general regulations governing United States securities, i.e., Department of the Treasury Circular No. 300, current revision (31 CFR Part 306), as to the extent applicable to marketable securities issued in book-entry form, and the regulations governing book-entry Treasury Bonds, Notes, and Bills, as adopted and published as a final rule to govern securities held in the TREASURY DIRECT Book-Entry Securities System in 51 FR 18260, *et seq.* (May 16, 1986), apply to the Notes offered in this circular.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239, prior to 1:00 p.m., Eastern Standard time, Wednesday, December 23, 1987. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, December 22, 1987, and received no later than Thursday, December 31, 1987.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $1,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalities; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in Section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.000. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject any or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this Section is final.

5. Payment and Delivery

5.1 Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in Section 3.5 must be made or completed on or before Thursday, December 31, 1987. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Tuesday, December 29, 1987. In addition, Treasury Tax and Loan Note Option Depositaries may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Thursday, December 31, 1987. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2 In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3 Registered definitive securities tendered in payment for the Notes allotted and to be held in TREASURY DIRECT are not required to be assigned if the inscription on the registered definitive security is identical to the registration of the note being purchased. In any such case, the tender form used to place the Notes allotted in TREASURY DIRECT must be completed to show all the information required thereon, or the TREASURY DIRECT account number previously obtained.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, and to issue, maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not adversely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Record of Vote of Meeting Closure

Pursuant to the Government in the Sunshine Act (Pub. L. 94-409) (5 U.S.C. Sec. 552b)

I, Benjamin F. Baer, Chairman of the United States Parole Commission, presided at a meeting of said Commission which started at nine o'clock a.m. on Tuesday, December 15, 1987 at the Commission's Central Office, 5550 Friendship Boulevard, Chevy Chase, Maryland 20815. The meeting ended at or about 10:30 a.m. The purpose of the meeting was to decide approximately 8 appeals from National Commissioners' decisions pursuant to 28 CFR 2.27. Eight Commissioners were present, constituting a quorum, when the vote to close the meeting was submitted.

Public announcements further describing the subject matter of the meeting and certifications of General Counsel that this meeting may be closed by vote of the Commissioners present were submitted to the Commissioners prior to the conduct of any other business. Upon motion duly made, seconded, and carried, the following Commissioners voted that the meeting be closed: Benjamin F. Baer, Saundra Brown Armstrong, Cameron M. Batjer, Jasper Clay, Jr., Carol Pavilack Getty, Daniel R. Lopez, G. MacKenzie Rast, and Victor M.F. Reyes. The Commissioners and a Parole Analyst attended.

In witness whereof, I make this official record of the vote taken to close this meeting and authorize this record to be made available to the public.

Date: December 16, 1987.

Benjamin F. Baer,
Chairman, U.S. Parole Commission.

FEDERAL TRADE COMMISSION

16 CFR Part 455

Used Motor Vehicle Trade Regulation Rule; Request for Public Comment on Petition for Exemption by the State of Maine

AGENCY: Federal Trade Commission.

ACTION: Request for public comment on petition by State of Maine for statewide exemption from the trade regulation rule.

SUMMARY: The Federal Trade Commission seeks public comment on the request by the State of Maine for exemption from the Used Motor Vehicle Trade Regulation Rule, 16 CFR Part 455 (1987). Maine filed its petition pursuant to § 455.6 of the Used Car Rule. If granted, the exemption would require Maine used vehicle dealers to use the disclosure label prescribed by a Maine administrative regulation in the place of the Buyers Guide required by the FTC Rule. Additionally, the Commission would be precluded from enforcing the FTC Rule in Maine for as long as Maine administers and enforces effectively its law. The Commission invites public comment on the Petition generally and on certain questions specifically.

DATES: Written comments will be accepted until January 27, 1988.

ADDRESS: Written comments should be addressed to the Office of the Secretary, Federal Trade Commission, 6th and Pennsylvania Avenue, NW., Washington, DC 20580. Comments should be captioned: "Maine Petition for Statewide Exemption from the Used Car Rule—FTC File No. 215–54."

Copies of the Petition can be obtained from the Public Reference Room, Room 130, Federal Trade Commission, 6th and Pennsylvania Avenue, NW., Washington, DC 20580. (202) 326–2222.

FOR FURTHER INFORMATION CONTACT: Matthew D. Gold (202/326–3019) or Joyce E. Plyler (202/326–3021), Attorneys, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: To facilitate public consideration and comment, the Commission has summarized the information in the Maine Petition. In addition, the Commission has outlined the exemption process it intends to follow.

I. Introduction

On June 1, 1987, the Maine Secretary of State ("Petitioner") filed a petition for a statewide exemption (the "Petition") pursuant to § 455.6 of the Commission's Used Motor Vehicle Trade Regulation Rule (the "FTC Rule" or the "Used Car Rule"), 16 CFR Part 455 (1987).[1] If granted, the exemption would require Maine used vehicle dealers to use the disclosure label prescribed by a Maine administrative regulation in the place of the Buyers Guide required by the FTC Rule.[2] Additionally, the Commission would be precluded from enforcing the FTC Rule in Maine for as long as Maine administers and enforces effectively its law.[3]

In this notice, the Commission publishes the procedures it will use in its consideration of the Maine Petition. These procedures are patterned after the procedures used in the Commission's consideration of the exemption petition from the State of Wisconsin.[4] This notice also contains a provision-by-provision comparison of the Maine regulation and the FTC Rule. This comparison is intended to highlight differences in the two regulations that are relevant to the Commission's standards for granting exemptions. Finally, the notice also contains specific questions that the Commission believes will focus public comment on the important issues involved in the Commission's consideration of the Petition.

II. Exemption Standards and Procedures

The FTC Rule includes a specific provision, § 455.6, setting forth the Commission's standards for exempting a state from the Rule's requirements. Section 455.6 states:

> (a) If, upon application to the Commission by an appropriate state agency, the Commission determines, that—
>
> (1) There is a state requirement in effect which applies to any transaction to which this rule applies; and
>
> (2) That state requirement affords an overall level of protection to consumers which is as great as, or greater than, the protection afforded by this Rule; then the Commission's Rule will not be in effect in that state to the extent specified by the Commission in its determination, for as long as the state administers and enforces effectively the state requirement.
>
> (b) Applications for exemption under Subsection (a) should be directed to the Secretary of the Commission. When appropriate, proceedings will be commenced in order to make a determination described in Subsection (a), and will be conducted in accordance with Subpart C of Part 1 of the Commission's Rules of Practice.

The Commission determines the appropriate relationship between the FTC Rule and state law on a case-by-case basis in an exemption proceeding conducted pursuant to § 1.16 of the Commission's Rules of Practice.[5] Section 1.16 of the Commission's Rules of Practice is a general provision allowing any person to whom a trade regulation rule would otherwise apply to petition the Commission for an exemption, but it offers no specific guidance to state agencies seeking statewide exemption.

However, final staff guidelines for state exemption petitions have been developed for the Commission's Trade Regulation Rule Concerning Funeral Industry Practices (the "Funeral Rule"), 16 CFR Part 453 (1987).[6] Because the Funeral Rule has a state exemption provision that is virtually identical to that included in the FTC Rule,[7] the Commission followed the Funeral Rule guidelines when considering the Wisconsin petition for exemption from the FTC Rule.[8] Maine followed these guidelines in submitting its petition.

The state exemption guidelines recommend that a complete application be comprised of the following information: (1) A copy of all relevant state statutes, rules, regulations and court cases; (2) a statement comparing the state law with the Commission's rule, on a provision-by-provision basis, which explains how the state law applies to the same transactions as does the Commission's rule and how the state law affords an overall level of protection to consumers that is equal to or greater than that afforded by the Commission's rule; (3) information sufficient to demonstrate the state's willingness and ability to administer and enforce its law effectively; and (4) a statement from the state's attorney general that the state law provides adequate authority to support the rules, regulations, conclusions, interpretations, policies and procedures described in the statement submitted in the application for the statewide exemption from the Commission's rule. The state exemption guidelines also state that once a complete application for statewide exemption has been received, staff will place the materials on the public record and recommend that the Commission publish a notice in the **Federal Register** allowing a period of time for interested persons to submit written comments. This notice invites interested parties to submit comments on the Maine Petition. The Commission will place written comments on the public record.

The Commission's staff will also place on the public record any factual information received orally on which it relies in making its recommendation to the Commission concerning whether to grant the exemption. Moreover, under the procedures discussed in the Statement of Basis and Purpose,[9] this exemption proceeding will be subject to the restrictions on *ex parte* communications applicable to a section 18 rulemaking "adapted in such form as may be appropriate to the circumstances of the particular proceeding."[10] The restrictions on *ex parte* communications applicable to a Section 18 rulemaking proceeding are set forth in 16 CFR 1.18(c) (1987). In brief, they require that a communication on the merits to a Commissioner from a person outside the Commission be placed on the public record of the proceeding, and that a communication on the merits to a Commissioner from the rulemaking staff be disclosed on the record to the extent that it contains any fact not already on the record.[11]

III. The Petition

A. Contents

As noted earlier, the Maine Secretary of State filed its Petition requesting a statewide exemption from the FTC Rule on June 1, 1987. Included in this Petition are the following materials: (1) A provision-by-provision comparison of the FTC Rule and the Maine Rule (Appendix A); (2) a copy of the Maine Rule, which was adopted on January 22, 1987, with an effective date of twenty-one days after a statewide exemption is granted (Appendix B); (3) a copy of the Maine window label (Buyer's Guide) required by the Maine Rule (Appendix C); (4) copies of the relevent Maine statutes, including the Maine Used Car Information Act ("MUCIA"),[12] the Maine Unfair Trade Practices Act,[13] and the Maine Annual Car Inspection Law[14] (Appendix D); (5) a discussion of Maine's willingness and ability to enforce the MUCIA and the Maine Rule (Appendix E); and (6) a letter from Maine Attorney General James E. Tierney stating that Maine law provides adequate authority to support the Maine Rule, as well as the conclusions, interpretations, policies and procedures described in the Petition and in the Appendices (Appendix F).

B. Does the Maine Rule Apply to the Same Transactions to Which the FTC Rule Applies?

This section compares the definitions which determine the scope of the FTC Rule with their counterparts in the Maine Rule. Whether a transaction is covered by the FTC Rule depends upon three factors: (1) the identity of the person or entity offering the vehicle for sale;[15] (2) the identity of the person or entity to whom the vehicle is offered for sale;[16] and (3) the characteristics of the vehicle being offered for sale.[17]

1. Definition of "Dealer"

Section I(A)(2) of the Maine Rule defines "dealer" as "any person or legal entity which meets the [definition of that term at] M.R.S.A. 1471, sub-section 2." That definition "includes a natural person, firm, corporation, partnership and any other legal entity that is engaged in the business of selling, offering for sale, or negotiating the sale of used motor vehicles, except auctioneers licensed by the Secretary of State * * *"[18] Also excluded from this definition are "departments and agencies of the State when selling, offering for sale or negotiating the sale of used state-owned motor vehicles."[19]

The FTC Rule definition of "dealer," at § 455.1(d)(3), includes "any person or business which sells or offers for sale a used vehicle after selling or offering for sale five (5) or more used vehicles in the previous twelve months, but does not include a bank or financial institution, a

[15] The term "dealer" is defined in § 455.1(d)(3) of the FTC Rule.

[16] The term "consumer" is defined in § 455.1(d)(4) of the FTC Rule.

[17] The terms "vehicle" and "used vehicle" are defined in §§ 455.1(d)(1) and (2) of the FTC Rule, respectively.

[18] Me. Rev. Stat. Ann. tit. 10, Sec. 1471(2) (Supp. 1986).

[19] Id.

business selling a used vehicle to an employee of that business, or a lessor selling a leased vehicle by or to that vehicle's lessee or to an employee of the lessee."

The Maine Rule's definition of "dealer" differs from that found in the FTC Rule in several respects. First, there is no requirement that a minimum volume of vehicles be offered for sale before the Maine Rule would apply. Instead, one must be "engaged" in the used car business to be considered a dealer in Maine. A recent case, however, indicates that the number of vehicles necessary to meet this threshold may be even lower than the FTC Rule's minimum. [20]

The Maine Rule also specifically excludes auctioneers from the definition of "dealer." However, while the auction house itself is excluded, dealers selling their vehicles through auctions are required to comply with the Maine Rule.

The Maine Rule also differs in that it covers all sales by banks or financial institutions, leasing companies, or other businesses. The FTC Rule specifically excludes sales by banks or financial institutions and some sales by leasing companies and businesses.

2. Definition of "Consumer"

Section I(A)(1) of the Maine Rule defines "consumer" as "any person who is not a used vehicle dealer." This language tracks exactly the definition of "consumer" in the FTC Rule. The Maine Rule also includes within its definition any person defined as a "purchaser" in the MUCIA. This MUCIA definition includes "any person who has obtained ownership of a used motor vehicle from a dealer by transfer, gift or purchase." [21] Although the Maine Rule definition explicitly excludes dealers, the "General Duty" clause, section 1(C)(1) of the Maine Rule, requires the posting of the Maine Buyer's Guide prior to offering for sale used vehicles "to a consumer or another dealer." [22] The MUCIA also appears to include dealers. In any event, the Maine Rule definition is at least as inclusive as that found in the FTC Rule.

3. Definition of "Motor Vehicle"

Section I(A)(5) of the Maine Rule specifically incorporates the definition of "motor vehicle" found in the MUCIA.[23] That definition includes "any self-propelled vehicle designed primarily to transport not more than 14 individuals, except motorcycles * * * and any vehicles operated exclusively on a rail or rails. This definition is intended to include motor trucks that have a gross vehicle weight of not more than 10,000 pounds * * *."

The FTC Rule definition of "vehicle," at § 455.1(d)(1), also excludes motorcycles, but includes motorized vehicles with a gross vehicle weight of less than 8500 pounds, a curb weight of less than 6000 pounds, and a frontal area of less than 46 square feet.

These definitions are substantially similar. Any vehicle included in the FTC Rule definition is included in the Maine Rule's definition. The Maine Rule definition is slightly more inclusive in that it also covers vehicles with gross vehicle weights of between 8500 and 10,000 pounds.

4. Definition of "Used Vehicle"

The Maine Rule's definition of this term, found at section I(A)(8), is virtually identical to that contained in § 455.1(d)(2) of the FTC Rule, except that it expressly includes "demonstrators" or "company cars," and any vehicle that meets the definition of "reconstructible motor vehicle" in the MUCIA.[24] Although the FTC Rule does not specifically mention these types of vehicles, they are included under the Rule's definition.[25]

C. *Does the Maine Rule Provide an Overall Level of Protection to Consumers Which is as Great as or Greater than that Provided by the FTC Rule?*

This portion of the notice compares the Maine Rule with the FTC Rule on a provision-by-provision basis. This discussion will follow the format of the FTC Rule.

1. Section 455.1—General Duties of Used Vehicle Dealers

Section 455.1(a) of the FTC Rule states that the following acts or practices are deceptive when committed by used vehicle dealers offering for sale used vehicles in or affecting commerce: (1) misrepresenting the mechanical condition of a used vehicle; (2) misrepresenting the terms of any warranty; and (3) representing that a used vehicle is sold with a warranty when that is not true. Section 455.1(b) of the Rule further states that the following acts or practices are unfair when committed by used vehicle dealers offering for sale used vehicles in or affecting commerce: (1) Failing to disclose, prior to sale, that a used vehicle is sold without a warranty; and (2) failing to make available, prior to sale, the terms of any written warranty offered in connection with the sale of a used vehicle. However, a violation of one of these Sections, in and of itself, would not constitute a violation of the FTC Rule. Section 455.1(c)(3) of the FTC Rule states that "[i]f a used vehicle dealer complies with the requirements of §§ 455.2 through 455.5 of this part [proper preparation and display of the Buyers Guide], the dealer does not violate this Rule."

In terms of enforcement, therefore, violations of §§ 455.1(a) and (b) of the FTC Rule would be actionable under Section 5 of the FTC Act,[26] rather than under the Rule. The comparable provisions in the Maine Rule, sections I(B)(1) and I(B)(2), differ in that violations would be actionable under the Maine Rule itself. Therefore, unlike the case in the FTC Rule, civil penalties would be available for violations of these sections.

These "general duty" sections of the Maine Rule also differ in that only written misrepresentations are prohibited. The FTC Rule does not distinguish between written and oral misrepresentations. The Maine Rule, however, does note that verbal misrepresentations may be a violation of Maine common law or statutory law, such as the Maine Unfair Trade Practices Act or the Maine Uniform Commercial Code.[27]

2. Section 455.2—Buyers Guide

(a) *Format.* Both the FTC Rule and the Maine Rule require dealers to complete and display a disclosure form on a side window of each used vehicle offered for sale to consumers.[28] Both laws specify the exact format of the disclosure form. The provisions of the Maine Rule regarding format and display of the Maine Buyer's Guide are virtually identical to the comparable provisions in the FTC Rule.[29] Additionally, the printing specifications for the Maine Buyer's Guide are designed to create a window form that is very similar in appearance to the FTC Buyers Guide. The Maine Rule, however, calls for a minimum size of 12½ inches high by 8½ inches wide, as opposed to the FTC Rule's minimum of 11 inches by 7¼ inches. The additional disclosures on the Maine Buyer's Guide necessitate its larger size.

(b) *Text of Window Stickers—Similar Provisions.* All of the disclosures required on the FTC Rule Buyers Guide are also required on the Maine Rule Buyer's Guide. However, in some instances, the wording of these disclosures on the Maine window sticker varies from the language used on the FTC sticker. Following is a brief comparison of FTC Rule Buyers Guide disclosures with the equivalent Maine Rule Buyer's Guide disclosure.

(i) *The "As Is" Disclosure.* Section 455.2(b)(1)(i) of the FTC Rule requires dealers to check a large box next to the words "AS IS—NO WARRANTY" when offering a used vehicle for sale on that basis. This disclosure is printed in conspicuously large type. The purpose of this disclosure is to inform consumers that the dealer will not be responsible for post-purchase repairs to the vehicle.[30] The FTC Buyers Guide includes an explanation of the meaning of the words "as is" immediately underneath the words "AS IS—NO WARRANTY."[31]

In Maine, the MUCIA states that, except in the case of reconstructible motor vehicles,[32] a dealer may not sell or transfer a vehicle unless it meets the state inspection standards and displays a valid inspection sticker issued during the thirty days prior to the date of sale or transfer. Consequently, section 1(C)(2)(f) of the Maine Rule requires Maine dealers to check a box on the Buyer's Guide next to the words "WARRANTY OF INSPECTABILITY," unless the vehicle is a reconstructible motor vehicle. Directly underneath the box is a one-sentence explanation of this state-required warranty.

Under section 1(C)(2)(g) of the Maine Rule, if the dealer chooses to offer the vehicle without an express warranty other than the state-required warranty of inspectability, the dealer must check a box next to the words "NO EXPRESS WARRANTY EXCEPT THAT VEHICLE MEETS STATE INSPECTION STANDARDS." Underneath this statement is the following explanation:

YOU WILL PAY ALL COSTS FOR ANY REPAIRS NOT RELATED TO MEETING STATE INSPECTION STANDARDS. REGARDLESS OF ANY ORAL STATEMENTS ABOUT THE VEHICLE, THE DEALER ACCEPTS NO RESPONSIBILITY FOR REPAIRS EXCEPT THOSE NECESSARY TO PASS STATE INSPECTION.

When the box next to this disclosure is checked (in addition to the box informing the consumer of the warranty of inspectability), the consumer is put on notice that the dealer's express warranty obligations extend only to the inspectability of the vehicle. A Maine dealer's minimum post-sale responsibility extends to the repair of any defect in systems or components on the state inspection "checklist," if the purchaser can show that the defect existed at the time of sale. Also, Maine dealers may choose not to disclaim state law implied warranties in addition to offering the express warranty of inspectability.

(ii) *The "Implied Warranties Only" Disclosure.* Section 455.2(b)(1)(ii) of the FTC Rule requires that an "IMPLIED WARRANTIES ONLY" disclosure be used in place of the "AS IS—NO WARRANTY" disclosure in states that limit or prohibit "as is" sales and in instances where a dealer choose to sell a used vehicle with neither an express warranty nor on an "as is" basis. This disclosure informs consumers that the dealer may be legally obligated to repair serious problems even though it did not provide an express warranty.

Section 1(C)(2)(j) of the Maine Rule contains a detailed explanation of a Maine dealer's options regarding implied warranties. Under the words "IMPLIED WARRANTIES" on the Maine Buyer's Guide are three boxes, one of which the dealer must check. The dealer must check the box next to the word "YES" if the dealer chooses not to disclaim implied warranties. If the parties enter into a service contract at the time of sale, implied warranties may not be disclaimed and the "YES" box must be checked.[33] The dealer must check the box next to the word "NO" if the dealer chooses to disclaim implied warranties.[34] If the dealer offers an express warranty, implied warranties may not be disclaimed, but they can be limited to the duration of the express warranty.[35] In this case, the dealer must mark the box next to the words "LIMITED TO DURATION OF EXPRESS WARRANTY," but only if such limitation is "conscionable." [36] There is no space on the FTC Buyers Guide for a dealer to disclose its intention to limit implied warranties to the duration of an express warranty.

Another difference between the Maine Rule and the FTC Rule regarding implied warranties is the explanation of implied warranty rights on the window stickers. The FTC Buyers Guide provides the general statement that state law implied warranties "may give you some rights to have the dealer take care of serious problems that were not apparent when you bought the vehicle.[37] The Maine Rule Buyer's Guide, on the other hand, goes into slightly more detail, referring to both the implied warranty of merchantability and the implied warranty of fitness for a particular use.[38]

(iii) *Information About Express Warranties.* Section 1(C)(2)(h) of the Maine Rule requires dealers offering an express warranty to check a box next to the words "DEALER EXPRESS WARRANTY" on the Maine Buyer's Guide. Subsections (i)—(iv) and (vi) of section 1(C)(2)(h) of the Maine Rule track the language of § 455.2(b)(2)(i)—(b)(2)(v) of the FTC Rule by requiring that the following warranty terms be disclosed:

—Whether the warranty is full or limited; [39]

—Which systems are covered by the warranty; [40]

—The duration of the warranty; [41] and

—The percentage of repair costs to be paid by the dealer.[42]

---

[20] *See Tanguay* v. *Seacoast Tractor Sales, Inc.*, 494 A.2d 1364 (Me. 1985). Maine's Supreme Judicial Court held that a seller of at least one dozen vehicles over a twenty-year period qualified as a "dealer" under the MUCIA definition. *Id.*

[21] *See* Me. Rev. Stat. Ann. tit. 10, sec. 1471, subsection 6.

[22] James McKenna of the Maine Attorney General's Office confirmed that the intent of the Maine Rule is to include sales to dealers within its scope.

[23] Me. Rev. Stat. Ann. tit. 10, sec. 1471, subsection 4.

[24] *See* Me. Rev. Stat. Ann. tit. 10, sec. 1471, subsection 6–A. This definition includes "a used motor vehicle which does not meet the inspection standards as set forth in Title 29, section 2502, and which is sold, offered for sale or negotiated for sale to a person other than another dealer for the purpose of transportation after repair or rebuilding."

[25] The SBP Specifically states that such vehicles are intended to be included within the Rule's coverage. *See* 49 FR 45707.

[42] *Compare* section 1(C)(2)(h)(iv) of the Maine Rule *with* 16 CFR 455.2(b)(2)(iv) (1987).

The Maine Rule, like the FTC Rule, also gives dealers the option of disclosing whether the manufacturer's original warranty still applies.[43]

In addition to the above disclosures, the Maine Rule requires that dealers disclose a deductible, if applicable, in a space provided in the warranty section of the Maine Buyer's Guide.[44] The FTC Rule dose not contain an analogous provision.[45]

Subsection (vii) of section 1(C)(2)(h) of the Maine Rule states that if the dealer originally offers the vehicle with an express warranty but, after negotiations with the consumer, sells the vehicle with no express warranty, it should cross out the warranty disclosure on the Maine Buyer's Guide and check the box next to the "NO EXPRESS WARRANTY EXCEPT THAT VEHICLE MEETS STATE INSPECTION STANDARDS" disclosure. This section of the Maine Rule is analogous to the last two paragraphs in §455.2(b)(2) of the FTC Rule concerning how to note negotiated changes in warranty coverage on the Buyers Guides.

(iv) *Service Contract Availability.* Section 1(C)(2)(i) of the Maine Rule requires dealers to check the box next to the words "SERVICE CONTRACT" if it chooses to offer such a contract. This section tracks § 455.2(b)(3) of the FTC Rule.

(v) *Vehicle, Dealership and Complaint Information.* Section 455.2(d) of the FTC Rule requires dealers to include certain vehicle information on the Buyers Guide, including the make, model, model year and vehicle identification number. Dealers may also include their vehicle stock number. These disclosures are designed to enhance the value of the Buyers Guide as evidence of the agreement between the dealer and the consumer.[46] The Maine provision, section 1(C)(2)(a), is identical to this FTC Rule provision.

Similar to § 455.2(c) and (e) of the FTC Rule, section 1(C)(2)(m) of the Maine Rule requires dealers to disclose on the back of the Buyer's Guide the name and address of the dealership, and the name, title and phone number of the dealership employee who should be contacted if complaints arise after the sale. Unlike the FTC Rule, this section of the Maine Rules also requires that if warranty repairs are not to be performed at the dealership providing the warranty, dealers musts place the name, address and other identifying information of each facility within a radius of 50 miles of the dealer's place of business to which the vehicle may be brought for warranty service.[47]

(vi) *Statement Concerning Pre-Purchase Independent Inspection.* Near the bottom of the FTC Buyers Guide there is a required disclosure suggesting that consumers inquire about the availability of an independent, pre-purchase inspection.[48] The Maine Rule requires a similar disclosure, in larger lettering, placed toward the top of the Maine Buyer's Guide.[49]

(vii) *Spoken Promises Warning.* An identical warning against relying on spoken promises is required to be included on the top of both the FTC Buyers Guide and the Maine Rule Buyer's Guide.

(viii) *List of Major Vehicle Systems.* An identical list of the fourteen major mechanical and safety systems of an automobile and some of the major problems that can occur in these systems is required on the back of both the FTC Buyers Guide and the Maine Rule Buyer's Guide.

(c) *Text of Window Stickers—Additional Disclosures Required by Maine.* In addition to the disclosures required by the FTC Rule, the Maine Rule requires several disclosures that are not required by the FTC Rule. These additional disclosures are discussed below.

(i) *Prior Use of Vehicle.* Section 1(C)(2)(b) of the Maine Rule requires that dealers disclose, on the Buyer's Guide, "the principal use to which the vehicle was put by the former owner." This disclosure would be made in one of two ways. If the former owner used the vehicle for personal use, the dealer would check the box next to the word "PERSONAL." If the prior owner used the vehicle for other than personal use (*e.g.*, police car, daily rental car, taxi, etc.), the dealer would check the box next to the word "OTHER," and state that prior use in the space provided.

(ii) *How Vehicle Was Acquired.* Section 1(C)(2)(d) of the Maine Rule requires the dealer to disclose, on the Buyer's Guide, "the type of sale by which [the dealer] acquired the vehicle." This disclosure would be made in one of two ways. If the dealer obtained the vehicle through a trade-in, it would check the box next to the word "TRADE-IN." If the dealer obtained the vehicle through another method, such as a sheriff's sale, repossession, auction, etc., it would check the box next to the word "OTHER," and state that method on the space provided.

(iii) *Known Mechanical Defects or Prior Substantial Damage.* Section 1(C)(2)(c) of the Maine Rule requires that dealers disclose, on the Buyer's Guide all mechanical defects known at the time of sale, even if the dealer has fully repaired the defect.[50] Further, section 1(C)(2)(e) of the Maine Rule requires dealers to disclose on the Buyer's Guide "any and all substantial damage that the vehicle has sustained that is known to [the dealer], including damage to the body or engine from collision, fire, water or other causes. [The dealer] must make this disclosure even if [the dealer has] fully repaired the damage."[51] In large letters under the spaces for this disclosure and the disclosure of known mechanical defects is the following statement: "IMPORTANT: THESE ARE THE ONLY PROBLEMS KNOWN TO THE DEALER. ASK IF YOU MAY GET AN INDEPENDENT INSPECTION BEFORE PURCHASE.

The FTC Rule Buyers Guide also contains (at the bottom) a statement suggesting that the consumer request an independent inspection of the vehicle prior to purchase. The Maine Rule's disclosure is in larger type than its FTC Rule counterpart. It is placed adjacent to the mechanical defects and prior substantial damage disclosures on the Maine Rule Buyer's Guide.

(iv) *Availability of Prior Owner's Name and Address.* Section 1(C)(2)(k) of the Maine Rule would require dealers to place a disclosure at the bottom of the Buyer's Guide informing the consumer that the previous owner's name and address is available from the dealer upon request.[52]

(v) *Whether Vehicle Has Been Returned to Manufacturer.* Section 1(C)(2)(l) of the Maine Rule requires dealers to disclose, on the reverse side of the Maine Rule Buyer's Guide, whether the vehicle has been returned to the manufacturer because of non-conformity with express warranties. If the dealer knows that the vehicle has been so returned, it must describe the non-conformities in the space provided.

[43] *Compare* section 1)(C)(2)(h)(vi) of the Maine Rule *with* 16 CFR 455.2(b)(2)(v) (1987).

[44] *See* section 1)(C)(2)(h)(v) of the Maine Rule.

[45] The staff compliance guidelines for the Used Car Rule suggest that dealers disclose the existence of a deductible by placing asterisks next to the percentage of parts and labor disclosures and writing an explanation of the terms of the deductible on the top line of the "systems covered/duration" portion of the Buyers Guide. *See* 52 FR at 18500, 18504.

[46] *See* SBP at 45,710.

[47] *See also* Me. Rev. Stat. Ann. tit. 10, sec. 1474(3)(A)(1).

[48] This disclosure states: "PRE PURCHASE INSPECTION: ASK THE DEALER IF YOU MAY HAVE THIS VEHICLE INSPECTED BY YOUR MECHANIC EITHER ON OR OFF THE LOT."

[49] This disclosure reads, in pertinent part: "ASK IF YOU MAY GET AN INDEPENDENT INSPECTION BEFORE PURCHASE." This provision is addressed further in this notice in the sections discussing disclosure of known mechanical defects and substantial damage.

[52] *See also* Me. Rev. Stat. Ann. tit. 10, sec. 1475(2)(B).

3. Section 455.3—Window Stickers Given to Purchaser and Incorporated into Contract

Section 455.3(a) of the FTC Rule directs dealers to give purchasers of used vehicles a Buyers Guide that includes any agreed-upon warranty coverage. The Maine Rule contains a substantially similar provision at section 1(D)(1). Similar to § 455.3(b) of the FTC Rule, section 1(D)(2) of the Maine Rule provides that the information on the Buyer's Guide is incorporated into the contract of sale and overrides any contrary provisions in the contract of sale. This section also requires that dealers place a two-sentence disclosure in the contract of sale informing consumers of this fact.[53] This disclosure is identical to the disclosure required by § 455.3(b) of the FTC Rule. The Maine Rule, however, specifies that the disclosure be placed in 10-point bold caps, while the FTC Rule merely requires that the disclosure be placed "conspicuously" in the contract.

4. Section 455.4—Contrary Statements

Section 455.4 of the FTC Rule prohibits dealers from making any statements, oral or written, or from taking other actions which alter or contradict the disclosures required by the Rule. Further, it recognizes that dealers may negotiate with consumers over warranty coverage, but requires that the final warranty terms be identified in the contract of sale and summarized on the final Buyers Guide that is given to the consumer. Sections 1(D) (3) and (4) of the Maine Rule contain equivalent requirements.

5. Section 455.5—Spanish Language Sales

Unlike the FTC Rule, Maine Rule does not contain a requirement that dealers prepare, display, and provide a Spanish language Buyers Guide if the transaction is conducted in that language. In noting this difference, the Maine petition states that such a requirement is not necessary in the Maine Rule due to Maine's low percentage of Spanish-speaking people. According to information obtained by the Commission from the U.S. Bureau of the Census,[54] in 1980 Maine had both the lowest percentage and the lowest raw number of Spanish speaking persons among the fifty states and the District of Columbia.[55]

D. Does Maine Evidence a Willingness and Ability To Enforce its Sticker Rule?

Pursuant to 16 CFR 455.6 (1987), the final requirement for obtaining and retaining a statewide exemption from the FTC Rule is a showing that a state administers and enforces effectively the state requirement that would replace the FTC Rule. Accordingly, the Funeral Rule state exemption guidelines ask states to submit sufficient information to show a willingness and ability to enforce their laws effectively.[56] Specifically, those guidelines state that staff will consider the following information as relevant to this determination:

(1) The fiscal arrangements and funding of the state agency (or agencies) which is charged with enforcing the state law, or other information indicating that the state agency has adequate funding to properly enforce the law;

(2) The number and qualifications of persons engaged in the enforcement and administration of the state law, or other information indicating that the state has adequate qualified personnel to administer and enforce the law;

(3) The state's current or planned enforcement procedures;

(4) The state's past history of enforcement of statutes which are comparable to the Commission's rule; and

(5) The level of compliance with any state statutes or regulations governing the practices covered by the Commission's rule, insofar as this information is relevant to the state's enforcement history.[57]

Appendix E of the Maine Petition discusses enforcement of the Maine Rule, and is summarized below.

Both the Maine Department of the Attorney General and the Maine Department of Motor Vehicles enforce the provisions of the Maine Used Car Information Act, the enabling statute for the Maine Rule. A violation of the Maine Rule is a *per se* violation of the Maine Unfair Trade Practices Act, which the Maine Attorney General's office is primarily responsible for enforcing.[58] The Department of Motor Vehicles has the power to deny, suspend or revoke the license of any dealer who does not comply with the Maine Rule.[59] To qualify as a "dealer" under the licensing provisions of the Maine Code, one must comply with the disclosure requirements of the MUCIA.[60]

1. Funding and Staffing of Agencies

According to the Maine Department of the Attorney General, there are four assistant attorneys general, five paralegals, one investigator and two clearical workers assigned exclusively to consumer protection matters in the state.[61] The enforcement staff at the Department of Motor Vehicles consists of fifteen investigators and two clerical workers.[62] Additionally, there are two state police officers who conduct MUCIA inspections on a part-time basis.[63]

2. Enforcement Procedures

(a) *Department of Attorney General.* According to the Maine Petition, enforcement of the MUCIA can commence in at least two ways. First, investigators within the Consumer and Antitrust Division of the Attorney General's Office have been instructed generally to survey used car lots during their travels around the state and to submit reports of their findings to the Director of Investigations.[64] Second,

[53] This disclosure reads as follows: "The information you see on the window form for this vehicle is part of this contract. Information on the window form overrides any contrary provisions in the contract of sale."

[54] June 12, 1987 Letter from Paul M. Siegel, Chief, Education and Social Stratification Branch, Population Division, Bureau of the Census, United States Department of Commerce, Washington, DC 20233.

[55] These data are derived from two census questions. First, the subject was asked: "Does this person speak a language other than English at home?" If the answer to that question was yes, the person was asked: "What is that language?" 2,987 Maine citizens, or 0.3% of Maine's population, answered "Yes" and "Spanish," respectively, to these questions in 1980. This data compares to 3,270,287, or 14.5% of California residents. Of course, this information does not specifically reveal the number of Spainsh-speaking people who have little or no comprehension of English, and would therefore require a Spanish language Buyer's Guide whil shopping for a used vehicle.

[56] 50 FR at 12525.

[57] *Id* The guidelines also recognize that some of this information may not be relevant or available in certain states and that each state application may differ accordingly.

VOL 52 ISS 248 DEC 28 1987 UMI

mediators in that office attempt to resolve complaints involving used motor vehicle transactions. As part of this process, the mediator determines whether the dealer in question has been making the disclosures required by both the Maine Rule and the FTC Rule. According to the Petition, repeated failure to make the required disclosures results in an unfair trade practice investigation, which may lead to an Assistant Attorney General initiating a formal enforcement action.

Each violation of the MUCIA subjects the violator to a civil penalty of between $100 and $1,000.[65] Under the FTC Act, violators of trade regulation rules may be punished by penalties of up to $10,000 per violations.[66] The Maine Rule contains a two-year statute of limitations.[67] This contrasts with the five-year statute of limitations applicable to enforcement of FTC trade regulations rules.[68] Additionally, the Maine Rule specifically provides dealers with a defense if the alleged violations are shown to be "unintentional" and "bona fide error[s]." [69] Neither the FTC Rule nor the FTC Act contains a defense based on intent.[70]

(b) *Department of Motor Vehicles.* The Department of Motor Vehicles employs investigators who enforce the disclosure requirements of the MUCIA.[71] According to the Petition, the DMV typically gives a violating dealer ten days to comply. Failure to do so results in the issuance of a civil complaint in state district court.[72]

3. History of Enforcement of the MUCIA

The mediation program of the Consumer and Antitrust Division of the Attorney General's Office has resolved 197 out of 481 complaints received since January, 1985.[73] During the past two years, that Division has conducted 59 MUCIA civil or criminal investigations, eleven of which were litigated. All eleven resulted in either a consent decree or a court injunction with penalties.[74]

4. Private Right of Action

A dealer who violates the MUCIA may be liable to the purchaser in an amount not less than $100 and not more than $1,000 in liquidated damages, in addition to costs and reasonable attorneys fees.[75] This penalty may be imposed in addition to any civil penalty awarded in a separate action brought by a state agency.[76]

IV. Requests for Public Comment

The Commission has determined that the Maine Petition contains sufficient information to initiate a proceeding on whether to grant an exemption pursuant to § 455.6 of the FTC Rule. Accordingly, the Commission requests public comment on whether to grant a statewide exemption to the State of Maine from the FTC Rule.

The following questions are designed to elicit public comment on whether the Maine Rule provides protection to consumers that is equal to or greater than that provided by the FTC Rule. To that end, commenters are encouraged to support their conclusions with factual information or data.

1. Does the Maine Rule apply to the same transactions as does the FTC Rule, and, if not, how do the differences in coverage affect the level of protection afforded to consumers in the State of Maine?

2. How does the disclosure regarding the mandatory "warranty of inspectability" on the Maine Rule Buyer's Guide affect the overall level of protection afforded to consumers by the state laws?

3. How does the disclosure regarding implied warranties on the Marine Rule Buyer's Guide affect the overall level of protection afforded to consumers by the state laws?

4. What is the impact on the overall level of protection provided to consumers by disclosures included in the Maine Rule (for example, the "prior use" and "how acquired" disclosures) but which are not included in the FTC Rule?

5. In what way does the private right of action available in Maine affect the overall level of protection provided to consumers by the state law?

6. Compared with the FTC Rule, what is the impact of the Maine Rule on the overall level of protection provided to Spanish-speaking consumers, given that the Maine Rule does not require that a Spanish-language Buyer's Guide be used if the sale is conducted in Spanish?

7. In general, do the Maine Rule and other state laws provide an overall level of protection to consumers which is as great as, or greater than, the protection afforded by the FTC Rule?

The following questions are designed to elicit public comment on whether the Petition demonstrates Maine's willingness and ability to enforce adequately its state law. To that end, commenters are encouraged to support their conclusions with factual information or data.

8. Are the sanctions available under state law sufficient to deter violations of the Maine Rule?

9. In general, has Maine demonstrated its willigness and ability to enforce the Maine Rule?

Under the Funeral Rule state exemption guidelines, additional procedures for public participation may be scheduled if necessary for a full and fair presentation of significant issues.[77] For example, the guidelines state that oral hearings may be necessary if there are significant factual issues that can be adequately presented only through an oral hearing, such as where cross-examination is necessary to present significant factual issues fully and fairly.[78] In the Commission's opinion, a determination as to whether such procedures will be necessary can not be made at this time. However, interested parties may request that the Commission schedule an oral hearing or a period for rebuttal comments.

BUYERS GUIDE

IMPORTANT: Spoken promises are difficult to enforce. Ask the dealer to put all promises in writing. Keep this form.

VEHICLE MAKE _____ MODEL _____ YEAR _____ VIN NUMBER _____

DEALER STOCK NUMBER (Optional) _____

WARRANTIES FOR THIS VEHICLE:

☐ **AS IS - NO WARRANTY**

YOU WILL PAY ALL COSTS FOR ANY REPAIRS. The dealer assumes no responsibility for any repairs regardless of any oral statements about the vehicle.

☐ **WARRANTY**

☐ **FULL** ☐ **LIMITED WARRANTY. The dealer will pay _____% of the labor and _____% of the parts for the covered systems that fail during the warranty period. Ask the dealer for a copy of the warranty document for a full explanation of warranty coverage, exclusions, and the dealer's repair obligations. Under state law, "implied warranties" may give you even more rights.**

SYSTEMS COVERED: _____

DURATION: _____

☐ **SERVICE CONTRACT. A service contract is available at an extra charge on this vehicle. Ask for details as to coverage, deductible, price, and exclusions. If you buy a service contract within 90 days of the time of sale, state law "implied warranties" may give you additional rights.**

PRE PURCHASE INSPECTION: ASK THE DEALER IF YOU MAY HAVE THIS VEHICLE INSPECTED BY YOUR MECHANIC EITHER ON OR OFF THE LOT.

SEE THE BACK OF THIS FORM for important additional information, including a list of some major defects that may occur in used motor vehicles.

Below is a list of some major defects that may occur in used motor vehicles.

Frame & Body
- Frame-cracks, corrective welds, or rusted through
- Dogtracks—bent or twisted frame

Engine
- Oil leakage, excluding normal seepage
- Cracked block or head
- Belts missing or inoperable
- Knocks or misses related to camshaft lifters and push rods
- Abnormal exhaust discharge

Transmission & Drive Shaft
- Improper fluid level or leakage, excluding normal seepage
- Cracked or damaged case which is visible
- Abnormal noise or vibration caused by faulty transmission or drive shaft
- Improper shifting or functioning in any gear
- Manual clutch slips or chatters

Differential
- Improper fluid level or leakage excluding normal seepage
- Cracked or damaged housing which is visible
- Abnormal noise or vibration caused by faulty differential

Cooling System
- Leakage including radiator
- Improperly functioning water pump

Electrical System
- Battery leakage
- Improperly functioning alternator, generator, battery, or starter

Fuel System
- Visible leakage

Inoperable Accessories
- Gauges or warning devices
- Air conditioner
- Heater & Defroster

Brake System
- Failure warning light broken
- Pedal not firm under pressure (DOT spec.)
- Not enough pedal reserve (DOT spec.)
- Does not stop vehicle in straight line (DOT spec.)
- Hoses damaged
- Drum or rotor too thin (Mfgr. Specs)
- Lining or pad thickness less than 1/32 inch
- Power unit not operating or leaking
- Structural or mechanical parts damaged

Steering System
- Too much free play at steering wheel (DOT specs.)
- Free play in linkage more than 1/4 inch
- Steering gear binds or jams
- Front wheels aligned improperly (DOT specs.)
- Power unit belts cracked or slipping
- Power unit fluid level improper

Suspension System
- Ball joint seals damaged
- Structural parts bent or damaged
- Stabilizer bar disconnected
- Spring broken
- Shock absorber mounting loose
- Rubber bushings damaged or missing
- Radius rod damaged or missing
- Shock absorber leaking or functioning improperly

Tires
- Tread depth less than 2/32 inch
- Sizes mismatched
- Visible damage

Wheels
- Visible cracks, damage or repairs
- Mounting bolts loose or missing

Exhaust System
- Leakage

☐ SERVICE CONTRACT. A service contract is available at an extra charge on this vehicle. Ask for details as to coverage, deductible, price, and exclusions. If you buy a service contract within 90 days of the time of sale, Maine "implied warranties" cannot be limited by the dealer and may give you additional rights.

IMPLIED WARRANTIES

☐ **YES** ☐ **NO** ☐ **LIMITED TO DURATION OF EXPRESS WARRANTY**

Maine's implied warranty law may give you additional rights. If the vehicle is still within its useful life and has not been abused, you may have the right to have the dealer repair defects in materials or workmanship that were not apparent when you bought the vehicle. Or you may be able to return the car if the dealer promised you it was fit for a particular use and it was not.

IMPORTANT INFORMATION

- PRIOR OWNERS NAME AND ADDRESS IS AVAILABLE FROM THE DEALER UPON REQUEST.
- SEE THE BACK OF THIS FORM FOR ADDITIONAL INFORMATION, INCLUDING A LIST OF SOME MAJOR DEFECTS THAT MAY OCCUR IN USED MOTOR VEHICLES.

-46-

IMPORTANT NOTE: THIS FORM HAS BEEN REDUCED FROM THE 8½" x 12½" MINIMUM SIZE PRESCRIBED BY SECTION (C) (1)(b) of the MAINE USED CAR INFORMATION ACT STICKER RULE

Below is a list of some major defects that may occur in used motor vehicles.

Frame & Body
- Frame-cracks, corrective welds, or rusted through
- Dogtracks — bent or twisted frame

Engine
- Oil leakage, excluding normal seepage
- Cracked block or head
- Belts missing or inoperable
- Knocks or misses related to camshaft lifters and push rods
- Abnormal exhaust discharge

Transmission & Drive Shaft
- Improper fluid level or leakage, excluding normal seepage
- Cracked or damaged case which is visible
- Abnormal noise or vibration caused by faulty transmission or drive shaft
- Improper shifting or functioning in any gear
- Manual clutch slips or chatters

Differential
- Improper fluid level or leakage excluding normal seepage
- Cracked or damaged housing which is visible
- Abnormal noise or vibration caused by faulty differential

Cooling System
- Leakage including radiator
- Improperly functioning water pump

Electrical System
- Battery leakage
- Improperly functioning alternator, generator, battery or starter

Fuel System
- Visible leakage

Inoperable Accessories
- Gauges or warning devices
- Air conditioner
- Heater & Defroster

Brake System
- Failure warning light broken
- Pedal not worn under pressure (DOT spec.)
- Not enough pedal reserve (DOT spec.)
- Does not stop vehicle in straight line (DOT spec.)
- Hoses damaged
- Drum or rotor too thin (Mfr. Specs.)
- Lining or pad thickness less than 1/32 inch
- Power unit not operating or leaking
- Structural or mechanical parts damaged

Steering System
- Too much free play at steering wheel (DOT specs.)
- Free play in linkage more than ¼ inch
- Steering gear binds or jams
- Front wheels aligned improperly (DOT specs.)
- Power unit belts cracked or slipping
- Power unit fluid level improper

Suspension System
- Ball joint seals damaged
- Structural parts bent or damaged
- Stabilizer bar disconnected
- Spring broken
- Shock absorber mounting loose
- Rubber bushings damaged or missing
- Radius rod damaged or missing
- Shock absorber leaking or functioning improperly

Tires
- Tread depth less than 2/32 inch
- Sizes mismatched
- Visible damage

Wheels
- Visible cracks, damage or repairs
- Mounting bolts loose or missing

Exhaust System
- Leakage

Vehicle Returned to Manufacturer.
This vehicle has _____ has not _____ been returned to the manufacturer, its agent or authorized dealer, for its non-conformity with express warranties. These non-conformities were: _____

_____

_____

Notice of Breach of Warranty.
If a dealer fails to perform his obligation under the warranty, the purchaser shall give the dealer written notice of such failure before the purchaser initiates a civil action in accordance with 10 MRSA § 1476. This notice must be sent by registered or certified mail to the dealer's last known business address.

_____
Dealer

_____
Address

FR Doc. 87-29153 Filed 12-24-87; 8:45 am]
BILLING CODE 6750-01-C

federal register

Monday
December 28, 1987

Part III

Environmental Protection Agency

40 CFR Parts 160 and 792
Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA); Good Laboratory Practice Standards; Proposed Rules

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 160

[OPP-300165; FRL 3245-5]

Federal Insecticide, Fungicide and Rodenticide Act (FIFRA); Good Laboratory Practice Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to expand the scope of the FIFRA Good Laboratory Practice (GLP) Standards by requiring GLP compliance for testing conducted in the field and for such disciplines of testing as ecological effects, chemical fate, residue chemistry, and, as required by 40 CFR 158.160, product performance (efficacy testing). EPA is proposing this amendment in order to ensure the quality and integrity of all data submitted to the Agency in conjunction with pesticide product registration, or other marketing and research permits. EPA is also proposing to amend the FIFRA GLPs to incorporate many of the changes made by the Food and Drug Administration (FDA) to its GLP regulations.

DATE: Submit written comments on or before March 28, 1988.

ADDRESS: Submit written comments, identified by the document control number (OPP-300165), by mail to: Information Services Section, Program Management and Support Division (TS-757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. In person, deliver comments to: Rm. 236, CM —2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this proposed rule may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for public inspection in Rm. 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: Daniel A. Helfgott, Office of Compliance Monitoring (EN-342), Rm. E-707B, 401 M St. SW., Washington, DC 20460, Telephone: (202) 382-7825.

SUPPLEMENTARY INFORMATION: Following is an index to the remainder of this preamble:

I. Introduction
  A. Legal Authority
  B. Background
  C. Consistency With FDA GLP Regulations
  D. Proposed Changes to the FIFRA GLP Regulation
II. Economic Analysis
III. Statutory Requirements
IV. Other Regulatory Requirements
  A. Executive Order 12291
  B. Regulatory Flexibility Act
  C. Paperwork Reduction Act

I. Introduction

A. Legal Authority

These standards are promulgated under the authority of sections 3, 5, 6, 8, 18, 24(c), and 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136 et seq., sections 408, 409, and 701 of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 301 et seq., and Reorganization Plan No. 3 of 1970.

B. Background

EPA originally published enforceable FIFRA Good Laboratory Practice Standards in the **Federal Register** of November 29, 1983 (48 FR 53446), which were codified as 40 CFR Part 160. At the same time, EPA published GLP standards applicable to testing required under the Toxic Substances Control Act (TSCA, 48 FR 53922, 40 CFR Part 792). These regulations were promulgated in response to investigations by EPA and FDA during the mid-1970s which revealed that some studies submitted to the Agencies had not been conducted in accordance with acceptable laboratory practices. Some studies had been conducted so poorly that the resulting data could not be relied upon in EPA's regulatory decision-making process. For instance, some studies had been submitted which did not adhere to specified protocols, were conducted by underqualified personnel and supervisors, or were not adequately monitored by study sponsors. In some cases results were selectively reported, underreported, or fraudulently reported. In addition, it was discovered that some testing facilities displayed poor animal care procedures and inadequate record-keeping techniques. The FIFRA GLP standards specify minimum practices and procedures which must be followed in order to ensure the quality and integrity of data submitted to EPA in support of a research or marketing permit for a pesticide product.

When EPA published its final FIFRA and TSCA GLP standards in the **Federal Register** of November 29, 1983, the Agency sought to harmonize the requirements and language with those regulations promulgated by the FDA in the **Federal Register** of December 22, 1978 (43 FR 60013), and codified as 21 CFR Part 58. Differences between the two Agencies' current GLP regulations exist only to the extent necessary to reflect the Agencies' different statutory TSCA, FIFRA, and the Federal Food, Drug, and Cosmetic Act (FFDCA) responsibilities. Similar to the FDA GLP regulations, the FIFRA and TSCA GLPs delineate standards for studies designed to determine the health effects of a test substance; however, the TSCA GLPs also contain provisions related to environmental testing (i.e., ecological effects and chemical fate).

Compliance with EPA's GLP regulations has been monitored through a program of laboratory inspections and study audits coordinated between EPA and FDA. Under an Interagency Agreement originating in 1978, FDA carries out inspections at laboratories which conduct health effects testing. EPA primarily performs laboratory inspections and data audits for environmental studies.

After a thorough review of its GLP regulations and compliance program, FDA concluded that some of the provisions of the GLPs needed to be clarified, amended, or deleted in order to reduce the regulatory burden on testing facilities. Accordingly, FDA proposed revisions to its GLPs in the **Federal Register** of October 24, 1984 (49 FR 43530), which were intended to simplify the regulation without compromising study integrity. FDA's proposed revision has recently been published as a final rule in the **Federal Register** of September 4, 1987 (52 FR 33768).

EPA agrees with FDA that many provisions of the GLP regulations can be streamlined without compromising the goals of the GLPs. Therefore, EPA is proposing to amend the FIFRA GLP standards to incorporate many of the changes recently made by FDA to its GLP regulations. In addition, EPA is proposing to expand the scope of the FIFRA GLPs to include the environmental testing provisions currently found in the TSCA GLPs. EPA's proposed revision to the GLPs also extends the scope of the regulation to include product performance data (efficacy testing) as required by 40 CFR 158.160. In sum, the proposed FIFRA GLPs will allow the Agency to ensure the quality and integrity of all data submitted in support of pesticide product research or marketing permits. In another notice in this **Federal Register**, EPA is proposing similar changes to the TSCA GLP standards.

C. Consistency With FDA GLP Regulations

It is EPA's policy to minimize the regulatory burden on the public which might arise from conflicting requirements which could be promulgated under different regulatory authorities. In keeping with this policy, the final FIFRA 1983 GLP standards, 40 CFR Part 160, followed the format and, with few exceptions, the wording of FDA's final GLP regulations, 21 CFR Part 58. Differences between the EPA and FDA GLP regulations were based upon varying needs and responsibilities under each Agency's regulatory statutes. This proposed revision to the FIFRA GLPs follows this same policy by conforming to many of the changes FDA made to its GLP regulations, published in the **Federal Register** of September 4, 1987 (52 FR 33768). EPA has varied from FDA's revised GLP regulations only when necessary due to EPA's statutory responsibilities. The most significant differences between the EPA proposal and the FDA revised GLP regulations are the scope of the testing and test systems affected.

More specifically, EPA is proposing to require compliance with the FIFRA GLPs for all studies submitted to the Agency which are intended to support pesticide product research or marketing permits. Under the current FIFRA Good Laboratory Practice regulations, and consistent with the FDA GLP regulations, this Agency only requires GLP compliance for health effects testing. However, unlike FDA, testing required by EPA in support of research or marketing permits may include ecological effects, environmental and chemical fate, and efficacy (as stipulated by 40 CFR 158.160 *Product performance data requirements*), as well as health effects testing. Therefore, in an effort to attain consistency in the quality and the integrity of all data submitted to the Agency, EPA has determined that it is necessary to expand the scope of the FIFRA GLPs to require that all types of testing which are used to obtain data in support of research or marketing permits be conducted in accordance with the proposed GLP standards.

EPA's proposed FIFRA GLP standards also vary from FDA's in their coverage of testing conducted in the field. To ensure the quality and integrity of all data submitted in support of research or marketing permits, EPA believes that GLP standards must apply whenever data collection occurs. Because many of the test data required by EPA are developed in the field, or more accurately in outdoor laboratories (i.e., ground-water studies, air monitoring studies, degradation in soil, etc.), EPA is proposing to include field testing within the scope of these regulations.

This Agency's proposed FIFRA GLPs also differ from FDA's in the scope of the requirements provided for test system care facilities, test system supply facilities, and test system care. Because testing required by FDA is focused on health testing, in which animals are the central test system, it is appropriate for FDA's GLP regulations to focus on requirements for appropriate animal care facilities (21 CFR 58.43), adequate animal supply facilities (21 CFR 58.45), and proper animal care (21 CFR 58.90). However, the broad range of testing required by EPA may involve plants, soils, and microorganisms, as well as animals, for the primary test systems. In order to ensure the quality and integrity of all data submitted to this Agency, it is proposed that § 160.43 *Animal care facilities*, § 160.45 *Animal supply facilities*, and § 160.90 *Animal care* be expanded to cover facilities, handling, and care of all test systems. Accordingly, EPA is proposing that these sections be retitled as follows: § 160.43 *Test system care facilities*, § 160.45 *Test system supply facilities*, and § 160.90 *Animal and other test system care*. Further, in most instances, EPA is proposing to replace the term "animal," which is currently used in the FIFRA GLP regulations, with the broader term "test system." Specifically, this change is proposed in §§ 160.43, 160.45, 160.81, 160.90 and 160.120. These proposed changes are further discussed in Unit I.D. of this preamble.

The remaining differences between the EPA and FDA GLP regulations are described in the preamble to this proposed rule and the preamble to the FIFRA Good Laboratory Practice Standards, published in the **Federal Register** of November 29, 1983 (48 FR 53946). EPA has coordinated this proposal with FDA and has considered comments received on the proposal to amend the FDA GLP regulations (49 FR 43530; October 29, 1984).

D. Proposed Changes to the GLP FIFRA Regulations

1. *Section 160.3 Definitions.* a. EPA proposes to define the term "carrier" to mean any material, such as feed, water, soil, nutrient material, etc., with which the test substance is combined for administration to test organisms. The term "carrier" is currently used in § 160.113 and is not defined. EPA proposes to define this term to clarify it.

b. EPA proposes to conform with the September 4, 1987, FDA GLP regulations by amending the definition of "control substance" to exclude feed and water. EPA agrees with FDA's statement regarding this change (52 FR 33769; September 4, 1987) that "the term control [substance] should be reserved for the discrete substances/articles, and vehicles other than water administered to groups of the test system to provide a basis of comparison with the test [substance]."

FDA contends that, under the current definition of "control substance," because the control group of a test system provides the basis for comparison with a test substance, any substance administered to the control group would be considered a control substance. This would mean that feed and water given to the control group of a study are considered a control substance. For instance, in studies in which the test substance or mixture is administered to the test system orally, through feed or drinking water, gavage, or injection, the feed or water is considered a control substance. As a control substance, the feed or water is subject to § 160.105(a) for substance characterization, § 160.105(b) for testing for stability and solubility, § 160.105(c) for requirements for appropriate storage, § 160.105(d) for retention of reserve samples, and § 160.107 for documentation of receipt and distribution of each batch. EPA agrees with FDA that placing these requirements on the use of feed and water as a control substance in control groups unnecessarily burdens the regulated community and is not essential for ensuring the quality and integrity of the data generated by a study.

However, under 40 CFR Part 160, feed and water used as a carrier for the test and control substances or mixtures are still covered by the applicable sections for the testing and storage of test, control, and reference substances and mixtures. For example, § 160.31(e) requires testing facility management to ensure materials are available as scheduled; § 160.45 requires that test system supply facilities shall be provided to ensure proper feed storage; § 160.81(b)(2) requires Standard Operating Procedures (SOP) for test system care, including nutrition; § 160.90(g) requires periodic analysis of feed and water to ensure that contaminants which would interfere with the study are not present; § 160.120(a)(9) requires the protocol to

describe and/or identify the diet used in the study, including the level of contaminants expected in the dietary materials.

c. EPA also proposes to modify the definition of "control substance" by adding the phrase "for no effect levels." This addition to the definition is being proposed merely to clarify the difference between the term "reference substance" and "control substance." While a control substance is used to determine a baseline comparison to no effect levels, a reference substance is used to determine a baseline comparison to an established effect level.

d. EPA proposes to add and define the terms "experimental start date" and "experimental termination date." "Experimental start date" is proposed to mean the first date the test substance is applied to the test system. Under this definition, as of the experimental start date: (1) Under proposed § 160.105(b), the stability and, if important to the conduct of the experiment, the solubility of the test, control, and reference substances would have been determined; (2) under proposed § 160.113(a)(2), the stability and, if important to the conduct of the experiment, the solubility of the test, control, and reference substance in the mixture would have been determined and; (3) under proposed § 160.120(a)(4), the proposed experimental start date would appear in the protocol.

EPA proposes that "experimental termination date" be defined as the last date on which data are collected directly from the study. Under § 160.120(a)(4) as proposed, EPA would require the proposed experimental termination date to appear in the protocol. EPA considers histopathology after scheduled terminal animal sacrifice to be carried out before the experimental termination date.

Experimental start and termination dates would be expressed as the actual calendar dates, not just time-line increments. Therefore, when determining the proposed experimental start and termination dates, as would be required by proposed § 160.120(a)(4), the submitter should consider any lag time relating to protocol approval and laboratory contracting.

e. EPA proposes to add and define the term "reference substance" to mean any chemical substance or mixture or material other than a test substance that is administered to or used in analyzing the test system in the course of a study for purposes of establishing a basis for comparison with the test substance for known effect levels. EPA proposes the use of the term "reference substance" in the revised FIFRA GLP regulations because of its common usage in environmental testing and, therefore, its proposed use in these regulations.

In this proposed GLP regulation, all the requirements provided for test and control substances would also apply to "reference substances." Accordingly, the term "reference substance" has been added wherever the term "test and control substance" appears in these standards. Specifically, the term "reference substance" is added to proposed § 160.29 (d) through (f); § 160.43(b); § 160.47(a) (1) through (3) and (b); § 160.81(b)(3); the Subpart F heading; § 160.90(c); § 160.105 (a) through (e); § 160.107; § 160.113 (a) and (b); § 160.120(a) (2), (9), and (11); § 160.185(a) (4) and (5); and § 160.195(c).

f. EPA proposes to broaden the definition of the term "study" to be consistent with EPA's proposal to amend these regulations to require GLP compliance for all testing required to be submitted to the Agency in conjunction with a pesticide product's research or marketing permit.

EPA is proposing to delete the phrase "in vivo or in vitro" from the definition of "study." The Agency still intends the requirements of these regulations to apply to "in vivo and in vitro" experiments. However, since the Agency intends these regulations to apply to all studies required to be submitted under FIFRA, including those conducted in the field, EPA feels that including the phrase "in vivo or in vitro" in the definition of "study" is too limiting.

Further, EPA is proposing to delete the term "prospectively" from the definition of "study." In this way, epidemiological studies, which could be "retrospective," will be required to be presented to the Agency in accordance with the GLP standards. EPA recognizes that data used in an epidemiological study may not have been generated in conformance with the FIFRA GLP standards, however, it is EPA's contention that the epidemiological study itself can be conducted and submitted to the Agency in accordance with the GLPs.

EPA is also proposing to delete from the current definition of "study" the following sentence: "The term does not include studies utilizing human subjects or clinical studies or field trials in animals." Again, this change is consistent with EPA's intention to require compliance with GLPs for all studies submitted to the Agency in support of a research or marketing permit for pesticide products, including biomonitoring or efficacy studies. FIFRA does not prohibit pesticide testing on humans (as long as the informed-consent conditions specified in FIFRA section 12(a)(2)(P) are met, and provided the records required by 40 CFR 169.2(j) are maintained). EPA feels that testing that is performed on humans must be conducted in accordance with the GLPs, if that data is submitted to the Agency in support of a marketing or research permit.

It is also proposed that studies designed to determine the physical or chemical characteristics of a test substance be included within the scope of these regulations. Therefore, EPA is proposing that the phrase "or to determine physical or chemical characteristics of a test substance" be deleted from the definition of the term "study." This proposed change is consistent with the definition of the term "study" as it now appears, and as it is proposed to appear, in the TSCA Good Laboratory Practice Standards at 40 CFR Part 792. However, as specified in proposed § 160.135, exclusions from certain GLP requirements are provided for studies related to determining the physical or chemical characterization of a test, control, or reference substance (e.g., studies designed to determine color, odor, physical state, melting point, pH measurement, etc.).

g. EPA proposes to incorporate the FDA definitions for "study completion date" and "study initiation date" in § 160.3. "Study completion date" is proposed to mean the date the final report is signed by the study director. EPA advises that the phrase "close of the study" as used in § 160.33(f), and the phrase "study is completed" as used in § 160.195(b)(3) both refer to the "study completion date." Consistent with this definition, as of that date: (1) Under § 160.33(f), the study director must ensure that all raw data, documentation, protocols, specimens, and final reports are transferred to the archives; (2) after this date under § 160.185(c), corrections or additions to the final report must be in the form of an amendment by the study director under the procedures specified in that section; and (3) in the applicable situations described in § 160.195(b)(3), records must oe maintained for a period of at least 2 years following the study completion date.

EPA proposes to define "study initiation date" as the date the protocol is signed by the study director. EPA advises that the phrase "study is initiated" as used in § 160.31(a), and the phrase "study was initiated" as used in § 160.35(b)(1) would refer to the "study initiation date." Therefore, as of the study initiation date: (1) Under § 160.31(a), the testing facility management would designate a study director; (2) under § 160.35(b)(1), the study would be entered on the master schedule sheet by the quality assurance unit; and (3) under § 160.120(b), after this date all changes or revisions in the protocol would be documented, signed by the study director, and dated. EPA also expects that as of the study initiation date, under § 160.31(e), the testing facility management would have ensured that personnel, resources, facilities, equipment, material, and methodologies are available as scheduled.

h. EPA proposes to replace the term "test substance or mixture" with the term "test substance." This is an editorial change which makes usage consistent in the GLP standards. The term "test substance" is proposed to be defined to include mixtures.

i. EPA proposes to expand the definition of "test system" to include chemical or physical matrices (e.g., soil or water). This proposal is consistent with the Agency's intent to expand these regulations to include environmental effects testing.

j. EPA proposes to define the term "vehicle" to mean any agent which facilitates the mixture, dispersion, or solubilization of a test substance with a carrier.

2. *Section 160.31 Testing facility management.* In conformance with the revised FDA GLP regulations, in § 160.31(b), EPA proposes to delete the requirement that the replacement of a study director must be documented as "raw data." EPA agrees with FDA that this requirement is redundant with other provisions of the GLPs. For instance, § 160.35(b)(1) states that the master schedule sheet must contain the name of the study director. As FDA notes (52 FR 33770), any replacement of the study director would be reflected on the master schedule sheet, which is already considered "raw data." Further, § 160.120(b) states that all changes in an approved protocol must be documented and signed by the study director. Replacement of the study director is considered to be a change in the approved protocol.

3. *Section 160.35 Quality assurance unit (QAU).* a. In § 160.35(a), EPA proposes to conform with the revised FDA GLP regulations by substituting the term "which" for the current phrase "composed of one or more individuals who." This change clarifies that EPA does not require the QAU to be a fixed, permanently staffed unit whose only functions are to monitor the quality of a study. The Agency is only concerned that there be a distinct separation of duties between those personnel involved with the conduct or direction of a study and those personnel performing quality assurance on the same study. Therefore, EPA does intend proposed § 160.35(a) to prohibit personnel from performing quality assurance activities on their own study.

b. In § 160.35(b)(1), EPA proposes to delete the requirement that the name of the study sponsor appear on the master schedule sheet. Instead, it is proposed that under § 160.35(b)(1) the sponsor's identity appear on the master schedule sheet. This change is being proposed to be consistent with the FDA's recent revision and to provide the regulated community the option of using an identity code on the master schedule in lieu of the sponsor's name.

EPA agrees with FDA's contention that requiring the sponsor to be identified specifically by name on the master schedule is not essential to fulfill the requirements of the GLPs or the goal of ensuring the quality and integrity of the data generated from the studies. However, while the name of the study sponsor would not be required to appear on the master schedule sheet, this information must be made available to the Agency upon request.

c. As in the revised FDA GLP regulations, EPA is also proposing to delete the requirement in § 160.35(b)(1) that the master schedule sheet contain the status of the final report. EPA agrees with FDA that this requirement is redundant in view of the other information required by § 160.35(b)(1) such as the date the experiment began and the current status of each study.

d. In conformance with the revised FDA GLP regulations, EPA proposes to modify the requirements of § 160.35(b)(3) to provide for inspections of a study on a schedule adequate to ensure the integrity of the study. This section currently specifies that the quality assurance unit must inspect each phase of a study periodically. This section also currently specifies that for studies lasting more than 6 months, quality assurance inspections shall be conducted every 3 months, and for studies lasting less than 6 months, quality assurance inspections shall be conducted at intervals adequate to ensure the integrity of the study.

The proposed changes to this section will allow the QAU the necessary latitude to adjust its monitoring activities to meet the individual problems of each study. EPA agrees with FDA's contention that an inspection of each phase of the study is not necessary to ensure that a study is being conducted properly. However, EPA also agrees with FDA that each study, no matter how short, must be inspected at least once while in progress. EPA expects that by allowing the QAU flexibility in designing a reasonable inspection schedule, the goal of ensuring the quality of the study can be best achieved.

e. Consistent with the revised FDA GLPs, EPA is proposing to delete § 160.35(e) in its entirety. Section 160.35(e) currently requires that all quality assurance records be kept in one location at the testing facility. As FDA pointed out in its October 29, 1984, proposed GLP revision, since § 160.190(b) already requires the use of archives for the orderly storage and expedient retrieval of all reports and records, the requirements of § 160.35(e) are not necessary. However, EPA maintains that all reports and records, including those of the QAU, must be easily accessible and made available to EPA and FDA inspectors when requested.

4. *Section 160.41 General.* FDA has deleted from its GLPs the requirement that the location of each testing facility be suitable to facilitate the proper conduct of studies. However, EPA is proposing that § 160.41 require that testing facilities which are not located within an indoor controlled environment be suitably located to facilitate the proper conduct of studies.

The studies FDA requires are generally conducted within the confines of a traditional indoor laboratory. Because the conditions specified within a protocol can be artificially manipulated within the traditional indoor laboratory, the location of these laboratories is generally not a factor in determining the quality of a study. Therefore, it is not necessary to ensure that a traditional indoor testing facility is suitably located to facilitate the proper conduct of the study.

However, the studies EPA requires are not necessarily conducted within the confines of the traditional indoor scientific laboratory (i.e., field studies, groundwater studies, ecological toxicity studies, etc.). EPA considers any site where testing is undertaken to generate data required by the Agency to be a testing facility. The conditions required by the protocol are not necessarily conducive to artificial manipulation in the field, or other outdoor testing facilities. Therefore, ensuring the suitability of the location of these types of testing facilities is both a valid and necessary part of EPA's GLP Standards.

5. *Section 160.43 Test system care facilities.* a. EPA is proposing to revise the title of § 160.43 from "Animal care facilities" to "Test system care facilities". The proposed heading for § 160.43 more adequately reflects the

VOL 52 ISS 248 DE 28 1987 UMI

Agency's intent to specify facility requirements for the care of chemical or physical matrices (e.g., soil or water), plants, and microorganisms, as well as animals. Accordingly, the Agency is proposing to further modify § 160.43 by incorporating the term "test system" when facility requirements should extend beyond "animal" care.

Consistent with the Agency's intent stated above, paragraphs (a)(1), (a)(2), (d), (e), (f), (g), and (h) in proposed § 160.43 have been added or modified in order to ensure proper care facilities are provided for the additional test systems covered by the expanded section.

b. EPA proposes to modify § 160.43(a) to allow testing facilities to provide for isolation areas rather than quarantine areas. This change is consistent with the proposal to modify § 160.90(b) to allow "isolation" of newly received animals rather than require "quarantine" [See Unit I.D. of this preamble for a discussion of proposed § 160.90(b)].

c. In § 160.43(c), EPA proposes to delete the requirement that separate areas be provided in all cases for the diagnosis, treatment, and control of test system diseases. Instead, it is proposed that such separate areas be provided "as appropriate." This proposal is consistent with the September 4, 1987, revised FDA GLP regulations.

EPA has proposed this modification in order to allow laboratories the option of disposing of diseased animals and other test systems without also bearing the expense of maintaining separate areas in testing facilities for diagnosis, treatment, and control of disease. Additionally, EPA recognizes that the diagnosis and treatment requirements of § 160.43(c) may not be appropriate when dealing with such test systems as soil, plants, or microorganisms. However, if the decision is made not to dispose of the test system, then test system care facilities, as specified in proposed § 160.43(c), must be provided.

d. EPA proposes to conform to the revised FDA GLPs by deleting § 160.43(e) in its entirety. Currently, § 160.43(e) requires test system facilities to be designed, constructed, and located so as to minimize disturbances which may interfere with the study. EPA agrees with FDA that this provision is already adequately covered in § 160.41, which requires that facilities be of suitable size, construction, and, for outdoor testing facilities, location to facilitate the proper conduct of the study.

6. *Section 160.45 Test system supply facilities.* a. EPA proposes to expand the scope of § 160.45 to require that supply facilities necessary for environmental testing be provided when appropriate.

b. Consistent with the proposed expanded scope of this section, EPA is also proposing to retitle § 160.45, from "Animal supply facilities" to "Test system supply facilities."

c. EPA also proposes to modify § 160.45 to state "Perishable supplies shall be preserved by appropriate means." This change is being proposed to conform with the revised FDA GLPs and recognizes that there are a variety of acceptable storage and preservation procedures available besides refrigeration. Depending on the stability characteristics of the perishable material, acceptable storage and preservation methods may include desiccation, room temperature-low humidity, and constant temperature-low humidity.

d. EPA also proposes to delete the phrase "or feed" from the last sentence of § 160.45. Both EPA and FDA consider "feed" to be a "supply." Therefore, the use of the word "feed" in § 160.45 is redundant.

7. *Section 160.49 Laboratory operation areas.* a. EPA proposes to conform with FDA's revised GLP regulations by deleting paragraph (b) from § 160.49, adding the phrase "and specialized" after the word "routine" and before the word "procedures," and deleting the qualifying phrase "including specialized areas for performing activities such as aseptic surgery, intensive care, necropsy, histology, radiography, and handling of biohazardous materials."

Paragraphs (a) and (b), as currently worded, describe activities which require that separate laboratory space be provided. As FDA noted in its proposal to modify its corresponding section (49 FR 43532), the list of activities that currently appears in paragraphs (a) and (b) is not all inclusive and is not essential for the clarity of these sections. Further, by adding the phrase "and specialized," the proposed new paragraph will encompass all activities now listed in paragraphs (a) and (b).

b. In § 160.49, EPA proposes to add the phrase "and other space" after the words "laboratory space" and before the word "shall." As discussed in Unit I.C. of this preamble, this change to § 160.49 is being proposed to reflect that testing does not necessarily take place within the confines of a traditional indoor laboratory. Proposed § 160.49 would require that there be enough space provided to perform the procedures required by the protocol Wherever testing takes place (i.e., indoor laboratory or field station).

8. *Section 160.53 Administrative and personnel facilities.* As in the revised FDA GLP regulations, EPA proposes to delete § 160.53 in its entirety. EPA agrees with FDA that the requirements of this section are not necessary for achieving the goals of the FIFRA GLP standards.

9. *Section 160.61 Equipment design.* In § 160.61, EPA proposes to delete the phrase "Automatic, mechanical, or electronic" from the beginning of the first sentence. EPA agrees with FDA that the deletion of these qualifying terms provides for a more general interpretation of the word "equipment."

10. *Section 160.63 Maintenance and calibration of equipment.* a. Consistent with the FDA GLPs, EPA is proposing to amend § 160.63(b) to state that standard operating procedures (SOPs) for remedial action for equipment, in the event of failure or malfunction of equipment, need only be established when "appropriate." This change acknowledges that laboratories may choose to discard rather than repair equipment, and in such cases SOPs which delineate remedial action are not necessary.

b. EPA is also proposing to conform to the revised FDA GLP regulations by deleting from § 160.63(b) the provision that copies of the SOPs shall be made available to laboratory personnel. EPA still believes that laboratory personnel must have access to laboratory SOPs; however, since this requirement is clearly stated in § 160.81(c), EPA considers the inclusion of this requirement in § 160.63(b) to be redundant.

11. *Section 160.81 Standard operating procedures.* a. In § 160.81(b) (1), (2), (6), (7), and (12), EPA is proposing to replace the term "animal" with the term "test system." As discussed previously in this preamble, this modification is consistent with the broad scope of test systems which may be used in testing undertaken in support of a pesticide product research or marketing permit.

b. In § 160.81(b)(5), EPA is proposing to require that SOPs be established for tests wherever the testing is undertaken, including those conducted in the field. Accordingly, it is proposed that § 160.81(b)(5) read "Laboratory or other tests" (see discussion of "field testing" in Unit I.C. of this preamble).

c. In conformance with FDA's revised GLP regulations, EPA is proposing to delete the list of examples for laboratory manuals and SOPs required to be made immediately available under § 160.81(c). EPA still intends that laboratory areas must have immediately available manuals and SOPs for laboratory procedures being performed. This requirement still includes toxicology, histology, clinical chemistry, hematology, teratology, and necropsy, if applicable. However, this list is not all inclusive and is too broad to serve as a useful guide. For example, this requirement also includes SOPs for the maintenance, repair, and calibration of equipment as described in § 160.63(b).

d. EPA is also proposing to amend the language of § 160.81(c) to clarify that the requirement of this section also applies to field testing facilities. Therefore, it is proposed that § 160.81(c) will read, "Each laboratory *or other study* area shall have immediately available manuals and standard operating procedures relative to the laboratory or field procedures being performed."

12. *Section 160.90 Animal and other test system care.* a. EPA is proposing to retitle § 160.90 from "Animal care" to "Animal and other test system care". As previously stated, testing required by EPA may involve plants, soils, microorganisms, and other test systems, in addition to animals. The proposed title to § 160.90 reflects the broader scope of this Agency's regulatory responsibilities, these regulations, and this section, to provide for the quality and integrity of all data submitted in support of pesticide product research and marketing permits.

Consistent with the Agency's proposal stated above, paragraphs (b), (d), (e)(1), (f), (g), and (j) in proposed § 160.90 have been added or modified in order to ensure the proper care of all test systems used in a study.

b. EPA proposes to modify § 160.90(b) to provide for the evaluation of a test system's health status, or the appropriateness of the test system for the study, according to acceptable "scientific practice." This section, as proposed, will still require that newly received animals must have their health status evaluated according to acceptable veterinary medical practices. However, EPA recognizes that it may not be appropriate to evaluate the health status of certain test systems (e.g., soil or water) or to require that a plant, microorganism, soil, or water be evaluated according to acceptable veterinary medical practice to determine their appropriateness for a study. EPA is only concerned that test systems used in a study are free of any disease or condition which may interfere with the purpose or conduct of the study, and that the proper precautions, as stated in § 160.90(b), are taken to comply with this requirement.

c. Additionally, EPA is proposing to modify § 160.90(b), to require "isolation" rather than "quarantine" of newly received animals. This proposal is consistent with FDA's revision to its GLPs.

As previously stated, the intent of § 160.90(b) is to prevent the entry of unhealthy or inappropriate test systems into the study, as required by § 160.90(c). Currently, § 160.90(b) provides that this intent be achieved through "quarantine." However, the term "quarantine" suggests a rigid set of procedures, including a mandatory holding period, a specific list of diagnostic procedures, and the use of specialized facilities and test system care practices, which may be an unnecessary burden to industry.

EPA agrees with FDA's conclusion, discussed in the preamble to its revised GLPs (52 FR 33775; September 4, 1987), that isolation and evaluation of health status are sufficient precautions against contamination of test systems and, therefore, fulfill the intent of this section. FDA further states that such a revision would provide laboratories the flexibility to develop isolation and health status evaluation procedures best suited for the age, species, class, and type of the test system, as well as the type of study to be performed.

d. EPA proposes to conform to the FDA GLPs by modifying § 160.90(c) to require isolation of diseased test systems only when necessary.

Currently, § 160.90(c) requires that animals which contract a disease or condition shall be isolated in all cases. This requirement would in turn require that separate facilities be available for the isolation of these animals. However, as discussed in the proposal for § 160.43(c), both EPA and FDA believe that laboratories should be given flexibility in their disposition of diseased test systems. As FDA discussed in the proposed revisions to its GLP regulations (49 FR 43533; October 29, 1984), the proposed modification to § 160.90(c) will allow laboratories the option of: (1) Leaving the diseased test system in the experiment provided that the integrity of the study will not be adversely affected by this action; (2) disposing of the test system; or (3) isolating treating, and returning the test system to the study.

13. *Section 160.105 Test, control, and reference substance characterization.* a. In revised 21 CFR 58.105(a), FDA deleted the requirement that test and control substance characteristics shall be determined and documented for each batch "before the initiation of the study." This change has not been adopted by EPA in its proposed revision to § 160.105(a). However, EPA proposes to modify § 160.105(a) to require that test, control, *or reference* substance characterization be determined and documented for each batch before its use in the experiment. EPA feels that this proposed requirement is necessary because it is essential that characteristics of test, control, and reference substances be known prior to their administration or use in an experiment.

EPA's recent experience with antimony trioxide has shown that extensive analytical work was necessary prior to test initiation. Certain assumptions regarding the product's characteristics were used in the protocols for antimony trioxide testing which proved invalid. These invalid assumptions necessitated modifications to the proposed study, resulting in the delay and rescheduling of other subsequent studies. If the analytical work had preceded the toxicology studies, the studies would not have failed and modifications to the studies would not have been necessary. The Agency's conclusion is that it is better to delay study schedules than to initiate improper experimental procedures which will produce invalid results.

b. FDA has modified 21 CFR 58.105(b) to provide for the determination of the stability of the test or control substance either before the initiation of the study or through periodic analysis of each batch according to written standard operating procedures. EPA has chosen not to adopt this approach in proposed § 160.105(b) because the Agency does not agree that stability can adequately be demonstrated by periodic analysis without initial evaluation.

Further, there are many studies required by EPA where solubility of the test, control, or reference substance is of critical importance, such as aquatic toxicity studies. Therefore, EPA is proposing that solubility of the test, control, or reference substance be determined before the experimental start date if knowledge of solubility characteristics is relevant for the proper conduct of the experiment.

It is EPA's contention that both stability and solubility of the test, control, and reference substance need to be determined before the experimental start date in order to ensure proper handling and administration of the test substance to the test system. However, since the determination of the solubility of the test, control, and reference substance is not a requirement in FDA's GLP regulations, EPA is interested in receiving public comment on this issue.

14. *Section 160.113 Mixtures of substances with carriers.* a. FDA has revised 21 CFR 58.113(a)(2) to require determination of the stability of the test and control substance in a mixture, as required by the conditions of the study, either before the initiation of the study

or through periodic analysis of each batch. While EPA does not propose to modify § 160.113(a)(2) to provide the option of determining the stability of the mixture either before study initiation or through periodic analysis (see discussion for § 160.105(b)), EPA will modify this section to require stability testing only to the extent required by the conditions of the experiment. As proposed for § 160.105(b), EPA is also proposing to require that, when appropriate to the conduct of the experiment, solubility of the test, control, or reference substance in the mixture be determined in the same manner (see discussion for § 160.105(b)). Additionally, as proposed for § 160.105 (a) and (b), EPA is proposing to replace the phrase "before the initiation of the study" with the phrase "before the experimental start date" (see discussion for § 160.105(a)).

The phrase "as required by the conditions of the experiment" has been added in order to clarify that determination of stability and, if appropriate, solubility of a test, control, or reference substance in a mixture is only necessary to support the actual time of use in the experiment. Therefore, it is not necessary to provide data which illustrate long-term stability of a mixture when the actual time that the mixture is used is short-term. For example, a test, control, or reference substance in a mixture that will be used the same day it is prepared will only require data sufficient to show stability and, if appropriate, solubility for 1 day.

b. EPA proposes to add § 160.113(c) which states, that if a vehicle is used to facilitate the mixing of a test substance with a carrier, assurance shall be provided that the vehicle does not interfere with the integrity of the test.

15. *Section 160.120 Protocol.* a. In revised 21 CFR 58.120(a), FDA has replaced the qualifying phrase "but shall not necessarily be limited to" with the phrase "as applicable." EPA proposes to adopt FDA's approach with some modifications. It is proposed that the phrase "Where applicable" appear before the information specified in § 160.120(a)(9), and continue to appear before the information required by § 160.120(a)(6). The phrase "but shall not necessarily be limited to" would remain in this section.

In FDA's discussion of this proposal (49 FR 43533; October 29, 1984), concerns were expressed that some of the information required to appear in the protocol is not applicable to all types of testing. Specifically, FDA points to the information required by 21 CFR 58.120(a)(9) and (11). In 21 CFR 58.120, paragraph (a)(9) requires a description of the diet used in a study as well as solvents, emulsifiers, and/or other materials used to solubilize or suspend the test or control substance before mixing with the carrier. FDA points out that this requirement is not applicable to radiation-emitting products. Section 58.120(a)(11) specifies that the protocol shall specify dosage level, and this requirement is not applicable to implantable medical devices.

Clearly, the basis for FDA's change is to accommodate concerns that are specific to the types of testing required by FDA and do not necessarily apply to testing required by EPA. Further, EPA is concerned that placing the phrase "as applicable" in § 160.120(a) suggests that there may be cases where it is not applicable for any of the other information required by § 160.120(a) to appear in the protocol. Therefore, the phrase "as applicable" should only appear before those items which are not necessarily appropriate to appear in the protocol for certain types of testing.

For example, there may be testing required by EPA where it may not be appropriate to require a protocol to contain the information specified in § 160.120(a)(9), such as describing and/or identifying the diet of a human subject involved in exposure testing. Therefore, EPA proposes to add the phrase "Where applicable" before the information specified in proposed § 160.120(a)(9).

b. In revised 21 CFR 58.120(a)(4), FDA has deleted the requirement that the protocol contain "The proposed starting and completion dates." EPA is proposing to retain this requirement in § 160.120(a)(4), but is proposing to modify this paragraph to require, "The proposed experimental start and termination dates."

EPA believes that this information is necessary for the evaluation of a protocol, and the Agency scheduling of additional related studies and audit reviews. Section 160.120(a)(4) is related to the selected study method, laboratory, and specialist availability, and other Agency and industry priorities. Often a group of experiments are carried out in sequence, so that both start and termination dates affect subsequent study expectations and timetables. Projected experimental start and termination dates identify the normal duration for a given experiment type and reflects any special considerations that may be unique to a laboratory, anticipated analytical or methodology work, and available resources, and it may also affect pending regulatory timetables.

Given that there are hundreds of studies that EPA must track, these estimated schedules, combined with those from other studies, allow the Agency to more efficiently schedule audits and regulatory action. Further considerations are the following: (1) The availability of composite schedules for many studies may be necessary to set realistic regulatory action goals; (2) composite study schedules are evaluated to schedule audits while several studies are ongoing or recently completed, and which may all be at a given laboratory or geographic location, thus directly reducing EPA resources necessary for audit and regulatory review functions; and (3) standard business management by objectives requires intermediate calendar goals when scheduling multiple outputs, or a long-term single product. The master on-site laboratory schedule will incorporate these dates to carry out the study.

c. In 21 CFR 58.120(a)(5), FDA has deleted the requirement that the protocol contain a justification for the selection of the test system. EPA has chosen to leave this requirement in proposed § 160.120(a)(5).

Environmental studies, including both ecological effects and chemical fate, are more diverse than health effects testing. Further, details relevant to the test system design are more chemically dependent in the case of environmental effects and chemical fate testing than in the case of health effects testing. Many of the test systems in environmental studies must be modified in accordance with specific chemical characteristics. Therefore, EPA must allow a much broader range of flexibility in the nature of tests and selection of test systems. In order to fully understand the test and its results, EPA needs to have a discussion of the reasons for selection of the test system. In addition, EPA recognizes that industry may be engaged in state-of-the-art environmental testing. Under proposed § 160.120(a)(5), EPA can keep abreast of industry advances in such testing and ensure that their use of test systems is appropriate. EPA is interested in receiving public comment on whether to limit the requirement that the protocol contain a justification of the test system to environmental testing.

d. FDA has deleted from 21 CFR 58.120(a)(10) the requirement that the protocol include the route of administration and the reason for its choice. EPA has chosen to retain this requirement in proposed § 160.120(a)(10).

The chemicals regulated by FDA will usually have a predefined route of exposure. Therefore, it makes sense for FDA to eliminate the requirement to stipulate the route of administration and

the reason for its choice within the protocol. Unlike FDA, EPA is concerned with presence in or exposure to various media (i.e., air, water, soil, sediment, chemicals, etc.) and may not know in advance the routes of exposure for the chemicals it regulates. Most chemicals and products regulated by EPA do not have set routes of exposure and may even have multiple routes of exposure. Therefore, EPA must consider a wide range of possible exposure routes in its regulatory decisions. Further, the route of administration is essential to determine the effectiveness of a test system for the purposes of a specific toxicology study. The route of administration affects the real dosage rates and, therefore, affects whether the impact of the exposure of the test substance is acute or chronic.

Therefore, EPA believes that, for its purposes, it is essential that the protocol contain the route of administration and the reason for its choice. This requirement will therefore remain in the FIFRA GLPs in § 160.120(a)(10).

e. EPA proposes to delete current § 160.120(a)(12) in its entirety. Currently, § 160.120(a)(12) requires that the protocol contain the method by which the degree of absorption of the test and control substance by the test system will be determined. EPA agrees with FDA's conclusion that this requirement is not necessary in the protocol.

f. In proposed § 160.120(a)(14), redesignated from current paragraph (a)(15), EPA proposes to conform with FDA's revised GLP regulations and require that the study director's signature be dated on the protocol.

EPA is proposing in § 160.3 that the study initiation date be defined as the date the protocol is signed by the study director. It is through the proposed requirement of § 160.120(a)(14), that the Agency will be able to identify the official study initiation date.

16. *Section 160.130 Conduct of a study.* a. FDA has modified 21 CFR 58.130(d) to provide that records of gross findings for a specimen from postmortem observations "should" be made available to the pathologist when examining that specimen's histopathology. EPA is proposing to retain the requirement that these records "shall," in all cases, be provided to a pathologist during study of the specimen.

EPA agrees with FDA's conclusion that for most studies it is important for the pathologist to have the records of gross findings available when examining a specimen histopathologically. However, it is FDA's contention that replacing the word "shall" with the word "should" will allow the histopathological evaluation of specimens in a "blind" fashion. EPA also recognizes that it may be appropriate for some studies to provide for "blinding" in histopathological evaluation. However, EPA maintains that, when specified by the protocol, the pathologist can accomplish "blinding," without violating § 160.130 by not looking at the records which have been provided. Therefore, it will remain EPA's requirement that the pathologist must have access to the records of gross findings when examining a specimen histopathologically.

b. In conformance with the revised FDA GLP regulations, in § 160.130(e), EPA proposes to replace the terms "computer" and "computer driven" with the term "automated data collection." EPA agrees with FDA that the terms "computer" or "computer driven" do not adequately reflect the data collection and storage technologies currently used by testing facilities. The Agency believes that the proposed term "automated data collection" provides a more appropriate description of the data collection and storage systems available for industry use.

17. *Section 160.135 Physical and chemical characterization studies.* EPA proposes to add § 160.135 in order to specify the provisions of the proposed FIFRA GLP standards which will not apply to studies designed to determine the physical and chemical characteristics of a test, control, or reference substance. Most studies designed to determine the physical or chemical characteristics of a test, control, or reference substance rarely involve any modifications to the protocol or experimental design and are usually conducted in an assembly line fashion. Therefore, proposed § 160.135(a) relaxes the requirements of the GLP standards without compromising the quality or integrity of data generated from these studies.

However, in § 160.135(b), EPA is also proposing that the exemptions listed in proposed § 160.135(a) will not apply to studies designed to determine stability, solubility, octanol water partition coefficient, volatility, and persistence of a test, control, or reference substance. These types of physical and chemical characterization studies are more complex in design, execution, and interpretation, and EPA does not believe that it can be assured of the quality and integrity of data generated from these studies without complete GLP compliance.

18. *Section 160.185 Reporting of study results.* a. In § 160.185(a)(5), EPA is proposing to require that the final report include information relating to the solubility, in addition to stability, of the test, control or reference substance if solubility information was important to the conduct of the experiment. This change is consistent with the proposed modification to §§ 160.105(b) and 160.113(a)(2) (see discussion of proposed §§ 160.105(b) and 160.113(a)(2)).

19. *Section 160.190 Storage and retrieval of records and data.* a. In § 160.190(a), EPA proposes to conform to the revised FDA GLP regulations by modifying this section to state that specimens obtained from mutagenicity tests and specimens of blood, urine, feces, and biological fluids generated as a result of a study need *not* be retained. EPA is also proposing that § 160.190(a) state that specimens of soil, water, and plants obtained from environmental testing need *not* be retained. EPA agrees with FDA's conclusion that retention of these specimens beyond initial evaluation is burdensome and does not have a significant impact on the quality of a study.

b. As in the revised FDA GLPs, EPA proposes to revise § 160.190(e) by deleting the requirement that study materials which are retained in archives must be indexed specifically by test substance, date of study, test system, and nature of study. EPA agrees with FDA that the intent of this section is to require indexing of materials in such a way as to permit expedient retrieval from archives. EPA does not believe it is necessary to stipulate the specific indexing terms which must be used.

20. *Section 160.195 Retention of records.* a. In § 160.195, EPA proposes to delete the examples provided in the first sentence of paragraph (c). EPA has proposed this change in conformity with FDA's recent revision because EPA agrees with FDA that these examples do not clarify which materials must be retained from a study, and therefore, are not necessary in this section.

b. EPA is also proposing to modify § 160.195(c) to state that specimens obtained from mutagenicity tests, specimens of soil, water, and plants, and wet specimens of blood, urine, feces, biological fluids, do not need to be retained beyond quality assurance review. This change has been adopted in order to be consistent with the change discussed in proposed § 160.190(a).

c. In new § 160.195(i), EPA proposes to allow records and other "raw data" required by these regulations to be retained either as original records or as true copies, such as photocopies, microfiche, or other accurate reproductions of the original records. This provision would be incorporated in the FIFRA GLPs, in § 160.195(i), in order

BEST COPY AVAILABLE

VOL 52 ISS 248 DE 28 1987 UMI

to be consistent with the recent changes to FDA's Good Laboratory Practice Regulations.

II. Economic Analysis

In order to satisfy requirements for analysis as specified by Executive Order 12291 and the Regulatory Flexibility Act, the Agency developed a document entitled "Regulatory Impact Analysis of the FIFRA Good Laboratory Practices Regulations". This document, which is available for public inspection, estimates the costs of compliance with the proposed revisions to the FIFRA Good Laboratory Practices Regulations. Compliance costs were estimated using data from a survey of laboratories potentially affected by the revised GLP regulation and from data on pesticides testing demand and costs taken from a 1980 study of the pesticides testing industry.

It was found that the GLP revisions will not increase the costs of health effects testing and that non-health effects testing costs will increase by about 20 percent. It is estimated that the adoption of the proposed GLP revisions would increase annual pesticide testing costs by between $6.3 and $9.9 million in 1986 dollars.

III. Statutory Requirements

As required by FIFRA section 25, copies of this proposed rule were provided to the Scientific Advisory Panel, the Secretary of Agriculture, the Senate Committee on Agriculture, Nutrition, and Forestry, and the House Committee on Agriculture. No comments were received from either Congressional Committee and the FIFRA Scientific Advisory Panel waived its review of this proposal. The following are the comments of the Secretary of the Department of Agriculture and the response of EPA:

The Secretary of the Department of Agriculture requested that the definition of "study" be modified to more clearly reflect EPA's intent that GLP compliance for efficacy testing be limited to product performance as required by 40 CFR 158.160. We have modified the definition of "study" accordingly.

The Secretary asked if the regulation requires that only studies conducted in accordance with the GLPs are acceptable for Agency review and, are there any conditions under which a study can be accepted which did not fully comply with the GLPs?

Studies may be submitted to EPA which do not completely conform to the GLPs as long as the Statement of Compliance, required by § 160.12(b) of the GLP regulations, describes in detail all differences between the practices used in the study and those required by the GLPs. EPA will review these studies. However, EPA will decide on a case-by-case basis whether studies which deviate from the GLPs are acceptable to support the pesticide product registration, or other marketing and research permit.

The Secretary of Agriculture asked if studies which reflect negatively on a chemical use, or studies which report toxic or carcinogenic effects will automatically be ignored by EPA if they have not been conducted under verifiable GLP conditions.

EPA will *not* ignore scientific data which does not comply with the FIFRA GLP standards, and may choose to rely on such data for purposes of showing adverse effects. However, as stated by § 160.17(a) of the FIFRA GLPs, EPA may determine that data which does not comply with the GLPs is not reliable to support an application for a research or marketing permit. Further, § 160.15(b) of the GLPs states that "The determination that a study will not be considered in support of an application for a research or marketing permit does not, however, relieve the applicant for such a permit of any obligation under any applicable statute or regulation to submit the results of the study to EPA." Adverse effects data, which is required to be submitted to the Agency under FIFRA section 6(a)(2), must be submitted to the Agency regardless of whether it complies with the GLPs or not. The Agency does not now, and will not in the future, require FIFRA section 6(a)(2) data to be generated and submitted to the Agency in accordance with the GLPs. EPA will not ignore any FIFRA section 6(a)(2) data. However, additional testing required by the Agency as a result of the FIFRA section 6(a)(2) finding must be conducted in accordance with the GLPs.

The Department of Agriculture commented that if they are required to conduct the analyses described in §§ 160.105 and 160.113, it would greatly limit their resources and capability to conduct studies under the minor use pesticide program. They state that they are working with labeled pesticides which already have tolerances established in food crops, and that are being utilized under simulated commercial conditions. Therefore, they believe that the information gained from these analyses would not be of any real significance to the results of the studies for efficacy, phytotoxicity, and residue.

EPA continues to believe that adequate test, control, and reference substance characterization, and knowledge of their behavior in the mixture, is essential to assure the quality and integrity of the test. EPA agrees that the analyses of a test, control, or reference substance mixed with a carrier, as required by § 160.113, may be costly. However, some cost savings can be realized by obtaining the documentation of the identity, strength, purity, and composition for each batch of the test, control, and reference substance, as required by § 160.105, from the manufacturer of these chemicals (this is particularly pertinent when the chemical is specifically synthesized for the test). These analyses do not have to be repeated by the testing facility.

Finally, please note, the analyses required by §§ 160.105 and 160.113 are only required for efficacy testing of the types of products specified by 40 CFR 158.160 (e.g., for pesticide products that claim to control microorganisms that pose a threat to human health and pesticides that claim to control vertebrates that may transmit diseases to humans). Therefore, in most cases efficacy testing that is conducted under the Department of Agriculture's minor use pesticide program is not required to comply with the requirements of the GLPs, including the analyses required by §§ 160.105 and 160.113.

Finally, the Secretary of the Department of Agriculture asked if there is a grandfather provision for studies conducted prior to the implementation of the regulations.

EPA does not intend to require compliance with the revised GLP standards for studies begun significantly before the effective date of the final version of these proposed regulations.

IV. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA is required to judge whether a rule is a "major" one and is therefore subject to the requirement of a Regulatory Impact Analysis. The proposed amendments of the FIFRA Good Laboratory Practice Standards would not be a major rule because they do not meet any of the criteria set forth and defined in section 1(b) of the Order.

B. Regulatory Flexibility Act

This rule has been reviewed under the Regulatory Flexibility Act of 1980 (Pub. L. 96-354; 94 Stat. 1165 (5 U.S.C. 60 et. seq.)) and it has been determined that it will not have significant economic impact on a substantial number of small businesses, small governments, or small organizations.

C. Paperwork Reduction Act

The Office of Management and Budget (OMB) has approved the information collection requirements contained in this proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, and has assigned OMB control numbers: 2070-0024, 2070-0032, 2070-0040, 2070-0055, 2070-0057, 2070-0060. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB, marked "Attention: Desk Officer for EPA." The final rule will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Part 160

Good laboratory practices, Laboratories, Environmental protection, Hazardous materials, Chemicals, Recordkeeping and reporting requirements.

Dated: December 8, 1987.

Lee M. Thomas,

Administrator.

Therefore, it is proposed that 40 CFR Part 160 be amended as follows:

PART 160—[AMENDED]

1. The authority citation for Part 160 continues to read as follows:

Authority: 7 U.S.C. 136a, 136c, 136d, 136f, 136j, 136t, 136v, 136w; 21 U.S.C. 346a, 348, 371, Reorganization Plan No. 3 of 1970.

2. In § 160.3, by removing the alphabetical paragraph designations in paragraphs (a) through (q): by revising the definitions for "Control substance," "Study," and "Test system"; by replacing the term "Test substance or mixture" with the term "Test substance"; and by alphabetically inserting definitions for "Carrier", "Experimental start date", "Experimental termination date", "Reference Substance", "Study completion date", "Study initiation date", and "Vehicle", to read as follows:

§ 160.3 Definitions.

* * * * *

"Carrier" means any material (e.g., feed, water, soil, nutrient media) with which the test substance is combined for administration to test organisms.

"Control substance" means any chemical substance or mixture or any other material other than a test substance, feed, or water that is administered to the test system in the course of study for the purpose of establishing a basis for comparison with the test substance for no-effect levels.

* * * * *

"Experimental start date" means the first date the test substance is applied to the test system.

"Experimental termination date" means the last date on which data are collected directly from the study.

* * * * *

"Reference substance" means any chemical substance or mixture or material other than a test substance, feed, or water that is administered to or used in analyzing the test system in the course of a study for purposes of establishing a basis for comparison with the test substance for known effect levels.

* * * * *

"Study" means any experiment in which a test substance is studied in a test system under laboratory conditions or in the environment to determine or help predict its effects, metabolism, product performance (efficacy as required by 40 CFR 158.160), environmental and chemical fate, persistence and residue, or other characteristics in humans, other living organisms, or media. The term does not include basic exploratory studies carried out to determine whether a test substance has any potential utility.

"Study completion date" means the date the final report is signed by the study director.

* * * * *

"Study initiation date" means the date the protocol is signed by the study director.

"Test substance" means a substance or mixture administered or added to a test system in a study, which substance or mixture:

(1) Is the subject of an application for a research or marketing permit supported by the study, or is the contemplated subject of such an application; or

(2) Is an ingredient, impurity, degradation product, metabolite, or radioactive isotope of a substance described by paragraph (1) of this definition, or some other substance related to a substance described by that paragraph, which is used in the study to assist in characterizing the toxicity, metabolism, or other characteristics of a substance described by that paragraph.

"Test system" means any animal, plant, microorganism, chemical or physical matrix (e.g., soil or water), or subparts thereof, to which the test or control substance is administered or added for study. "Test system" also includes appropriate groups or components of the system not treated with the test, control, or reference substance.

* * * * *

"Vehicle" means any agent which facilitates the mixture, dispersion, or solubilization of a test substance with a carrier.

3. In § 160.29, by revising paragraphs (d), (e), and (f) to read as follows:

§ 160.29 Personnel.

* * * * *

(d) Personnel shall take necessary personal sanitation and health precautions designed to avoid contamination of test, control, and reference substances and test systems.

(e) Personnel engaged in a study shall wear clothing appropriate for the duties they perform. Such clothing shall be changed as often as necessary to prevent microbiological, radiological, or chemical contamination of test systems and test, control, and reference substances.

(f) Any individual found at any time to have an illness that may adversely affect the quality and integrity of the study shall be excluded from direct contact with test systems, and test, control, and reference substances, and any other operation or function that may adversely affect the study until the condition is corrected. All personnel shall be instructed to report to their immediate supervisors any health or medical conditions that may reasonably be considered to have an adverse effect on a study.

4. In § 160.31, by revising paragraph (b) to read as follows:

§ 160.31 Testing facility management.

* * * * *

(b) Replace the study director promptly if it becomes necessary to do so during the conduct of a study.

* * * * *

5. In § 160.35, by revising paragraphs (a) and (b) (1) and (3) and removing paragraph (e) to read as follows:

§ 160.35 Quality assurance unit.

(a) A testing facility shall have a quality assurance unit which shall be responsible for monitoring each study to assure management that the facilities, equipment, personnel, methods, practices, records, and controls are in conformance with the regulations in this part. For any given study, the quality assurance unit shall be entirely separate from and independent of the personnel engaged in the direction and conduct of that study.

(b) The quality assurance unit shall:

(1) Maintain a copy of a master schedule sheet of all studies conducted at the testing facility indexed by test substance and containing the test system, nature of study, date study was

VOL 52 ISS 248 DEC 28 1987 UMI

initiated, current status of each study, identity of the sponsor, and name of the study director.

* * * * *

(3) Inspect each study at intervals adequate to ensure the integrity of the study and maintain written and properly signed records of each periodic inspection showing the date of the inspection, the study inspected, the phase or segment of the study inspected, the person performing the inspection, findings and problems, action recommended and taken to resolve existing problems, and any scheduled date for reinspection. Any problems which are likely to affect study integrity found during the course of an inspection shall be brought to the attention of the study director and management immediately.

* * * * *

6. By revising § 160.41 to read as follows:

§ 160.41 General.

Each testing facility shall be of suitable size and construction to facilitate the proper conduct of studies. Testing facilities which are not located within an indoor controlled environment shall be of suitable location to facilitate the proper conduct of studies. Testing facilities shall be designed so that there is a degree of separation that will prevent any function or activity from having an adverse effect on the study.

7. By revising § 160.43 to read as follows:

§ 160.43 Test system care facilities.

(a) A testing facility shall have a sufficient number of animal rooms or other test system areas, as needed, to ensure: proper separation of species or test systems, isolation of individual projects, quarantine or isolation of animals or other test systems, and routine or specialized housing of animals or other test systems.

(1) In tests with plants or aquatic animals, proper separation of species can be accomplished within a room or area by housing them separately in different chambers or aquaria. Separation of species is unnecessary where the protocol specifies the simultaneous exposure of two or more species in the same chamber, aquarium, or housing unit.

(2) Aquatic toxicity tests for individual projects shall be isolated to the extent necessary to prevent cross-contamination of different chemicals used in different tests.

(b) A testing facility shall have a number of animal rooms or other test system areas separate from those described in paragraph (a) of this section to ensure isolation of studies being done with test systems or test, control, and reference substances known to be biohazardous, including volatile substances, aerosols, radioactive materials, and infectious agents.

(c) Separate areas shall be provided, as appropriate, for the diagnosis, treatment, and control of laboratory test system diseases. These areas shall provide effective isolation for the housing of test systems either known or suspected of being diseased, or of being carriers of disease, from other test systems.

(d) Facilities shall have proper provisions for collection and disposal of contaminated water, soil, or other spent materials. When animals are housed, facilities shall exist for the collection and disposal of all animal waste and refuse or for safe sanitary storage of waste before removal from the testing facility. Disposal facilities shall be so provided and operated as to minimize vermin infestation, odors, disease hazards, and environmental contamination.

(e) Facilities shall have provisions to regulate environmental conditions (e.g., temperature, humidity, photoperiod) as specified in the protocol.

(f) For marine test organisms, an adequate supply of clean sea water or artificial sea water (prepared from deionized or distilled water and sea salt mixture) shall be available. The ranges of composition shall be as specified in the protocol.

(g) For freshwater organisms, an adequate supply of clean water of the appropriate hardness, pH, and temperature, and free of contaminants capable of interfering with the study, shall be available as specified in the protocol.

(h) For plants, an adequate supply of soil of the appropriate composition, as specified in the protocol, shall be available as needed.

8. By revising § 160.45 to read as follows:

§ 160.45 Test system supply facilities.

(a) There shall be storage areas, as needed, for feed, nutrients, soils, bedding, supplies, and equipment. Storage areas for feed nutrients, soils, and bedding shall be separated from areas housing the test systems and shall be protected against infestation or contamination. Perishable supplies shall be preserved by appropriate means.

(b) When appropriate, plant supply facilities shall be provided. These include:

(1) Facilities, as specified in the protocol, for holding, culturing, and maintaining algae and aquatic plants.

(2) Facilities, as specified in the protocol, for plant growth (e.g., greenhouses, growth chambers, light banks).

(c) When appropriate, facilities for aquatic animal tests shall be provided. These include aquaria, holding tanks, ponds, and ancillary equipment, as specified in the protocol.

9. By revising § 160.47 to read as follows:

§ 160.47 Facilities for handling test, control, and reference substances.

(a) As necessary to prevent contamination or mixups, there shall be separate areas for:

(1) Receipt and storage of the test, control, and reference substances.

(2) Mixing of the test, control, and reference substances with a carrier, e.g., feed.

(3) Storage of the test, control, and reference substance mixtures.

(b) Storage areas for test, control, and/or reference substance and for test, control, and/or reference mixtures shall be separate from areas housing the test systems and shall be adequate to preserve the identity, strength, purity, and stability of the substances and mixtures.

10. By revising § 160.49 to read as follows:

§ 160.49 Laboratory operation areas.

Separate laboratory space and other space shall be provided, as needed, for the performance of the routine and specialized procedures required by studies.

§ 160.53 [Removed]

11. By removing § 160.53

Administrative and personnel facilities.

12. By revising § 160.61 to read as follows:

§ 160.61 Equipment design.

Equipment used in the generation, measurement, or assessment of data and equipment used for facility environmental control shall be of appropriate design and adequate capacity to function according to protocol and shall be suitably located for operation, inspection, cleaning, and maintenance.

13. In § 160.63, by revising paragraph (b) to read as follows:

§ 160.63 Maintenance and calibration of equipment.

* * * * *

(b) The written standard operating procedures required under § 160.81(b)(11) shall set forth in sufficient detail the methods, materials, and schedules to be used in the routine inspection, cleaning, maintenance, testing, calibration, and/or standardization of equipment, and shall specify, when appropriate, remedial action to be taken in the event of failure or malfunction of equipment. The written standard operating procedures shall designate the person responsible for the performance of each operation.

* * * * *

14. In § 160.81, by revising paragraphs (b) (1), (2), (3), (5), (6), (7), and (12) and (c) to read as follows:

§ 160.81 Standard operating procedures.

* * * * *

(b) * * *

(1) Test system room preparation.

(2) Test system care.

(3) Receipt, identification, storage, handling, mixing, and method of sampling of the test, control, and reference substances.

* * * * *

(5) Laboratory or other tests.

(6) Handling of test systems found moribund or dead during study.

(7) Necropsy of test systems or postmortem examination of test systems.

* * * * *

(12) Transfer, proper placement, and identification of test systems.

(c) Each laboratory or other study area shall have immediately available manuals and standard operating procedures relative to the laboratory or field procedures being performed. Published literature may be used as a supplement to standard operating procedures.

* * * * *

15. By revising § 160.90 to read as follows:

§ 160.90 Animal and other test system care.

(a) There shall be standard operating procedures for the housing, feeding, handling, and care of animals and other test systems.

(b) All newly received test systems from outside sources shall be isolated and their health status or appropriateness for the study evaluated. This evaluation shall be in accordance with acceptable veterinary medical practice or scientific practice.

(c) At the initiation of a study, test systems shall be free of any disease or condition that might interfere with the purpose or conduct of the study. If during the course of the study, the test systems contract such a disease or condition, the diseased test systems should be isolated, if necessary. These test systems may be treated for disease or signs of disease provided that such treatment does not interfere with the study. The diagnosis, authorization of treatment, description of treatment, and each date of treatment shall be documented and shall be retained.

(d) Warm-blooded animals, adult reptiles, and adult terrestrial amphibians used in laboratory procedures that require manipulations and observations over an extended period of time or in studies that require these test systems to be removed from and returned to their test system-housing units for any reason (e.g., cage cleaning, treatment, etc.), shall receive appropriate identification (e.g., tattoo, toe clip, color code, ear tag, ear punch, etc.). All information needed to specifically identify each test system within the test system-housing unit shall appear on the outside of that unit. Suckling mammals and juvenile birds are excluded from the requirement of individual identification unless otherwise specified in the protocol.

(e) Except as specified in paragraph (e)(1) of this section, test systems of different species shall be housed in separate rooms when necessary. Test systems of the same species, but used in different studies, should not ordinarily be housed in the same room when inadvertent exposure to test, control, or reference substances or test system mixup could affect the outcome of either study. If such mixed housing is necessary, adequate differentiation by space and identification shall be made.

(1) Plants, invertebrate animals, aquatic vertebrate animals, and organisms that may be used in multispecies tests need not be housed in separate rooms, provided that they are adequately segregated to avoid mixup and cross contamination.

(2) [Reserved]

(f) Cages, racks, pens, enclosures, aquaria, holding tanks, ponds, growth chambers, and other holding, rearing and breeding areas, and accessory equipment, shall be cleaned and sanitized at appropriate intervals.

(g) Feed, soil, and water used for the test systems shall be analyzed periodically to ensure that contaminants known to be capable of interfering with the study and reasonably expected to be present in such feed, soil, or water are not present at levels above those specified in the protocol. Documentation of such analyses shall be maintained as raw data.

(h) Bedding used in animal cages or pens shall not interfere with the purpose or conduct of the study and shall be changed as often as necessary to keep the animals dry and clean.

(i) If any pest control materials are used, the use shall be documented. Cleaning and pest control materials that interfere with the study shall not be used.

(j) All plant and animal test organisms shall be acclimatized, prior to their use in an experiment, to the environmental conditions of the test.

Subpart F—Test, Control, and Reference Substances

16. By revising the heading for Subpart F to read as set forth above.

17. By revising § 160.105 to read as follows:

§ 160.105 Test, control, and reference substance characterization.

(a) The identity, strength, purity, and composition, or other characteristics which will appropriately define the test, control, or reference substance shall be determined for each batch and shall be documented before its use in an experiment. Methods of synthesis, fabrication, or derivation of the test, control, or reference substance shall be documented by the sponsor or the testing facility.

(b) The stability and, when relevant to the conduct of the experiment, the solubility of each test, control, or reference substance shall be determined by the testing facility or by the sponsor before the experimental start date. Where periodic analysis of each batch is required by the protocol, there shall be written standard operating procedures that shall be followed.

(c) Each storage container for a test, control, or reference substance shall be labeled by name, chemical abstracts service number (CAS) or code number, batch number, expiration date, if any, and, where appropriate, storage conditions necessary to maintain the identity, strength, purity, and composition of the test, control, or reference substance. Storage containers shall be assigned to a particular test substance for the duration of the study.

(d) For studies of more than 4 weeks duration, reserve samples from each batch of test, control, and reference substances shall be retained for the period of time provided by § 160.195.

(e) The stability of test, control, and reference substances under test conditions shall be known for all studies.

18. In § 160.107, by revising the section heading and introductory text to read as follows:

§ 160.107 Test, control, and reference substance handling.

Procedures shall be established for a system for the handling of the test, control, and reference substances to ensure that:

* * * * *

19. By revising § 160.113 to read as follows:

§ 160.113 Mixtures of substances with carriers.

(a) For each test, control, or reference substance that is mixed with a carrier, tests by appropriate analytical methods shall be conducted:

(1) To determine the uniformity of the mixture and to determine, periodically, the concentration of the test, control, or reference substance in the mixture.

(2) To determine the stability and, when relevant to the conduct of the experiment, the solubility of the test, control, or reference substance in the mixture, before the experimental start date. Determination of the stability and solubility of the test, control, or reference substance in the mixture shall be done under the environmental conditions specified in the protocol and as required by the conditions of the experiment. Where periodic analysis of the mixture is required by the protocol, there shall be written standard operating procedures that shall be followed.

(b) Where any of the components of the test, control, or reference substance carrier mixture has an expiration date, that date shall be clearly shown on the container. If more than one component has an expiration date, the earliest date shall be shown.

(c) If a vehicle is used to facilitate the mixing of a test substance with a carrier, assurance shall be provided that the vehicle does not interfere with the integrity of the test.

20. In § 160.120, by revising paragraph (a) to read as follows:

§ 160.120 Protocol.

(a) Each study shall have an approved written protocol that clearly indicates the objectives and all methods for the conduct of the study. The protocol shall contain but shall not necessarily be limited to the following information:

(1) A descriptive title and statement of the purpose of the study.

(2) Identification of the test, control, and reference substance by name, chemical abstracts service (CAS) number or code number.

(3) The name and address of the sponsor and the name and address of the testing facility at which the study is being conducted.

(4) The proposed experimental start and termination dates.

(5) Justification for selection of the test system.

(6) Where applicable, the number, body weight, sex, source of supply, species, strain, substrain, and age of the test system.

(7) The procedure for identification of the test system.

(8) A description of the experimental design, including methods for the control of bias.

(9) Where applicable, a description and/or identification of the diet used in the study as well as solvents, emulsifiers and/or other materials used to solubilize or suspend the test, control, or reference substances before mixing with the carrier. The description shall include specifications for acceptable levels of contaminants that are reasonably expected to be present in the dietary materials and are known to be capable of interfering with the purpose or conduct of the study if present at levels greater than established by the specifications.

(10) The route of administration and the reason for its choice.

(11) Each dosage level, expressed in milligrams per kilogram of body or test system weight or other appropriate units, of the test, control, or reference substance to be administered and the method of frequency of administration.

(12) The type and frequency of test analyses, and measurements to be made.

(13) The records to be maintained.

(14) The date of approval of the protocol by the sponsor and the dated signature of the study director.

(15) A statement of the proposed statistical method.

* * * * *

21. In § 160.130, by revising paragraphs (d) and (e) to read as follows:

§ 160.130 Conduct of a study.

* * * * *

(d) In animal studies where histopathology is required, records of gross findings for a specimen from postmortem observations shall be available to a pathologist when examining that specimen histopathologically.

(e) All data generated during the conduct of a study, except those that are generated by automated data collection systems, shall be recorded directly, promptly, and legibly in ink. All data entries shall be dated on the day of entry and signed or initialed by the person entering the data. Any change in entries shall be made so as not to obscure the original entry, shall indicate the reason for such change, and shall be dated and signed or identified at the time of the change. In automated data collection systems, the individual responsible for direct data input shall be identified at the time of data input. Any change in automated data entries shall be made so as not to obscure the original entry, shall indicate the reason for change, shall be dated, and the responsible individual shall be identified.

22. By adding § 160.135 to read as follows:

§ 160.135 Physical and chemical characterization studies.

(a) Except as provided in paragraph (b) of this section, the following provisions shall not apply to studies designed to determine physical and chemical characteristics of a test, control, or reference substance:

§ 160.31 (c), (d), and (g)
§ 160.35 (b) and (c)
§ 160.43
§ 160.45
§ 160.47
§ 160.49
§ 160.81(b) (1), (2), (8) through (9), and (12)
§ 160.90
§ 160.105 (a) through (d)
§ 160.113
§ 160.120(a) (5) through (12), and (15)
§ 160.185(a) (5) through (8), (10), (12), and (14)
§ 160.195 (c) and (d)

(b) The exemptions provided in paragraph (a) of this section shall not apply to physical/chemical characterization studies designed to determine stability, solubility, octanol water partition coefficient, volatility, and persistence (such as biodegradation, photodegradation, and chemical degradation studies), and such studies shall be conducted in accordance with this part.

23. In § 160.185, by revising paragraphs (a) (4) and (5) to read as follows:

§ 160.185 Reporting of study results.

(a) * * *

(4) The test, control, and reference substances identified by name, chemical abstracts service (CAS) number or code number, strength, purity, and composition, or other appropriate characteristics.

(5) Stability and, when relevant to the conduct of the experiment, the solubility of the test, control, and reference substances under the conditions of administration.

* * * * *

24. In § 160.190, by revising paragraphs (a) and (e) to read as follows:

§ 160.190 Storage and retrieval of records and data.

(a) All raw data, documentation, records, protocols, specimens, and final reports generated as a result of a study shall be retained. Specimens obtained from mutagenicity tests, specimens of soil, water, and plants, and wet specimens of blood, urine, feces, and biological fluids, do not need to be retained beyond quality assurance. Correspondence and other documents relating to interpretation and evaluation of data, other than those documents contained in the final report, also shall be retained.

* * * * *

(e) Material retained or referred to in the archives shall be indexed to permit expedient retrieval.

25. In § 160.195, by revising paragraph (c) and adding paragraph (i) to read as follows:

§ 160.195 Retention of records.

* * * * *

(c) Wet specimens, samples of test, control, or reference substances, and specially prepared material which are relatively fragile and differ markedly in stability and quality during storage, shall be retained only as long the quality of the preparation affords evaluation. Specimens obtained from mutagenicity tests, specimens of soil, water, and plants, and wet specimens of blood, urine, feces, biological fluids, do not need to be retained beyond quality assurance review. In no case shall retention be required for longer periods than those set forth in paragraph (b) of this section.

* * * * *

(i) Records required by this part may be retained either as original records or as true copies such as photocopies, microfilm, microfiche, or other accurate reproductions of the original records.

[FR Doc. 87-29511 Filed 12-24-87; 8:45 am]
BILLING CODE 6560-50-M

---

40 CFR Part 792

[OPTS-46016; FRL-3245-6]

Toxic Substances Control Act (TSCA); Good Laboratory Practice Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to amend the TSCA Good Laboratory Practice (GLP) Standards to incorporate many of the changes made by the Food and Drug Administration (FDA) to its GLP regulations and to expand the scope of the TSCA GLP standards to apply to testing conducted in the field under TSCA. EPA is proposing this amendment in order to ensure the quality and integrity of data generated from such studies.

DATE: Submit written comments on or before March 28, 1988.

ADDRESS: Submit written comments, identified by the document control number (OPTS-46016), in triplicate to: TSCA Public Information Office (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Rm. NE-G004, 401 M St., SW., Washington, DC 20460.

The public record supporting this action is available for inspection at the above address from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: Edward A. Klein, Director, TSCA Assistance Office (TS-799), Office of Toxic Substances, Rm. E-543, 401 M St., SW., Washington, DC 20460 (202) 554-1404.

SUPPLEMENTARY INFORMATION: Following is an index to the remainder of this preamble:

I. Introduction
A. Legal Authority
B. Background
C. Consistency With FDA GLP Regulations
D. Proposed Changes to the TSCA GLP Regulations
II. Economic Analysis
III. Other Regulatory Requirements
A. Executive Order 12291
B. Regulatory Flexibility Act
C. Paperwork Reduction Act

I. Introduction

A. Legal Authority

On November 29, 1983 (48 FR 53922), EPA promulgated the GLP standards under the authority of TSCA section 4 (90 Stat. 2006, 15 U.S.C. 2603). Section 4(a) of TSCA authorizes the EPA Administrator to require, by rule, that manufacturers (including importers) and processors of identified chemical substances and mixtures test such chemicals if certain findings are made. Section 4(b)(1) of TSCA specifies that each test rule shall include standards for the development of test data. These standards are defined in section 3(12) of TSCA to mean a prescription of—

(A) the—
(i) health and environmental effects, and
(ii) information relating to the toxicity, persistence, and other characteristics which affect health and the environment, for which test data for a chemical substance or mixture are to be developed and any analysis that is to be performed on such data, and

(B) to the extent necessary to assure that data respecting such effects and characteristics are reliable and adequate—
(i) the manner in which such data are to be developed,
(ii) the specification of any test protocol or methodology to be employed in the development of such data, and
(iii) such other requirements as are necessary to provide such assurance.

In summary, the specific authority to issue the GLP standards is provided by section 4(b)(1) of TSCA, which is further explained by the definitions in sections 3(12)(B)(i) and 3(12)(B)(iii).

In addition, the Agency also requires sponsors to utilize these GLP standards when conducting testing under TSCA section 4 testing consent agreements and will include provisions to adhere to these GLP standards in those agreements (see 40 CFR 790.60(a)(7)). Also, it is the Agency's policy that all data developed as a result of rules or orders under section 5 of TSCA should be in accordance with the GLP standards. If data developed under section 5 of TSCA are not generated in accordance with the GLP standards, the Agency may elect to consider such data insufficient to evaluate the health effects, environmental effects, and fate of the chemical.

B. Background

EPA originally published enforceable TSCA Good Laboratory Practice Standards in the Federal Register of November 29, 1983 (48 FR 53922), which were codified as 40 CFR Part 792. At the same time, EPA published GLP standards applicable to testing under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA, 48 FR 53963, 40 CFR Part 160). These regulations were promulgated in response to investigations by EPA and FDA during the mid-1970s which revealed that some studies submitted to the Agencies had not been conducted in accordance with acceptable laboratory practices. Some studies had been conducted so poorly that the resulting data could not be relied upon in EPA's regulatory decisionmaking process. For instance, some studies had been submitted which did not adhere to specified protocols, were conducted by underqualified personnel and supervisors, or were not adequately monitored by study sponsors. In some cases results were selectively reported, underreported, or fraudulently reported. In addition, it was discovered that some testing facilities displayed poor animal care procedures and inadequate recordkeeping techniques. The TSCA GLP standards specify minimum practices and

procedures which must be followed in order to ensure the quality and integrity of data submitted in accordance with TSCA section 4 requirements. The 1983 TSCA GLP standards also established a policy that persons should comply with the GLP standards when submitting data in response to rules and orders issued under section 5 of TSCA, and when submitting data to the Agency voluntarily.

When EPA published its final TSCA and FIFRA GLP standards in the **Federal Register** of November 29, 1983, the Agency sought to harmonize the requirements and language with those regulations promulgated by the FDA in the **Federal Register** of December 22, 1978 (43 FR 60013), and codified as 21 CFR Part 58. Differences between the two Agencies' current GLP regulations exist only to the extent necessary to reflect the Agencies different statutory responsibilities under TSCA, FIFRA, and the Federal Food, Drug, and Cosmetic Act (FFDCA). Similar to the FDA GLP regulations, the FIFRA and TSCA GLPs delineate standards for studies designed to determine the health effects of a test substance; however, the TSCA GLPs also contain provisions related to environmental testing (i.e., ecological effects and chemical fate).

Compliance with EPA's GLP regulations has been monitored through a program of laboratory inspections and study audits coordinated between EPA and FDA. Under an Interagency Agreement originating in 1978, FDA carries out inspections at laboratories which conduct health effects testing. EPA primarily performs laboratory inspections and data audits for environmental studies.

After a thorough review of its GLP regulations and compliance program, FDA concluded that some of the provisions of the GLPs needed to be clarified, amended, or deleted in order to reduce the regulatory burden on testing facilities. Accordingly, FDA proposed revisions to its GLP regulations in the **Federal Register** of October 24, 1984 (49 FR 43530), which were intended to simplify the regulation without compromising study integrity. FDA's proposed revision has recently been published as a final rule in the **Federal Register** of September 4, 1987 (52 FR 33768).

EPA agrees with FDA that many provisions of the GLP regulations can be streamlined without compromising the goals of the GLPs. Therefore, EPA is proposing to amend the TSCA GLP standards to incorporate many of the changes recently made by FDA to its GLP regulations. In addition, EPA is proposing to expand the scope of the TSCA GLPs to cover testing wherever it is conducted (e.g., field testing). In another notice in this **Federal Register** EPA is proposing similar changes to the FIFRA GLP standards.

C. Consistency With FDA GLP Regulations

It is EPA's policy to minimize the regulatory burden on the public which might arise from conflicting requirements which could be promulgated under different regulatory authorities. In keeping with this policy, the final 1983 TSCA GLP Standards, 40 CFR Part 792, followed the format and, with few exceptions, the wording of FDA's final GLP regulations, 21 CFR Part 58. Differences between the EPA and FDA GLP regulations were based upon varying needs and responsibilities under each Agency's regulatory statutes. This proposed revision to the TSCA GLP standards follows this same policy by conforming to many of the changes FDA made to its GLP regulations, published in the **Federal Register** of September 4, 1987 (52 FR 33768). EPA has varied from FDA's revised GLP regulations only when necessary due to EPA's statutory responsibilities. The most significant differences between the EPA proposal and the revised FDA GLP regulations are the scope of the testing and test systems affected.

As in the current TSCA Good Laboratory Practice Standards, the proposed revisions to the TSCA GLP standards vary from the FDA GLPs in that the TSCA GLPs incorporate GLP provisions for environmental testing (EPA is proposing that the FIFRA GLPs extend to environmental studies as well). Environmental studies include ecological effects and chemical fate studies. Ecological effects studies are those performed for development of information on nonhuman toxicity and potential ecological impact of chemicals and their degradation products. Chemical fate studies are studies performed to characterize physical, chemical, and persistence properties of a substance in order to evaluate the transport and transformation of the substance in the environment.

To ensure the quality and integrity of all data generated from environmental studies, the current TSCA GLP standards contain requirements within 40 CFR Part 792 Subpart L applicable to testing plants, microbial organisms, aquatic organisms, amphibians, reptiles, and birds, where appropriate. These requirements include provisions for care, care facilities, and supply facilities for the various test systems used in environmental testing. As a means of simplifying the regulations, EPA is proposing that the requirements currently found within Subpart L be merged into Subparts A through J of the TSCA GLPs. Accordingly, it is proposed that current § 792.43 *Animal care facilities*, § 792.45 *Animal supply facilities*, and § 792.90 *Animal care* incorporate the provisions relating to the care of test systems, care facilities, and supply facilities from § 792.228 in Subpart L. The expanded sections are retitled in the proposed revision as follows: § 792.43 *Test system care facilities*, § 792.45 *Test system supply facilities*, and § 792.90 *Animal and other test system care*. Further, in most instances, EPA is proposing to replace the term "animal," currently used in the EPA and FDA GLP regulations, with the broader term "test system." Specifically, this change is proposed in §§ 792.43, 792.45, 792.81, 792.90, and 792.120. These proposed changes are further discussed in Unit I.D. of this preamble.

EPA's proposed TSCA GLP standards also vary from FDA's in their coverage of testing conducted in the field. To ensure the quality and integrity of data submitted to the Agency, EPA believes that GLP standards must apply whenever data collection occurs. Because many of the test data required by EPA are developed in the field, or more accurately in outdoor laboratories (i.e., ground water studies, air monitoring studies, degradation in soil, etc.), EPA is proposing to include field testing within the scope of these regulations.

The remaining differences between the EPA and FDA GLPs are described in the preamble to this proposed rule and the preamble to the TSCA Good Laboratory Practice Standards, published in the **Federal Register** of November 29, 1983 (48 FR 53922). EPA has coordinated this proposal with FDA and has considered comments received on the proposal to amend the FDA GLP regulations (October 29, 1984; 49 FR 43530).

D. Proposed Changes to the TSCA GLP Regulations

1. *Section 792.1 Scope.* EPA proposes to amend § 792.1 to reflect the Agency's option of entering into testing consent agreements in lieu of a test rule under section 4 of TSCA. Consistently, the term "testing consent agreement" has been added to the definition of "test substance" in proposed § 792.3, and has been added in proposed §§ 792.12 and 792.17.

2. *Section 792.3 Definitions.* a. EPA proposes that the definition of the term "carrier" be moved from § 792.226(b) to § 792.3. As stated in Unit I.C. of this preamble, EPA is proposing to delete Subpart L and include all the provisions of Subpart L within Subparts A through J of the TSCA GLP standards. Therefore, EPA proposes to define the term "carrier" in § 792.3 to mean any material, such as feed, water, soil, nutrient material, etc., with which the test substance is combined for administration to test organisms.

b. EPA proposes to conform with the September 4, 1987, FDA GLP regulations by amending the definition of "control substance" to exclude feed and water. EPA agrees with FDA's statement regarding this change (52 FR 33769: September 4, 1987) that "the term control [substance] should be reserved for the discrete substances/articles, and vehicles other than feed and water administered to groups of the test system to provide a basis of comparison with the test [substance]."

FDA contends that, under the current definition of "control substance," because the control group of a test system provides the basis for comparison with a test substance, any substance administered to the control group is considered a control substance. This means that feed and water given to the control group of a study are considered a control substance. For instance, in studies in which the test substance or mixture is administered to the test system orally, through feed or drinking water, gavage, or injection, the feed or water is considered a control substance. As a control substance, the feed or water is subject to § 792.105(a) for substance characterization, § 792.105(b) for testing for stability and solubility, § 792.105(c) for requirements for appropriate storage, § 792.105(d) for retention of reserve samples, and § 792.107 for documentation of receipt and distribution of each batch. EPA agrees with FDA that placing these requirements on the use of feed and water as a control substance in control groups unnecessarily burdens the regulated community and is not essential for ensuring the quality and integrity of the data generated by a study.

However, under 40 CFR Part 792, feed and water used as a carrier for the test and control substances or mixtures are still covered by the applicable sections for the testing and storage of test, control, and reference substances and mixtures. For example, § 792.31(e) requires testing facility management to ensure that materials are available as scheduled; § 792.45 requires that test system supply facilities shall be provided to ensure proper feed storage; § 792.81(b)(2) requires Standard Operating Procedures (SOP) for test system care, including nutrition; § 792.90(g) requires periodic analysis of feed and water to ensure that contaminants which would interfere with the study are not present; § 792.120(a)(9) requires the protocol to describe and/or identify the diet used in the study, including the level of contaminants expected in the dietary materials.

c. EPA also proposes to modify the definition of "control substance" by adding the phrase "for no effect levels." This addition to the definition is being proposed merely to clarify the difference between the term "reference substance" and "control substance." While a control substance is used to determine a baseline comparison for no effect levels, a reference substance is used to determine a baseline comparison to an established effect level.

d. EPA proposes to add and define the terms "experimental start date" and "experimental termination date." "Experimental start date" is proposed to mean the first date the test substance is applied to the test system. Under this definition, as of the experimental start date: (1) Under proposed § 792.105(b), the stability and, if important to the conduct of the experiment, the solubility of the test, control, and reference substance would have to be determined; (2) under proposed § 792.113(a)(2), the stability and, when important to the conduct of the experiment, the solubility of the test, control, and reference substance in the mixture would have to be determined and; (3) under proposed § 792.120(a)(4), the proposed experimental start date would appear in the protocol.

EPA proposes that "experimental termination date" be defined as the last date on which data are collected directly from the study. Under § 792.120(a)(4), as proposed, EPA would require the proposed experimental termination date to appear in the protocol. EPA considers histopathology after scheduled terminal animal sacrifice to be carried out before the experimental termination date.

Experimental start and termination dates would be expressed as the actual calendar dates, not just time-line increments. Therefore, when determining the proposed experimental start and termination dates, as would be required by proposed § 792.120(a)(4), the submitter should consider any lag time relating to protocol approval and laboratory contracting.

e. EPA proposes to add and define the term "reference substance". This term is currently defined in § 792.226(f) to mean any chemical substance or mixture or material other than a test substance that is administered to or used in analyzing the test system in the course of a study for purposes of establishing a basis for comparison with the test substance. EPA proposes to add the phrase "for known effect levels" to this definition to more clearly distinguish the terms "reference substance" and "control substance" (see discussion of the term "control substance" in Unit I.D. of this preamble).

Consistent with the Agency's proposal to merge the provisions of Subpart L into Subparts A through J, all the requirements provided for test and control substances are being proposed to apply to "reference substances." Accordingly, the term "reference substance" has been added wherever the term "test and control substance" appears in these regulations. Specifically, it is proposed that the term "reference substance" be added to § 792.29 (d) through (f); § 792.43(b); § 792.47(a) (1) through (3) and (b); § 792.81(b)(3); § 792.90(e); the Subpart F heading; § 792.105 (a) through (e); § 792.107; § 792.113 (a) and (b); § 792.120(a) (2), (9), and (11); § 792.185(a) (4) and (5); and § 792.195(c).

f. EPA proposes to amend the definition of "sponsor" by replacing the term "negotiated testing agreement" with the term "testing consent agreement." This proposal reflects the Agency's option of entering into a section 4 testing consent agreement in lieu of a test rule promulgated under section 4 of TSCA.

g. EPA proposes to broaden the definition of the term "study" to be consistent with the scope of testing that may be submitted under TSCA sections 4 and 5.

EPA is proposing to delete the phrase "in vivo or in vitro" from the definition of "study." The Agency still intends the requirements of these regulations to apply to "in vivo and in vitro" experiments. However, since the Agency intends these regulations to apply to all studies required to be developed under TSCA, including those conducted in the field, EPA believes that the phrase "in vivo or in vitro" in the current definition of "study" is too limiting.

Further, EPA is proposing to delete the term "prospectively" from the definition of "study." In this way, epidemiological studies, which could be "retrospective," will be required to be presented to the Agency in accordance with the GLP standards. EPA recognizes that data used in an epidemiological study may not have been generated in conformance

VOL 52 ISS 248 DEC 28 1987 UMI

with the TSCA GLP standards, however, it is EPA's contention that the epidemiological study itself can be conducted and submitted to the Agency in accordance with the GLPs.

EPA is also proposing to delete from the current definition of "study" the following sentence: "The term does not include studies utilizing human subjects or clinical studies or field trials in animals." Again, this change is consistent with EPA's intention that all studies follow GLPs which are required to be conducted under TSCA.

h. EPA proposes to incorporate the FDA definitions for "study completion date" and "study initiation date" into the TSCA GLP standards in § 792.3. "Study completion date" is proposed to mean the date the final report is signed by the study director. EPA advises that the phrase "close of the study" as used in § 792.33(f) refers to the "study completion date." Therefore, as of that date: (1) Under § 792.33(f), the study director must ensure that all raw data, documentation, protocols, specimens, and final reports are transferred to the archives; and (2) after this date under § 792.185(c), corrections or additions to the final report must be in the form of an amendment by the study director under the procedures specified in that section.

EPA proposes to define "study initiation date" as the date the protocol is signed by the study director. EPA advises that the phrase "study is initiated" as used in § 792.31(a), and the phrase "study was initiated" as used in § 792.35(b)(1) refer to the "study initiation date." Therefore, as of the study initiation date: (1) Under § 792.31(a), the testing facility management would designate a study director; (2) under § 792.35(b)(1), the study would be entered on the master schedule sheet by the quality assurance unit; and (3) under § 792.120(b), after this date all changes or revisions in the protocol would be documented, signed by the study director, and dated. EPA also expects that as of the study initiation date, under § 792.31(e), the testing facility management would have ensured that personnel resources, facilities, equipment, material, and methodologies are available as scheduled.

i. EPA proposes to replace the term "test substance or mixture" with the term "test substance." This is an editorial change which makes usage consistent in the GLP standards. The term "test substance" is proposed to be defined to include mixtures.

j. EPA proposes to incorporate the definition of the term "test system" currently found at § 792.226(a) into the definition of "test system" currently found at § 792.3(p). Therefore, the proposed definition of "test system" in proposed § 792.3 will include chemical or physical matrices (e.g., soil or water).

k. EPA proposes to incorporate the term "vehicle" currently found in § 792.226(g) into § 792.3 *Definitions.*

3. *Section 792.31 Testing facility management.* In conformance with the revised FDA GLP regulations, in § 792.31(b), EPA proposes to delete the requirement that the replacement of a study director must be documented as "raw data." EPA agrees with FDA that this requirement is redundant with other provisions of the GLPs. For instance, § 792.35(b)(1) states that the master schedule sheet must contain the name of the study director. As FDA notes (52 FR 33770), any replacement of the study director would be reflected on the master schedule sheet, which is already considered "raw data." Further, § 792.120(b) states that all changes in an approved protocol must be documented and signed by the study director. Replacement of the study director is considered to be a change in the approved protocol.

4. *Section 792.35 Quality assurance unit (QAU).* a. In § 792.35(a), EPA proposes to conform with the revised FDA GLP regulations by substituting the term "which" for the current phrase "composed of one or more individuals who." This change clarifies that EPA does not require the QAU to be a fixed, permanently staffed unit whose only functions are to monitor the quality of a study. The Agency is only concerned that there be a distinct separation of duties between those personnel involved with the conduct or direction of a study and those personnel performing quality assurance on the same study. Therefore, EPA does intend proposed § 792.35(a) to prohibit personnel from performing quality assurance activities on their own study.

b. In § 792.35(b)(1), EPA proposes to delete the requirement that the name of the study sponsor appear on the master schedule sheet. Instead, it is proposed that under § 792.35(b)(1) the sponsor's identity appear on the master schedule sheet. This change is being proposed to be consistent with the FDA's recent revision and to provide the regulated community the option of using an identity code on the master schedule in lieu of the sponsor's name.

EPA agrees with FDA's contention that requiring the sponsor to be identified specifically by name on the master schedule is not essential to fulfill the requirements of the GLPs or the goal of ensuring the quality and integrity of the data generated from the studies. However, while the name of the study sponsor would not be required to appear on the master schedule sheet, this information must be made available to the Agency upon request.

c. As in the revised FDA GLP regulations, EPA is also proposing to delete the requirement in § 792.35(b)(1) that the master schedule sheet contain the status of the final report. EPA agrees with FDA that this requirement is redundant in view of the other information required by § 792.35(b)(1) such as the date the experiment began and the current status of each study.

d. In conformance with the revised FDA GLP regulations, EPA proposes to modify the requirements of § 792.35(b)(3) to provide for inspections of a study on a schedule adequate to ensure the integrity of the study. This section currently specifies that the quality assurance unit must inspect each phase of a study periodically. This section also currently specifies that for studies lasting more than 6 months, quality assurance inspections shall be conducted every 3 months, and for studies lasting less than 6 months, quality assurance inspections shall be conducted at intervals adequate to ensure the integrity of the study.

The proposed changes to this section will allow the QAU the necessary latitude to adjust its monitoring activities to meet the individual problems of each study. EPA agrees with FDA's contention that an inspection of each phase of the study is not necessary to ensure that a study is being conducted properly. However, EPA also agrees with FDA that each study, no matter how short, must be inspected at least once while in process. EPA expects that by allowing the QAU flexibility in designing a reasonable inspection schedule, the goal of ensuring the quality of the study can be best achieved.

e. Consistent with the revised FDA GLPs, EPA is proposing to delete § 792.35(e) in its entirety. Section 792.35(e) currently requires that all quality assurance records be kept in one location at the testing facility. As FDA pointed out in its October 29, 1984, proposed GLP revision, since § 792.190(b) already requires the use of archives for the orderly storage and expedient retrieval of all reports and records, the requirements of § 792.35(e) are not necessary. However, EPA maintains that all reports and records, including those of the QAU, must be easily accessible and made available to EPA and FDA inspectors when requested.

5. *Section 792.41 General.* FDA has deleted from its GLPs the requirement

that the location of each testing facility be suitable to facilitate the proper conduct of studies. However, EPA is proposing that § 792.41 require that testing facilities which are not located within an indoor controlled environment be suitably located to facilitate the proper conduct of studies.

The studies FDA requires are generally conducted within the confines of a traditional indoor laboratory. Because the conditions specified within a protocol can be artificially manipulated within the traditional indoor laboratory, the location of these laboratories is generally not a factor in determining the quality of a study. Therefore, it is not necessary to ensure that a traditional indoor testing facility is suitably located to facilitate the proper conduct of the study.

However, the studies EPA requires are not necessarily conducted within the confines of the traditional indoor scientific laboratory (i.e., field studies, exposure monitoring studies, ecological toxicity studies, etc.). EPA considers any site where testing is undertaken to generate data required by the Agency to be a testing facility. The conditions required by the protocol are not necessarily conducive to artificial manipulation in the field, or other outdoor testing facilities. Therefore, ensuring the suitability of the location of these types of testing facilities is both a valid and necessary part of EPA's GLP Standards.

6. *Section 792.43 Test system care facilities.* a. EPA is proposing to revise the title of § 792.43 from "Animal care facilities" to "Test system care facilities." The proposed heading for § 792.43 more adequately reflects the Agency's intent to specify within the main body of the TSCA GLP Standards the requirements for testing facilities for the care of chemical or physical matrices (e.g., soil or water), plants, and microorganisms, as well as animals. Accordingly, the Agency is proposing to further modify § 792.43 by incorporating the term "test system" when facility requirements should extend beyond "animal" care.

b. Consistent with the Agency's intent to incorporate the environmental testing provisions currently found in Subpart L into Subparts A through J of Part 792, paragraphs (a)(1), (a)(2), (d), (e), (f), (g), and (h) in proposed § 792.43 have been added or modified to incorporate the provisions currently found in § 792.228(b) (1) through (7).

c. EPA proposes to modify § 792.43(a) to allow testing facilities to provide for isolation areas rather than quarantine areas. This change is consistent with the proposal to modify § 792.90(b) to allow "isolation" of newly received animals rather than requiring "quarantine" [See Unit I.D. of this preamble for a discussion of proposed § 792.90(b)].

d. In § 792.43(c), EPA proposes to delete the requirement that separate areas be provided in all cases for the diagnosis, treatment, and control of test system diseases. Instead, it is proposed that such separate areas be provided "as appropriate." This proposal is consistent with the September 4, 1987, revised FDA GLP regulations.

EPA has proposed this modification in order to allow laboratories the option of disposing of diseased animals and other test systems from the experiment without also bearing the expense of maintaining separate areas in testing facilities for diagnosis, treatment, and control of disease. Additionally, EPA recognizes that the diagnosis and treatment requirements of § 792.43(c) may not be appropriate when dealing with such test systems as soil, plants, or microorganisms. However, if the decision is made not to dispose of the test system from the study, then test system care facilities, as specified in proposed § 792.43(c), must be provided.

e. EPA proposes to conform to the revised FDA GLPs by deleting § 792.43(e) in its entirety. Currently, § 792.43(e) requires test system facilities to be designed, constructed, and located so as to minimize disturbances which may interfere with the study. EPA agrees with FDA that this provision is already adequately covered in § 792.41, which requires that facilities be of suitable size construction, and, for outdoor testing facilities, location to facilitate the proper conduct of the study.

7. *Section 792.45 Test system supply facilities.* a. EPA proposes to incorporate the provisions of § 792.228(c) into § 792.45. Therefore, proposed § 792.45 will require that supply facilities necessary for environmental testing be provided when appropriate.

b. Consistent with the proposed expanded scope of this section, EPA is also proposing to retitle § 792.45 from "Animal supply facilities" to "Test system supply facilities."

c. EPA proposes to modify § 792.45 to state "Perishable supplies shall be preserved by appropriate means." This change is being proposed to conform with the revised FDA GLPs and recognizes that there are a variety of acceptable storage and preservation procedures available other than refrigeration. Depending on the stability characteristics of the perishable material, acceptable storage and preservation methods may include desiccation, room temperature-low humidity, and constant temperature-low humidity.

d. EPA also proposes to delete the phrase "or feed" from the last sentence of § 792.45. Both EPA and FDA consider "feed" to be a "supply." Therefore, the use of the word "feed" in § 792.45 is redundant.

8. *Section 792.49 Laboratory operation areas.* a. EPA proposes to conform with FDA's revised GLP regulations by deleting paragraph (b) from § 792.49, adding the phrase "and specialized" after the word "routine" and before the word "procedures," and deleting the qualifying phrase "including specialized areas for performing activities such as aseptic surgery, intensive care, necropsy, histology, radiography, and handling of biohazardous materials."

Paragraphs (a) and (b), as currently worded, describe activities which require that separate laboratory space be provided. As FDA noted in its proposal to modify its corresponding section, the list of activities that currently appears in paragraphs (a) and (b) is not all inclusive and is not essential for the clarity of these sections. Further, by adding the phrase "and specialized," the proposed new paragraph will encompass all activities now listed in paragraphs (a) and (b).

b. In § 792.49, EPA proposes to add the phrase "and other space" after the words "laboratory space" and before the word "shall." As discussed in Unit I.C. of this preamble, this change to § 792.49 is being proposed to reflect that testing does not necessarily take place within the confines of a traditional indoor laboratory. Proposed § 792.49 would require that there be enough space provided to perform the procedures required by the protocol wherever testing takes place (i.e., indoor laboratory or field station).

9. *Section 792.53 Administrative and personnel facilities.* As in the revised FDA GLP regulations, EPA proposes to delete § 792.53 in its entirety. EPA agrees with FDA that the requirements of this section are not necessary for achieving the goals of the TSCA GLP standards.

10. *Section 792.61 Equipment design.* In § 792.61, EPA proposes to delete the phrase "Automatic, mechanical, or electronic" from the beginning of the first sentence. EPA agrees with FDA that the deletion of these qualifying terms provides for a more general interpretation of the word "equipment."

11. *Section 792.63 Maintenance and calibration of equipment.* a. Consistent with the FDA GLPs, EPA is proposing to amend § 792.63(b) to state that standard

VOL 52 ISS 248 DEC 28 1987 UMI

operating procedures (SOPs) for remedial action for equipment, in the event of failure or malfunction of equipment, need only be established when "appropriate." This change acknowledges that laboratories may choose to discard rather than repair equipment, and in such cases SOPs which delineate remedial action are not necessary.

b. EPA is also proposing to conform to the revised FDA GLP regulations by deleting from § 792.63(b) the provision that copies of the SOPs shall be made available to laboratory personnel. EPA still believes that laboratory personnel must have access to laboratory SOPs; however, since this requirement is clearly stated in § 792.81(c), EPA considers the inclusion of this provision in § 792.63(b) to be redundant.

12. *Section 792.81 Standard operating procedures.* a. In § 792.81(b) (1), (2), (6), (7), and (12), EPA is proposing to replace the term "animal" with the term "test system." As discussed previously in this preamble, this modification is consistent with the broad scope of test systems which may be used in environmental testing. Further, the Agency proposes to extend all the SOP requirements outlined by § 792.81 to environmental testing. For instance, the provisions of proposed § 792.81(b)(11), which require SOPs for the maintenance and calibration of equipment, would apply to procedures for preparation and maintenance of incubators, greenhouses, or growth chambers, currently required under § 792.228(d).

b. In § 792.81(b)(5), EPA is proposing to require that SOPs be established for tests wherever the testing is undertaken, including those conducted in the field. Accordingly, it is proposed that § 792.81(b)(5) read "Laboratory or other tests" (see discussion of "field testing" in Unit I.C. of this preamble).

c. In conformance with FDA's revised GLP regulations, EPA is proposing to delete the list of examples for laboratory manuals and SOPs required to be made immediately available under § 792.81(c). EPA still intends that laboratory areas must have immediately available manuals and SOPs for laboratory procedures being performed. This requirement still includes toxicology, histology, clinical chemistry, hematology, teratology, and necropsy, if applicable. However, this list is not all inclusive and is too broad to serve as a useful guide. For example, this requirement also includes SOPs for the maintenance, repair, and calibration of equipment as described in § 792.63(b).

d. EPA is also proposing to amend the language of § 792.81(c) to clarify that the requirement of this section also applies to field testing facilities. Therefore, it is proposed that § 792.81(c) will read, "Each laboratory *or other study* area shall have immediately available manuals and standard operating procedures relative to the laboratory or field procedures being performed."

13. *Section 792.90 Animal and other test system care.* a. EPA is proposing to retitle § 792.90 from "Animal care" to "Animal and other test system care." As previously stated, testing required by EPA may involve plants, soils, microorganisms, and other test systems, in addition to animals. The proposed title to § 792.90 reflects the broader scope of test systems for which the EPA intends this section to apply.

Further, it is proposed that the provisions for test system care for ecological effects testing, found in § 792.228(e), be incorporated into proposed § 792.90. Specifically, the proposed revision incorporates the requirements of: § 792.228(e)(1) into proposed § 792.90(b), § 792.228(e)(2) into proposed § 792.90(d), § 792.228(e)(3) into proposed § 792.90(e)(1), § 792.228(e)(4) into proposed § 792.90(f), § 792.228(e)(5) into proposed § 792.90(g), and § 792.228(e)(6) into proposed § 792.90(j).

b. EPA proposes to modify § 792.90(b) to provide for the evaluation of a test system's health status, or the appropriateness of the test system for the study, according to acceptable "scientific practice." This section, as proposed, will still require that newly received animals must have their health status evaluated according to acceptable veterinary medical practices. However, EPA recognizes that it may not be appropriate to evaluate the health status of certain test systems (e.g., soil or water) or to require that a plant, microorganism, soil, or water be evaluated according to acceptable veterinary medical practice to determine their appropriateness for a study. EPA is only concerned that test systems used in a study are free of any disease or condition which may interfere with the purpose or conduct of the study, and that the proper precautions, as stated in § 792.90(b), are taken to comply with this requirement.

c. Additionally, EPA is proposing to modify § 792.90(b), to require "isolation" rather than "quarantine" of newly received animals. This proposal is consistent with FDA's revision to its GLP regulations.

As previously stated, the intent of § 792.90(b) is to prevent the entry of unhealthy or inappropriate test systems into the study, as required by § 792.90(c). Currently, § 792.90(b) provides that this intent be achieved through "quarantine." However, the term "quarantine" suggests a rigid set of procedures, including a mandatory holding period, a specific list of diagnostic procedures, and the use of specialized facilities and test system care practices, which may be an unnecessary burden to industry.

EPA agrees with FDA's conclusion, discussed in the preamble to its revised GLP regulation (52 FR 33775; September 4, 1987), that isolation and evaluation of health status are sufficient precautions against contamination of test systems and, therefore, fulfill the intent of this section. FDA further states that such a revision would provide laboratories the flexibility to develop isolation and health status evaluation procedures best suited for the age, species, class, and type of the test system, as well as the type of study to be performed.

d. EPA proposes to conform to the FDA GLPs by modifying § 792.90(c) to require isolation of diseased test systems only when necessary.

Currently, § 792.90(c) requires that animals which contract a disease or condition shall be isolated in all cases. This requirement would in turn require that separate facilities be available for the isolation of these animals. However, as discussed in the proposal for § 792.43(c), both EPA and FDA believe that laboratories should be given flexibility in their disposition of diseased test systems. As FDA discussed in the proposed revisions to its GLP regulations (49 FR 43533; October 29, 1984), the proposed modification to § 792.90(c) will allow laboratories the option of: (1) Leaving the diseased test system in the experiment provided that the integrity of the study will not be adversely affected by this action; (2) disposing of the test system; or (3) isolating, treating, and returning the test system to the study.

14. *Section 792.105 Test, control, and reference substance characterization.* a. In revised 21 CFR 58.105(a), FDA has deleted the requirement that test and control substance characteristics shall be determined and documented for each batch "before the initiation of the study." This change has not been incorporated by EPA in its proposed revision to § 792.105(a). However, EPA proposes to modify § 792.105(a) to require that test, control, *or reference* substance characterization be determined and documented for each batch before its use in the experiment. EPA feels that this proposed requirement is necessary because it is essential that characteristics of test, control, and reference substances be known prior to their administration or use in an experiment.

EPA's recent experience with antimony trioxide has shown that extensive analytical work was necessary prior to test initiation. Certain assumptions regarding the product's characteristics were used in the protocols for antimony trioxide testing which proved invalid. These invalid assumptions necessitated modifications to the proposed study, resulting in the delay and rescheduling of other subsequent studies. If the analytical work had preceded the toxicology studies, the studies would not have failed and modifications to the studies woul d not have been necessary. The Agency's conclusion is that it is better to delay study schedules than to initiate improper experimental procedures which will produce invalid results.

b. FDA has modified 21 CFR 58.105(b) to provide for the determination of the stability of the test or control substance either before the initiation of the study or through periodic analysis of each batch according to written standard operating procedures. EPA has chosen not to adopt this approach in proposed § 792.105(b) because the Agency does not agree that stability can adequately be demonstrated by periodic analysis without initial evaluation.

Further, there are many studies required by EPA where solubility of the test, control, and reference substance is of critical importance, such as aquatic toxicity studies. Therefore, EPA is proposing that solubility of the test, control, and reference substance be determined before the experimental start date if knowledge of the solubility characteristics is relevant for the proper conduct of the experiment.

It is EPA's contention that both stability and solubility of the test, control, and reference substance need to be determined before the experimental start date in order to ensure proper handling and administration of the test substance to the test system. However, since the determination of the solubility of the test, control, and reference substance is not a requirement in FDA's GLP regulations, EPA is interested in receiving public comment on this issue.

15. *Section 792.113 Mixtures of substances with carriers.* a. FDA has modified 21 CFR 58.113(a)(2) to require determination of the stability of the test and control substance in a mixture, as required by the conditions of the study, either before the initiation of the study or through periodic analysis of each batch. While EPA does not propose to modify § 792.113(a)(2) to provide the option of determining the stability of the mixture either before study initiation or through periodic analysis (see discussion for § 792.105(b)), EPA will modify this section to require stability testing only to the extent required by the conditions of the experiment. As proposed for § 792.105(b), EPA is also proposing to require that, when appropriate to the conduct of the experiment, solubility of the test, control, or reference substance in the mixture must be determined in the same manner (see discussion for § 792.105(b)). Additionally, as proposed for § 792.105 (a) and (b), EPA is proposing to replace the phrase "before the initiation of the study" with the phrase "before the experimental start date" (see discussion for § 792.105(a)).

The phrase "as required by the conditions of the experiment" has been added in order to clarify that determination of stability and, if appropriate, solubility of a test, control, or reference substance in a mixture is only necessary to support its actual time of use in the experiment. Therefore, it is not necessary to provide data which illustrate long-term stability of a mixture when the actual time that the mixture is used is short-term. For example, a test, control, or reference substance in a mixture that will be used the same day it is prepared will only require data sufficient to show stability and, if appropriate, solubility for 1 day.

b. Additionally, EPA proposes to incorporate into § 792.113(a)(2), the provision currently found in § 792.228(f)(2), which states that the determination of the stability or solubility of the test, control, or reference substance in the mixture must be done under the environmental conditions specified in the protocol.

c. EPA proposes to add new paragraph (c) to § 792.113 which incorporates the provisions of § 792.228(f)(3).

16. *Section 792.120 Protocol.* a. In 21 CFR 58.120(a), FDA has replaced the qualifying phrase "but shall not necessarily be limited to" with the phrase "as applicable." EPA proposes to adopt FDA's approach with some modifications. It is proposed that the phrase "Where applicable" appear before the information specified in § 792.120(a)(9), and continue to appear before the information required by § 792.120(a)(6). The phrase "but shall not necessarily be limited to" would remain in this section.

In FDA's discussion of this proposal (49 FR 43533; October 29, 1984), concerns were expressed that some of the information required to appear in the protocol is not applicable to all types of testing. Specifically, FDA points to the information required by 21 CFR 58.120(a)(9) and (11). In 21 CFR 58.120, paragraph (a)(9) requires a description of the diet used in a study as well as solvents, emulsifiers, and/or other materials used to solubilize or suspend the test or control substance before mixing with the carrier. FDA points out that this requirement is not applicable to radiation-emitting products. Section 58.120(a)(11) specifies that the protocol shall specify dosage level, and this requirement is not applicable to implantable medical devices.

Clearly, the basis for FDA's change is to accommodate concerns that are specific to the types of testing required by FDA and do not necessarily apply to testing required by EPA. Further, EPA is concerned that placing the phrase "as applicable" in § 792.120(a) suggests that there may be cases where it is not applicable for any of the other information required by § 792.120(a) to appear in the protocol. Therefore, the phrase "as applicable" should only appear before those items which are not necessarily appropriate to appear in the protocol for certain types of testing.

For example, there may be testing required by EPA where it may not be appropriate to require a protocol to contain the information specified in § 792.120(a)(9), such as describing and/or identifying the diet of a human subject involved in exposure testing. Therefore, EPA proposes to add the phrase "Where applicable" before the information specified in proposed § 792.120(a)(9).

b. In 21 CFR 58.120(a)(4), FDA has deleted the requirement that the protocol contain "The proposed starting and completion dates." EPA is proposing to retain this requirement in § 792.120(a)(4), but is proposing to modify this paragraph to require, "The proposed experimental start and termination dates."

EPA believes that this information is necessary for the evaluation of a protocol and the Agency's scheduling of additional related studies and audit reviews. Section 792.120(a)(4) is related to the selected study method, laboratory, and specialist availability, and other Agency and industry priorities. Often a group of experiments are carried out in sequence, so that both start and termination dates affect subsequent study expectations and timetables. Projected experimental start and termination dates identify the normal duration for a given experiment type and reflect any special considerations that may be unique to a laboratory, anticipated analytical or methodology work, and available resources, and it may also affect pending regulatory timetables.

VOL 52 ISS 248 DEC 28 1987 UMI

Given that there are hundreds of studies that EPA must track, these estimated schedules, combined with those from other studies, allow the Agency to more efficiently schedule audits and regulatory action. Further considerations are the following: (1) The availability of composite schedules for many studies may be necessary to set realistic regulatory action goals; (2) composite study schedules are evaluated to schedule audits while several studies are ongoing or recently completed, and which may all be at a given laboratory or geographic location. This directly reduces EPA resources necessary for audit and regulatory review functions; and (3) standard business management by objectives requires intermediate calendar goals when scheduling multiple outputs, or a long-term single product. The master on-site laboratory schedule will incorporate these dates to carry out the study.

c. In 21 CFR 58.120(a)(5), FDA has deleted the requirement that the protocol contain a justification for the selection of the test system. EPA has chosen to retain this requirement in proposed § 792.120(a)(5).

Environmental studies, including both ecological effects and chemical fate, are more diverse than health effects testing. Further, details relevant to the test system design are more chemically dependent in the case of environmental effects and chemical fate testing than in the case of health effects testing. Many of the test systems in environmental studies must be modified in accordance with specific chemical characteristics. Therefore, EPA must allow a much broader range of flexibility in the nature of tests and selection of test systems. In order to fully understand the test and its results, EPA needs to have a discussion of the reasons for selection of the test system. In addition, EPA recognizes that industry may be engaged in state-of-the-art environmental testing. Under proposed § 792.120(a)(5), EPA can keep abreast of industry advances in such testing and ensure that their use of test systems is appropriate. EPA is interested in receiving public comment on whether to limit the requirement that the protocol contain a justification of the test system to environmental testing.

d. FDA has deleted from 21 CFR 58.120(a)(10) the requirement that the protocol include the route of administration and the reason for its choice. EPA has chosen to retain this requirement in proposed § 792.120(a)(10).

The chemicals regulated by FDA will usually have a predefined route of exposure. Therefore, it makes sense for FDA to eliminate the requirement to stipulate the route of administration and the reason for its choice within the protocol. Unlike FDA, EPA is concerned with presence in or exposure to various media (i.e., air, water, soil, sediment, chemicals, etc.) and may not know in advance the routes of exposure for the chemicals it regulates. Most chemicals and products regulated by EPA do not have set routes of exposure and may even have multiple routes of exposure. Therefore, EPA must consider a wide range of possible exposure routes in its regulatory decisions. Further, the route of administration is essential to determine the effectiveness of a test system for the purposes of a specific toxicology study. The route of administration affects the real dosage rates, and therefore, affects whether the impact of the exposure of the test substance is acute or chronic.

Therefore, EPA believes that, for its purposes, it is essential that the protocol contain the route of administration and the reason for its choice. This requirement will therefore remain in the EPA's TSCA GLP standards in § 792.120(a)(10).

e. EPA proposes to delete current § 792.120(a)(12) in its entirety. Currently, § 792.120(a)(12) requires that the protocol contain the method by which the degree of absorption of the test and control substance by the test system will be determined. EPA agrees with FDA's conclusion that this requirement is not necessary in the protocol.

f. In proposed § 792.120(a)(14), redesignated from current paragraph (a)(15), EPA proposes to conform with FDA's revised GLP regulations and require that the study director's signature be dated on the protocol.

EPA is proposing in § 792.3 that the study initiation date be defined as the date the protocol is signed by the study director. It is through the proposed requirement of § 792.120(a)(14), that the Agency will be able to identify the official study initiation date.

17. *Section 792.130 Conduct of a study.* a. FDA has modified 21 CFR 58.130(d) to provide that records of gross findings for a specimen from postmortem observations "should" be made available to the pathologist when examining that specimen's histopathology. EPA has chosen to retain the requirement that these records "shall," in all cases, be provided to a pathologist during study of the specimen.

EPA agrees with FDA's conclusion that for most studies it is important for the pathologist to have the records of gross findings available when examining a specimen histopathologically. However, it is FDA's contention that replacing the word "shall" with the word "should" will allow the histopathological evaluation of specimens in a "blind" fashion. EPA also recognizes that it may be appropriate for some studies to provide for "blinding" in histopathological evaluation. However, EPA maintains that, when specified by the protocol, the pathologist can accomplish "blinding," without violating § 792.130 by not looking at the records which have been provided. Therefore, it will remain EPA's requirement that the pathologist must have access to the records of gross findings when examining a specimen histopathologically.

b. In conformance with the revised FDA GLP regulations, in § 792.130(e), EPA proposes to replace the terms "computer" and "computer driven" with the term "automated data collection." EPA agrees with FDA that the terms "computer" or "computer driven" do not adequately reflect the data collection and storage technologies currently used by testing facilities. The Agency believes that the proposed term "automated data collection" provides a more appropriate description of the data collection and storage systems available for industry use.

18. *Section 792.135 Physical and chemical characterization studies.* EPA proposes to add § 792.135 in order to specify the provisions of the proposed TSCA GLP standards which will not apply to studies designed to determine the physical and chemical characteristics of a test, control, or reference substance. Most studies designed to determine the physical or chemical characteristics of a test, control, or reference substance rarely involve any modifications to the protocol or experimental design and are usually conducted in an assembly line fashion. Therefore, proposed § 792.135(a) relaxes the requirements of the GLP standards without compromising the quality or integrity of data generated from these studies.

However, in § 792.135(b), EPA is also proposing that the exemptions listed in proposed § 792.135(a) will not apply to studies designed to determine solubility, octanol water partition coefficient, volatility, and persistence of a test, control, or reference substance. These types of physical and chemical characterization studies are more complex in design, execution, and interpretation, and EPA does not believe that it can be assured of the quality and integrity of data generated from these studies without complete GLP compliance.

19. *Section 792.185 Reporting of study results.* In § 792.185(a)(5), EPA is proposing to require that the final report include information relating to the solubility, in addition to stability, of the test, control, or reference substance, if solubility information was important to the conduct of the experiment. This change is consistent with the proposed modifications to §§ 792.105(b) and 792.113(a)(2) (see the preamble discussion of proposed §§ 792.105(b) and 792.113(a)(2)).

20. *Section 792.190 Storage and retrieval of records and data.* a. In § 792.190(a), EPA proposes to conform to the revised FDA GLP regulations by modifying this section to state that specimens obtained from mutagenicity tests and specimens of blood, urine, feces, and biological fluids generated as a result of a study need *not* be retained. EPA is also proposing that § 792.190(a) state that specimens of soil, water, and plants obtained from environmental testing need *not* be retained. EPA agrees with FDA's conclusion that retention of these specimens beyond initial evaluation is burdensome and does not have a significant impact on the quality of a study.

b. As in the revised FDA GLPs, EPA proposes to revise § 792.190(e) by deleting the requirement that study materials which are retained in archives must be indexed specifically by test substance, date of study, test system, and nature of study. EPA agrees with FDA that the intent of this section is to require indexing of materials in such a way as to permit expedient retrieval from archives. EPA does not believe it is necessary to stipulate the specific indexing terms which must be used.

21. *Section 792.195 Retention of records.* a. EPA proposes to delete paragraphs (b)(2) and (3) of § 792.195, redesignate paragraph (b)(1) as (b), and amend paragraph (b) to require a retention period for documentation records, raw data, and specimens of 5 years from the date the results of any study are submitted to the Agency.

Currently, § 792.195(b) requires a retention period for records, raw data, and specimens under paragraph (b)(1) of 10 years following the effective date of the applicable final test rule and, under paragraph (b)(2) of 10 years following the publication date of the acceptance of a negotiated test agreement. This section also recommends a retention period for such materials of 5 years following the date studies are submitted to the Agency under TSCA section 5.

As stated in the preamble to the 1983 TSCA GLP regulation (48 FR 53935; November 29, 1983), EPA believes that it is essential that study records, raw data, and specimens be maintained to provide the Agency with a sufficient period of time to review the study results and implement any appropriate regulatory actions. Further, it is essential that records, raw data, and specimens be available to suppport Agency decisions in case of court challenges to those decisions. However, the Agency sees no reason to vary record retention requirements and has concluded that a record retention period of 5 years from the date the study is submitted to EPA is a sufficient period of time to meet the Agency concerns and goals. Finally, the record retention period proposed in § 792.195(b) is preferable to the timeframes currently required because it is consistent with the requirements currently set forth in the FIFRA GLPs, in 40 CFR 160.195(b)(2), and the FDA Good Laboratory Practice regulations in 21 CFR 58.195(b).

b. In § 792.195, EPA proposes to delete the examples provided in the first sentence of paragraph (c). EPA has proposed this change in conformity with FDA's recent revision because EPA agrees with FDA that these examples do not clarify which materials must be retained from a study and, therefore, are not necessary in this section.

c. EPA is also proposing to modify § 792.195(c) to state that specimens obtained from mutagenicity tests, specimens of soil, water, and plants, and wet specimens of blood, urine, feces, biological fluids, do not need to be retained beyond quality assurance review. This change has been adopted in order to be consistent with the change discussed in proposed § 792.190(a).

d. In new § 792.195(i), EPA proposes to allow records and other "raw data" required by these regulations to be retained either as original records or as true copies, such as photocopies, microfiche, or other accurate reproductions of the original records. This provision would be incorporated in the TSCA GLPs in § 792.195(i) in order to be consistent with the changes to FDA's Good Laboratory Practice regulations.

II. Economic Analysis

The proposal to expand coverage of the TSCA GLP standards to testing conducted in the field is not expected to increase testing costs significantly. Further, the revisions to the TSCA GLP standards which reflect the FDA GLP revisions primarily provide relief from the original GLP standards (ICF 1987). Therefore, these amendments to the TSCA GLPs are not expected to have a significant economic impact on testing under TSCA.

III. Other Regulatory Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA is required to judge whether a rule is a "major" one and is therefore subject to the requirement of a Regulatory Impact Analysis. The proposed amendments of the TSCA Good Laboratory Practice Standards would not be a major rule because they do not meet any of the criteria set forth and defined in section 1(b) of the Order.

B. Regulatory Flexibility Act

The proposed amendments to the TSCA GLP standards are not expected to have a significant impact on a substantial number of small businesses since little or no economic impact is expected from the revision overall.

C. Paperwork Reduction Act

The Office of Management and Budget (OMB) has approved the information collection requirements contained in this proposed rule under the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* and has assigned OMB control number 2070–0033. Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB, marked "Attention: Desk Officer for EPA." The final rule will respond to any OMB or public comments on the information collection requirements.

List of Subjects in 40 CFR Part 792

Good laboratory practices, Laboratories, Environmental protection, Hazardous materials, Chemicals, Recordkeeping and reporting requirements.

Dated: December 8, 1987.

Lee M. Thomas,

Administrator.

Therefore, it is proposed that 40 CFR Part 792 be amended as follows:

PART 792—[AMENDED]

1. The authority citation for Part 792 is revised to read as follows:

Authority: 15 U.S.C. 2603.

2. In § 792.1, by revising paragraphs (a) and (c) to read as follows:

§ 792.1 Scope.

(a) This part prescribes good laboratory practices for conducting studies relating to health effects, environmental effects, and chemical fate testing. This part is intended to ensure the quality and integrity of data submitted pursuant to testing consent agreements and test rules issued under section 4 of the Toxic Substances

Control Act (TSCA) (Pub. L. 94-469, 90 Stat. 2006, 15 U.S.C. 2603 et seq.).

* * * * *

(c) It is the Agency's policy that all data developed under section 5 of TSCA be in accordance with provisions of this part. If data are not developed in accordance with the provisions of this part, the Agency will consider such data insufficient to evaluate the health and environmental effects of the chemical substances unless the submitter provides additional information demonstrating that the data are reliable and adequate.

3. In § 792.3, by removing the alphabetical paragraph designations in paragraphs (a) through (q); by revising the definitions for "Control substance", "Study," and "Test system"; by replacing the term "Test substance or mixture" with "Test substance"; by amending the definition for "Sponsor" by revising paragraph (2) thereunder; and by adding and alphabetically inserting definitions for "Carrier", "Experimental start date", "Experimental termination date", "Reference substance", "Study completion date", "Study initiation date", and "Vehicle", to read as follows:

§ 792.3 Definitions.

* * * * *

"Carrier" means any material (e.g., feed, water, soil, nutrient media) with which the test substance is combined for administration to test organisms.

"Control substance" means any chemical substance or mixture or any other material other than a test substance, feed, or water that is administered to the test system in the course of study for the purpose of establishing a basis for comparison with the test substance for no effect levels.

* * * * *

"Experimental start date" means the first date the test substance is applied to the test system.

"Experimental termination date" means the last date on which data are collected directly from the study.

* * * * *

"Reference substance" means any chemical substance or mixture or material other than a test substance, feed, or water that is administered to or used in analyzing the test system in the course of a study for purposes of establishing a basis for comparison with the test substance for known effect levels.

* * * * *

"Sponsor" means:

* * * * *

(2) A person who submits a study to the EPA in response to a TSCA section 4(a) test rule and/or a person who submits a study under a TSCA section 4 testing consent agreement or a TSCA section 5 rule or order to the extent the agreement, rule or order references this part; or

* * * * *

"Study" means any experiment in which a test substance is studied in a test system under laboratory conditions or in the environment to determine or help predict its effects, metabolism, environmental and chemical fate, persistence, or other characteristics in humans, other living organisms, or media. The term does not include basic exploratory studies carried out to determine whether a test substance has any potential utility.

"Study completion date" means the date the final report is signed by the study director.

* * * * *

"Study initiation date" means the date the protocol is signed by the study director.

* * * * *

"Test substance" means a substance or mixture administered or added to a test system in a study, which substance or mixture is used to develop data to meet the requirements of a TSCA section 4(a) test rule and/or is developed under a TSCA section 4 testing consent agreement or section 5 rule or order to the extent the agreement, rule or order references this part.

"Test system" means any animal, plant, microorganism, chemical or physical matrix (e.g., soil or water), or subparts thereof, to which the test, control, or reference substance is administered or added for study. "Test system" also includes appropriate groups or components of the system not treated with the test, control, or reference substance.

* * * * *

"Vehicle" means any agent which facilitates the mixture, dispersion, or solubilization of a test substance with a carrier.

4. In § 792.12, by revising the introductory text to read as follows:

§ 792.12 Statement of compliance or non-compliance.

Any person who submits to EPA a test required by a testing consent agreement or a test rule issued under section 4 of TSCA shall include in the submission a true and correct statement, signed by the sponsor and the study director, of one of the following types:

* * * * *

5. In § 792.17, by revising the introductory text of paragraph (a) and paragraph (c) to read as follows:

§ 792.17 Effects of non-compliance.

(a) The sponsor or any other person who is conducting or has conducted a test to fulfill the requirements of a testing consent agreement or a test rule issued under section 4 of TSCA will be in violation of section 15 of TSCA if:

* * * * *

(c) If data submitted to fulfill a requirement of a testing consent agreement or a test rule issued under section 4 of TSCA are not developed in accordance with this part, EPA may determine that the sponsor has not fulfilled its obligations under section 4 of TSCA and may require the sponsor to develop data in accordance with the requirements of this part in order to satisfy such obligations.

6. In § 792.29, by revising paragraphs (d), (e), and (f) to read as follows:

§ 792.29 Personnel.

* * * * *

(d) Personnel shall take necessary personal sanitation and health precautions designed to avoid contamination of test, control, and reference substances and test systems.

(e) Personnel engaged in a study shall wear clothing appropriate for the duties they perform. Such clothing shall be changed as often as necessary to prevent microbiological, radiological, or chemical contamination of test systems and test, control, and reference substances.

(f) Any individual found at any time to have an illness that may adversely affect the quality and integrity of the study shall be excluded from direct contact with test systems, test, control, and reference substances and any other operation or function that may adversely affect the study until the condition is corrected. All personnel shall be instructed to report to their immediate supervisors any health or medical conditions that may reasonably be considered to have an adverse effect on a study.

7. In § 792.31, by revising paragraph (b) to read as follows:

§ 792.31 Testing facility management.

* * * * *

(b) Replace the study director promptly if it becomes necessary to do so during the conduct of a study.

* * * * *

8. In § 792.35, by revising paragraphs (a) and (b) (1) and (3) and removing paragraph (e) to read as follows:

§ 792.35 Quality assurance unit.

(a) A testing facility shall have a quality assurance unit which shall be responsible for monitoring each study to assure management that the facilities, equipment, personnel, methods, practices, records, and controls are in conformance with the regulations in this part. For any given study, the quality assurance unit shall be entirely separate from and independent of the personnel engaged in the direction and conduct of that study.

(b) * * *

(1) Maintain a copy of a master schedule sheet of all studies conducted at the testing facility indexed by test substance and containing the test system, nature of study, date study was initiated, current status of each study, identity of the sponsor, and name of the study director.

* * * * *

(3) Inspect each study at intervals adequate to ensure the integrity of the study and maintain written and properly signed records of each periodic inspection showing the date of the inspection, the study inspected, the phase or segment of the study inspected, the person performing the inspection, findings and problems, action recommended and taken to resolve existing problems, and any scheduled date for re-inspection. Any problems which are likely to affect study integrity found during the course of an inspection shall be brought to the attention of the study director and management immediately.

* * * * *

9. By revising § 792.41 to read as follows:

§ 792.41 General.

Each testing facility shall be of suitable size and construction to facilitate the proper conduct of studies. Testing facilities which are not located within an indoor controlled environment shall be of suitable location to facilitate the proper conduct of studies. Testing facilities shall be designed so that there is a degree of separation that will prevent any function or activity from having an adverse effect on the study.

10. By revising § 792.43 to read as follows:

§ 792.43 Test system care facilities.

(a) A testing facility shall have a sufficient number of animal rooms or other test system areas, as needed, to ensure: proper separation of species or test systems, isolation of individual projects, quarantine or isolation of animals or other test systems, and routine or specialized housing of animals or other test systems.

(1) In tests with plants or aquatic animals, proper separation of species can be accomplished within a room or area by housing them separately in different chambers or aquaria. Separation of species is unnecessary where the protocol specifies the simultaneous exposure of two or more species in the same chamber, aquarium, or housing unit.

(2) Aquatic toxicity tests for individual projects shall be isolated to the extent necessary to prevent cross-contamination of different chemicals used in different tests.

(b) A testing facility shall have a number of animal rooms or other test system areas separate from those described in paragraph (a) of this section to ensure isolation of studies being done with test systems or test, control, and reference substances known to be biohazardous, including volatile substances, aerosols, radioactive materials, and infectious agents.

(c) Separate areas shall be provided, as appropriate, for the diagnosis, treatment, and control of laboratory test system diseases. These areas shall provide effective isolation for the housing of test systems either known or suspected of being diseased, or of being carriers of disease, from other test systems.

(d) Facilities shall have proper provisions for collection and disposal of contaminated water, soil, or other spent materials. When animals are housed, facilities shall exist for the collection and disposal of all animal waste and refuse or for safe sanitary storage of waste before removal from the testing facility. Disposal facilities shall be so provided and operated as to minimize vermin infestation, odors, disease hazards, and environmental contamination.

(e) Facilities shall have provisions to regulate environmental conditions (e.g., temperature, humidity, photoperiod) as specified in the protocol.

(f) For marine test organisms, an adequate supply of clean sea water or artificial sea water (prepared from deionized or distilled water and sea salt mixture) shall be available. The ranges of composition shall be as specified in the protocol.

(g) For freshwater organisms, an adequate supply of clean water of the appropriate hardness, pH, and temperature, and free of contaminants capable of interfering with the study shall be available as specified in the protocol.

(h) For plants, an adequate supply of soil of the appropriate composition, as specified in the protocol, shall be available as needed.

11. By revising § 792.45 to read as follows:

§ 792.45 Test system supply facilities.

(a) There shall be storage areas, as needed, for feed, nutrients, soils, bedding, supplies, and equipment. Storage areas for feed, nutrients, soils, and bedding shall be separated from areas housing the test systems and shall be protected against infestation or contamination. Perishable supplies shall be preserved by appropriate means.

(b) When appropriate, plant supply facilities shall be provided. These include:

(1) Facilities, as specified in the protocol, for holding, culturing, and maintaining algae and aquatic plants.

(2) Facilities, as specified in the protocol, for plant growth (e.g., greenhouses, growth chambers, light banks).

(c) When appropriate, facilities for aquatic animal tests shall be provided. These include aquaria, holding tanks, ponds, and ancillary equipment, as specified in the protocol.

12. By revising § 792.47 to read as follows:

§ 792.47 Facilities for handling test, control, and reference substances.

(a) As necessary to prevent contamination or mixups, there shall be separate areas for:

(1) Receipt and storage of the test, control, and reference substances.

(2) Mixing of the test, control, and reference substances with a carrier, e.g., feed.

(3) Storage of the test, control, and reference substance mixtures.

(b) Storage areas for test, control, and/or reference substance and for test, control, and/or reference mixtures shall be separate from areas housing the test systems and shall be adequate to preserve the identity, strength, purity, and stability of the substances and mixtures.

13. By revising § 792.49 to read as follows:

§ 792.49 Laboratory operation areas.

Separate laboratory space and other space shall be provided, as needed, for the performance of the routine and specialized procedures required by studies.

§ 792.53 [Removed]

14. By removing § 792.53 *Administrative and personnel facilities.*

15. By revising § 792.61 to read as follows:

VOL 52 ISS 248 DEC 28 1987 UMI

§ 792.81 Equipment design.

Equipment used in the generation, measurement, or assessment of data and equipment used for facility environmental control shall be of appropriate design and adequate capacity to function according to protocol and shall be suitably located for operation, inspection, cleaning, and maintenance.

16. In § 792.63, by revising paragraph (b) to read as follows:

§ 792.63 Maintenance and calibration of equipment.

* * * * *

(b) The written standard operating procedures required under § 792.81(b)(11) shall set forth in sufficient detail the methods, materials, and schedules to be used in the routine inspection, cleaning, maintenance, testing, calibration, and/or standardization of equipment, and shall specify, when appropriate, remedial action to be taken in the event of failure or malfunction of equipment. The written standard operating procedures shall designate the person responsible for the performance of each operation.

* * * *

17. In § 792.81, by revising paragraphs (b) (1), (2), (3), (5), (6), (7), and (12) and (c) to read as follows:

§ 792.81 Standard operating procedures.

* * * * *

(b) * * *

(1) Test system room preparation.

(2) Test system care.

(3) Receipt, identification, storage, handling, mixing, and method of sampling of the test, control, and reference substances.

* * * * *

(5) Laboratory or other tests.

(6) Handling of test systems found moribund or dead during study.

(7) Necropsy of test systems or postmortem examination of test systems.

* * * * *

(12) Transfer, proper placement, and identification of test systems.

(c) Each laboratory or other study area shall have immediately available manuals and standard operating procedures relative to the laboratory or field procedures being performed. Published literature may be used as a supplement to standard operating procedures.

* * * * *

18. By revising § 792.90 to read as follows:

§ 792.90 Animal and other test system care.

(a) There shall be standard operating procedures for the housing, feeding, handling, and care of animals and other test systems.

(b) All newly received test systems from outside sources shall be isolated and their health status or appropriateness for the study evaluated. This evaluation shall be in accordance with acceptable veterinary medical practice or scientific practice.

(c) At the initiation of a study, test systems shall be free of any disease or condition that might interfere with the purpose or conduct of the study. If during the course of the study, the test systems contract such a disease or condition, the diseased test systems should be isolated, if necessary. These test systems may be treated for disease or signs of disease provided that such treatment does not interfere with the study. The diagnosis, authorization of treatment, description of treatment, and each date of treatment shall be documented and shall be retained.

(d) Warm-blooded animals, adult reptiles, and adult terrestrial amphibians used in laboratory procedures that require manipulations and observations over an extended period of time or in studies that require these test systems to be removed from and returned to their test system-housing units for any reason (e.g., cage cleaning, treatment, etc.), shall receive appropriate identification (e.g., tattoo, toe clip, color code, ear tag, ear punch, etc.). All information needed to specifically identify each test system within the test system-housing unit shall appear on the outside of that unit. Suckling mammals and juvenile birds are excluded from the requirement of individual identification unless otherwise specified in the protocol.

(e) Except as specified in paragraph (e)(1) of this section, test systems of different species shall be housed in separate rooms when necessary. Test systems of the same species, but used in different studies, should not ordinarily be housed in the same room when inadvertent exposure to test, control, or reference substances or test system mixup could affect the outcome of either study. If such mixed housing is necessary, adequate differentiation by space and identification shall be made.

(1) Plants, invertebrate animals, aquatic vertebrate animals, and organisms that may be used in multispecies tests need not be housed in separate rooms, provided that they are adequately segregated to avoid mixup and cross contamination.

(2) [Reserved]

(f) Cages, racks, pens, enclosures, aquaria, holding tanks, ponds, growth chambers, and other holding, rearing, and breeding areas, and accessory equipment, shall be cleaned and sanitized at appropriate intervals.

(g) Feed, soil, and water used for the test systems shall be analyzed periodically to ensure that contaminants known to be capable of interfering with the study and reasonably expected to be present in such feed, soil, or water are not present at levels above those specified in the protocol. Documentation of such analyses shall be maintained as raw data.

(h) Bedding used in animal cages or pens shall not interfere with the purpose or conduct of the study and shall be changed as often as necessary to keep the animals dry and clean.

(i) If any pest control materials are used, the use shall be documented. Cleaning and pest control materials that interfere with the study shall not be used.

(j) All plant and animal test organisms shall be acclimatized, prior to their use in an experiment, to the environmental conditions of the test.

Subpart F—Test, Control, and Reference Substances

19. By revising the heading for Subpart F to read as set forth above.

20. By revising § 792.105 to read as follows:

§ 792.105 Test, control and reference substance characterization.

(a) The identity, strength, purity, and composition, or other characteristics which will appropriately define the test, control, or reference substance shall be determined for each batch and shall be documented before its use in an experiment. Methods of synthesis, fabrication, or derivation of the test, control, or reference substance shall be documented by the sponsor or the testing facility.

(b) The stability and, when relevant to the conduct of the experiment, the solubility of each test, control, or reference substance shall be determined by the testing facility or by the sponsor before the experimental start date. Where periodic analysis of each batch is required by the protocol, there shall be written standard operating procedures that shall be followed.

(c) Each storage container for a test, control, or reference substance shall be labeled by name, chemical abstracts service number (CAS) or code number, batch number, expiration date, if any, and, where appropriate, storage conditions necessary to maintain the

identity, strength, purity, and composition of the test, control, or reference substance. Storage containers shall be assigned to a particular test substance for the duration of the study.

(d) For studies of more than 4 weeks' duration, reserve samples from each batch of test, control, and reference substances shall be retained for the period of time provided by § 792.195.

(e) The stability of test, control, and reference substances under test conditions shall be known for all studies.

21. In § 792.107, by revising the section heading and introductory text to read as follows:

§ 792.107 Test, control, and reference substance handling.

Procedures shall be established for a system for the handling of the test, control, and reference substances to ensure that:

* * * * *

22. By revising § 792.113 to read as follows:

§ 792.113 Mixtures of substances with carriers.

(a) For each test, control, or reference substance that is mixed with a carrier, tests by appropriate analytical methods shall be conducted:

(1) To determine the uniformity of the mixture and to determine, periodically, the concentration of the test, control, or reference substance in the mixture.

(2) To determine the stability and, when relevant to the conduct of the experiment, the solubility of the test, control, or reference substance in the mixture, before the experimental start date. Determination of the stability and solubility of the test, control, or reference substance in the mixture shall be done under the environmental conditions specified in the protocol and as required by the conditions of the experiment. Where periodic analysis of the mixture is required by the protocol, there shall be written standard operating procedures that shall be followed.

(b) Where any of the components of the test, control, or reference substance carrier mixture has an expiration date, that date shall be clearly shown on the container. If more than one component has an expiration date, the earliest date shall be shown.

(c) If a vehicle is used to facilitate the mixing of a test substance with a carrier, assurance shall be provided that the vehicle does not interfere with the integrity of the test.

23. In § 792.120, by revising paragraph (a) to read as follows:

§ 792.120 Protocol.

(a) Each study shall have an approved written protocol that clearly indicates the objectives and all methods for the conduct of the study. The protocol shall contain but shall not necessarily be limited to the following information:

(1) A descriptive title and statement of the purpose of the study.

(2) Identification of the test, control, and reference substance by name, chemical abstracts service (CAS) number or code number.

(3) The name and address of the sponsor and the name and address of the testing facility at which the study is being conducted.

(4) The proposed experimental start and termination dates.

(5) Justification for selection of the test system.

(6) Where applicable, the number, body weight, sex, source of supply, species, strain, substrain, and age of the test system.

(7) The procedure for identification of the test system.

(8) A description of the experimental design, including methods for the control of bias.

(9) Where applicable, a description and/or identification of the diet used in the study as well as solvents, emulsifiers and/or other materials used to solubilize or suspend the test, control, or reference substances before mixing with the carrier. The description shall include specifications for acceptable levels of contaminants that are reasonably expected to be present in the dietary materials and are known to be capable of interfering with the purpose or conduct of the study if present at levels greater than established by the specifications.

(10) The route of administration and the reason for its choice.

(11) Each dosage level, expressed in milligrams per kilogram of body or test system weight or other appropriate units, of the test, control, or reference substance to be administered and the method of frequency of administration.

(12) The type and frequency of test analyses, and measurements to be made.

(13) The records to be maintained.

(14) The date of approval of the protocol by the sponsor and the dated signature of the study director.

(15) A statement of the proposed statistical method.

* * * * *

24. In § 792.130, by revising paragraphs (d) and (e) to read as follows:

§ 792.130 Conduct of a study.

* * * * *

(d) In animal studies where histopathology is required, records of gross findings for a specimen from postmortem observations shall be available to a pathologist when examining that specimen histopathologically.

(e) All data generated during the conduct of a study, except those that are generated by automated data collection systems, shall be recorded directly, promptly, and legibly in ink. All data entries shall be dated on the day of entry and signed or initialed by the person entering the data. Any change in entries shall be made so as not to obscure the original entry, shall indicate the reason for such change, and shall be dated and signed or identified at the time of the change. In automated data collection systems, the individual responsible for direct data input shall be identified at the time of data input. Any change in automated data entries shall be made so as not to obscure the original entry, shall indicate the reason for change, shall be dated, and the responsible individual shall be identified.

25. By adding § 792.135 to read as follows:

§ 792.135 Physical and chemical characterization studies.

(a) Except as provided in paragraph (b) of this section, the following provisions shall not apply to studies designed to determine physical and chemical characteristics of a test, control, or reference substance:

§ 792.31 (c), (d), and (g)
§ 792.35 (b) and (c)
§ 792.43
§ 792.45
§ 792.47
§ 792.49
§ 792.81(b) (1), (2), (6) through (9), and (12)
§ 792.90
§ 792.105 (a) through (d)
§ 792.113
§ 792.120(a) (5) through (12), and (15)
§ 792.185(a) (5) through (8), (10), (12), and (14)
§ 792.195 (c) and (d).

(b) The exemptions provided in paragraph (a) of this section shall not apply to physical/chemical characterization studies designed to determine solubility, octanol water partition coefficient, volatility, and persistence (such as biodegradation, photodegradation, and chemical degradation studies), and such studies shall be conducted in accordance with this part.

26. In § 792.185, by revising paragraphs (a) (4) and (5) to read as follows:

VOL
52
ISS
248
DE
28
1987
UMI

§ 792.185 Reporting of study results.

(a) * * *

(4) The test, control, and reference substances identified by name, chemical abstracts service (CAS) number or code number, strength, purity, and composition, or other appropriate characteristics.

(5) Stability and, when relevant to the conduct of the experiment, the solubility of the test, control, and reference substances under the conditions of administration.

* * * * *

27. In § 792.190, by revising paragraphs (a) and (e) to read as follows:

§ 792.190 Storage and retrieval of records and data.

(a) All raw data, documentation, records, protocols, specimens, and final reports generated as a result of a study shall be retained. Specimens obtained from mutagenicity tests, specimens of soil, water, and plants, and wet specimens of blood, urine, feces, and biological fluids, do not need to be retained beyond quality assurance review. Correspondence and other documents relating to interpretation and evaluation of data, other than those documents contained in the final report, also shall be retained.

* * * * *

(e) Material retained or referred to in the archives shall be indexed to permit expedient retrieval.

28. In § 792.195, by revising paragraphs (b) and (c), and adding paragraph (i), to read as follows:

§ 792.195 Retention of records.

* * * * *

(b) Except as provided in paragraph (c) of this section, documentation records, raw data, and specimens pertaining to a study and required to be retained by this part shall be retained in the archive(s) for a period of at least 5 years following the date on which the results of the study are submitted to EPA.

(c) Wet specimens, samples of test, control, or reference substances, and specially prepared material, which are relatively fragile and differ markedly in stability and quality during storage, shall be retained only as long the quality of the preparation affords evaluation. Specimens obtained from mutagenicity tests, specimens of soil, water, and plants, and wet specimens of blood, urine, feces, biological fluids, do not need to be retained beyond quality assurance review. In no case shall retention be required for longer periods than those set forth in paragraph (b) of this section.

* * * * *

(i) Records required by this part may be retained either as original records or as true copies such as photocopies, microfilm, microfiche, or other accurate reproductions of the original records.

Subpart L—[Removed]

29. By removing Subpart L—*Environmental Testing Provisions*, consisting of §§ 792.225, 792.226, 792.228, and 792.232.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 13 and 21

Migratory Birds Permits; Uniform Rules and Procedures

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) proposes changes in Part 13 of Title 50, Code of Federal Regulations which provide for the general administration of permits issued by the Service. The proposed rule clarifies the application procedures and the criteria for issuance. Factors which disqualify an applicant from being eligible for the issuance of a permit are established. Criteria for suspension and revocation of a permit are clearly stated, and the procedures for appealing a denial, suspension, or revocation of a permit are revised. The schedule of application processing fees is also amended.

The Service further proposes changes in Part 21 of 50 CFR relative to permits issued under authority of the Migratory Bird Treaty Act (16 U.S.C. 703–711). Some of these changes are technical in nature and deal with the period for which permits are issued and the definition of terms. Other changes are more substantive. The Service proposes significant changes to the falconry and raptor propagation permit regulations. These changes include removing the technical requirements for raptor facilities and equipment from the Federal falconry standards, and eliminating the requirement for banding the more common species of raptors used for falconry. The banding requirement will be retained for those species of raptors that the Service has determined to be "sensitive." The concept of a joint Federal-State falconry permit will no longer be used; however, an applicant will be required to have a falconry permit from a State with laws or regulations compatible with the Federal falconry standards before a Federal falconry permit will be issued. The acquisition, transfer, or disposition of any raptor must be reported on a Service form to the office that issued the Federal falconry permit. Under the new rules, falconers will be authorized to sell or purchase lawfully acquired captive-bred raptors that are marked with a numbered, seamless band provided by the Service; however, falconers will be specifically prohibited from engaging in raptor propagation unless they hold a separate raptor propagation permit.

In addition to changes in the falconry permit some changes in the requirements for raptor propagation permits are proposed. These include elimination of facilities and equipment requirements, clarification of the marking requirement, and the requirement that each acquisition, transfer, or disposition of any raptor must be reported on a Service form to the office that issued the permit.

Other changes in Part 21 include amending the special purpose permit regulations to allow the sale of captive-bred, migratory game birds, other than waterfowl. In addition the Service intends to reimpose the requirement for a permit to import and export certain migratory birds.

DATES: Comments must be submitted on or before February 26, 1988.

ADDRESSES: Comments and materials concerning this proposal should be sent to U.S. Fish and Wildlife Service, Division of Law Enforcement, P.O Box 28006, Washington, DC 20038–8006. Comments and materials may be delivered to the U.S. Fish and Wildlife Service, Division of Law Enforcement, Room 300, Hamilton Building, 1375 K Street NW., Washington, DC, between the hours of 8:00 a.m. and 4:00 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Special Agent in Charge Thomas L. Striegler at the above address [202/343–9242 or FTS 343–9242].

SUPPLEMENTARY INFORMATION:

Background

Wildlife conservation laws of the United States generally proscribe specific activities related to the wildlife that is the subject of each statute. However, many of these statutes establish procedures through which the Secretary of the Interior (Secretary) may authorize otherwise prohibited activities, either through regulations or by issuing a permit. By Department of the Interior (Department) policy the authority to promulgate regulations and to issue permits under authority of the various wildlife conservation statutes has been delegated to the Service. Regulations issued by the Service under this delegation of authority are codified in Chapters I and IV of Title 50, Code of Federal Regulations (50 CFR). Subchapter B of Chapter I (Subchapter B) contains the regulations issued by the Service relating to the taking, possession, importation, exportation, transportation, sale, purchase, and barter of wildlife and plants.

Under the Service's current regulatory scheme, Part 13 of 50 CFR contains general procedures for the application, issuance, renewal, suspension, revocation and general administration of permits issued by the Service. The last major revision of Part 13 occurred in 1974, and the Service believes that general review of its basic permit procedures was appropriate.

Part 21 of 50 CFR contains regulations relating to migratory bird permits. These regulations are promulgated under authority of the Migratory Bird Treaty Act (16 U.S.C. 703–711) which implements a series of bilateral treaties for the protection of migratory birds. The intent of this regulatory effort was to review and, if appropriate, modify the regulations found in §§ 21.28, 21.29 and 21.30 relating to falconry and raptor propagation. This review was based upon a concern by both the Service and the public that some regulatory reform might be indicated by the results of a series of Service undercover investigations collectively known as "Operation Falcon." However, the Service has determined that a general review of the regulations relating to migratory bird permits would be beneficial to both the migratory bird resource and to the public.

General Permit Procedures (Part 13)

In its review of Part 13, the Service identified several areas in which changes could be made to clarify policy and provide more effective procedures for the general administration of permits. Most of the changes proposed are technical in nature and are designed to provide the public with a better understanding of the Service's policy.

Some modifications have been proposed in the application procedures for permits. Specifically, the term "Special Agent in Charge" has been changed to "Assistant Regional Director for Law Enforcement" to reflect the current organizational title of these officials. The time in which applications should be submitted to the issuing office, other than the Federal Wildlife Permit Office, has been increased from 30 days to 60 days prior to the requested date of the permit to more realistically reflect the time required to process applications. It is proposed to charge a $25.00 processing fee for migratory bird permits. This is consistent with the fees charged for most other permits issued by the Service and with the policy of the Federal government to require users of special government services to reimburse the government for the costs of those services. It is also proposed that § 13.13 relating to the abandonment of a permit application be incorporated into § 13.11 and revised to reduce the time at which an application is considered abandoned from 60 days to 30 days from the date of notification of deficiency. Finally, technical language changes have been proposed for § 13.12 to clarify the general information required on applications for permits.

Substantial changes have been proposed in Subpart C relating to permit administration. The criteria for issuance of any permit have been rewritten to clearify language. In addition, the Service proposes the establishment of certain disqualifying factors. Any applicant who meets one of these factors is disqualified from receiving a permit from the Service for the time specified by the factor involved. Under these disqualifying factors, any person who has been convicted of, or pleaded guilty or nolo contendere to a felony violation involving wildlife of any law of the United States or of any State is disqualified for life from receiving any permit from the Service. Such lifetime disqualification is consistent with other sanctions imposed against convicted felons including disenfranchisement and loss of the right to possess firearms.

The conviction, entry of a plea of guilty or nolo contendere, or the assessment of a civil penalty for any violation of any statute or regulation relating to the permitted activity disqualifies the applicant for a period of five years. In addition, the issuing officer may consider any such violation in determining whether to issue or deny any future permit. Any applicant who has had a permit revoked will be disqualified from receiving a permit for a period of five years from the date of expiration of the revoked permit, and the issuing officer may consider any such revocation in determining whether to issue or deny any future permit. Finally, failure to pay any fees, assessed costs, penalties, or other debts owed to the Service disqualifies an applicant until such are paid.

A new section relating to the suspension and revocation of permits has been added. This section clearly establishes conditions under which a permit may be suspended or revoked. In addition the appeal procedures have been revised to ensure due process for those persons appealing adverse decisions on the part of the Service. Other clarifying language changes have been made to several other sections of Part 13 to assist the public in understanding the Service's policies.

Migratory Bird Permits (Part 21)

The primary purpose of the Service's review of the migratory bird permit regulations was to determine if changes were needed in the regulations relating to falconry and raptor propagation. While the Service used this opportunity to re-examine all of its migratory bird permit regulations, its main focus was on §§ 21.28 (falconry permits), 21.29 (Federal falconry standards), and 21.30 (raptor propagation permits). Substantial changes are proposed in the falconry permit regulations, in the Federal falconry standards, and in the raptor propagation regulations. Changes have also been proposed to other migratory bird permits. These include amending the special purpose permit regulations to allow the sale of captive bred migratory game birds and the reinstatement of the permit requirement to import and export certain migratory birds. Other technical changes are made to clarify language and to facilitate permit administration.

In reviewing the falconry permit regulations, the Service identified certain raptor species that it believes are in need of special control either because of biological or law enforcement considerations. These species have been included in the definition of a new term, "sensitive raptors." Under the current proposal, sensitive raptors include the peregrine falcon (*Falco peregrinus*), the gyrfalcon (*Falco rusticolus*), the Harris hawk (*Parabuteo unicinctus*), and the prairie falcon (*Falco mexicanus*). The peregrine falcon is included because most of the North American subspecies are listed as either endangered or threatened. The gyrfalcon is listed as a sensitive raptor because of its listing on Appendix I to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (Convention). The Harris hawk is listed because biological indications point to a declining population in the United States. Finally, the prairie falcon is included because its popularity for use in falconry has often made it a target for illegal taking from the wild.

The Service proposes to eliminate the concept of a joint Federal-State falconry permit. While this concept was originally introduced to reduce administrative work on the part of the Service and State conservation organizations and to provide less of a burden on the public, the Service believes that it has not accomplished either goal. To be effectively administered, the joint Federal-State permit requires review and approval by both participating agencies which generally consume as much time on the part of each agency as the issuance of separate permits. Further, although State agencies are required to meet Federal falconry standards to participate in the joint program, conflicting requirements concerning issuance, renewal, suspension and revocation of permits often create a situation that is not conducive to effective permit administration by either agency. Under the proposed rules, the Service would require that any applicant for a Federal falconry permit first obtain a falconry permit from a State whose laws and regulations are in conformance with the Federal falconry standards.

The proposed rules would eliminate the requirement for banding raptors used for falconry, except for those that are defined as sensitive raptors. Operation Falcon demonstrated that the adjustable plastic bands are, on occasion, subject to international manipulation for illegal purposes. Therefore, the Service will be introducing a new, metal, tamper resistant band for marking raptors other than those captive produced birds that are eligible for sale. However, banding will be limited to only those species designated as sensitive raptors.

The new band proposed by the Service is made of aluminum, and sizes range from 7mm (0.28 inches) to 26mm (1.02 inches). These bands will be stamped with a 3-digit agency identification number and a 5-digit serial number. The bands are secured around the bird's leg by closing the aluminum ring with a crimping tool, inserting a stainless steel pin through holes at the crimped ends of the band, and then crimping the pin in place. A band sealed in this manner cannot be opened and then resealed without detection.

The Service is also eliminating the requirement for an annual report for falconry permits. Instead, the Service proposes to institute a requirement that a form 3–186A, Migratory Bird Acquisition/Disposition Report, must be completed and submitted to the permit issuing office each time any raptor is acquired or disposed of by any means, including accidental loss or death. The Service will establish an implementation period during which raptors currently in possession may be banded and a form 3–186A submitted. The Service intends to enter the information from each of these forms into a raptor monitoring system to maintain statistics concerning the effects of falconry on the raptor resource and to track individual raptors.

Other changes in the falconry permit regulations include a specific prohibition against the propagation of raptors without a raptor propagation permit. While this has always been the intent of Service regulations, the current regulations are not clear on this issue. The proposed rules would allow falconers to sell or barter captive bred raptors that are marked with a

VOL 52 ISS 248 DEC 28 1987 UMI

numbered, seamless band provided by the Service in accordance with the provisions of § 21.30. In addition the term of the falconry permit has been changed from two years to three years. Other technical changes have been made in the falconry permit regulations to clarify language and policy.

Several changes are proposed for the Federal falconry standards found in § 21.29. Under this proposal the Service would no longer require States to establish minimum requirements for facilities and equipment, nor to administer an examination as a requirement for issuing a falconry permit. The Service does not impose such conditions on other types of permits under which a person may possess live wildlife and believes it is inconsistent to do so for falconry permits. The marking requirements are modified to conform with the proposal that only sensitive raptors must be banded. States may also allow falconers to sell or barter properly marked, captive bred raptors. Finally, the Service will no longer certify nor publish a list of States whose regulations are in compliance with Federal falconry standards, although the Service will not issue a Federal falconry permit to any person who does not possess a valid falconry permit issued by a State that is in conformance with these standards.

The proposed rules would eliminate the minimum requirements for facilities for a raptor propagation permit for the same reason that such requirements are being eliminated from the Federal falconry standards. The marking requirements for raptors held under authority of a raptor propagation permit are clarified to require that all such raptors, regardless of species, must be banded with either a numbered, seamless band or the new nonreusable band supplied by the Service. A requirement to document each acquisition, including hatching, and each disposition, including death or accidental loss, using the form 3–186A, Migratory Bird Acquisition/Disposition Report, is proposed. The term of the permit is changed from five years to three years to be consistent with other migratory bird permits. Other technical changes have been made in the raptor propagation permit regulations to clarify language and policy.

In addition to the proposed changes in regulations relating to falconry and raptor propagation, the Service is proposing to reinstitute the requirement that a permit be obtained prior to importing or exporting certain migratory birds. Such a requirement was historically part of the Service's permit scheme, but was eliminated in 1981. However, the Service now believes that this elimination is inconsistent with the general scope of its permit regulations. Throughout its regulatory scheme, the Service requires permits prior to the importation or exportation of wildlife protected by laws which generally prohibit such activity. Under this proposal, the Service would not require import permits for migratory game birds lawfully taken by sport hunters and imported in accordance with Subpart G of Part 20 of 50 CFR. Also exempt from this permit requirement would be the export of properly marked, captive bred waterfowl.

The Service is also proposing to amend the special permit regulations found in § 21.27 to permit the sale of properly marked, captive bred migratory game birds, other than waterfowl. Currently, a number of persons have special purpose permits authorizing the captive breeding of migratory game birds other than waterfowl, especially doves and cranes. Since current regulations permit the sale of properly marked, captive bred waterfowl and raptors, it is inconsistent to prohibit the sale of other captive bred migratory game birds. Marking and reporting requirements similar to those applicable to the sale of captive bred waterfowl and raptors will be required.

Certain technical administrative changes are proposed in the regulations to facilitate permit administration. Chiefly, the standard term of a permit will be changed from a two-year period ending on December 31 of the second year following issuance to a three-year term ending three years following the date of issuance. This change will stagger the renewal of permits throughout the year much as many States have done with automobile license renewals.

Finally, the Service has been petitioned by the Wildlife Information Center, Inc., Allentown, Pennsylvania, to amend its regulations to prohibit all uses of pole traps in the United States. This petition is based upon data provided indicating that significant injuries may occur to migratory birds that are caught in such traps. The Service decided to review this issue as part of this regulatory proposal. As a result of that review, the Service has determined that it has no statutory authority to prohibit the use of pole traps, per se, although the taking of migratory birds by the use of pole traps can be restricted. However, the Service does not believe that any regulatory changes are necessary to address this issue. Based on the Service's review, the only issue that should be addressed is the policy of whether the Service should issue permits that allow the use of pole traps for taking depredating migratory birds. A new, more restrictive policy has recently been issued by the director and no further action is contemplated.

Statement of Effects, Executive Order 12291, and Regulatory Flexibility Act

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and certifies that this proposed rule will not have a significant effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). In 1986 there were approximately 229 permits for raptor propagation, 2,783 permits for falconry, 3,145 import/export licenses, and 13,938 permits issued for other purposes. The only effect upon all permittees will be clarification of the conditions of their permits and licenses, which should improve efficiency with little cost to the general public. The initiation of user fees for those permits not currently requiring fees will have negligible impact because the fees will only amount to $25.00 for each permit. The length of most permits has been extended from two years to three years, thus decreasing the cost per year to those permittees who have previously been charged a fee and making the annual cost to new permittees only $8.34 per year.

The information collection requirements contained in this proposal have been approved by the Office of Management and Budget under 44 U.S.C. 3501 et seq. and assigned clearance number 1018–0022. To the extent that changes in 50 CFR Parts 13 and 21 require additional approval from the Office of Management and Budget that approval will be sought and collection of such information will not be required until such approval is obtained.

Environmental Effects

An environmental assessment on falconry and raptor propagation regulations has been prepared by the Service's Office of Migratory Bird Management in connection with this proposed rulemaking. This environmental assessment is available for public inspection in Room 536, Matomic Building, 1717 H Street NW., Washington, DC. Prior rulemakings dealing with falconry and raptor propagation were covered by environmental assessments prepared in 1978 and 1982. Changes in the regulations published in Part 13 and in sections of Part 21 other than §§ 21.28 through 21.30 are internal organizational changes or are regulatory and enforcement actions which are covered by a categorical exclusion from the National Environmental Policy Act procedures under 516 DM 2, Appendix I.

Author

The primary author of this proposed rule is Thomas L. Striegler, Special Agent in Charge, Division of Law Enforcement, U.S. Fish and Wildlife Service.

List of Subjects

50 CFR Part 13

Administrative preactice and procedure, Exports, Fish, Imports, Penalties, Reporting and recordkeeping requirements, Wildlife.

50 CFR Part 21

Exports, Imports, Reporting and recordkeeping requirements, Wildlife.

For the reasons set out in the preamble, Title 50, Chapter I, Subchapter B of the Code of Federal Regulations, is proposed to be amended as set forth below.

PART 13—GENERAL PERMIT PROCEDURES

1. The authority citation for Part 13 is revised to read as follows:

Authority: 18 U.S.C. 42; 16 U.S.C. 3374; 16 U.S.C. 704, 712; 16 U.S.C. 668a; 19 U.S.C. 1202; 16 U.S.C. 1539, 1540(f); 16 U.S.C. 1538(d); sec. E.E. 11911, 41 FR 15683, 3 CFR 1976 Comp., p. 112; 16 U.S.C. 742j–1; 16 U.S.C. 1382; 31 U.S.C. 9701.

2. Revise § 13.2 to read as follows:

§ 13.2 Purpose of regulations.

The regulations contained in this part will provide uniform rules, conditions, and procedures for the application for and the issuance, denial, amendment, renewal, suspension or revocation, and general administration of all permits issued pursuant to this Subchapter B.

3. Amend § 13.11 as follows: a. Add introductory paragraph as set out below.

b. In paragraph (b)(2) remove "Special Agent in Charge" and insert in lieu thereof "Assistant Regional Director, Division of Law Enforcement, in charge".

c. Revise paragraphs (c), and (d)(1) and (2) as set out below.

d Amend paragraph (d)(4) by revising the entry "Migratory Bird (Part 21)" under "Type of Permit" to read "Migratory Bird—Banding or marking (21.22)."

e. Add paragraph (e) as set out below.

§ 13.11 Application procedures.

No permit may be issued for any activity authorized by of this Subchapter B unless a completed application is filed in accordance with the following procedures. A separate application need not be submitted for each permit unless otherwise required by this subchapter.

* * * * *

(c) *Time notice.* The Service will process all applications as quickly as possible; however, it cannot guarantee final action within desired time frames. Applications for endangered species and marine mammal permits should be received by the Federal Wildlife Permit Office at least 90 calendar days prior to the effective date requested by the applicant. Applications for all other permits should be received by the issuing office at least 60 calendar days prior to the requested effective date.

(d) *Fees.* (1) Unless otherwise specifically exempted in this paragraph, applications for permits, certificates, licenses, registrations, and their renewals must be accompanied at the time of filing by payment in the form of a check or money order drawn payable to "U.S. Fish and Wildlife Service" in the full amount of any application processing or other fee required for the application or permitted activity. Such fees will not be refunded under any circumstances except that a fee submitted with an application which is withdrawn prior to significant processing may be returned by the issuing office.

(2) The fee for processing any application, except one listed as nonstandard in paragraph (d)(4) of this section, shall be $25.00. If regulations in this subchapter require more than one type of permit for a given activity, and the permits are issued by the same office, the issuing office may issue a single, consolidated permit containing all necessary authorizations and charge a single fee, which shall be the highest single fee applicable for the activity to be permitted.

* * * * *

(e) *Abandoned or incomplete applications.* Upon receipt of an incomplete or improperly executed application, or one which is not accompanied by the proper fees, the issuing office will notify the applicant of the deficiency. If the applicant fails to supply correct information to complete the application or to pay the required fees within 30 calendar days of the date of the notification the application shall be considered abandoned and no fees paid shall be returned.

4. Amend § 13.12 by revising paragraphs (a) introductory text and (a)(1) through (a)(5) as follows, removing paragraphs (a)(6) and (a)(7) and redesignating paragraphs (a)(8) through (a)(11) as paragraphs (a)(6) through (a)(9).

§ 13.12 General information requirements on applications for permits.

(a) *General information required for all applications.* All applications must contain the following information:

(1) Applicant's full name, mailing address, telephone number(s), and,

(i) If the applicant is an individual, the date of birth, height, weight, hair color, eye color, sex, and any business or institutional affiliation of the applicant related to the requested permitted activity; or,

(ii) If the applicant is a corporation, firm, partnership, association, institution, or public or private agency, the name and address of the president or principal officer and of the registered agent for the service of process;

(2) Location where the requested permitted activity is to occur or be conducted;

(3) Reference to the part(s) and section(s) of this Subchapter B as listed in paragraph (b) of this section under which the application is made for a permit or permits, together with any additional justification including supporting documentation as required by the reference part(s) and section(s);

(4) If the requested permitted activity involves the import or re-export of wildlife or plants from or to any foreign country, and the country of origin, or of export or re-export restricts the taking, possession, transportation, exportation or sale of wildlife or plants, documentation as indicated in § 14.52(c) of this Subchapter B;

(5) Certification in the following language:

I hereby certify that I have read and am familiar with the regulations contained in Title 50, Part 13, of the Code of Federal Regulations and of the other applicable parts in Subchapter B of Chapter I of Title 50, Code of Federal Regulations, and I further certify that the information submitted in this application for a permit is complete and accurate to the best of my knowledge and belief. I understand that any false statement herein may subject me to suspension or revocation of this permit and to the criminal penalties of 18 U.S.C. 1001.

* * * * *

§ 13.12 [Amended]

5. Section 13.12(b) is further amended by removing the reference to "paragraph (a)(5)" and inserting in lieu thereof a reference to "paragraph (a)(3)".

VOL 52 ISS 248 DEC 28 1987 UMI

§ 13.13 [Removed]

6. Remove § 13.13.

§ 13.14 [Removed]

7. Remove § 13.14

8. Revise Subpart C to read as follows:

Subpart C—Permit Administration

Sec.

13.21 Issuance of permits.
13.22 Renewal of permits.
13.23 Amendment of permits.
13.24 Right of succession by certain persons.
13.25 Permits not transferable; agents.
13.26 Discontinuance of permit activity.
13.27 Permit suspension or revocation.
13.28 Appeal procedures.

Subpart C—Permit Administration

§ 13.21 Issuance of permits.

(a) *General.* No activity for which a permit, license, or registration is required may be undertaken by any person prior to receipt of a valid permit authorizing that activity. An oral or written representation by an employee or agent of the United States, or any action by any employee or agent of the United States, is not a permit unless it meets the requirements of a permit defined in 50 CFR 10.12.

(b) *Criteria for issuance.* No permit may be issued except in compliance with the following criteria:

(1) Receipt of a written, complete, and accurate application properly executed in accordance with § 13.11 and any other part(s) and section(s) governing the permitted activity;

(2) Receipt of payment of all applicable fees for the permitted activity;

(3) Finding by the issuing office that the applicant has demonstrated a valid justification for the permit, has made a showing of responsibility, and is otherwise qualified to exercise the authority or privilege provided by the permit requested; and

(4) Finding by the issuing officer that the authorization does not potentially threaten any wildlife or plant population.

(c) *Disqualifying factors.* Any one of the following will disqualify a person from receiving or retaining permits issued under this Part for the period set forth:

(1) Conviction, or entry of a plea of guilty or nolo contendere, for a felony violation involving wildlife of any law of the United States or any State disqualifies any such person from receiving or exercising the privileges of a permit for life.

(2) Conviction, entry of a plea of guilty or nolo contendere, or assessment of a civil or criminal penalty, for a violation of any statute or regulation relating to the activity for which the application is filed disqualifies any such person from receiving or exercising the privileges of a permit for five years; and the fact of such violation is a factor which shall be considered by any issuing officer in finding an applicant to be qualified or responsible to receive any future permits.

(3) No applicant who has had a permit revoked may be found to be qualified, nor may perform any activity authorized by a permit, for a period not less than five years from the expiration date of the revoked permit; and the fact of revocation is a factor which shall be considered by any issuing officer in finding an applicant to be qualified or responsible to receive any future permits.

(4) Failure to pay any required fees or assessed costs and penalties, whether or not reduced to judgment; or to submit timely, accurate, or valid reports as required shall be disqualifying as long as the deficiency exists.

(d) *Use of supplemental information.* An issuing office, in making a determination under this subsection, may use any information available, including the reports of state or local officials, and shall consider all relevant facts or information available. They may make independent inquiry or investigation to verify information or substantiate qualifications asserted by the applicant.

(e) *Conditions of issuance and acceptance.* (1) Any permit automatically incorporates within its terms the conditions and requirements of Subpart D of this part and of any part(s) or section(s) specifically authorizing or governing the activity for which the permit is issued.

(2) Any person accepting and holding a permit under this Subchapter B acknowledges the necessity for close regulation and monitoring of the permitted activities by the Government. By accepting such permit the permittee consents to and shall allow entry at any reasonable hour by agents or employees of the Service upon premises maintained for conduct of the permitted activity, for the purpose of inspecting the location; any books, records, or permits required to be kept by regulations of this Subchapter B; and any wildlife or plants which are the subject of the permit.

(f) *Term of permit.* Unless the permit is suspended or revoked, or its term is otherwise amended, a person may engage in the activity authorized by a permit for the period from and including the effective date of issue and to and including the expiration date endorsed on the face of the permit.

(g) *Denial.* The issuing office shall deny a permit to any applicant who fails to meet the issuance criteria set forth in this section or in any part(s) or section(s) specifically governing the activity for which a permit is requested.

§ 13.22 Renewal of permits.
